Paved roads lead right to the heart of this country and graveled roads into its nooks and its picturesque spots, and the great trunk-line railroads no longer pass all this magnificence; excursion trains run with regular schedule and excellent accom-

modations to points which make the fish, the banks, and the hunting grounds easily accessible.

I desire to make clear that while all this modern equipment and all these modern facilities have been provided, not a single step has been taken without keeping in mind the beauty and magnificence of the natural advantages of the Ozarks. The roads have not spoiled but enhanced the beauty; and back of these roads, in the fields and forests or along the streams where nature can be really enjoyed, the hand of civilization and progress has not annihilated her or her beauties.

No section of America offers such remarkable opportunities for great national parks than the Ozarks of Missouri and northern Arkansas. There they lie in the center of the Nation waiting to be set aside for the benefit of the Nation's people. Local communities have made them accessible; nature has made them marvelous. All that is required to preserve them for the future in the interest of a people who love the real outdoors is some congressional recognition of the facts as they exist.

I am not blind to the economic possibilities of the Ozark country in its natural resources, its mines, its fertility, its opportunities for great power developments and various other projects. Undoubtedly there are large opportunities for men of genius, or with ambition, who may go into this country to-day with little, with every certainty of making money.

What I am particularly interested in, however, is calling the attention of Congress to the fact that while these economic conditions still remain true, the natural beauty and possibilities of this section has not yet received proper Federal recognition.

You who have not had the pleasure of tramping its hills or fishing its banks are naturally lacking in the enthusiasm that comes to one who spends his vacation days in that wonderful area. Down there among those wonderful old trees, by those clear waters, you will find men from the North, men from the South, whose pioneer fathers and mothers left them there to make this country great; and you will find new pioneers from the South and from the North moving in to love their new homes better than their own.

After the Louisiana Purchase, when the region west of the Mississippi became the property of the United States, Americans flocked in thousands to the Ozark country of south Missouri. You will find their descendants living there to-day, boasting of their country, of its beauty, and of its possibilities.

Pioneers arrived in the Ozarks by canoes up the White River, and incidentally you can take a trip up the White River to-day and the scenery that will greet you has hardly been changed from the scenery that greeted John Carter, of Virginia, who was one of the earliest settlers to make the trip.

The residents of the Ozarks call it "the Switzerland of America." I have read about the Swiss Alps, and all that they offer in the way of grandeur and picturesque setting. I shall allow something for the enthusiasm of Ozark citizens, but nevertheless I think that very probably the Ozarks may be called the "Switzerland of America," perhaps not so much in its actual similarity to Mont Blanc or St. Moritz or Luzerne, but particularly in the fact that its rugged mountains and its beautiful lakes and its wonderful streams and rolling plains lie in the heart of America, just as Switzerland lies in the heart of Europe, accessible from all sides.

It can not be disputed that the Ozark hill country is one of the most interesting and picturesque sections in the world. Area for area no region in the world contains the amount of natures masterpieces. The western country with its massive peaks, deep canyons of hewn rock, and other interests which after a few days become tiring and upon close examination show bleak rock and waste, inhospitible and beautiful only when viewed from a distance, then they are widely separated and oftentimes a thousand miles of roadway must be driven through a bleak and semidesolate country before another worthwhile section is reached.

Unlike this vast sector the Ozarks are hospitable and contain charm that is appreciated only upon close examination afforded by a lengthier sojourn. Instead of massive bleakness one finds streams winding picturesquely through deeply cut but heavily foliaged valleys, fragrant with the scent of wild flowers and pine. Bird life is abundant and as one visits one valley and on to the next the same hospitality greets the eye, its sameness and monotony is broken by many distinguishing works of nature.

The Ozark country contains many large springs; in fact, some of the largest, if not the largest springs in the world will be found here. Scarcely a county in the hills is without its large springs and innumerable smaller ones. There are over 30 measured springs whose flow exceeds 1,000,000 gallons per day.

Let me endeavor to picture probably the largest spring in the State, if not in the world. Situated in Oregon County not many miles from the Arkansas line will be found Greer Spring. It is 25 miles from a railroad but on an excellent road. Flowing from a cave in the hills its waters rush onward for about one quarter of a mile, where it is joined by a boiling spring. The spring branch is about one and one-quarter miles long and its cold waters empty into the Eleven Points River, a wonderful fishing stream. At no place is it over 500 feet wide, if that wide. Out of this spring comes a sufficient amount of water to provide every man, woman, and child in the United States with from 3½ to 4 gallons daily. Just picture a spring flowing nearly 500,000,000 gallons of water every 24 hours. This spring and 3,200 acres of ground surrounding it are owned by a sportsman, Louis E. Dennig, president of the Independent Packing Co. of St. Louis. So long as the public does not destroy he welcomes visitors. He keeps watchmen on the ground to see that the virgin timber is not disturbed. His answer to the power companies—the spring having a fall of 85 feet in its 1¼ miles—and to prospectors who desire to purchase this wonderful property is always the same: "My price is beyond your ability to pay."

I have visited this place and caught trout weighing 3 pounds, of the beautiful rainbow variety, and have seen them taken weighing 5 and 6 pounds.

About 12 years ago through the Director of the Bureau of Fisheries I had several thousand rainbow trout sent to this spring from the Government hatchery at Neosho. Every year thereafter until four years ago the spring was stocked by the Government. Four years ago Mr. Dennig installed his own hatchery, and now he raises from 50,000 to 75,000 trout annually and when they have reached the proper size places them in the spring. He has an excellent feeding system in connection with his hatchery and employs natives to look after the feeding, while he sends the food by parcel post from St. Louis daily.

The Big Spring, located in the Big Spring State Park, a few miles from Van Buren in Carter County of southeastern Missouri, is perhaps the next largest in the State. Its measured average flow per day is approximately 300,000,000 gallons. The Meramec Springs near St. James, the Alley Springs in Alley Springs State Park, Round Springs in Round Spring State Park, Blue Spring, Bennett Spring, and many others have a flow of many million gallons per day. In addition to these large artesians the country is fairly covered with smaller ones. Scarcely a farm is without one. Aside from the natural beauty these springs are used for other purposes. The crystal clear mineral water is cold and affords excellent sites for fish hatcheries that propagate the prized rainbow trout. The trout are easily raised and breed in the runways, and, consequently, many of the spring-fed creeks and streams are well stocked with this gamy fish.

Twelve State parks are found within the boundaries of Missouri, where you will always find the gates wide open and the sign of welcome greeting you on arrival. Recently in an article published in the Game and Fish News by the State game and fish department the following appeared:

> Our parks, which number 12, comprise one of the best park systems of the United States. National authorities on the subject of State parks expressed surprise at the number and quality of the parks acquired by Missouri in so short a time. This was the expressed conviction of Raymond H. Torrey, field secretary of the National Conference on State Parks, after a recent inspection of our system, made in company with chief of parks, C. D. Monteith, of the Missouri game and fish department.
>
> Their selection was made with due regard to recreational possibilities and the propagation of wild life, while at least two of them were acquired by the department because of their historical coloring—Mark Twain State Park, at Florida, and Arrow Rock State Park, at Arrow Rock, originally New Philadelphia.

Our State parks are Bennett Springs State Park, Big Spring State Park, Mark Twain State Park, Montauk State Park, Indian Trail State Park, Deer Run State Park, Sam A. Baker State Park, Arrow Rock State Park, Alley Springs State Park, Sequiota State Park and Hatchery, Round Spring State Park, and Franklin County State Park. We also have the Chesapeake State hatchery, and under a recent law passed by our State we are inaugurating an auxiliary game-refuge system throughout Missouri. These auxiliary game refuges will be open to the public, no private game refuges being established. The money to support the parks, hatcheries, and game refuges is paid into the State Treasury by the fishermen and hunters in the form of a small license. All such funds collected go for this purpose.

When the State selected the Franklin County site, on which I had hunted game and taken bass for years, it was suggested to the game and fish commissioner to call it the Daniel Boone State Park because Boone had spent many years in this vicinity

and had actually had a hut on the site at one time. This park is 65 miles from St. Louis on a new concrete road.

The Arcadia Valley, with its beautiful "shut-ins" and other natural wonderments, the Shepherd of the Hills country, the Big Spring country, the White River region, the Black River Meramec River, and other portions of the hilly portion of the State possess hundreds of interests that should be perpetuated.

Camping, horseback riding, and, in fact, all woodland and water sports and recreations may be enjoyed. Float trips down its many streams are rivaled by none.

The Ozarks also have many caves of great size and depths. The Onadaga Cave, near Leasburg, and the Marvel Cave, in southwestern Missouri, are the two largest. The Marvel Cave rivals the Mammoth Cave of Kentucky in size and depth and is more interesting; and, I might add, safer, as it is a rock cave eroded from a number of different strata of rock, and according to professors the cave is one of the most interesting in the Nation.

In the Onadaga Caverns, 80 miles from St. Louis, you can walk for miles in subterranean passages, riding through darkness over rivers of great depth, through seeming endless stalactites and stalagmites.

The wild sectors of the region are famed for the hunting and fishing they afford as well as an excellent recreation ground. Quail, doves, rabbits, squirrels, coon, possum, and in the wildest unsettled regions deer, wild turkey, and even bear may be found.

The many swiftly flowing creeks, all practically spring fed, and the principal streams—the Meramec, Current, Black, Gasconade, Piney, White, Osage, Eleven Points, and others—afford excellent fishing. Black bass, trout, croppie, wall-eyed pike—commonly known as the Jack salmon—perch, big-mouth bass, and numerous other game fish literally swarm in the waters. The many State fish hatcheries are keeping up the quality of Missouri's fishing.

The Niangua River where among the rocks you find large jack salmon, small-mouth bass, and the beautiful rainbow trout, is especially worthy of mention. The view from a real castle on the hill at Hahatonka, the country for miles around is truly a paradise of natural beauty.

My friends, until you have landed a small-mouth bass or a rainbow trout in a stream in the Ozarks, on light tackle, you will never experience "the thrill that comes once in a lifetime."

My first visit to the Ozarks was in 1895, when I was 15 years of age. Since that time I have never let a year go by that I have not climbed the hills and fished the streams in that wonderful country. All efforts to get me to leave my State for the lakes in the North or the trout streams in the East or West have failed. I have spurned a hundred invitations. When time permits I desire to spend it in this country. Every Saturday and Sunday finds me in the Ozarks, weather permitting, when I am home. In one year, about five years ago, my diary showed that from April 1 to November 1 I traveled 3,200 miles on trains during my week-end trips entirely within the boundaries of Missouri.

You all have your hobbies. I know there are scores who would fight if some one attempted to use your favorite golf clubs. So it is with me if anyone attempts to cast one of my four fly rods. They weigh 4⅛, 5, 5½, and 6 ounces. Three of these rods I have had for 15 years and one for 4 years. I bring them to Washington and back to St. Louis when I return. They are at all times close at hand.

All of the Ozarks are beautiful and so compacted with interest is the country that the motorist may drive southwestward from St. Louis and within a radius of 75 miles from St. Louis drive into the hills on any of the smaller county roads and find nature in the superlative.

I wish I could take the House with me up the Gasconade to its source winding to the hills of the Ozarks.

I wish I could take you out to the Little Piney with its trout, and the Meraines and Current with their bass, or to the Niangua, where the rainbow runs large and is plentiful, and the jack salmon thrive. Or I wish you could stand on the precipices that overlook the great streams of this wonderful country, or ride with me over the placid waters of Lake Taneycomo. I would not again have to call to your attention the great possibilities of the Ozarks. You yourself would see them! You yourself would appreciate them!

But because of my inability to do so, I mention these few facts in the hope that at some future time some one interested in the great outdoors of America may find these few words in the RECORD, suggesting to them a visit to this wonderful country and resulting in some proper Federal recognition of its great possibilities.

We who represent the commercial and industrial sections of Missouri have no reason thus to exploit the Ozarks except a consciousness that if all America could see the Ozarks, some part of that great and wonderful country would be set aside as a national park to be protected for the future of America as a really great playground where future Americans may enjoy all that is magnificent in outdoor nature.

In concluding let me say there is a perfect paved highway from Washington to St. Louis through the Cumberland Valley. Those of you who will soon depart for Kansas City, where you will select your candidate for President, take your family in your automobile, and leave them for a vacation in the Ozarks while my colleagues on this side who will journey to Houston can do likewise, leaving your cars and families with the hospitable people who you will find by the scores in this wonderful country, and after your labors, return and spend a few days in this region yourself. The outdoors afford no recreation possibilities that you will not find in our Ozarks.

The St. Louis Globe-Democrat has formed what is known as the Forty-ninth State Tour Club, has a large staff in charge of Jimmie and Norman Higgs, recognized as specialists in arranging tours. They have not only visited every interesting spot in Missouri but have also toured the United States and Canada and have prepared log books and pamphlets by the score which show the routes and mileages to the various places of interest.

The St. Louis Post-Dispatch, St. Louis Star, St. Louis Times, Kansas City Star, Kansas City Times, Kansas City Journal-Post, as well as Springfield and Joplin papers, likewise welcome an opportunty to serve visitors in quest of information. Their service is at your disposal and the only requirement is the asking. The St. Louis & San Francisco, Missouri Pacific, Iron Mountain, Rock Island, Missouri, Kansas & Texas, Kansas City Southern, and other railroads issue booklets not only telling you of this wonderful country but also advising you how to reach your destination and where hotels and country homes by the hundreds are located where you can stop with your family. The rates charged by the week will hardly equal what it costs to remain at one of the large summer resorts on the coast a day.

In fact, outside of a nonresident fishing license of $3, or a nonresident hunting and fishing license at $10, both state-wide, the Ozarks are as free to you as the air you breathe. If you care to neither fish nor hunt no fees of any kind are asked.

REVENUE BILL, FARM BILL, AND OTHER BILLS OF THE SEVENTIETH CONGRESS

Mr. GARDNER of Indiana. Mr. Speaker, I ask unanimous consent to extend my own remarks on the legislative business at this session of Congress.

The SPEAKER. The gentleman's own remarks?

Mr. GARDNER of Indiana. My own remarks, and in the discussion of the tax question I ask unanimous consent to quote from the Washington Herald of December 16.

The SPEAKER. Is there objection to the request of the gentleman from Indiana to his extending his remarks in the manner indicated?

There was no objection.

Mr. GARDNER of Indiana. Mr. Speaker, I desire to speak briefly on some of the important legislation considered at this session of Congress in which I was deeply interested, and in which I think the public is interested.

REVENUE BILL

One of the bills in which every one is interested is the revenue bill. My way of thinking about taxation, in any form, is that it should be the purpose of those framing the laws of taxation to so frame such laws as will equalize the burden as nearly as possible, and place that burden on the taxpayer in proportion to his ability to bear such burden, and with as little injury to his business as can possibly be done. I would like to see the burden of taxation placed in such a way that it will do as little injury as possible to legitimate business. I am glad to see the reductions in taxation in the bill passed at this session of Congress made. And I am for reducing the taxes as much as can be done and still defray the necessary expenditures of the Government, economically administered, and reduce the war debt at a reasonable rate.

It is the great middle class of people who are the bone and sinew of this Nation, and it is that class who do more for the Nation's prosperity than any other class of people. And this class of small taxpayers are in need of, and are entitled to, consideration, the same as the larger taxpayer, and I feel that it is mainly due to the efforts of the Democratic Members of Congress, with the aid of liberal Republicans, that the average taxpayer's interests have been protected and his taxes reduced, as has been done in the tax bill passed at this session of Congress and now a law. And in support of this contention I am

quoting from an article published in the Washington Herald of December 16, 1927, just after the House passed the revenue bill, as follows:

MELLON LIMIT IS CAST ASIDE AS DEMOCRATS WIN, 366 TO 24—REPUBLICANS BEATEN IN ALL EFFORTS TO PREVENT TOTAL EXCEEDING $225,000,000—AUTO TAX IS ABOLISHED—CONSOLIDATED TAX RETURNS BY AFFILIATED COMPANIES ALSO ARE DONE AWAY WITH

By Arthur Hathten, Universal Service

After a savage battle, in which the Democrats won every victory, the House last night passed the new revenue bill, affording tax reduction totaling approximately $290,000,000. The vote was 366 to 24.

The Republicans made an unsuccessful last-minute attempt to refer the measure back to the Ways and Means Committee with the hope of bringing the total tax cut back near the $225,000,000 recommended by Secretary Mellon and backed by President Coolidge. The vote was 93 to 301.

EVERY MOVE BALKED

The Republicans also tried in vain to rescind the repeal of the war-time excise tax on automobiles, the abolition of consolidated tax returns by affiliated corporations, and the provision of a graduated tax on corporations having a net income up to $15,000.

The Democratic line held solidly against all attacks. Augmented by a sufficient number of Republicans, the Democrats mustered 212 votes for a graduated tax on small corporations to 181 against the proposition.

GARNER, Democrat, of Texas, offered the amendment which provides for a tax of 5 per cent on corporations' incomes up to $7,000; 7 per cent on incomes between $7,000 and $12,000; and 9 per cent on incomes between $12,000 and $15,000. Incomes above $15,000 would call for an 11½ per cent tax. This affords $24,000,000 relief for the corporations.

GARNER'S amendment, abolishing consolidated tax returns of affiliated corporations, also was approved in a roll call, 210 to 107.

MUST FILE SEPARATE

As a result, corporations having subsidiaries in which they own 95 per cent or more of stock are required to file separate returns for each affiliated company.

While some of the provisions of the tax bill as it passed the House were modified before its final passage, yet many of the provisions above mentioned were retained in substance as inserted by the Democratic Members, one of which was the elimination of the automobile tax, a war-time measure, thus saving the automobile users $66,000,000. The graduated income tax, giving relief to the smaller corporations, passed by the House, was eliminated by the Senate, but the tax on all corporations was reduced from 13½ cents to 12 cents on the final passage of the bill. The estate tax, I think, was rightly retained in the bill. This tax affects no estate under $100,000, and practically no tax is paid on an estate of less than $500,000.

I feel that the tax reduction bill as passed is an improvement over the bill as was proposed by the Coolidge-Mellon plan and submitted to the House for passage. And I feel that the benefit that will be derived from this bill by the smaller taxpayer is largely due to the efforts of Hon. JOHN GARNER, of the Ways and Means Committee, and his Democratic supporters.

FARM RELIEF BILL

Everyone admits that the agricultural industry is not on a parity with other industries of the country. There is no question but what the farming industry is entitled to relief in some form. Legislative relief has been given to the railroads by permitting the railroads to charge rates sufficient to make a reasonable profit. The manufacturer has been given legislative relief by a high-protective tariff, in many instances at an unreasonable rate, not as a revenue measure but to create a barrier against foreign merchandise. Then why should the farmer be discriminated against as to legislative relief? The McNary-Haugen bill was designed to lift the price of agricultural products to the level of manufactured products. I have been for and voted for the McNary-Haugen bill three times. The first bill failed to pass Congress. Twice the President has vetoed the bill. I feel that this administration must assume the responsibility for not enacting some law that would be helpful to the farmer. The last national Republican platform pledged itself for legislation for the relief of the farmer. I am willing for the farmers to decide whether or not that party fulfilled its promise in giving legislation for their relief. If the President and his administration were not satisfied with the farm relief proposed, it was the duty of that administration to propose some legislation that would be helpful to the farmer and fulfill its promise.

The bill should have been enacted into law, and if it did not work properly then it could be modified or repealed. In my judgment it would be helpful to the farmer, and bring the necessary relief to him, to lower the excessive tariff rates on what he has to buy; lower the freight rates on farm products, and open up trade relations with foreign countries, thereby disposing of the surplus farm products. This could be done without creating a lot of additional machinery and highly paid officers to administer the law. It is a matter of equalizing the various industries, but as everyone knows a remedy of this kind can not be had under this administration.

FLOOD CONTROL

Another important piece of legislation passed at this session of Congress was the flood-control bill. I feel that this is one of the important pieces of legislation of this session of Congress. While it will take years to accomplish the work proposed, yet I feel that a start in the right direction has been made by this legislation, and I am hoping that the plan proposed will be workable, and as soon as the work is completed I am hoping that we will not see a recurrence of the disastrous flood of 1927, which caused the loss of much property and many lives.

MUSCLE SHOALS

As everyone knows we secured Muscle Shoals in war time and have invested in that project probably $150,000,000. This matter has been before Congress for many years and was entitled to be disposed of. As a general proposition I am opposed to the Government going into business in competition with private industry, but we are already in the business at Muscle Shoals, and the bill as it passed the House eliminates the making of the finished fertilizer but produces nitrates in a form that may be sold to the farmers or to the fertilizer concerns. It should reduce the price of fertilizer to the farmers and eliminate the necessity of importing nitrates from Chili and other foreign countries by the fertilizer manufacturers. In addition, under this bill, power can be furnished to the surrounding country and should be helpful to that section of the country in that way and the plant kept in readiness for use in case of war. This bill passed both branches of Congress, but as Congress adjourns the bill has not been signed by the President.

THE BOULDER DAM PROJECT

The Boulder Dam project as passed by the House should be helpful in the way of preventing floods on the Colorado River, furnish water to irrigate the lands of the Imperial Valley, furnish power to that section of the country, and furnish a water supply to many western cities. This bill has not passed the Senate.

THE GEORGE ROGERS CLARK MEMORIAL

One of the bills passed by this session of Congress, and is now a law, that should be interesting to the people of any State is the bill authorizing the appropriation of $1,000,000 to aid in the construction of the George Rogers Clark Memorial. All Members of the House and the Senators of the Indiana delegation were deeply interested and did what they could for the passage of this bill. We are thankful for this appropriation that will give a memorial to a great man and his wonderful accomplishments, and we appreciate the fact that this memorial is to be erected on Indiana soil.

THE ROAD BILL

The passage of the bill continuing Federal aid to the States was one of great importance to the country. I know of no one thing that has done more for the benefit and improvement of this country than has the construction of good roads. It has brought the farmer closer to the markets, and has been the means of developing many sections of the country that were practically inaccessible before good roads were built through those sections. In addition to contributing to the national wealth, I know of no appropriation that has done so much to improve conditions and bring about enlightenment as has the system of extending Federal aid to the States for road improvement. And as a member of the Committee on Roads I am in favor of a continuation of the further extension of Federal aid to the States for the construction and improvement of roads.

OTHER BILLS

There were many other important measures considered, which I can not discuss in these brief remarks. Among them was the bill granting increases of wages to Federal employees. By the passage of this bill approximately 150,000 Federal employees have been materially benefited. The passage of the bill increasing the pay of the fourth-class postmasters, giving them an allowance for rent, fixtures, fuel, and so forth, and the night differential pay bill were secured for the benefit of Government employees by passing these bills over the President's veto. The passage by the House of the bill in regard to prison-made goods was a helpful piece of legislation to a number of industries in my district and to a number of persons who are employees in

those industries. I regret that this bill failed to pass the Senate. A bill has been passed to increase the pensions of Civil War widows from $30 to $40 after the widow has arrived at the age of 75 years. There are few of these widows left, and practically all, by reason of their age, are incapacitated from earning a livelihood. I introduced a bill to increase these pensions to $50, but those in charge of the legislation were unwilling to increase these pensions above $40. In addition to the passage of this law, I have been able at this session of Congress to secure the passage of several private pension bills that brought relief to helpless and dependent sons and daughters of Civil War veterans, and to grant pensions to Civil War widows who were unable to secure a pension under the general law. Other helpful legislation was the liberalization of the World War veteran laws. The immigration laws were slightly modified in order to give preference to some deserving cases, but the Congress still goes on record, as it should do, as favoring a restrictive immigration law.

I have commented briefly on some of the bills considered in this Congress in which I was interested, on which my vote was for the bill, and I am glad to call the attention of the people to the consideration of these legislative measures and to my views on the same.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had agreed to the amendments of the House of Representatives to bills of the following titles:

S. 343. An act for the relief of Sallie Stapleford, Mrs. J. C. Stuckert, Mary E. Hildebrand, Kate Wright, Mary M. Janvier, Harry L. Gray, Frank D. Carrow, Harry V. Buckson, George H. Swain, Claude N. Jester, and Charles H. Jamison;

S. 433. An act for the relief of Harry C. Bradley;

S. 471. An act for the relief of Agnes McManus and George J. McManus;

S. 1486. An act for the relief of the owners of the schooner *Addison E. Bullard;*

S. 1989. An act to amend the third paragraph of section 13 of the Federal reserve act;

S. 4321. An act authorizing the Secretary of the Interior to dispose of two bridges on the San Carlos Indian Reservation, in Arizona, and for other purposes; and

S. 4344. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across White River at or near Clarendon, Ark.

The message also announced that the Senate had passed the following concurrent resolution:

Senate Concurrent Resolution 22

Resolved by the Senate (the House of Representatives concurring), That the President of the Senate and the Speaker of the House of Representatives be authorized and directed to close the first session of the Seventieth Congress by adjourning their respective Houses on the 29th day of May, 1928, at 5.30 o'clock p. m.

MY RECORD IN CONGRESS—A MESSAGE TO THE VOTERS OF THE SECOND CONGRESSIONAL DISTRICT OF KENTUCKY

Mr. KINCHELOE. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. KINCHELOE. Mr. Speaker and gentlemen of the House, the voters of the second congressional district of Kentucky will vote on the 6th day of the coming November not only for President and Vice President but for a Member of Congress to further represent them.

Under our form of government the American people do not have the opportunity of voting but for a very few Federal officers. There are to-day in this country over 500,000 Federal officers, and yet only 533 of this number are elected by the people. They vote only for a President, Vice President, 96 Senators, and 435 Members of Congress. The rest of this vast army of Federal officers are appointed and are not responsible to the people for their conduct in office; so each voter in America only votes for five Federal officers—President, Vice President, two United States Senators, and a Member of Congress. Therefore, when either or all of these officers are to be elected it is highly important that all the voters go to the polls and cast their votes for the candidates of their choice. The right to vote is the greatest privilege that any American citizen enjoys, and unless the intelligent citizenship of the country exercises this right of suffrage there can be no hope of having competent and responsible people in office.

For the information of the splendid people of the second congressional district, whom I have had the honor to represent in Congress for the past 14 years, and who have been so loyal to me, I feel that I should make an epitomized statement of the record I have made during that time in this great body.

Five minutes after I first took the oath of office as a Member of Congress from that great district, on the first Monday in December, 1915, I introduced in the House of Representatives a good roads bill providing for Federal aid to assist the various States of the Union in building splendid highways throughout the United States, and I am proud to say that I aided very materially in the passage of a similar bill through Congress and it has been a law since 1916. Congress every year since that time has appropriated from sixty-five to seventy-five million dollars to the States of the Union to assist in building highways, which mean so much to the American people. Under this law Congress has expended on roads in the State of Kentucky over $20,000,000. The first speech I made in Congress was in behalf of this bill.

I think this is perhaps the most important bill that has been passed by Congress in this generation, and I say with pardonable pride that I am glad I had a part in it. Kentucky has been receiving her proportion of these appropriations and she is gradually building a system of fine roads, and I am glad that the enthusiasm in Kentucky for good roads is greater to-day than it has ever been.

FEDERAL FARM LOAN ACT

The next speech I made in Congress was in behalf of the Federal farm loan bill, which established 12 farm loan land banks throughout the United States, and thereby made it possible for the farmers of the Nation to borrow money from the Government at from 5 to 5½ per cent interest. Before the enactment of this law the farmers were compelled to borrow money from their local banks on three months' time, and in many instances had to pay from 9 to 10 per cent interest. Kentucky has at Louisville one of these farm loan banks. Had it not been for these banks there would have been additional thousands of farmers who would have lost their homes during the critical financial depression through which the agricultural interests of this country have gone in the last seven years.

JEFFERSON DAVIS'S BIRTHDAY

The next speech I made in Congress was on the 3d of June, 1916, which was the anniversary of the birth of Jefferson Davis. I am proud to say that I was the first Member of Congress who ever delivered a speech in the Congress of the United States on his birthday. This speech was carried by the Associated Press and was printed in full in the Confederate Veteran.

WOMAN'S SUFFRAGE

I also voted for the nineteenth amendment to the Federal Constitution, giving the women of the United States equal right of suffrage.

SOLDIERS' LEGISLATION

During the World War, in July, 1918, after Congress adjourned, I went to the battle fronts of Europe at my own expense, knowing that by so doing I would have a more intimate knowledge of the needs of our boys over there who were baring their breasts to the bayonets in order that civilization might endure not only in this country but in every civilized nation of the world. Shortly after I returned, and on September 11, 1918, I introduced a bill to erect a soldiers' hospital at Dawson Springs, Ky., and worked on that bill day and night until the 3d of March, 1919, when the bill became a law by the signature of President Wilson. I am proud to say that this great hospital, which cost $2,250,000, has long since been built, and hundreds of ex-service boys who lost their health in the defense of their country have received and are receiving treatment there. It is one of, if not the finest soldiers' hospitals in the United States. I view this as the crowning accomplishment of my service in Congress.

I voted for the soldiers' bonus and for the soldiers' compensation act, and have been assisting ex-service boys ever since the armistice was signed in procuring compensation and hospitalization, and it has afforded me much pleasure to do so. As soon as the armistice was signed I wrote a personal letter to every ex-service man who went to war from my district itemizing the gratuities of the Government to which he was entitled and assisted them in procuring these gratuities in every way possible.

I also voted for the increase of pensions to Spanish-American War veterans, and have also procured an increase of pension for many soldiers and widows of soldiers of the Civil War.

I have voted for all legislation that has come before Congress since I have been a Member that I thought would redound to the interest and happiness of the American laboring man, whether he labored on the farm, on the railroad, in the factory, mill, or mine, and I gladly submit my record to the closest scrutiny on all labor legislation.

Space will only permit the mention of but a few of the other laws which I have helped to enact, as follows:

Adamson railroad law.

Restriction of immigration.

Federal water power act, which retains perpetual ownership by the Government for all the people.

Establishment of the Veterans' Bureau, construction of other hospitals, and numerous liberalizing laws for ex-service men.

Establishment of air mail.

Radio control law, which divides the country into zones and seeks to give the people in every zone equal power and wave lengths.

Removal of all tax from automobiles and automobile parts.

Flood control.

Muscle Shoals.

Liberalized farm loans.

Established Board of Mediation to settle labor disputes and prevent strikes.

Antinarcotic laws.

Hoch-Smith resolution to help reduce freight rates on agricultural products.

Deportation of aliens who violate the laws of this country.

Several hundred laws of general interest which I have helped to enact could also be mentioned.

BETTER MAIL SERVICE

I have always felt that the most beneficial and direct service the Federal Government has given the American people is a good mail service both to those who live in cities and those who live in small towns and in the country. I have procured as many, if not more, new rural routes in my district since I have been in Congress as any other Member from Kentucky. I have always felt that the people who live on the farms are as entitled to as good mail service as those who live in the cities. I secured what is called village delivery mail service for the towns of Morganfield, Sturgis, Dawson Springs, Providence, and Earlington, and enlarged the city carrier service in practically every large town in my district. I now feel that my district is getting splendid mail service.

FARM LEGISLATION

I have the honor to be a member of the great Agriculture Committee of Congress and am now the second Democratic member in rank on that committee. Ever since I have been in Congress I have voted against discriminatory legislation of all kinds that I thought would be inimical to the farmers of the Nation. I have also supported all farm legislation that I thought would redound to the happiness and prosperity of the American farmer. This Republican administration passed the Fordney-McCumber tariff bill, placing the highest tariff in the history of the country on manufactured products which the farmers, the laboring men, and other consumers have to pay. Therefore, the American farmer is compelled to buy all the manufactured products he buys in a protected market and must sell all his products in a world market. To-day the American farmer is receiving about pre-war prices for the products he sells, but is compelled to pay higher than war prices for the manufactured products he buys for himself, his family, and his farm. Consequently the agricultural interest of the country is almost bankrupt. I believe in lowering the tariff on a great many of these manufactured products, which would enable the farmer and other consumers to buy them cheaper. This would also increase the purchasing power of the farmer's dollar and would increase the foreign markets for his surplus products. I was born and reared on a farm and I know the hardships of the farmer and the problems he has to deal with, and I shall continue to give sympathetic and active support to all legislation that will give the farmers of the Nation an equal opportunity with the manufacturers.

At this session of the Congress I was fortunate in having a bill passed giving many unselfish men of Henderson, through a corporation they had formed, a permit by Congress to construct a bridge across the Ohio River at Henderson. This bill became a law May 3 last. There were pending at that time both in the House and in the Senate two bills seeking the consent of Congress to the State of Indiana through its highway commission to construct a bridge across the Ohio River at or near Dade Park. My bill and these two bills contemplated paying for the bridge out of its tolls, and, therefore, private capital will have to be relied upon to finance the building of the bridge. The gentlemen at Henderson and I knew that if either of these Indiana bills became a law it would not only muddy the financial waters but would make it almost impossible to induce private capital to invest money in either of these bridges. Therefore I undertook to and did prevent the passage of both bills through the House, and as a result neither one of the Indiana bridge bills became a law. I am sure the people of Henderson County and other adjoining counties, for that matter, are grateful to me for my activities in this matter, and I assure you it gave me pleasure to be of this service.

The voters of Kentucky for the last 25 years have been exercising good judgment in reelecting their Members of Congress as long as they would serve. Age of service in Congress counts as much as, if not more than, anything else. It gives the Member experience, prestige, and influence that he can not otherwise get. It assists him in getting on important committees in the House and in taking a high rank on these committees.

The voters of the first congressional district kept Ollie James in Congress 10 years, and until he was elected to the United States Senate, where he served almost six years before he died, and would have been reelected for another term of six years had he lived. They also kept ALBEN W. BARKLEY in Congress 14 years, until he was elected to the United States Senate, which office he now holds with honor and distinction.

The voters of the second congressional district kept A. O. Stanley in Congress 12 years, and would have kept him longer had he desired to stay, but he was afterwards elected governor for four years and then served a term of six years in the United States Senate.

The voters of the third congressional district kept R. Y. Thomas in Congress for about 18 years, and until his death.

The voters of the fourth congressional district kept Ben Johnson in Congress for 20 years, and until he retired.

The voters of the fifth congressional district kept Swagar Sherley in Congress 16 years.

The voters of the sixth congressional district kept A. B. Rouse in Congress for 16 years, and until he retired.

The voters of the seventh congressional district kept J. Campbell Cantrill in Congress almost 16 years, and until he retired to run for governor.

The voters of the eighth congressional district kept Harvey Helm in Congress almost 14 years, and until he died.

The voters of the ninth congressional district kept William J. Fields in Congress for almost 14 years, and until he was elected governor.

In order to show the importance of keeping men in Congress from the standpoint of committee assignments, let us note the positions the above-named gentlemen occupied on important committees at the time they were either elected to the Senate, retired, or died:

Ollie James and A. O. Stanley: Members of the Ways and Means Committee at the time of their retirement from the House.

ALBEN W. BARKLEY: Ranking Democrat on the Interstate and Foreign Commerce Committee.

R. Y. Thomas, jr.: Ranking Democrat on Judiciary Committee.

Ben Johnson: Member of the Committee on Appropriations for the War Department.

Swagar Sherley: Chairman of Appropriations Committee.

A. B. Rouse: Second Democrat on the Committee on the Post Office and Post Roads.

Campbell Cantrill: Third Democratic member on Committee on Rules and second Democrat on the Committee on Public Buildings and Grounds.

Harvey Helm: Chairman of Committee on the Census.

W. J. Fields: Ranking Democrat on Committee on Military Affairs.

I am the second Democrat on the Committee on Agriculture.

I think you will agree with me that Kentucky has been ably represented in Congress in the past and I am glad to say is ably represented in Congress now, for the sitting Members from Kentucky all have splendid and important committee assignments considering their length of service here.

CONCLUSION

I wish time and space would admit my giving to you a more detailed statement of my record here, for I assure you my record is an open book to all who might care to investigate it, and I take a pardonable pride in this record.

I am a candidate for the Democratic nomination for Congress and the Democratic primary will be held on August 4. I have Democratic opposition, but I have no fear of winning this nomination by an overwhelming majority if my friends will go to the polls on that day and vote for me. It is an important office and a responsible position. It is the duty of all the Democratic voters in this district, both men and women, to go to the polls on that day and cast their ballot for the candidate of their choice. I have given my time and the best talent I have in the discharge of every duty that this great office entails. No citizen of this district has ever called upon me for any favor that I could grant that I did not do it cheerfully. No one has ever written me a letter about any matter that I did not answer it promptly. I appeal to all Democratic voters in the

district who are my friends and who indorse my record in Congress to go to the polls on the 4th day of August and cast their votes for me. I will appreciate it and promise that I will continue to discharge the duties of this great office to the best of my ability and will continue to look after the interests of the congressional district in the future as I have in the past.

THE DUTY OF CONGRESMEN TO THEIR CONSTITUENTS

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to extend my remarks by printing in the RECORD a questionnaire which I sent out to my constituents, together with an editorial from the New York Post, and my answer thereto.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD and include an editorial from the New York Post. Is there objection?

Mr. SCHAFER. Reserving the right to object, what is the editorial on?

Mr. SIROVICH. On the questionnaire.

There was no objection.

Mr. SIROVICH. Mr. Speaker, ladies, and gentlemen, on October 15, 1927, I sent the following letter and questionnaire to all citizens of the fourteenth congressional district of New York, asking them to give me an expression of opinion regarding the important bills that were likely to come up before the Seventieth Congress.

The letter to the constituency of my district read as follows:

HOUSE OF REPRESENTATIVES,
Washington, D. C., October 15, 1927.

To My Fellow Citizens of the Fourteenth Congressional District:

Under the present system of convening Congress Members do not take their seats until some 13 months have elapsed since their election. Consequently the first opportunity that I shall have officially to represent you will be on December 5, 1927, when the Seventieth Congress convenes.

As your Congressman, I am anxious to be responsive to your wishes, and in my activities as a Member of the House of Representatives to reflect your views on legislation which may be pending. I am, therefore, taking this opportunity, on the eve of the opening session, to determine your opinion on some of the more important matters which will come up for deliberation. These, briefly explained, are listed on the inclosed card which you are respectfully urged to fill out and return to me.

I shall certainly appreciate your interest in answering the inclosed questionnaire, and the expression of your viewpoint will receive due consideration and serve as a valuable guide to me in my official conduct.

My New York and Washington offices are always open to you, and I shall be happy if at any time I can be of service to you.

Very sincerely yours,

WILLIAM IRVING SIROVICH, M. D.

The questionnaire sent out to the voters of my district, the answers to which guided me to a great extent in my deliberations to express the sentiments of my district, were as follows:

----------, 192--

Hon. WILLIAM I. SIROVICH, M. C.,
Fourteenth Congressional District, New York City.

DEAR SIR: Regarding the following legislative measures to be discussed in the coming session of Congress I desire to express my opinion as follows:

For	Against	
☐	☐	1. Norris amendment: Allowing Congress to convene in January following election rather than, as now, 13 months later.
☐	☐	2. Selective immigration law: Allowing the entrance into the United States of the immediate families of aliens, regardless of quotas.
☐	☐	3. Old-age pensions: For the protection of the worker in his declining years; employer and Government would contribute to a joint fund.
☐	☐	4. McNary-Haugen bill: Providing farmers' relief through Government aid.
☐	☐	5. Flood control: Provisions for the minimizing of loss through future floods in the Mississippi Valley.
☐	☐	6. Defense legislation: For the creation of a department of national defense, with three branches—Army, Navy, and aeronautics.
☐	☐	7. St. Lawrence proposal: For the deepening of the St. Lawrence River, thereby permitting the entrance of ocean liners into the Great Lakes.
☐	☐	8. Muscle Shoals and Boulder Dam: Provides for governmental development of the natural resources of these areas.
☐	☐	9. Tariff revision: Downward revision of the present tariff.

Remarks----------
Name ----------
Address ----------

The reason I sent out this letter and questionnaire to all the citizens of the fourteenth congressional district was my firm conviction that a Representative in the Congress of the United States should act as the servant of his constituency instead of being its master.

On November 1, 1927, the New York Evening Post contained the following editorial about this innovation:

Congressman SIROVICH proposes to simplify his work as a Member of the House of Representatives by having his constituents indicate on a post card how he shall vote on the nine principal questions which will come before Congress at the approaching session. This seems to be a poor way for a statesman to make up his mind as to whether a measure is a desirable one or not. Probably not more than 10 per cent of the voters will take the trouble to reply. When his constituents elected him to Congress they expected him to do his own congressional thinking, reserving the right to find fault and punish him if he persisted in acting contrary to their wishes. In a letter accompanying the post cards Doctor SIROVICH practically tells the voters in his district that he hasn't any ideas of his own regarding the most important questions of the day, but that he wants to be on the popular side of all of them, regardless of whether that side is right or wrong. This is bad politics. As a rule, the voters in any district prefer a leader who shows some independence to one who virtually says that he will do anything to keep the job.

In response to this editorial I wrote the following letter to the New York Evening Post, which speaks for itself:

HOUSE OF REPRESENTATIVES,
Washington, D. C., November 7, 1927.

To the EDITOR OF THE NEW YORK EVENING POST,
75 West Street, New York City.

SIR: Editorial comment contained in your issue of the 1st instant has been called to my attention and I beg leave to congratulate you on the degree of frankness with which you approach the advisability of a Member of Congress consulting his constituents by the method of the referendum on matters of prime importance to the Nation and themselves.

It was after considerable hesitancy that I chose to reply to some of the statements contained in the above-mentioned editorial; a hesitancy that was born out of a disinclination to impede the historic function of a great newspaper to subject public men and public questions to fair-minded criticism. Your views, however, as expressed in the editorial reveal such a distinct divergence of fundamental opinion between you and myself, that I felt that a presentation of my views to your readers might not be taken amiss.

Quite possibly, you selected Edmund Burke's statement in his speech at Bristol, that a representative in a parliamentary body should reflect the views not of his constituents but those of himself, as your major premise, and from that, there quickly flowed the conclusion that I must have been in error in submitting some important congressional measures to my constituents for a determination. Such a view would unquestionably be tenable if it did not conflict with the traditional function of an American Member of the House of Representatives as contradistinguished from that of a member of the English House of Commons. Historically, the backgrounds are quite different.

In England a member of the House of Commons represents, theoretically, not the views and emotions of any local constituency but those of the entire nation. A member may therefore be, and frequently is, elected from a section of England, Scotland, and Wales far removed from his place of domicile. This plan has proved to be a very feasible one for the British Isles, which are geographically closely knit and contain a more or less homogeneous population. A Scotch Laborite who is elected to represent the white chapel district of London can therefore be expected to pay no particular heed to the views and needs of his immediate constituency, but can represent the entire English people, and his opinions may be colored only by his adherence to the platform of the Labor Party.

In the United States, however, which had its inception in a union of federated States, each maintaining its own degree of sovereignty, a quite different theory of the duties of a Representative has been evolved. Our country is a large one, our population contains many racial strains, and the economic as well as political views of our people are found to be sharply divergent as we travel from one portion of our wide expanse to another.

In addition thereto our Federal Constitution has provided that a Member of Congress must be an actual resident of the State from which he is elected and must have so resided in that State for a considerable number of years.

Such a Representative was inherently calculated to give expression to the views of various localities and to make the Representative responsive to the will of those particular districts and to the voters therein.

The other Member of our bicameral Legislature, the United States Senate, was wisely designed on a more national scale, being a small compact body of men intended to be given to the expression of strong individualistic views for the good of the Nation as a whole.

By limiting the mode of election of a Member of the House of Representatives we have thereby limited the freedom of his scope and made him a servant of local opinion rather than its master.

It was in keeping with this construction of my duties as a Member of Congress that I instituted the above-mentioned referendum among my constituents. Incidentally, I might state in passing, that when I stood for election in my district last year, despite the fact that the people therein knew me to be a man entertaining strong personal convictions on public questions, I nevertheless promised them in my canvass that if I were elected to Congress, I would consult them by means of a referendum (such as the one I have employed) and also to report to them of my activities after the close of the session of Congress.

I trust that you will be indulgent with me for stating that you seem to beg the question when you contend that "probably no more than 10 per cent of the voters will take the trouble to reply."

Indifference of voters does not bear on the principle involved. As a matter of pure fact, however, the number of replies to my questionnaire has already gone far beyond 10 per cent of the voters of my constituency.

Thanking you for inducing the discussion of so important a public question and assuring you that I shall be grateful to you if you were to give currency to this letter, I beg to remain,

Very truly yours,

WILLIAM IRVING SIROVICH, M. D.,
Member of Congress,
Fourteenth Congressional District, New York City.

It might interest the membership of this historic body to know that Edmund Burke in 1779, running for the House of Parliament on the principle that a member of the House of Parliament is master of his constituency instead of its servant, the principle enunciated by the distinguished editor of the New York Evening Post, was overwhelmingly defeated on that platform.

It might also interest the Members of this House to know how faithfully and loyally I kept the promise and pledge made to the voters of my district by returning to them during the last fortnight and speaking in three different sections of my congressional district, giving them a summary of everything that took place in the House of Representatives, and how I tried to reflect their views and opinions by voting in accordance with what I believed to be their sentiments.

Thus I have religiously lived up to the traditions and ideals I think every Member of the Congress of the United States should strictly adhere to; that is, to be the servant of his constituency rather than their master.

EXTENSION OF REMARKS

Mr. WOOD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a speech delivered by the gentleman from Indiana [Mr. PURNELL] as permanent presiding officer at the Republican State Convention last Wednesday at Indianapolis.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD by inserting a speech delivered by the gentleman from Indiana [Mr. PURNELL]. Is there objection?

Mr. LANKFORD. I object.

AMENDING SUPPLEMENT OF THE CODE OF LAWS OF THE UNITED STATES

The SPEAKER. The Chair lays before the House the following resolution from the Senate.

The Clerk read as follows:

Resolved, That the House of Representatives be respectfully requested to return to the Senate the bill (H. R. 13622) entitled "An act to amend and supplement the Code of the Laws of the United States of America."

The resolution was agreed to.

PERSONAL PHYSICIAN TO THE PRESIDENT

Mr. JAMES. Mr. Speaker, I ask unanimous consent that the bill H. R. 5658 allowing the rank, pay, and allowances of a colonel, Medical Corps, United States Army, to the medical officer assigned to duty as personal physician to the President be stricken from the calendar, a similar bill having passed the House.

The SPEAKER. Is there objection?

There was no objection.

PAY OF THE ARMY

Mr. JAMES. Mr. Speaker, I also ask unanimous consent that the bill (H. R. 7753) to authorize the disbursement of and accounting for the appropriation, "pay, and so forth, of the Army," as one fund, and for other purposes, be referred back to the Committee on Military Affairs.

The SPEAKER. Is there objection?

There was no objection.

EXTENSION OF REMARKS

Mr. GARNER of Texas. Mr. Speaker, let me ask the gentleman from Connecticut [Mr. TILSON] a question. Does he not think it advisable to ask unanimous consent that Members, for five legislative days, have the right to extend their own remarks in the RECORD?

As I understand it now the Public Printer is taking note of the fact of requests, and unless the request contains permission to insert other than their own remarks, the printer will not permit abuse of the RECORD by the insertion of other than their own remarks by Members. If that is true, I think the gentleman could very consistently have unanimous consent granted to Members to extend their own remarks in the RECORD. They could not then abuse the privilege as it has been done by some Members in the past.

Mr. TILSON. When it is finally determined that we shall adjourn, I have it in mind to do that very thing.

Mr. GARBER. That would obviate the necessity for Members rising to get consent for themselves.

FINAL ADJOURNMENT

Mr. TILSON. Mr. Speaker, I call up Senate Concurrent Resolution 22.

The SPEAKER. The gentleman from Connecticut calls up the following Senate concurrent resolution, which the Clerk will report.

The Clerk read as follows:

Senate Concurrent Resolution 22

Resolved by the Senate (the House of Representatives concurring), That the President of the Senate and the Speaker of the House of Representatives be authorized and directed to close the first session of the Seventieth Congress by adjourning their respective Houses on the 29th day of May, 1928, at 5.30 o'clock p. m.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken; and on a division (demanded by Mr. SCHAFER) there were—ayes 155, noes 9.

Mr. SCHAFER. Mr. Speaker, I object to the vote upon the ground that there is no quorum present.

Mr. TILSON. Mr. Speaker, I insist that there is a quorum present. A large number of Members did not vote on the rising vote. I ask that the Chair count.

The SPEAKER. The Chair will count. [After counting.] Two hundred and twenty-one Members are present, a quorum.

So the resolution was agreed to.

MEMORIAL DAY

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for seven minutes.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to address the House for seven minutes. Is there objection?

There was no objection.

Mr. RANKIN. Mr. Speaker, to-morrow will be Memorial Day. It will be so observed throughout the Nation. Yet few people, I dare say, know its origin.

On April 25, 1866, less than one year after the Civil War closed, the women of Columbus, Miss., in the district which I have the honor to represent, met to decorate the graves of the Confederate dead, and at the suggestion of the widow of a brave Confederate soldier who had been killed in the war, they impartially scattered flowers alike on the graves of about 40 Federal soldiers buried in that city. The incident is reported in the Mississippi Index, a paper published at Columbus, Miss., at that time in its issue of April 26, 1866. The New York Tribune commented on the fact, and the Hon. Francis Miles Finch, a distinguished northern poet, taking his suggestion from that incident, wrote a little poem called "The Blue and the Gray," which stands as a monument to the generosity of those noble women. He published this poem in the Atlantic Monthly for September, 1867, using the New York Tribune's comment on the Columbus, Miss., incident as his introduction. From that incident and that poem came our National Memorial Day. It was observed annually throughout the South from that day on and spread throughout the country until it became so popular that several years later General Logan issued his famous order designating May 30 of each year as a National Memorial Day.

I am going to ask the Clerk to read in my time that introduction and poem just as they appear in the Atlantic Monthly for September, 61 years ago.

The Clerk read as follows:

THE BLUE AND THE GRAY

(From the New York Tribune)

The women of Columbus, Miss., animated by nobler sentiments than are many of their sisters, have shown themselves impartial in their

offerings made to the memory of the dead. They strewed flowers alike on the graves of the Confederate and of the National soldiers.

By the flow of the inland river,
Whence the fleets of iron have fled,
Where the blades of the grave grass quiver,
Asleep are the ranks of the dead;
Under the sod and the dew,
Waiting the judgment day,
Under the one the Blue,
Under the other the Gray.

These in the robings of glory,
Those in the gloom of defeat,
All with the battle blood gory,
In the dusk of eternity meet;
Under the sod and the dew,
Waiting the judgment day,
Under the laurel the Blue,
Under the willow the Gray.

From the silence of sorrowful hours
The desolate mourners go,
Lovingly laden with flowers
Alike for the friend and the foe;

Under the sod and the dew,
Waiting the judgment day,
Under the roses the Blue,
Under the lilies the Gray.

So with an equal splendor
The morning sun rays fall,
With a touch impartially tender,
On the blossoms blooming for all;
Under the sod and the dew,
Waiting the judgment day,
Broidered with gold the Blue,
Mellowed with gold the Gray.

So when the summer calleth,
On forest and field of grain,
With an equal murmur falleth
The cooling drip of the rain;
Under the sod and the dew,
Waiting the judgment day,
Wet with the rain the Blue,
Wet with the rain the Gray.

Sadly, but not with upbraiding,
The generous deed was done;
In the storm of the years that are fading,
No braver battle was won;
Under the sod and the dew,
Waiting the judgment day,
Under the blossoms the Blue,
Under the garlands the Gray.

No more shall the war cry sever,
Or the winding rivers be red;
They banish our anger forever
When they laurel the graves of our dead!
Under the sod and the dew,
Waiting the judgment day,
Love and tears for the Blue,
Tears and love for the Gray.

[Applause.]

Mr. RANKIN. Mr. Speaker, I desire to insert at this point a clipping from the Mississippi Index, published at Columbus on April 26, 1866, giving an account of that first memorial day which inspired the beautiful and touching poem to which you have just listened, and which reads as follows:

The procession on yesterday in honor of the Confederate dead was large and imposing. First marched, in twos, the young ladies and girls, dressed in immaculate white, each bearing her bouquet or chaplet of flowers. Next came the matrons dressed in mourning; like the others, with flowers in their hands, their black dresses typical of the southern heart in gloom for its beloved dead, the fair flowers emblematic of woman's admiration and affection for all that was gallant and chivalrous in patriots. Lastly came the procession of carriages bearing the elderly ladies.

Arriving at the cemetery, the ladies assembled around the graves of the soldiers in the form of a square. From the center of the ground an elaborate and eloquent address was delivered by Rev. G. T. Stainback, and following it a fervent prayer by Rev. A. S. Andrews. The ladies then performed the beautiful and touching duty of decorating the graves with flowers.

There were over 1,400 graves to be decorated. Through exertions and appeals of the kind ladies superintending the good work, all these graves had been neatly cleaned off; so that after the decoration was completed, "God's Acre" of heroes looked as if freshly blooming with a thousand flowers—bearing up to heaven a fragrant and beautiful evidence of woman's love, tenderness, and appreciation.

We were glad to see that no distinction was made between our own dead and about 40 Federal soldiers, who slept their last sleep by them. It proved the exalted, unselfish tone of the female character. Confederate and Federal—once enemies, now friends—receiving this tribute of respect.

CAMPAIGN EXPENDITURES

Mr. SNELL. Mr. SPEAKER, I send to the Clerk's desk a resolution, and ask unanimous consent for its consideration.

The SPEAKER. The gentleman from New York submits a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 232

Resolved, That a special committee of five be appointed by the Speaker of the House of Representatives to investigate and report to the House not later than January 1, 1929, the campaign expenditures of the various presidential candidates, vice presidential candidates, senatorial candidates, and candidates for the House of Representatives in both parties, the names of the persons, firms, or corporations subscribing, the amount contributed, the method of expenditure of said sums, and all facts in relation thereto, not only as to the subscriptions of money and expenditures thereof but as to the use of any other means or influence, including the promise or use of patronage, and all other facts in relation thereto that would not only be of public interest but would aid the Congress in any necessary remedial legislation.

That said special committee or any subcommittee thereof is authorized to sit and act during adjournment of Congress, and that said committee or any subcommittee thereof is hereby empowered to sit and act at such time and place as it may deem necessary; to require by subpœna or otherwise the attendance of witnesses, the production of books, papers, and documents; to employ stenographers at a cost of not exceeding $1 per printed page. The chairman of the committee or any member thereof may administer oaths to witnesses. Subpœnas for witnesses shall be issued under the signature of the chairman of the committee or subcommittee thereof. Every person who, having been summoned as a witness by authority of said committee or any subcommittee thereof, willfully makes default, or who, having appeared, refuses to answer any questions pertinent to the investigation heretofore authorized, shall be held to the penalties provided by section 102 of the Revised Statutes of the United States.

The expenses thereof shall be paid from the contingent fund of the House on vouchers ordered by said committee and approved by the chairman thereof, but the expenses shall not exceed the sum of $20,000.

Mr. SNELL. Mr. Speaker, as the Members of the House know, I am not very much given to bringing in resolutions for investigations. But a great many substantial Members on both sides have spoken to me on the subject and they have thought that on account of the extraordinary conditions that might prevail during the coming presidential election it might be a very proper thing to set up such a committee as is called for in this resolution.

It is not intended that this shall be a snooping committee, to go around and pry into people's private matters, but if such an occasion should arise during the campaign where it would seem to be necessary to have certain investigations made, we felt that we should have the machinery set up in advance of such an emergency. We considered that it would be proper to have such a committee appointed from the House inasmuch as the Clerk of the House is the custodian of all the reports filed by the various campaign committees during the season.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. RANKIN. Would this commission have the power to go into the various States where these matters are alleged to occur, or would they have to make the investigation in Washington?

Mr. SNELL. They would go wherever they saw fit, and necessity demanded. It is not expected to be a general snooping committee to go all over the country, but only to make an investigation in the case of an outstanding occurrence where it would seem that something should be done.

Mr. RANKIN. Will they have the power to make these investigations?

Mr. SNELL. Yes.

Mr. DENISON. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. DENISON. I want to ask the gentleman from New York if the duties assigned to this committee by the resolution would not duplicate the duties of an investigating committee of the Senate now already established and authorized to act?

Mr. SNELL. To a certain extent that might be true, but the Committee of the Senate covers everything, and they are going at it all the time and working continually. This committee is to deal with any extraordinary occurrences that might happen during the campaign, and nothing more.

Mr. CRAMTON. While it may duplicate the duties, we hope it will not duplicate the performances. [Applause.]

Mr. SCHAFER. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. SCHAFER. In connection with the gentleman's resolution he should bear in mind that the United States contains a great deal of territory, and although you proposed to give this committee power to conduct the investigations, if you limit the appropriation to $20,000 I do not see much necessity for having this committee at all. Does not the gentleman think $100,000 would be far better?

Mr. SNELL. It might be better, but I think that $20,000 would suffice for all extraordinary occasions. If more is needed it could be provided.

Mr. UNDERHILL. Does the gentleman know how much money has been spent on investigations of this character?

Mr. SNELL. No; I do not know.

Mr. O'CONNOR of New York. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. O'CONNOR of New York. I did not just understand how the chairman of the Committee on Rules has called up this resolution.

Mr. SNELL. By unanimous consent.

Mr. O'CONNOR of New York. Was it pending before the committee?

Mr. SNELL. I did not present it as coming from the Committee on Rules.

Mr. O'CONNOR of New York. It has been before the committee?

Mr. SNELL. Yes.

Mr. O'CONNOR of New York. The committee has taken no action on it?

Mr. SNELL. No.

Mr. O'CONNOR of New York. The gentleman reported out a rule a week ago providing for the consideration of the Federal employees' retirement act. Does not the gentleman think that is more important to bring out that rule in the interest of the 500,000 employees than to make this last-minute gesture to the country?

Mr. SNELL. If I wanted purely to be a demagogue I would say "Yes." [Applause.] I have been a Member of this House for 13 years, and I have never uttered a demagogic sentence on the floor of this House, and will not begin now. [Applause.]

Mr. O'CONNOR of New York. Oh, well, the gentleman can not deny—and I disclose no secret—that the gentleman from New York pocketed the rule making it in order to consider the Federal employees' retirement act after voting for the rule. Is that demagoguery? Is not that a fair question? The rule has been pending here for a week. Why deceive our Federal employees?

Mr. SNELL. I have answered the gentleman's question, and I never deceive anyone. I vote as I talk.

Mr. MOORE of Virginia. I have never demagogued on the floor of the House any more than has the gentleman from New York, but I will ask him this question and request a frank answer.

Mr. SNELL. The gentleman can get one.

Mr. MOORE of Virginia. Why he has not brought forward the rule which applies to the retirement bill just mentioned by the gentleman from New York?

Mr. SNELL. Because I have not seen fit to. [Laughter.]

Mr. MOORE of Virginia. That is a frank answer as far as it goes, but will my friend go a little further and tell us why he has not seen fit?

Mr. SNELL. That is as far as I care to go at the present time.

Mr. HOWARD of Nebraska. Will the gentleman yield to me?

Mr. SNELL. Yes; I yield to my friend from Nebraska.

Mr. HOWARD of Nebraska. The gentleman yesterday, in the most beautiful language and yet brutally, objected to my request for unanimous consent to consider a Senate resolution, because it had not been considered by a House committee. I think he was right under the general practice, but if he was right then he is unhappily wrong now. [Laughter.]

Mr. BLACK of New York. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. BLACK of New York. I want to say that this is the first time since I have been in the House that I have agreed with the gentleman.

Mr. SNELL. Thank you. I must be wrong. [Laughter and applause.] Mr. Speaker, I move the previous question.

Mr. BLACK of New York. Will the gentleman allow me to conclude?

Mr. SNELL. No.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

FEDERAL PRISONS

Mr. SNELL. Mr. Speaker, I offer another resolution.

The SPEAKER. The gentleman from New York offers a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 233

Resolved, That a special committee is hereby created to consist of five Members of the House of Representatives to be appointed by the Speaker. Said special committee is authorized and directed to hold hearings, and to obtain all available information from dependable sources, relative to Federal prisoners confined in Federal, State, county, and municipal prisons and jails; the care of such prisoners as to housing, food, health, recreation, work, discipline, classification, medical treatment, and other pertinent facts; the rates of compensation paid for maintenance and board of such prisoners, the services rendered for such compensation, and the beneficiaries of such compensation; and the need for additional Federal penal and reformatory institutions to take care of the Federal prisoners.

Said special committee is further authorized and directed to make a survey of the employment of prisoners in the penal and reformatory institutions of the United States and of the several States; to gather information and statistics from reliable sources of the amount and kind of goods, wares, and merchandise manufactured, produced, and mined in such institutions; to ascertain to what extent such goods, wares, and merchandise come into competition with goods, wares, and merchandise manufactured, produced, and mined by free labor; and to determine how such prisoners can be employed regularly and in what manner the goods, wares, and merchandise manufactured, produced, and mined by such prisoners can be best disposed of with the least disadvantage to free labor.

Said special committee is authorized to sit in Washington or any other convenient place, to administer oaths and affirmations, to send for persons and papers, to employ necessary clerks and stenographers, the latter to be paid at a cost not to exceed 25 cents per 100 words, and said committee shall make a report to the House of Representatives of its findings, conclusions, and recommendations for legislation on or before the first Monday in February, 1929, and may prepare bills to carry out its recommendations for reference to the proper committees of the House of Representatives. The expenses attendant upon the work of said committee shall be paid out of the contingent fund of the House of Representatives upon vouchers authorized by said committee and signed by its chairman, but such expenses shall not exceed the sum of $20,000.

Mr. SNELL. Mr. Speaker, this resolution provides for a general survey of the penal institutions of the United States and the conditions existing therein by a committee of the House of Representatives. There has been no such survey made in the last 40 years. There seems to be a general demand for this survey not only by the Department of Justice but by several associations and people who have given a great deal of time and attention to a study of those conditions. As far as I know, there is no opposition whatever to the resolution. The only question is of getting some Members of the House who will do the real work that is required to make a proper report to the House in order that we may get some real instructive information—information that will guide us in passing legislation in regard to these institutions.

Mr. OLIVER of Alabama. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. OLIVER of Alabama. There is no question but that the purpose of the resolution is important, and I happen to know that the Department of Justice is very much interested in having this survey made; but my thought is whether the resolution is sufficiently broad to authorize the committee to prepare and introduce bills seeking to remedy conditions they may find.

Mr. SNELL. It does not go as far as to authorize them to introduce legislation, but they can get the required information on which to base information, and we can have the legislation introduced. This is as broad a resolution as we could offer.

Mr. RAMSEYER. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. RAMSEYER. The resolution provides specifically that the committee may embody their recommendations in bills to

be referred to the proper committees of the House; that is, the special committee itself can not report bills.

Mr. DYER. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. DYER. Has the gentleman any objection to stating from whom this resolution came?

Mr. SNELL. Well, if the gentleman wants to know, the gentleman from Iowa [Mr. RAMSEYER] is responsible for the mechanics of it, and it was based on a resolution originally introduced by my colleague from New York [Mr. BOYLAN].

Mr. DYER. I will state to the gentleman from New York that the Judiciary Committee of the House under the rules is charged with the responsibility of legislating on matters affecting our penal institutions. We have made some surveys; we have considered that subject very carefully in many respects and presented a bill, which passed the House at this session, calling for two additional institutions to care for Federal prisoners. There has been no request, so far as I know, during this entire session by either of the gentlemen mentioned by the gentleman from New York, Mr. RAMSEYER and Mr. BOYLAN, that the Committee on the Judiciary investigate this subject and report the matter to the House.

Mr. SNELL. This is no reflection whatever on the Committee on the Judiciary, let me say to the gentleman. It simply is to get information to place before the Judiciary Committee in connection with such legislation as may be desirable.

Mr. DYER. I understand that.

Mr. SNELL. And the Attorney General told me he had practically the same bill before the Committee on the Judiciary. I do not know whether that has ever been reported out or not.

Mr. DYER. There has been no request of the committee, so far as I know—and for most of the session I have been the acting chairman—for any consideration of this subject. I think this is a bad time to present the matter here, in the closing hours of the session, without the committee having had a chance to consider it.

Mr. SNELL. This is not legislation. This is simply to make a survey and get some information to place before the gentleman's honorable committee, so that the committee can legislate intelligently.

Mr. DYER. Our committee should have been consulted about this proposition in some way.

Mr. MICHENER. Mr. Speaker, the Committee on the Judiciary is not an investigating committee. All matters providing merely for investigating must go to the Committee on Rules.

Mr. DYER. I will state to the gentleman that these resolutions, according to the gentleman from New York, were referred to the Committee on the Judiciary, and, so far as I know, there has been no request whatever from any of these gentlemen that the committee investigate the subject, and for that reason I do not think the House should act upon it without some evidence that such an investigation is necessary.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. DYER. I have not the floor.

Mr. SNELL. I yield five minutes to the gentleman from New York [Mr. BOYLAN].

Mr. BOYLAN. Mr. Speaker and gentlemen of the House, particularly in answer to the gentleman from the Judiciary Committee, I would like to say that this resolution was introduced on the very opening day of the session, December 5 last, and the bill was referred to the Committee on Rules. I have been trying ever since that time to get some action on it. So the gentleman will see there was an effort made to get action.

There is not any desire under this resolution to take anything away from the distinguished Judiciary Committee. It is simply to ascertain facts that may be presented to them in order that proper legislation may be framed. As the distinguished chairman has told you, for over 40 years there has been no investigation of Federal prisons.

Mr. DYER. If the gentleman will permit, I do not desire to take up the time of the House or to cause unnecessary debate. I realize myself, personally, that such an investigation is highly important and necessary, and my only comment was that we should have considered it in the committee before it was brought upon the floor; but I shall not insist upon that and I will not object to the resolution.

Mr. BOYLAN. I would like to say one further word. The prison population has increased within the last 10 years over 150 per cent, and in the Federal prisons to-day conditions are deplorable, due to overcrowding. The physical conditions are such that they can not properly care for the vast number of prisoners confined on account of the enforcement of the narcotic law and the prohibition law.

This is simply a step along humane lines in order that proper housing and proper feeding and the question of employment of prisoners may be carefully looked into. I think in the passage of this resolution the House will perform one of its outstanding humane acts of this session.

Mr. CANNON. Will the gentleman yield?

Mr. BOYLAN. Yes.

Mr. CANNON. Is there not the desire on the part of those in charge of local State prisons to which the overflow from the Federal prisons has been sent that some more modern and more equitable arrangement be made as to the agreement which the Federal authorities may make with the local prison authorities in the housing of these prisoners?

Mr. BOYLAN. I believe that is true; and, furthermore, I think conditions are such that we should have additional Federal prisons in this country in order to properly care for Federal prisoners and not have us knocking at the doors of county jails looking for the admission of Federal prisoners and having them admitted to jails where there are not proper accommodations to care for them.

Mr. CANNON. And without the local institutions being adequately compensated.

Mr. BOYLAN. Yes.

Mr. O'CONNOR of New York. Will the gentleman yield?

Mr. BOYLAN. Yes.

Mr. O'CONNOR of New York. The gentleman said something about not getting action. The gentleman had a hearing before the Committee on Rules?

Mr. BOYLAN. Yes.

Mr. O'CONNOR of New York. And the gentleman knows that our committee has been considering this matter and has given it thorough consideration.

Mr. BOYLAN. Yes; I simply stated that in answer to the statement of the chairman of the Judiciary Committee.

Mr. SNELL. So far as the Rules Committee is concerned, I may say that it has given this resolution more consideration than any resolution that has been before it this session.

Mr. BOYLAN. I simply made that statement in answer to the gentleman of the Judiciary Committee who has stated that no effort was made to get action on it.

I want to say that the treatment accorded by the Rules Committee has been splendid. They gave a very extended hearing, for which I am very deeply grateful to them, as well as for their action to-day.

Mr. KINCHELOE. Will the gentleman yield for a question?

Mr. SNELL. Yes.

Mr. KINCHELOE. Is it contemplated that this committee is going to investigate conditions where district courts are held and the prisoners go into various county jails?

Mr. SNELL. So far as they can, in a general way. Of course, they will not visit every county jail in the United States.

Mr. KINCHELOE. But that is contemplated?

Mr. SNELL. In a general way, they will go over the whole situation. It is a very wide resolution if they undertake it all.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

FARM RELIEF

Mr. TILSON. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. WILLIAMS] may address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

Mr. WILLIAMS of Illinois. Mr. Speaker and gentlemen of the House, I desire to discuss briefly the causes of the failure to enact adequate farm relief at this session of Congress.

The farmers of the United States, who have been looking to Congress for legislation that would assist them in marketing the surplus of the great staple food products in a more orderly and profitable manner, are again to see Congress adjourn with no law on the statute books. They will be greatly disappointed, and they have a right to be. They will know that somebody, somewhere, is to blame for this failure to enact proper and helpful legislation for agriculture. Both political parties are solemnly pledged to assist in the enactment of legislation that will put agriculture on an economic parity with industry and labor. Everybody and every party has been for farm relief. Yet another session of Congress is closing, with no legislation, and the problem is apparently no nearer solution than when it was first considered in 1924, and is to be made a political football in a presidential campaign.

The farmers of America have common sense. They are intelligent and fair-minded, and will when they have dispassionately considered the whole matter, fix responsibility for the failure of Congress to enact adequate farm legislation where

that responsibility rightfully belongs. If any person or any group of persons or any political party imagine they can successfully play politics with the farmers of the United States or their economic problems, they are doomed to a certain and a rude disallusionment.

No one was surprised when President Coolidge vetoed the Haugen-McNary bill the other day. Everyone knew he would veto it if it was again presented to him with an equalization-fee provision. No one knew this better than those who sponsored the bill. They knew if Congress passed a farm bill with the equalization fee it meant no legislation at this session of Congress. They proceeded with their eyes wide open, and knew just as well what would happen three months ago as they did the day the veto message reached the Senate.

President Coolidge vetoed this bill in 1927. He based his veto largely on the ground the equalization-fee provision was unconstitutional. He was fortified in his position by an opinion of the Attorney General of the United States stating the scheme was unconstitutional. He was also supported in his position by the ablest constitutional lawyers in the House and Senate. During the debates it has been declared unconstitutional by such eminent authorities as Senator REED of Missouri, Senator BORAH, of Idaho, Senator WALSH of Montana, and in the House by men like Judge MOORE, of Virginia, and Governor MONTAGUE, of the same State.

Mr. CANNON. Will the gentleman yield?

Mr. WILLIAMS of Illinois. I do not yield.

Entertaining these views no one expected President Coolidge to give his approval of that proposition when presented to him a second time.

This was the situation confronting the friends of farm-relief legislation when Congress convened in December. Those of us who had been supporting the equalization-fee principle and who believed the necessity for farm legislation was urgent, were called upon to decide the very serious question of whether we would insist on the equalization fee going into a farm bill again, thus defeating all farm legislation for the session, or whether we would for the time being waive that controversial feature of our farm bill and make an effort to get on the statute books the very best farm legislation possible at this session. The decision we were called upon to make was a very grave one and was of tremendous importance to American agriculture. The decision we made would determine whether we would have legislation or no legislation. We were not passing judgment on whether the equalization fee was sound or unsound, whether it was constitutional or unconstitutional, whether President Coolidge was right or wrong in vetoing the former bill.

We were simply accepting a practical situation as we found it and trying to determine the proper course to pursue in the interests of agriculture.

Before the Christmas holidays, the gentleman from Indiana [Mr. PURNELL] and myself, both being members of the House Committee on Agriculture, undertook to ascertain the sentiment of Members who had in former sessions supported the Haugen bill with the equalization fee. We made a very careful canvass and I think talked with practically every Member, at least on the Republican side, who had voted with us in the last Congress.

Mr. CANNON. Will the gentleman yield?

Mr. WILLIAMS of Illinois. I can not yield.

The sentiment expressed to us was almost unanimous that the equalization fee should be omitted from whatever bill was reported by the Agricultural Committee. I am sure he will bear me out in the statement that less than 20 Members on the Republican side of the House expressed the view that the equalization fee should be included in a bill this year. While I am not in a position to speak definitely as to the sentiment of Members generally on the Democratic side of the House, I can say that many of our friends on that side who heretofore earnestly and consistently supported the equalization fee advised us they favored dropping the fee for this session and passing the best possible bill under the circumstances. It is my opinion, and I measure my words in making the statement, there were not to exceed 50 Members of the House who believed it good policy or in the interest of agriculture to insist on the equalization fee going into the bill this year. That was the undoubted and, I think, the admitted feeling and judgment of Members of the House as they assembled in December for the opening of the session.

Fourteen members of the House Committee on Agriculture out of 21, in formal conferences and in conversations among themselves, agreed that the equalization fee should be omitted from the bill reported by the committee.

This was the situation in the House and in the Committee on Agriculture of the House when hearings on farm relief legislation started in January. At that time spokesmen for certain farm organizations and others who had been active in the support of the Haugen bill with the equalization fee came to Washington. They were informed as to the situation and told that the overwhelming sentiment of friends of agricultural relief legislation in the House favored a bill incorporating as much of our program as we could hope to have approved by the President, eliminating for the present the equalization fee. These gentlemen were told their insistence on the equalization fee meant no legislation at this session and would probably delay legislation for two years. They were told a majority of the committee and a majority of Members of the House felt it would be a very serious mistake to defeat all farm legislation by standing for a program which was doomed to failure.

Very much to the surprise of members of the committee and to the friends of agricultural relief legislation in the House, representatives of the American farm bureau and other organizations affiliated with that organization took the position that the equalization fee must be retained as part of any farm bill enacted.

They took the position that it was better to have no legislation than to have legislation with the fee omitted.

They utterly disregarded the opinions and advice of Members of the House whose friendship for agriculture no one questioned and indicated clearly their intentions to go into the districts of Members and fight them for reelection unless they joined in the program of putting an equalization fee bill up to President Coolidge again.

The attitude of these organizations in insisting on the equalization fee or nothing is clearly shown in the testimony of Chester H. Gray, Washington representative of the American farm bureau when he appeared before the House Committee on Agriculture.

The following questions propounded to Mr. Gray and his answers to the same appear in the record of the hearings:

Mr. WILLIAMS of Illinois. Mr. Gray, you stated in answer to a question by Mr. KINCHELOE that your organization was backing up its original position on the equalization fee?

Mr. GRAY. Yes.

Mr. WILLIAMS of Illinois. That means that you would prefer to have Congress pass a farm relief bill containing an equalization fee, and have that vetoed and get no legislation, rather than have Congress pass the very best possible farm relief bill at this time?

Mr. GRAY. I could not answer your question as you state it.

Mr. WILLIAMS of Illinois. You would rather have no bill than have one without an equalization fee?

Mr. JONES. I would like to have an answer.

Mr. GRAY. I don't agree, neither does this conference—and I think I speak the unanimous voice of the conference—that we necessarily must expect a presidential veto on a bill such as we are now advocating.

Mr. WILLIAMS of Illinois. The President said in his veto message he could not approve it on account of the equalization fee, and he gave two reasons. One was that it was unconstitutional. He undoubtedly will not change his position on that. The other was that it would destroy American agriculture. You don't expect him to sign a bill with an equalization fee in it, do you?

Mr. GRAY. Yes, sir; as this bill is drawn.

Mr. WILLIAMS of Illinois. Then you are the only man in Washington that knows what is going on that even dreams that he will sign it. You are here asking the American Congress, after we have worked seven years, and worked hard, to get some real farm relief, to pass a bill that you and your organization are bound to know is going to be vetoed, and destroy the possibility of getting any kind of relief in this session. I asked you to state, and I think you should state to this committee, because I think the committee has a right to know, and I think the Congress has a right to know, and this country has a right to know, whether you are here now demanding the enactment of a bill containing an equalization fee or nothing.

Mr. GRAY. We are demanding the enactment of a bill containing the equalization fee.

Mr. WILLIAMS of Illinois. You know that means nothing. You are bound to know that.

Mr. GRAY. I do not agree that it means nothing.

* * * * * * *

Mr. PURNELL. Mr. Gray, if I may interrupt Mr. ANDRESEN for just one question: On the other hand, if some of us decide to follow the views of the farm organizations, as we have done here for a number of years, and take the responsibility for sending a bill down to the President which we know now will be vetoed, and we rely upon your judgment and the farmers get no legislation, then you take the responsibility for our action?

Mr. GRAY. We are not shirking that responsibility.

Mr. PURNELL. I say it is a two-edged sword. If we do what we think is right and it does not agree with what you think is right, then we are responsible; but if we follow your judgment and are wrong, that is your responsibility.

Mr. GRAY. That is a very gentlemanly and very exact way of stating it, I believe.

Mr. ADKINS. In other words, if we can not get the bill as suggested by your organization, with the equalization fee in it, your judgment is that we had better not have anything?

Mr. GRAY. That would be our judgment.

Mr. ADKINS. That is what I want to know.

* * * * * * *

The unyielding attitude of farm representatives doomed all farm legislation for the session and created a situation very much to the liking of those who regard political relief more desirable and urgent than farm relief. Full advantage of this situation was taken by those who thought it good politics for themselves to embarrass the President of the United States.

Naturally leaders of the opposition party felt a veto of a farm bill would work to their advantage. It would embitter and turn against the President and his party Republican farmer votes in the agricultural States. Consequently we found ardent and last-ditch equalization-fee advocates springing up overnight. While talking long and loud in public, they were assuring each other in private that they were taking no chances in demanding the equalization fee, as the President was sure to veto it, and it would not become a law, and that would defeat the Republican Party in the agricultural States.

On the Republican side also the opportunity to play politics could not be resisted by those whose chief political strength is in farming the farmer. These gentlemen evidently thought it would be good politics to force President Coolidge to veto a farm bill just before the Kansas City convention, and they left nothing undone to bring about that situation.

The influences I have enumerated—the unyielding attitude of powerful and reputable farm organizations, aided and abetted by those seeking political relief—were sufficient to retain the equalization fee in the bill in the Committee on Agriculture, to pass it through the House, and send it down to the President.

Those who wanted an equalization fee bill or nothing got both their first and their second choice. They got the equalization fee and they got nothing. They ought to be satisfied.

Frantic and violent criticism of President Coolidge will not long mislead the farmers of the United States as to what has really happened to them and will not blind them in fixing responsibility for the failure of farm legislation at this session of Congress where that responsibility rightfully belongs.

There was urgent need for farm legislation at this session of Congress. The farmers expected legislation. They were entitled to it, and a majority of the Members of Congress, especially a majority of the Members of the House of Representatives, were anxious and willing to assist them in getting the very best possible legislation that could be obtained under existing conditions.

Responsibilty for failure must rest with those who, assuming to speak for agriculture, demanded the impossible—those who said we will have just what we want, and all we want, or we will have nothing.

The American people have confidence in President Coolidge. They know that he is honest and that he is courageous. They may disagree with him on matters but they know he will do the right as he sees it at all times without regard to what the political consequences may be to himself or his party. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. WILLIAMS of Illinois. Mr. Speaker, I ask unanimous consent for five minutes more.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. GARNER of Texas. Reserving the right to object, if the gentleman is going to get additional time he ought to yield.

Mr. WILLIAMS of Illinois. I will yield when I am through.

Mr. GARNER of Texas. The gentleman is making a speech now for the farmer when he voted to support the bill. He ought to recognize the right to be interrupted.

Mr. WILLIAMS of Illinois. I am speaking for the farmers and explaining how they were denied legislation.

Mr. HASTINGS. How did the gentleman vote on the McNary-Haugen bill?

Mr. WILLIAMS of Illinois. The gentleman from Texas voted against the bill a year ago and then this session urged his Democratic colleagues, both in the Committee on Agriculture and on the floor of the House, to be sure and retain the equalization fee in the bill because it would be certain to be vetoed and would help the Democratic Party. [Applause on the Republican side.]

Mr. GARNER of Texas. Will the gentleman yield?

Mr. WILLIAMS of Illinois. Yes.

Mr. GARNER of Texas. The gentleman is as accurate about that as he is as to the position of the President of the United States in regard to farm organizations. The gentleman from Texas did not vote against the bill a year ago.

Mr. WILLIAMS of Illinois. The gentleman did not vote; he was against the bill.

Mr. GARNER of Texas. Then why does the gentleman put into the RECORD statements that are erroneous?

Mr. WILLIAMS of Illinois. That was an oversight. The gentleman did not vote; he was against the legislation.

Mr. GARNER of Texas. The gentleman can not point to anything to show that I was against it.

Mr. WILLIAMS of Illinois. The gentleman from Texas was active during the time that the hearing was going on before the Committee on Agriculture, assuring his colleagues in the cloak room that it was good politics to keep the equalization fee in the bill.

Mr. GARNER of Texas. I was only following out what the gentleman from Illinois wanted me to do. He was in favor of the legislation, and I wanted to see him and the farmers get what they wanted.

Mr. WILLIAMS of Illinois. I have been constantly in favor of farm legislation both in the committee and in the House. I voted for the McNary-Haugen bill with the equalization fee in it. I would have been glad to have done it again this session if we had a ghost of a chance to have it written on the statute books. My position was that we ought to have farm legislation. I did not agree with those who took the position that the equalization fee is absolutely essential to legislation that is worth something to agriculture. So I took the position that the majority of the membership in this House entertained in December, that if we wanted to help agriculture and not play politics the thing to do was to report out the best possible bill we could get signed, recognizing the fact that it takes both the Congress and the President to make laws; and, as a member of the Committee on Agriculture, I say to the gentleman that I voted to strike the equalization fee from the bill, and he well knew it, and when that was not done I supported the bill.

Mr. GARNER of Texas. I want to know if the gentleman is not on the Republican steering committee?

Mr. WILLIAMS of Illinois. No; I am not.

Mr. GARNER of Texas. Well, he ought to be. [Laughter.]

Mr. WILLIAMS of Illinois. If I were on the Democratic steering committee, perhaps I could do a better job for the gentleman's party.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield to me?

Mr. WILLIAMS of Illinois. Mr. Speaker, they did not expect him to sign the McNary-Haugen farm bill with its equalization fee. They knew he would not. He had vetoed it once on the ground that it was unconstitutional and unsound. They knew he was supported in his views as to its unconstitutionality by the best legal minds in the country. They would have lost their respect for him if he had yielded to political expediency and signed the bill.

This game of trying to put President Coolidge "in the hole" is not a new one in Congress. During the winter of 1923 and 1924 Congress did little else than play at the game of putting Coolidge in the hole. His suggestions were scouted and his policies were defeated on roll call after roll call. This Chamber resounded daily with the applause of those who were engaged in the delightful pastime of putting him in the hole. A few months later the people marched to the polls and pulled him out of the hole by a plurality of more than 7,000,000 votes. He still has the confidence of the people, and this latest attempt to put him in the hole will recoil on those who schemed it. [Applause on the Republican side.]

The American people know that of all men in public life in this country to-day, Calvin Coolidge is preeminent in courage, and that his integrity is as fixed and rugged as the granite hills of his native State. [Applause on the Republican side.] Nothing but his own positive statement that he will not accept the nomination if tendered him by the Republican convention at Kansas City will prevent him from being the next President of the United States. [Applause on the Republican side.]

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed, with an amendment, in which the concurrence of the House of Representatives was requested, a bill of the House of the following title:

H. R. 13622. An act to amend and supplement the Code of Laws of the United States of America.

The message further announced that the Senate had agreed to the amendments of the House of Representatives to bills of the following titles:

S. 652. An act for the relief of Edgar Travis, sr.;

S. 1191. An act to amend an act of March 3, 1885, entitled "An act providing for allotment of lands in severalty to the Indians residing upon the Umatilla Reservation, in the State of Oregon, and granting patents therefor, and for other purposes";

S. 1297. An act to extend the benefits of the United States employees' compensation act of September 7, 1916, to Alice E. Moore;

S. 1541. An act for the relief of George A. Robertson;

S. 3314. An act for the relief of John J. Fitzgerald;

S. 3931. An act for the relief of Augusta Cornog; and

S. 3991. An act declaring certain designated purposes with respect to certain parts of Santa Rosa Island in Florida, to be "public purposes" within the meaning of the proviso in section 7 of the act approved March 12, 1926, entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes."

The message also announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 7492. An act for the relief of Capt. Louis C. Brinton;

H. R. 12952. An act to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by act of March 6, 1920;

H. R. 13108. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a toll bridge across the White River at or near Newport;

H. R. 13248. An act to authorize an increase in the limit of cost of one fleet submarine;

H. R. 13651. An act granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Choctawhatchee River in Dale County on the highway now under construction from Dothan to Enterprise; and

H. R. 13996. An act granting the consent of Congress to the board of supervisors of Leake County, Miss., to construct, maintain, and operate a free highway bridge across the Pearl River at or near Edinburg, Leake County, Miss.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House was requested bills of the House of the following titles:

H. R. 13930. An act to authorize an appropriation for the American Group of the Interparliamentary Union;

H. R. 11463. An act to fix the salaries of certain judges of the Territories and insular possessions of the United States; and

H. R. 12064. An act to discontinue certain reports now required by law to be made to Congress.

SAFETY OF SUBMARINES

Mr. FRENCH. Mr. Speaker, I ask unanimous consent to proceed for two minutes.

The SPEAKER. The gentleman from Idaho asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. FRENCH. Mr. Speaker and gentlemen of the House, when the second deficiency appropriation bill was considered in the Senate, an item was added of $20,000 for the purpose of authorizing the Navy Department to make certain investigations and appoint experts to assist in the work in connection with submarine disasters, the proposition doubtless growing out of the *S–4* disaster. That amendment was eliminated in conference. Since the House approved the action of the conferees, the question has been raised whether or not anything is being done or will be done looking to the further study of the submarine question, especially from the standpoint of safety. The reason the item was eliminated by the conferees was because the naval appropriation act for the coming fiscal year, and which had been signed by the President less than 10 days previously, carried not $20,000, but $200,000 for the work that could have been accomplished under the $20,000 item carried in the deficiency appropriation bill. As a matter of fact, we made the amount of money immediately available, and the department is proceeding at this time with the work of studying the problem of submarines, having particularly in view the thought of eliminating disasters that may result in loss of life and destruction of property. Already very great attention has been paid to the subject by the department, and for this work the measure already passed carried the amount of money that experts within the department had indicated to the members of the subcommittee that framed the Navy bill could be reasonably and wisely expended for this important undertaking.

Mr. FISH. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. Is there objection?

There was no objection.

SUBMARINE SAFETY APPLIANCES—VETERANS' CREDIT IN CIVIL-SERVICE EXAMINATIONS

Mr. FISH. Mr. Speaker, I take this opportunity to make a few remarks along the lines of those of the gentleman from Idaho [Mr. FRENCH]. About two years ago the gentleman from New York [Mr. GRIFFIN], after the disaster to the *S–51*, spoke in this House and advocated certain safety devices which the Navy Department proceeded to ignore, and, as a result, when the *S–4* was sunk, the lives of the crew were lost. If the advice of the gentleman from New York [Mr. GRIFFIN] had been taken I think it fair to say that the lives of every one of those men would have been saved. The present Congress has appropriated $200,000 in order to permit the Navy Department to go ahead immediately with their research work to develop practical safety devices for use in submarines and for taking the crew out of disabled submarines. It does not do any good to criticise the Navy Department for what has taken place in the past, but that department now has ample funds available to construct emergency devices to save the lives of any men who may go down in submarines.

A friend of mine from New York City, Mr. John F. O'Rourke, a prominent consulting engineer, who has built many of the subways under New York and has given years of expert study to the construction and use of compressed-air chambers, has suggested a plan to lower a diving bell or compressed-air chamber by a derrick upon the hatch of a sunken submarine. This is a very simple, practical device, which will not cost more than $5,000. I have been assured by the Navy Department, by the officers in charge of construction, that they are now proceeding with the $200,000 allotted by Congress to make a diving bell or compressed-air chamber along the design presented by Mr. O'Rourke to lower down upon the hatch of a submarine. All that is necessary is to put a ring around the hatch with clamps on it, and then simply to lower this compressed-air chamber upon or near the hatch, there being weights in the bell to move it around, and after attaching the clamps and regulating the compressed air to permit the men in the sunken submarine to come out through the compressed-air chamber, which would hold its own crew of several men and have telephone connections.

In all of the accidents to submarines in this country never once has the Navy Department saved the men who have gone down in the submarine. Now, with $200,000 available for research work and the construction of safety devices and with the O'Rourke design and 3,500 others that need analysis, I am hopeful for once that Congress can adjourn feeling assured when they adjourn that the Navy Department will do its full duty, and that the lives of men who may go down in submarines will be saved in the future. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. FISH. Mr. Speaker, I ask unanimous consent to proceed for two minutes more.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BLACK of New York. Mr. Speaker, will the gentleman yield on that subject, before he leaves it?

Mr. FISH. I yield to the gentleman, briefly.

Mr. BLACK of New York. I would like to point out to the gentleman that this $200,000 appropriation was inserted by the Senate Committee on Appropriations on the motion of the senior Senator from New York [Mr. COPELAND], who received the amendment from myself, with an application from the New York Navy Yard. It is for the increase of the Navy. It provides for plans and specifications for three fleet submarines authorized in 1916 and four destroyers.

That is the kind of contribution made by this Congress to the increase of the Navy. It was thought at the time it was put in to be a purely submarine safety device.

Mr. FISH. I think the gentleman is in error. I believe that appropriation was put in as the result of House Joint Resolution 131, introduced by our beloved deceased colleague, Thomas Butler of Pennsylvania, and that when the Senate refused to agree the House Committee on Appropriations in charge of naval appropriations authorized $200,000 for research work. Is that correct?

Mr. FRENCH. I think the gentleman from New York [Mr. BLACK] is speaking about an entirely different subject from that which I was discussing and which is now being discussed by my colleague [Mr. FISH] from New York. The item to which we are referring is the $200,000 item included in the regular Naval Establishment bill; an item that was put in on the House side; an item that I would say originated within the subcommittee itself, and after further discussion with the department and others it was the subject of a special estimate from the Bureau of the Budget, in the amount of $200,000. The item to which the gentleman from New York [Mr. BLACK] seems to have referred was another item of $200,000 carried in the second deficiency bill and which provided for plans for construction of new submarines, and not for the study of safety devices.

The SPEAKER pro tempore. The time of the gentleman from New York has again expired.

Mr. FRENCH. Mr. Speaker, I ask that the gentleman may have five minutes more.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. FISH. The House passed yesterday afternoon House Joint Resolution 238 introduced by me, providing for 5 points credit to all veterans and 10 points to all disabled veterans in civil-service examinations. The Senate acquiesced unanimously in last night's session and the resolution now goes to the President for signature. We all know that Congress has been liberal in providing compensation, hospitalization, and rehabilitation for our disabled veterans, but we have done very little to secure jobs for the disabled, and that applies not only to the present Republican administration but to the prior Democratic administration under President Wilson. We have not been able to break down the red tape so that the crippled veterans can get a job, to help in providing for their families.

The Congress of the United States has appropriated large sums for our disabled veterans, and the United States Veterans' Bureau under General Hines has administered these funds honestly and efficiently in the interests of the disabled veterans of the World War. There are still a number of claims that need adjustment and there yet remains those claims where there is difficulty in proving war origin which need adjudication. We are spending over a million dollars a day on our disabled and no American begrudges the expenditure. We have, however, fallen down badly on the main objective of finding positions for the disabled and thereby helping the veterans to help themselves. They do not seek charity but an opportunity to work for a living and to support their wives and families. It is true that banks and large private concerns have employed a number of our disabled veterans, but that does not excuse the Government or free it from further obligation. The Government has given a large measure of lip service through public statements, but has failed lamentably to help the disabled obtain positions in the Federal service through the one agency under its control—the United States Civil Service Commission.

It is not a pleasant duty for me to arraign the members of the Civil Service Commission for lack of sympathy for the disabled veterans, but the facts speak for themselves. The Executive order of March 3, 1923, issued by President Harding, requires the commission to add 5 points to the earned rating of the veteran, and 10 points to the disabled veteran, when he takes an examination for a civil-service position, but the commission refuses to live up to either the spirit or the letter of that Executive order.

Frequently the disabled veteran who applies and takes the examination does not receive this preference of 10 points. The commission has justified its action by a ruling whereby the 10-point advantage is not allowed unless the candidate receives 60 per cent in his written test. Consequently the disabled veteran who receives 59 or less gets no preference and is not allowed to qualify for the ensuing oral and character test, whereas the nonveteran with 60 per cent is. The same arbitrary ruling applies to the able-bodied war veterans with 5-point preference as to the disabled veterans. There are 559,138 Federal civil service employees with a turnover of approximately 40,000 a year.

It seems to me there is a duty on the part of the Government to see that the disabled veterans are given a chance to earn a livelihood when Government positions are open. I do not ask that the present employees be thrown out, but with 40,000 positions available each year I believe the veterans should be given preference in filling them. The high-handed and arbitrary action of the commission helps to shut the door to these jobs in the face of the American veterans of both the Spanish and the World War, and defeats the very object of the existing Executive order. There has been no armistice for many of these disabled veterans, yet the United States Civil Service Commission sits back in smug complacency and has declined to grant the prescribed preference to the disabled veterans. If the commissioners continue to act in contravention to the Executive order they should be asked to resign and some disabled veterans appointed in their places.

The number of disabled veterans in the Government service is criminally small. Ask the American Legion, Veterans of Foreign Wars, Disabled American Veterans, or the Spanish War Veterans. They know the facts and the difficulty in getting a job for a disabled veteran on account of the civil-service regulations. Go to the various departments in Washington and see how many disabled veterans of the World War are working for the Government; go to the National Museum or the Smithsonian building, where practically every man should be a disabled veteran and you will find only two. There are 368 men employed by the National Museum, Smithsonian, and so forth, and only two are disabled veterans of the World War. Eighty per cent of the positions are for watchmen or guards and the very place for disabled soldiers. One of the disabled without a leg is a guard at the Freer Art Gallery and the other without an arm is watchman at the Zoological Park. Go to the Museé du Louvre, or to any other of the French, British, or German public buildings or museums and you will find practically all the guards and guides disabled soldiers with one arm or one leg or badly crippled or gassed. The American people have repeatedly made promises and given pledges to care for our disabled and they want to keep faith by helping them to fill every available position in the Government service for which they are qualified.

I get no satisfaction in criticizing the Civil Service Commission; what I want is favorable action; to get action it is necessary to place the blame publicly where it belongs on the commission which will probably issue a long statement proclaiming its innocence and devotion to the disabled. It is acts not words that counts. It is jobs not excuses or arbitrary rulings that help the veterans and keeps faith with them.

There are 170 men employed by the United States Civil Service Commission, all with civil-service status, and yet just one disabled veteran of the World War. The proof of the pudding is in the eating. What kind of preference can the disabled American veteran expect from the United States Civil Service Commission which only employs one disabled World War Veteran on its own force.

It might also be interesting to know, although I do not want them thrown out unless they were slackers, how many of the employees now holding jobs under the Civil Service Commission were appointed during the war, when the disabled veterans got their wounds and disabilities.

It is time for us to wake up to the fact that we have not been getting jobs in this country for our disabled soldiers under the Federal Government. I hope when we come back we shall be able to enact some more legislation that will give real preference to disabled soldiers and help place them in Federal positions where they can earn their living. [Applause.]

MEMORIAL DAY SPEECH

Mr. FISH. Mr. Speaker, I ask unanimous consent to extend my remarks.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. FISH. Mr. Speaker, under leave to extend my remarks in the RECORD, I insert the following speech, which I will deliver to-morrow, May 30, at Warwick, N. Y.:

It is fitting that the American people should pause in their daily tasks and do honor and pay tribute to the heroes of all our wars and bedeck their graves with flowers.

It is just 10 years ago to-day that the onrushing victorious German armies captured Chateau Thierry and reached the Marne, where they were stopped by the Second and Third American Divisions. The German offensive the end of May, 1918, took the French by surprise. It was the most successful major operation on the western front, and in three days the German Army advanced from the Chemin des Dames with little loss to Chateau Thierry, on the Marne, capturing 60,000 prisoners and 500 field guns, to be finally checked by American troops. It was our first important military contribution toward winning the war.

We should not only pause on Memorial Day to pay our homage to these veterans who paid the supreme sacrifice and to those who have gone beyond, but we should ask ourselves if we have kept faith with our pledges that this was a war to end wars. It is true that for 10 years our efforts have been faltering and faint-hearted, but a new dawn of world peace has suddenly appeared on the horizon as a result of the proposal of Secretary of State Kellogg to renounce war as an instrument of national policy between the six great nations of the world, which has already been accepted in principle by all of them.

As a Representative in Congress from this district I am glad to state that I spoke in Congress and urged the outlawry of wars of aggression

three years ago. The outlawry of war is one of those foolish ideas that remain foolish until realized. Six months ago every diplomat in Europe thought such a proposal crazy, and to-day it is dominating the whole diplomacy of Europe and of the civilized world. It is not a question at this moment of disarmament, but if the scheme works then practical disarmament will follow. We are in the midst of the greatest bloodless revolution in the history of the world—the outlawry of war and substitution of arbitration and justice. The time is fast approaching when swords will be beaten into plowshares and spears into pruning hooks and nation shall not arm against nation. This bloodless revolution is the work of the ex-service men. It is the result of their sacrifices and hardships and would have been different if we had lost the war. The credit belongs to them.

It is our duty to strive to prevent wars, to outlaw wars, and to do away with this curse of mankind. There is an overwhelming desire for peace among the thinking people throughout the world because they know that there is no human excuse for the barbaric, savage, and antiquated method of settling international disputes by bloodshed and the killing of our fellowmen. It is now 10 years since the armistice yet war as an institution is just as legitimate as it has been since the dawn of history. If the Emperor of Japan declared war on us to-morrow, it would be just as legal and lawful as for American citizens to belong to a church or to send their children to public schools.

Have we already forgotten that there were 10,000,000 selected men of the enlightened nations slaughtered in the World War, 5,000,000 more maimed, and hundreds of billions of dollars of the savings of generations consumed for destructive purposes? We have done nothing, attempted nothing to destroy the legality of the war system. The only time to fight war and try to prevent future wars is in time of peace.

The hopes and aspirations of humanity are written in the Kellogg proposal, here is a program that the peace-loving people of the world can agree upon. If the six leading powers will mutually agree to renounce war, except for self-defense, the peace societies can get ready to disband. The multilateral treaty presented by Secretary Kellogg to outlaw war goes far beyond the wildest dreams of the League of Nations. The substitution of arbitration, mediation, conciliation, and judicial processes for arbitrament by bloodshed is not visionary or impractical. It is nothing more than a great human proposal for the benefit of humanity and the maintenance of civilization.

The conscience of the thoughtful people of the world is awake to the obligations to promote peace, and woe to the nation that stands in the way. The people of the world know the horrors and folly of the war system and are united in demanding its abolition. No nation or people will want to take the responsibility of blocking the road to peace or preventing the leading nations of the world from combining to outlaw war and thereby turning their undivided efforts to abolishing ignorance, poverty, disease, and crime—the four great remaining enemies of mankind. Let us unite in support of true international Christianity and write into a treaty this international desire for world peace, this vision of a better world in which reason and justice will be substituted for violence and war among civilized nations.

We are accustomed to hearing our diplomacy jeered at and belittled and often overreached by foreign diplomats. We can well afford to ignore such criticism, as our American foreign policy has won a notable triumph for world peace. We have proposed to renounce war in spite of the fact that we are the richest and most powerful nation in the world. Every American citizen should feel proud of our honest and sincere efforts and active leadership in urging a world-wide renunciation of war as an instrument of national policy.

RESIGNATION FROM COMMITTEES

The SPEAKER. The Chair lays before the House the following communications which the Clerk will report.

The Clerk read as follows:

MAY 29, 1928.

Hon. NICHOLAS LONGWORTH,
Speaker of the House of Representatives.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Committee on the Post Office and Post Roads.

Yours very truly,

C. W. RAMSEYER.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

The SPEAKER. The Chair also lays before the House another resignation, which the Clerk will report.

The Clerk read as follows:

MAY 29, 1928.

Hon. NICHOLAS LONGWORTH,
Speaker of the House of Representatives,
Washington, D. C.

MY DEAR MR. LONGWORTH: I herewith tender my resignation as a member of the following committees: Banking and Currency, Library, Irrigation and Reclamation.

Very truly yours,

JOHN C. ALLEN.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

The SPEAKER. The Chair also lays before the House another resignation, which the Clerk will report.

The Clerk read as follows:

MAY 29, 1928.

To the honorable the SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D. C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Committee on Irrigation and Reclamation, the Committee on Flood Control, the Committee on Merchant Marine and Fisheries, and the Committee on the Library, said resignation to take effect immediately.

Yours very truly,

F. M. DAVENPORT,

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

ELECTION TO COMMITTEES

Mr. TILSON. Mr. Speaker, I send to the Clerk's desk three resolutions and ask unanimous consent for their immediate consideration.

The SPEAKER. The Clerk will report the resolutions.

The Clerk read as follows:

House Resolution 234

Mr. TILSON submitted the following resolution:

"*Resolved*, That DANIEL R. ANTHONY, Jr., of Kansas, be, and he is hereby, elected chairman of the Committee on Appropriations."

House Resolution 235

Mr. TILSON submitted the following resolution:

"*Resolved*, That FRED A. BRITTEN, of Illinois, be, and he is hereby, elected chairman of the Committee on Naval Affairs."

House Resolution 236

Mr. TILSON submitted the following resolution:

"*Resolved*, That the following Members be, and they are hereby, elected members of the following-named standing committees of the House, to wit:

"C. WILLIAM RAMSEYER, of Iowa, and FREDERICK M. DAVENPORT, of New York, Committee on Ways and Means.

"JOHN C. ALLEN, of Illinois, Committee on Appropriations.

"JOSEPH L. HOOPER, of Michigan, Committee on the Library."

The SPEAKER. Without objection, the resolutions will be respectively agreed to.

There was no objection.

ESTATE OF HALLER NUTT, DECEASED

Mr. HOOPER. Mr. Speaker, I call up a conference report on the Senate bill 1769.

The SPEAKER. The Clerk will read the conference report.

The conference report was read.

The conference report is as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1769) entitled "An act for the relief of the legal representative of the estate of Haller Nutt, deceased," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendments of the House numbered 1, and agree to the same.

Amendment numbered 2: That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment as follows: In lieu of the amount inserted by the House amendment insert the following: "$75,000"; and the House agree to the same.

JAMES G. STRONG,
JOSEPH L. HOOPER,
B. G. LOWREY,
Managers on the part of the House.

GERALD P. NYE,
W. H. MCMASTER,
H. D. STEPHENS,
Managers on the part of the Senate.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

EXTENSION OF REMARKS

Mr. WOOD. Mr. Speaker, I ask unanimous consent that the gentleman from Tennessee [Mr. BYRNS], who is the ranking member of the Committee on Appropriations, and myself, as

ranking member on the Republican side, may have 10 legislative days in which to file a statement, respectively, in reference to the accomplishments of this Congress.

Incidentally, I would like to ask the gentleman from Georgia [Mr. LANKFORD] to withdraw his objection to my request to insert in the RECORD the speech made by the gentleman from Indiana [Mr. PURNELL].

Mr. LANKFORD. Mr. Speaker, I wish to state that I now withdraw my objection to the request made by the gentleman from Indiana and willingly and gladly consent to the request. [Applause.]

The SPEAKER. The gentleman from Indiana asks unanimous consent that he and the gentleman from Tennessee [Mr. BYRNS] be allowed 10 days in which to extend their remarks on the accomplishments of the Congress. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Indiana renews his request, to which objection has been withdrawn by the gentleman from Georgia, that he be allowed to extend his remarks in the RECORD by printing an address delivered by the gentleman from Indiana [Mr. PURNELL]. Is there objection?

There was no objection.

REVIEW OF APPROPRIATIONS, BUDGET ESTIMATES, AND OTHER GOVERNMENT FINANCES

Mr. WOOD. Mr. Speaker, the close of the first session of the Seventieth Congress brings us to that stage in the political life of the Government and parties where a mere recital of the work of the past session would be an incomplete account of the stewardship of the party which has been in full control of the Government for the last seven years and in partial control during the last nine years. We have passed through a financial epoch in Government and an historical résumé of the achievements of the Republican Party during that period reveals a record of financial accomplishment so courageous, so steadfast, so sound, and so successful that it is not equaled in the history of any nation.

The Republican Party came into power in the Congress on March 4, 1919, as a result of the elections of the fall of 1918. The new Congress was summoned into extra session by President Wilson on May 19, 1919. President Harding took office on March 4, 1921, as a result of the elections of the fall of 1920. The record made by the Republican Congress during the two years from 1919 to 1921, while the administration was Democratic, and by the Republican Party in full control of the executive and legislative branches of the Government since 1921 under Presidents Harding and Coolidge, has been a constant succession of events of good administration and sound business management.

Upon assembling in extra session in 1919 the Republican Congress was confronted with innumerable and difficult fiscal problems, both domestic and foreign. The country had just emerged from a devastating war, the administration of which had been characterized by gross waste and extravagance. Government expenditures were on a scale which no nation could long endure. Loans in huge and staggering sums had been made to foreign governments without any understanding as to the basis of repayment. Administrative officials were striving to hold at swollen strength many of the enlarged activities of the Government, particularly the military and naval arms. The host of Federal employees assembled during the period of the conflict was not being demobilized with the rapidity that the cessation of war activities would permit. The public debt and the annual interest charge were a burden upon the resumption of normal financing. Taxation was crushing the individual and stifling business. The American people were demanding a speedy resumption of normal conditions in the finances of the Government as an imperative relief to them and as an example and healthy impetus to industry.

The reduction of taxes, the curtailment of the public debt, the decrease of swollen Federal activities, and the return to a normal state of affairs could not be accomplished without a drastic reduction of expenditures, and that could only be had by a decrease in appropriations.

Upon assembling in extra session May, 1919, the new Republican Congress was confronted with the duty of passing, before the commencement of the fiscal year on July 1, 1919, eight of the largest of the appropriation bills which the Democratic Congress had failed to enact into law before it went out of power. Those bills at the time of their failure were all pending in the Senate. The amounts carried in them at the time of their failure aggregated $3,768,000,000. The total of the same eight bills after their repassage was $2,828,000,000. The first legislative action of the new Congress resulted in the passage of these bills before the fiscal year began and in the decrease of the appropriations proposed by the Democratic Congress for the fiscal year 1920 by $940,000,000. The estimates for the fiscal years ending June 30, 1921, and June 30, 1922, respectively, and deficiency estimates for prior years, were prepared by the Wilson administration and submitted to the Republican Congress. They were predicated upon that same basis of extravagant administration which had characterized the conduct of the administration even during the war period. The reductions made by the Congress in these estimates aggregated slightly more than $2,950,000,000. The total reductions which the Republican Congress effected in the amounts proposed to it by the Democratic administration for the fiscal years 1920, 1921, and 1922 reach $3,890,000,000, a sum almost as great as the total appropriations for the next fiscal year.

In addition to the reduction effected in the estimates of the Democratic administration and the bills of the Democratic Congress, the succeeding Republican Congresses in connection with the appropriation bills have brought about the repeal of war-time appropriations, which were on the books and subject to expenditure, totaling approximately $1,500,000,000.

The new Congress at once realized that the conduct of the finances of the Government, according to safe principles, could not be accomplished without the inauguration of a systematic procedure. It accordingly prepared and presented to President Wilson the Budget bill. His veto of that legislation postponed until the advent of the Republican President the enactment of that important measure. The new law was signed by President Harding on June 10, 1921. Its operation has covered the period of seven fiscal years of administration and the preparation of the budgets for eight full fiscal years. The initiation of the system under the leadership of President Harding and the successful administration and faithful adherence to its principles by President Coolidge take high place in the outstanding events in executive administration of the affairs of government. To President Coolidge is due great credit for his courageous and unswerving leadership in fiscal administration under the Budget. His tenacity and integrity of purpose in insisting upon an economic and efficient conduct of the business of government have given to his subordinates a leadership in fiscal matters that has been immeasurably productive of efficient administration.

The Congress has cooperated with the Executive in the operation of the Budget in the fullest sense. In no year since the establishment of the new order has the Republican Congress exceeded the aggregate of the requests for funds submitted by the President, and on important points of difference involving matters of major policy there has been full consultation and adjustment and no serious or insurmountable differences in Budget policy. The full success of the Budget system through the years since its establishment has been due entirely to the complete accord between the President and the Congress on matters of fiscal policy.

The efforts of the Republican Party to decrease the expenses of the Government commenced in 1919. The last appropriations made by the complete Democratic administration, even after the Republican House at the succeeding Congress had eliminated $940,000,000 from certain of the bills, totaled $7,272,000,000. The appropriations made at this session, nine years later, are still $2,644,000,000 less than the final record of a Democratic administration.

Expenditures are directly dependent upon the appropriations. The decrease of the former can not be accomplished without a reduction of the latter. The actual expenditures for the fiscal year 1920, including public-debt retirements payable from ordinary receipts and excluding the Postal Service payable from the postal revenues were $6,141,000,000. The expenditures during the fiscal year 1921, the first fiscal year in which Republican control came into all branches of the Government, were $5,538,000,000. The estimated expenditures for the fiscal year 1928, which closes on June 30 next, on the same basis as those given above, are $3,658,000,000. The decrease in expenditures since 1920 and 1921, respectively, are $2,483,000,000 and $1,880,000,000.

The reduction in appropriations and expenditures outlined above has been accompanied by a very favorable condition of the Treasury. Commencing with the fiscal year 1921, and including the estimated condition for the current fiscal year, the excess of ordinary receipts over ordinary expenditures is as follows:

Fiscal year:	
1921	$86,723,000
1922	313,801,000
1923	309,657,000
1924	505,366,000
1925	250,505,000
1926	377,767,000
1927	635,810,000
1928 (estimated)	413,000,000

The total of the surpluses in the Treasury for the eight years under Republican control has amounted to $2,892,629,000.

The reduction in Government expenditures and the recurring surpluses in the Treasury have resulted in two very gratifying financial operations, namely, tax reduction and decrease in the public debt. The gross public debt at its peak point, August 31, 1919, totaled $26,600,000,000. The gross debt on May 31, 1928, was $17,755,000,000. This shows a reduction from the peak of $8,845,000,000 in approximately nine years, or an average reduction per year of nearly $1,000,000,000.

The largest amount of interest paid on the public debt in any fiscal year was in 1920, when there was disbursed in interest payments $1,024,000,000. The estimated interest charge for the next fiscal year, which commences on July 1 next, is $670,000,000. This will be a decrease in the amount of interest on the public debt from the fiscal year 1920 of $354,000,000. While the very great part of this decrease in the annual interest bill has been due to a decrease in the amount of the outstanding debt, there is a considerable proportion of it attributable to the splendid refunding operations which have been conducted under the able direction of the Secretary of the Treasury, Hon. Andrew W. Mellon.

The refunding of the second Liberty loan at lower rates of interest on the securities issued to replace those retired as a part of the refunding operation, represents a decrease in interest alone of $21,000,000. The average rate of interest on the outstanding interest-bearing debt of the United States on December 31, 1927, was 3.88 per cent compared with an average rate of 4.29 per cent in 1921. This decrease in the average rate has been brought about gradually by refunding operations and represents an annual saving of approximately $72,500,000, the difference between interest at the average of 4.29 per cent and interest at an average of 3.88 per cent on the amount of the interest-bearing debt outstanding on December 31, 1927.

The aim of the Republican Party from its partial assumption of control of the Government in 1919 and throughout its full control has been to grant relief from taxation. Decreases in appropriations, expenditures, public debt, interest charges, and other retrenchments lead to this natural sequence. Four substantial decreases in taxation have been effected. The revenue acts of 1921, 1924, 1926, and 1928 have granted extensive relief both to the individual and the corporate taxpayer by the reduction of direct taxes on incomes, the elimination of many of the indirect taxes that constitute a burden on business and the individual though not tangibly sensed, and the increase in the exemptions allowed both to individuals and corporations. The revenue act of 1924 by the increase of personal exemptions freed approximately 3,400,000 taxpayers in the lower income brackets. The relief to the individual and to business, the stimulation of industry and private enterprise, due to the lifting of the burdens of taxation by the Federal Government, can readily be visualized and understood by a glance at the amounts removed from the American public by the enactment of these four laws:

The reduction under each act, arrived at by a comparison of the receipts during the first fiscal year under the new act with what might have been collected if the reduced rates had not been made effective, is as follows:

Revenue act of 1921	$663,000,000
Revenue act of 1924	519,000,000
Revenue act of 1926	422,000,000
Revenue act of 1928 (estimated)	222,000,000
Total reductions	1,826,000,000

As indicated by the foregoing tabulation, the total accumulative reduction in taxation under these four acts is $1,826,000,000. It is no challenge to the cold facts of history or to the fervid fancy of imagination to say that such an achievement is unparalleled anywhere in the history of governments. While this lifting of burdens has been taking place in the Federal Government, both in the matter of debt reduction and tax relief, the tendency in State and municipal affairs has been in the other direction. To sense the beneficence of the suspension of this aggregate amount from the economic and financial life of America one need only to contemplate for a fleeting second the damper that would be placed upon our material progress if there should be restored to our statutes a tax bill designed to raise approximately $2,000,000,000 a year in revenue. Each successive act cutting tax rates has been productive of an impetus to business and a larger happiness and comfort for the entire American public. We are enjoying now the fruits of this relief, and the results to come from the revenue act of 1928 will be a further stimulus to prosperity and a greater incentive to industry.

The advent of Republican control found unsettled and in a chaotic condition the status of the loans made by the United States to foreign governments during the period of the war. Evidences of the loans were in most instances in memorandum form only and with little tangible evidence of any basis on which the loans were made. Agreements have now been entered into with all of our foreign debtors. All of the settlements have been ratified except the agreement with France. These adjustments have been effected in sums less than the face value of the amounts loaned, which aggregated nearly ten billions of dollars. The United States has dealt honorably and fairly in these funding agreements. The nations with whom we negotiated suffered tremendously in loss of man power, material resources, and earning power, and the inevitable solution lay, not in the harsh position of a creditor insisting on a return of dollar for dollar, but in the more generous attitude based upon the ability of the nations to pay. In general, the terms of payment extend over a period of 62 years, and the aggregate of principal and interest to be received by the United States approximates $22,000,000,000. Payments have been received under these agreements, the amount during the fiscal year 1927 being $206,000,000, of which $46,000,000 represented payments on principal and $160,000,000 payments on account of interest. The disposition of this phase of our foreign relations marked the termination of a very vexatious, delicate, and exceedingly human problem in a most satisfactory manner. Great credit is due the Secretary of the Treasury and the World War Debt Funding Commission for the efficacious manner in which they have handled this unusual diplomatic situation.

It is appropriate at this point to call attention to the reductions made by Congress in estimates of appropriations since the inauguration of the Budget system. Seven sets of Budget estimates, including the regular annual Budget and the supplemental and deficiency estimates, have been transmitted to Congress since the passage of the Budget and Accounting Act in 1921. The net reductions effected by Congress in each of the seven sets of estimates are as follows:

Fiscal year 1923 and prior years (67th Cong., 1st and 2d sess.)	$312,361,792.27
Fiscal year 1924 and prior years (67th Cong., 3d and 4th sess.)	10,741,504.15
Fiscal year 1925 and prior years (68th Cong., 1st sess.)	9,024,637.08
Fiscal year 1926 and prior years (68th Cong., 2d sess.)	12,596,495.90
Fiscal year 1927 and prior years (69th Cong., 1st sess.)	6,716,064.34
Fiscal year 1928 and prior years (69th Cong., 2d sess.)	7,752,939.03
Fiscal year 1929 and prior years (70th Cong., 1st sess.)	9,331,779.05
Total reduction effected by Congress in estimates of appropriations since establishment of the Budget system	368,525,211.82

A widespread misapprehension prevails throughout the country that the Congress is grossly extravagant and has exceeded the recommendations made by the President for Government expenditure. The foregoing table is ample and accurate proof of the fact that in no year since the Budget became operative has Congress exceeded in the aggregate the requests of the President. On the other hand, except in the first year of Budget procedure, the margin of difference between what the President requested and the amount Congress granted has been small.

A reduction of $368,500,000 by Congress in Budget proposals in a period of seven years under the Budget law, and the decrease of $3,890,000,000 by the Republican Congress during 1919–1921 under the proposals of the Democratic administration, are satisfactory evidence of the part Congress has taken in restoring and keeping expenditures to a normal basis and in paving the way for debt reduction and tax relief. A comparison of the reductions in estimates for the two periods is further evidence of the soundness of Budget cooperation between the President and Congress during the past seven years.

The total of estimates submitted during the present session by the President in the December Budget, and from time to time during the session in supplemental and deficiency Budget estimates, aggregated $4,637,376,814.14. The total appropriations made by Congress in all acts and including the amounts under the permanent and indefinite appropriations is $4,628,045,035.09. The total of appropriations is $9,331,779.05 less than the total of all estimates. A comparison of the estimates submitted for each of the appropriation acts and the amounts appropriated in

each of those acts will be found in Table A, appended to this statement. The following recapitulation shows the reduction in the estimates for the regular annual and the deficiency bills and the net reduction in all estimates:

Estimates submitted in the Budget, transmitted in December, 1927, for the fiscal year 1929	$4,258,793,765.53
Supplemental estimates submitted during the session for consideration in connection with the regular annual bills for the fiscal year 1929	$22,071,319.38
Total estimates for regular annual bills and under permanent appropriations	4,280,865,084.91
Total appropriations in regular annual bills and under permanent appropriations	4,280,290,329.81
Reduction effected by Congress in the estimates for regular annual bills	574,755.10
Supplemental estimates submitted during the session for consideration in connection with deficiency and other bills, primarily for the fiscal year 1928 and prior fiscal years	356,511,729.23
Total appropriations made in deficiency and other acts	347,019,705.28
Reduction made by Congress in estimates for deficiency bills	9,492,023.95
Total reduction made by Congress in estimates for regular annual and deficiency bills	10,066,779.05
Deduct appropriations made in special acts for payment of claims and other special items for which estimates were not transmitted by the President (approximated)	735,000.00
Net amount by which total appropriations are less than total estimates	9,331,779.05

In arriving at the net reduction of Budget estimates only three significant increases have been made in the totals of any of the appropriation bills. The agricultural bill is $1,008,954 in excess of Budget recommendations, due primarily to the addition of $1,000,000 to the appropriation for forest roads and trails, bringing the amount from $6,500,000 to $7,500,000, to correspond to the authorization provided by law. The War Department appropriation bill is $6,655,208.50 in excess of the Budget, due in the main to the increase of the appropriation for rivers and harbors to provide for improvement of the Missouri River. The naval appropriation bill is $880,905 in excess of Budget recommendations, mainly on account of an increase from 83,250 to 84,000 in the enlisted strength. All other bills are at substantially Budget figures or sufficiently under to offset the major increases made in these three instances.

The net reduction of $9,331,000 in total Budget estimates has not been arrived at by any arbitrary method. The net is reached by a large number of small increases and decreases widely distributed over the entire service. The Budget estimates have not been accepted just as submitted. Each paragraph has been carefully scrutinized by the committee and full explanation and justification for the amount required from those defending the requests. The preparation of a budget for a government with as diverse interests and ramifications as those of the United States is a complicated and difficult task. There must be denials and disappointments. After seven years of experience it can safely be said that we have made steady progress.

The total of all appropriations made at this session will be found in Table B. They may be summarized as follows:

Total in regular annual acts	$2,906,585,736.28
Total in deficiency acts	346,954,705.28
Total in miscellaneous acts	800,000.00
Total of permanent and indefinite appropriations	1,373,704,593.53
Total	4,628,045,035.09

This latter sum, classified according to fiscal years, shows the following results:

Fiscal year 1929	$4,322,148,922.06
Fiscal year 1928	283,409,395.22
Fiscal year 1927 and prior years	22,486,717.81
Total	4,628,045,035.09

For the information of those who desire to visualize by large groups the principal objects of appropriation made at this session for the fiscal year 1929 and prior years, I shall insert the following tabulation:

Interest on the public debt	$670,000,000.00
Sinking fund and other public-debt retirement funds	541,623,393.53
Veterans' Bureau, including insurance, compensation, hospitalization, adjusted compensation, and hospital construction	586,461,094.71
Postal Service	776,974,541.45
Navy	392,617,307.22
Military activities, War Department (Army)	334,703,357.75
Pensions, all wars prior to World War	256,000,000.00
Pensions of civil employees (toward Government's accrued liabilities)	19,950,000.00
Federal aid for construction of roads, roads in forest reserves, and for gratuity to States of Vermont, New Hampshire, and Kentucky for damage or destruction of roads by floods	85,577,294.00
Refund of internal-revenue taxes	173,000,000.00
Shipping Board and Merchant Fleet Corporation	13,688,750.00
Rivers and harbors, flood control, acquisition of Cape Cod Canal property, operation of Panama and other canals	118,829,510.00
Enforcement of prohibition, including sums for the Bureau of Prohibition, Coast Guard, customs service, and estimated amounts under the Department of Justice	36,000,000.00
Settlement of war claims (alien property, etc.)	50,000,000.00
Construction of public buildings within and without the District of Columbia and for acquisition of property for sites for public buildings	54,315,083.56
All other activities, including the Executive Office, Congress, the judiciary, the executive departments, the independent establishments, payment of judgments, etc	518,304,702.87
Total	4,628,045,035.09

The amount appropriated at this session of Congress in all bills, regular annual and deficiency, for the fiscal year 1929 and for prior years, and including the permanent and indefinite appropriations, is $4,628,045,035.09. There is included in this amount, however, the appropriations from the second deficiency bill for the fiscal year 1927, which became stranded at the second session of the Sixty-ninth Congress, due to a filibuster in the Senate. The estimates for that bill, and the public buildings appropriation bill which failed with it, aggregated $135,000,000. Approximately $120,000,000 of this amount have of necessity had to be added to the appropriations of the present session in order to meet the laws covered by the appropriations in the bill which failed. If this sum of $120,000,000 be deducted from the appropriations of the present session, there remains $4,508,045,035.09 in appropriations chargeable to the Seventieth Congress.

The appropriations for the second session of the Sixty-ninth Congress, exclusive of the bills which failed and including the revised figures on permanent appropriations, total $4,149,502,526.65. Adding to this sum the $120,000,000 of appropriations made at the present session, but more accurately chargeable to the past session, there is reached a total of $4,269,502,526.65.

The total appropriations for the two sessions, therefore, on a comparable basis, show an increase from $4,269,502,526.65 to $4,508,045,035.09, or in the sum of $238,542,508.44.

This increase covers practically every range of Federal activity. It is nearly 10 years since the war closed. Our population has increased by nearly 10,000,000 persons and our national wealth has been greatly augmented. As the result of the war and our secure financial position the United States has become the outstanding world power. Our activities and interests have multiplied and with it our national expenditures must necessarily grow. The country has been and is prosperous, and as industry and individuals prosper the revenue of the Government will keep pace with the normal increase in expenditures.

With the retrenchment and readjustment period passed, with a balanced Budget each year including liberal provision for debt curtailment, and with confidence in the conduct of the affairs of the Government, there need be no anxiety felt or heed paid to the alarmists. Government expenditures are being carefully and cautiously watched, both by the executive and legislative branches through the operation of the Budget. Denial and repression must always be practiced and unworthy projects rejected, but all progress in Government affairs to keep pace with the rapidly advancing interests of the United States can not be judged solely by the mere size of the total of appropriations or expenditures. If the Nation lives within its income, reduces its debt, and still has a margin left with which to reduce the tax burden, it can hardly be accused or convicted of extravagance merely because there is an increase in totals.

While there are a large number of comparatively small increases running through the great majority of Federal activities, the total increase of the session is due in the main to a number of items of considerable size resulting from the enactment of new laws at this session designed to expand our national interests and further protect and promote the prosperity of our people.

Though the war ended nearly 10 years ago there is included in the appropriations of this session an item of $50,000,000 for the carrying into effect of the settlement of war claims act of 1928 to provide for the disposition of alien property and the payment of claims arising out of the war. The act authorized appropriations of not to exceed $100,000,000 for this purpose. The $50,000,000 appropriation will be devoted partly to the payment of compensation under awards made by the arbiter for German ships, patents, and radio stations seized by the United States during the war and partly to the credit of a special fund from which will first be paid the claims arising out of the war and adjudicated in favor of American citizens.

Under the provisions of the public buildings act of May 25, 1926, as amended, appropriations are made for work on public buildings throughout the United States totaling in all acts for this session $39,035,083.56, and in the District of Columbia for Federal office buildings to replace temporary war-time construction and rented quarters, $5,600,000, an aggregate of $44,635,083.56. Of this latter amount approximately $20,000,000 is accounted for by funds for building construction which came over to the present session due to the delay in the program occasioned by the failure of the appropriations in the Senate filibuster of last session. The amount for buildings outside of the District of Columbia provides for work on 233 projects under an aggregate limit of cost of approximately $125,000,000. The sum of $9,680,000 is also carried for the acquisition of property in Washington City to provide additional sites for public buildings and to carry out the scheme of development for the National City.

An impetus to aviation, both military and civil, is given by the appropriations of the present session. The increase for the War Department is $4,233,968, for the Navy Department $11,856,000, for the Department of Commerce $1,642,850, for the Post Office Department $4,000,000, making a total increase of $21,732,818. The increase for the Postal Service includes $2,050,000 for the extension of air-mail routes outside the limits of continental United States for the carrying of mail by air to foreign countries. It is anticipated that with this sum the lines to Cuba and the West Indies will be expanded and service facilitated and routes will be operated to Mexico, other Central American countries, and possibly to the west coast of South America. The importance of this phase of air development can not be overemphasized and Congress has recognized the opportunity thus presented.

An item of $74,500,000 appears in the appropriations of this session for the first time and is in effect a "bookkeeping" appropriation so far as the total is concerned. This sum represents premium payments on Government life insurance credited to the Government life-insurance fund for payment of losses, dividends, refunds, and other benefits under the insurance policies and appropriated by law for such purposes. It at once represents a receipt and an appropriation and is an offset, but is included in the totals of the Budget in order that all properly chargeable appropriations may be listed in giving a true picture of the total.

The Postal Service shows an increase of approximately $21,000,000. Exclusive of the increase for postal air mail, just referred to, there is, in addition to the normal increase in expenses of operating the Postal Service, an unusual item of $7,500,000 to enable the Post Office Department to carry out the provision of the merchant marine act of 1928 in so far as they relate to the carrying of mail to foreign countries. That act provides for increased rates for the carrying of mail in ships flying the American flag as an aid in the development of the American merchant marine and the sum appropriated is in furtherance of the policy adopted at the present session of Congress.

Pursuant to the policy of construction at military posts to replace war-time structures and provide adequate housing for officers and men, a total has been appropriated at this session of $13,819,975 over and above items of purely repair and general improvement nature. The amount thus granted is an increase in the total of this session's appropriations over those of last session of $10,299,975.

An appropriation of $19,950,000 is made to apply toward the Government's accrued liability in the fund for the retirement of Federal civil employees for disability and age. While the amount in the fund thus far, contributed solely by the employees, is sufficient to pay current annuities, Congress has recognized that the Government liability must be met and should be met currently rather than defer it to the time when the payment of the Federal share would prove a serious charge against the revenues. The retirement act was first passed in 1920 and up to the present no payment has been made into the fund by the United States toward a liquidation of its share to care for those currently retired or to assume the liability created at the time of the passage of the original act by the retirement of those by whom no contribution whatever had been made.

The appropriation for the Navy Department shows a large increase. While some additional amounts are provided for current operating expenses, including provision for 750 additional enlisted men, there is an increase, exclusive of the increase for aviation heretofore referred to, of $24,300,000 for carrying on the program of construction of light cruisers authorized in the 1924 act.

The additional sum of $15,000,000 is allowed under the provisions of the flood control act to be expended in conjunction with the previous appropriation of $10,000,000 under the provisions of the new law toward the enlarged plan for curbing the flood waters of the Mississippi River and its tributaries.

In addition to the foregoing increase, other major items of increase at the present session are as follows:

Eradication and control, quarantine, and establishment of cotton-free zones, to curb the spread of the pink bollworm of cotton in Texas and other Southwestern States	$5,000,000
Acquisition of the bonds of the Cape Cod Canal Co. under the contract for purchase of the canal by the United States	6,230,000
Relief of the States of Vermont, New Hampshire, and Kentucky on account of the damage to or destruction of roads and bridges by the floods of 1927	5,197,294
Increase for rivers and harbors, including the improvement of Missouri River	5,886,310
Toward the construction of the Memorial Highway from Washington to Mount Vernon as a part of the commemoration of the two hundredth anniversary of the birth of George Washington	2,500,000
Construction and readjustment of storage facilities for ammunition for the Army and Navy to correct conditions adjacent to populous centers and to provide proper storage for supplies not now adequately housed	3,108,159
Extension of the Foreign Service building program to provide adequate quarters for representatives of the United States abroad	2,000,000

One decrease under normal appropriations deserves particular mention. The amount for interest on the public debt is estimated to be decreased from $720,000,000 for the current year to $670,000,000 for the next year, or by the sum of $50,000,000. This is brought about by a decrease in the amount of the outstanding principal of the debt and by the refunding operations resulting in a lower rate of interest for the new securities than that paid on the issues retired by the refunding. The amount saved in interest might be very well added to the total relief granted by the tax bill, for it is a permanent lifting of a burdensome obligation.

The Congress at this session has passed an unusual number of laws authorizing appropriations, which will be felt for many years to come. While initial appropriations under many of these acts have been made at the present session, there will follow in the ensuing years appropriations in larger amounts to carry the acts into full effect. The total of the various measures spread over a period of years in the future, running as high as 10 years for the flood control act, is in excess of $1,000,000,000. A partial list showing the major expenditure authorizing legislation will be found in Table C appended to this statement.

The Republican Party has kept faith in its promises for retrenchment in Government expenditures and financial reform. Its record is complete and unanswerable. From the assembly of the Republican Congress in May, 1919, to the present date, every effort has been made to manage public affairs according to efficient, economical, and constructive business principles. How well these efforts have succeeded is reflected in the following résumé:

A reduction in total appropriations since the third session of the Sixty-fifth Congress (Democratic) of $2,644,000,000.

A reduction in annual expenditures under those for the fiscal year 1920 (Democratic) of $2,483,000,000.

A decrease in the public debt from its peak of $8,845,000,000.

A decrease in the annual interest on the public debt since 1920 of $354,000,000.

A decrease of the annual tax burden since 1921 of $1,826,000,000.

A total of Treasury surpluses in eight fiscal years of $2,892,629,000.

A decrease by Congress in estimates of appropriations submitted by the Executive of more than $4,250,000,000.

The repeal of appropriations totaling in excess of $1,500,000,000.

The settlement of debts due from foreign countries on account of loans advanced during the World War, providing for repayments of principal and interest amounting to approximately $22,000,000,000.

This record, and the traditional capacity of the Republican Party to provide efficient and sane management of the affairs of the Government, should commend themselves to every thoughtful citizen.

TABLE A.—*Comparison of Budget estimates and appropriations, Seventieth Congress, first session*

Title of act	Budget estimates, Seventieth Congress, first session	Appropriations, Seventieth Congress, first session	Increase (+) or decrease (−), appropriations compared with Budget estimates
Regular acts, fiscal year 1929			
Agriculture, Department of	$138, 129, 839. 88	$139, 138, 793. 88	+$1, 008, 954. 00
District of Columbia	[1] 37, 693, 686. 00	37, 625, 208. 00	−68, 478. 00
Independent offices	527, 553, 802. 00	527, 593, 111. 00	+39, 309. 00
Interior Department	[2] 273, 165, 839. 00	272, 656, 039. 00	−509, 800. 00
Legislative establishment	18, 072, 146. 86	17, 746, 893. 26	−325, 253. 60
Navy Department	361, 264, 907. 00	362, 145, 812. 00	+880, 905. 00
Departments of State, Justice, Commerce, and Labor:			
State	13, 950, 955. 14	13, 955, 955. 14	+5, 000. 00
Justice	26, 874, 742. 50	26, 759, 342. 50	−115, 400. 00
Commerce	38, 071, 460. 00	38, 136, 960. 00	+65, 500. 00
Labor	10, 960, 840. 00	10, 968, 340. 00	+7, 500. 00
Total	89, 857, 997. 64	89, 820, 597. 64	−37, 400. 00
Treasury and Post Office Departments:

[1] Approximated.
[2] Revised in Budget in December, 1927.

TABLE B.—*Comparison of appropriations made during the first session of the Seventieth Congress with those of the second session of the Sixty-ninth Congress*—Continued

Title of act	Appropriations, Sixty-ninth Congress, second session	Appropriations, Seventieth Congress, first session	Increase (+) or decrease (−), first session Seventieth Congress compared with second session Sixty-ninth Congress
District of Columbia	$2, 542, 000. 00	$2, 720, 000. 00	+$178, 000. 00
Total, permanent and indefinite	[2] 1, 344, 952, 508. 00	[3] 1, 373, 704, 593. 53	+28, 752, 085. 53
Grand total	4, 149, 502, 526. 65	4, 628, 045, 035. 09	+478, 542, 508. 44
Postal Service (regular annual and deficiency acts)	755, 336, 200. 00	776, 974, 541. 45	+21, 638, 341. 45
Grand total, exclusive of Postal Service from postal revenues	3, 394, 166. 326. 65	3, 851, 070, 493. 64	+456, 904, 166. 99

[2] Revised in Budget in December, 1927.

[3] Exclusive of $15,050,042 included in the Budget statements as a permanent appropriation to cover estimated deficiency in postal revenues for 1929. This sum is included in the total of the Post Office appropriation act and to include it again in the total of the permanent appropriations would constitute a duplication.

TABLE C.—*List of major measures of the Seventieth Congress authorizing expenditures over a period of future years*

Flood control act:		
Mississippi River and tributaries	$330, 000, 000	
Sacramento River	12, 000, 000	
		$342, 000, 000
Merchant marine act of 1928, authorization of loans for building of ships to fly the American flag up to $250,000,000. Amount authorized in excess of available balance in present construction loan fund		200, 000, 000
Public buildings for post offices, courthouses, marine hospitals, quarantine stations, immigration stations, and accommodation of other Government offices and activities		100, 000, 000
Acquisition of land in Washington as sites for public buildings and for development and beautification of the National Capital		25, 000, 000
Settlement of war claims act (alien property)		100, 000, 000
Increase of pensions for widows of Civil War veterans		10, 800, 000
Federal aid in road construction and for roads in forest reserves		165, 000, 000
Acts increasing the compensation of Federal employees generally and specifically for the Customs and Immigration Services		22, 000, 000
Construction of barracks, quarters, and other facilities at military posts and flying fields of the War Department		20, 000, 000
Mount Vernon Memorial Highway		4, 500, 000
Retirement of disabled emergency officers		2, 000, 000
Additional hospitals for the United States Veterans' Bureau		15, 000, 000
Acquisition of additional lands for reforestation		4, 000, 000
Pacific Branch, National Soldiers' Home, barracks		2, 100, 000
Redistribution and storage of ammunition, Army and Navy, in addition to appropriations made		6, 000, 000
Increase in capital stock of the Inland Waterways Corporation		10, 000, 000
Enlargement and expansion of system of fish-cultural stations		2, 000, 000
Memorial to George Rogers Clark		1, 000, 000
Eradication and control of the European corn borer		7, 000, 000
Middle Rio Grande conservancy district, New Mexico, irrigation of Indian lands		1, 500, 000
Amendment of the World War veterans' act		5, 500, 000
Acts affecting the Postal Service through granting a differential in pay for night work, increased allowances for fourth-class postmaster, and reductions and adjustments in postal rates		20, 000, 000

APPROPRIATIONS, EXPENDITURES, AND AUTHORIZATIONS, 1928–29

Mr. BYRNS. Mr. Speaker, the appropriations made at the first session of the Seventieth Congress which ended on May 29, 1928, amount to the staggering sum of $4,628,045,035.09. This is a greater sum than has been appropriated in normal peace times in all history. They exceed the appropriations made during the preceding session by $478,542,508.44, although carrying $50,000,000 less in interest on the public debt. They are greater than appropriations made by any session of Congress since 1921, at which time the country had not fully emerged from the World War and demobilization of the Army and war-time agencies was taking place. At the session in that year appropriations amounted to $4,780,829,510.35, or $152,784,475.26 more than was appropriated at the last session. But, as stated, the country was at that time demobilizing, and it must also be remembered that in the year 1921 there was appropriated for interest on the public debt the sum of $1,017,000,000, while only $670,000,000 was appropriated for that purpose at the last session, a difference of $347,000,000. Deduct this item and the appropriations of the session just closed exceed those of the demobilization period of 1921 by over $194,000,000.

The present Chief Executive assumed office early in the fiscal year 1924. From that time perhaps there has never been put forth a greater effort to impress the country with Federal economy, with the result that the average citizen has no doubt buf that since that time Federal expenditures have been reduced to the extent of billions of dollars. And yet the appropriations at the last session are practically 20 per cent greater than they were at the first session after Mr. Coolidge became President. In the December, 1923, session, immediately following the accession of Mr. Coolidge to the Presidency, there was appropriated the sum of $3,863,645,208.12. This is $764,399,826.97 less than was appropriated at the session of Congress just closed, and that, too, notwithstanding the annual interest on the public debt is $270,000,000 less than it was in 1923. The appropriations have been growing by leaps and bounds ever since, and the prophecy of the lamented chairman of the Appropriations Committee that session appropriations will reach the $5,000,000,000 mark unless there is a check on increased activities and extravagance is likely to be realized sooner than he could have anticipated.

Let no one seek to justify this enormous increase on the ground that it is due to unexpected emergencies like the flood disaster, for, although an authorization of $325,000,000 was made for flood control, the appropriations only carry $15,000,000 for that purpose. Neither is it due to the merchant marine, for, although there was an authorization of $250,000,000 for the building up of our merchant marine, there was no appropriation made at this session for that purpose. Nor is it due to the extensive building program which has been projected, for the session's appropriations carried only $36,468,500 for the building program. Nor is it due to increased sums for disabled soldiers of the World War, for the appropriations for the Veterans' Bureau are over $7,000,000 less than they were for last year. There are no extraordinary grounds upon which this increase can be justified.

BUDGET ESTIMATES

But even this huge sum is less than was asked for by the President. It is $9,331,779.05 less than the estimates submitted. I will append at the end of these remarks Table A, comparing the estimates submitted and the appropriations carried in the various annual and deficiency bills passed at this session of Congress. While Congress may be criticized for these large appropriations, it has shown itself to be more economical than the administration. It may be said that, including this session, Congress has reduced the estimates of the President more than $367,000,000 since the Budget was established in 1921.

AUTHORIZATIONS

A statement of the actual appropriations is not a complete picture of the demands upon the Treasury, for Congress has been extremely liberal in its authorization of future appropriations. The authorizations made at this session of Congress will amount to approximately $1,150,000,000. They range all the way from a thousand dollars for surveys and markers on battle fields to the largest item of $325,000,000 for flood control. Of this sum approximately $115,000,000 has been appropriated in the second deficiency bill, leaving more than $1,000,000,000 which must be carried in the appropriation bills in the next and few succeeding years in addition to the present large ordinary expenditures of the Government.

Even if Congress should refuse hereafter to make additional authorizations there is no hope of a reduction. There is not even the hope that appropriations will remain at the present figure. These increased obligations must be met, and the people must expect a continued increase in appropriations as a result. The sooner, therefore, that the people disabuse their minds of the false idea that they have been living under a régime of the strictest economy for the past six years and that there has been a reduction of expenditures the better it will be for the country.

But this is not all the story. There are pending in either the Senate or the House authorization bills which have passed one or the other of these two bodies amounting to over $450,000,000. Since these bills have passed one of the two Houses it is safe to assume that they will nearly all become laws at the next session. Certainly the naval authorization bill of $274,000,000, and most probably the Boulder Dam authorization of $125,000,000, and which some say will ultimately cost nearer $250,000,000, will become laws at the next session. Bills aggregating more than $400,000,000 in authorizations have been favorably reported by committees and are now on the calendar awaiting action by the two Houses. It is apparent, therefore, that at the close of the next session the authorizations for future or new appropriations by this Congress will amount to between $1,500,000,000 and $2,000,000,000, all of which will have to be taken care of in the next few years in addition to the existing ordinary expenditures of the Government. Never in peace time has a Congress shown such extreme liberality in pledging the future revenues of the Government.

In addition Congress passed the Welch salary increase bill which fixes an annual increased charge upon the Government of over $22,500,000 and which it is confidently asserted was designed to raise the salaries of the higher-paid employees rather than those who need it most. It increased salaries of customs service employees $1,625,799. It increased pensions $10,000,000 per year. It passed two bills over the veto of the President affecting the Postal Service and carrying approximately $10,000,000 per year by way of increase. It also passed the emergency officers' retirement bill over the veto of the President, which will cost more than $2,000,000 a year. With the exception of these three bills all of the above-named appropriations and authorizations were made with the approval of the President.

It may be said that all of these authorizations were meritorious and that many were essential at this time, but it can also be equally well said that some could have been postponed until a later date. The record of the administration and the Congress in regard to the appropriations and authorizations at this session must carry its own commendation and likewise its own condemnation. This is a rich and resourceful country and happily can stand even larger expenditures, but that is no excuse or justification for either extravagance or improvidence. The question is, How long will the business and tax-paying interests of the country stand this rapidly mounting increase in expenditures in the face of repeated assurances given in the past few years that Federal expenditures would be reduced or held down to a minimum?

COMPARISON OF APPROPRIATIONS

There will be found at the close of these remarks Table B, which is a comparison between the appropriations made at the second session of the Sixty-ninth Congress and those made at the first session of the Seventieth Congress for the fiscal years 1928 and 1929, respectively. It will be observed that the appropriations for this session exceed those of the last session in the sum of $478,542,508.44, or if the Postal Service is excluded, in the sum of $456,904,166.99.

But it should be said that not all of the appropriations carried in the two deficiency bills enacted at the last session are for the fiscal year 1929, and the same is true of the deficiency bill enacted at the preceding session as applied to the fiscal year 1928. The greater part of these two deficiency bills is for the combined years of 1928 and 1929. A portion, therefore, of these combined appropriations could be fairly applied to 1929. But deducting all these sums we find that at the beginning of the year the appropriations for the fiscal year 1929 amount to $4,322,148,922.06, and this sum will undoubtedly be increased by deficiencies at the next session, as has been done in all past years. Making the same deductions from the deficiency bill carried in the table referred to for 1928, the appropriations for the fiscal year 1928, at the beginning of that year were $4,014,988,936.40, showing an increase for the fiscal year 1929 over 1928 of $307,159,985.66, and this will be increased by such deficiencies as are appropriated at the next session.

EXPENDITURES

Expenditures are, of course, reflected by the appropriations. The actual total expenditures for the fiscal year 1924, ending June 30, 1924, were $4,079,626,493.75; for 1925, $4,129,234,923.68; for 1926, $4,230,851,302.36; for 1927, $4,176,706,508.06. The Budget Bureau in December, 1927, estimated that the total expenditures for the fiscal year 1928, ending June 30, 1928, would be $4,331,814,285. The latest revision of 1929 expenditures is $4,406,000,000, but since this revision there have been additional authorizations and appropriations, including an increase in the estimated postal deficit, and it is entirely safe to say that the total expenditures for 1929 will approximate $4,464,000,000.

The above figures include Postal Service expenditures, and properly so, because it is the only way to present a true picture of the entire expenditures of the Government. The omission of Postal Service expenditures has the effect of giving misleading information and creating the impression that expenses are less than they really are. Postal receipts are covered into the Treasury just like other collections and are taken therefrom by regular annual appropriation bills. They are, therefore, just as much ordinary expenditures as appropriations for the revenue and customs service, the Patent Office, and other bureaus which collect revenues. It may be said that these bureaus do not pay their own way. Neither does the Postal Service, for there is always a deficit. The Bureau of the Budget, however, has followed the custom of segregating postal expenditures from all other expenditures, which it chooses to class as "expenditures payable from ordinary receipts." Following this custom and excluding the Postal Service, the expenditures of the Government for the years stated were as follows:

1924	$3,506,000,000
1925	3,529,000,000
1926	3,584,000,000
1927	3,493,000,000
1928 (estimated)	3,621,000,000

For 1929 a fair and conservative estimate is $3,700,000,000.

And during all these years there has been in each succeeding year less to pay in interest on the public debt. The interest on the public debt for each of these years was as follows: 1924, $940,000,000; 1925, $881,000,000; 1926, $831,000,000; 1927, $787,000,000; 1928, $720,000,000; 1929, $670,000,000. It will be noted that the interest payable in 1929 is $270,000,000 less than in 1924, and yet there is a net increase in the six years of $385,000,000 in the total expenditures of the Government. This is a striking revelation of the extent of the increases in the cost of Government during this period.

PUBLIC DEBT

At its peak on August 31, 1919, the public debt was over $26,500,000,000. On June 30, 1927, it had been reduced by $8,084,794,716. Prior to March 3, 1921, under a Democratic administration, it had been reduced to $24,051,000,000—a net reduction of $2,549,000,000 in 19 months. Approximately $5,535,000,000 represents the reduction during the six years of the Harding-Coolidge administrations. It is estimated that there will be in the Treasury from the sinking fund and foreign repayments in the fiscal year 1928 approximately $537,000,000 which, under the law, will be applied on the public debt, and to which will be added whatever surplus there may be in the Treasury on June 30, 1928. It is estimated that the sinking fund and foreign repayments will approximate $541,000,000 in the fiscal year 1929, and this will be applied under the law on the public debt for that year with whatever surplus there may be in the Treasury on June 30, 1929.

One of the many highly constructive measures passed by a Democratic Congress and approved by a Democratic President was the sinking fund act. The passage of this act has contributed in very large measure to the reduction of our public debt. Nearly $2,000,000,000 of the reduction on the public debt by the Harding-Coolidge administrations was paid out of the fund created by this act. This fund alone will wipe out more than $10,000,000,000 of our public debt by 1946.

The Harding-Coolidge administrations can not claim all the credit for the reductions from 1921 to 1927. I have many times called attention to the cash assets inherited by these administrations from the Wilson administration. These cash assets aggregating probably $3,786,000,000 contributed to this reduction and came from various sources, such as the sale of surplus war supplies, collections on loans to railroads by the Wilson administration during the World War, back taxes collected from taxes levied during the war and under the Wilson administration, and other sources. Some time ago my colleague, Mr. HULL, inserted in the RECORD a table showing in detail the amounts and sources of these cash assets, and I will take the liberty of inserting that as Table C at the close of these remarks.

Under our form of government party control necessarily carries with it party responsibility. The Republican Party has had control of Congress since March 4, 1919, and of the Executive branch since March 4, 1921. Congress alone has the power to levy taxes and appropriate money to be expended for the executive departments. If there has been a reckless misuse of public money and an utter disregard of the taxpayers' interest during this period the Republican Party must be held responsible. A considerable increase in Government expenditures was to be expected. Greater attention to education; good roads and other activities which make for the enlightenment and progress of a people have necessarily increased our national expenditures, but taking these desirable activities and necessary expenditures into consideration the present and rapidly increasing expenditures of the National Government, with the added expenditures made necessary by the action of Congress at this session, shows a reckless disregard of the taxpayers' interest which no Republican platform pronouncement or administration propaganda of alleged economies can possibly explain or overcome.

During the past seven years the American people have been humiliated and outraged by the evidences of fraud and corruption which has taken place in their Federal Government. Without casting reflections on the thousands of honest persons in the Government service in the White House and other places, high and low, it must be apparent to every unbiased thinking citizen who loves his country more than he does his party that if the American people really desire to clean house and restore confidence in their Government; if the taxpaying citizens wish to call a halt on the increasing expenditures of their Government then they will make a change in the administrative and legislative branch of our Government at the coming election.

TABLE A.—*Comparison of Budget estimates and appropriations, Seventieth Congress, first session*

Title of act	Budget estimates, Seventieth Congress, first session	Appropriations, Seventieth Congress, first session	Increase (+) or decrease (−), appropriations compared with Budget estimates
Regular acts, fiscal year 1929			
Agriculture, Department of	$138, 129, 839. 88	$139, 138, 793. 88	+$1, 008, 954. 00

Postal Service (regular annual and deficiency acts)	755,336,200.00	776,974,541.45	+21,638,341.45
Grand total, exclusive of Postal Service, from postal revenues	3,394,166,326.65	3,851,070,493.64	+456,904,166.99

[1] Approximated.
[2] Revised in Budget in December, 1927.
[3] Exclusive of $15,050,042 included in the Budget statements as a permanent appropriation to cover estimated deficiency in postal revenues for 1929. This sum is included in the total of the Post Office appropriation act and to include it again in the total of the permanent appropriations would constitute a duplication.

TABLE C

Practically, cash assets inherited by Harding-Coolidge administrations and amount of net receipts to Treasury, fiscal years 1922 to 1927, inclusive:

War Finance Corporation	$157,247,000
Receipts from sale of Federal farm-loan bonds	199,928,000
Railroads	442,652,000
Grain Corporation	7,000,000
Total	806,827,000
Add:	
Foreign debt interest and repayments	841,000,000
Back taxes collected after 1920 for 1917, net	1,300,000,000
German payments for Army occupation	25,000,000
Sale of surplus war supplies, including transfers and withdrawals	492,949,000
Reduction of balance in general fund on June 30, 1921	321,000,000
Total	3,776,776,000
Public debt reduction prior to Mar. 3, 1921	$2,545,000,000
Grand total	6,321,776,000
Debt of the Federal Government when at its peak, Aug. 31, 1919, was	26,596,000,000
Feb. 28, 1921, it was	24,051,000,000
Reduction	2,545,000,000
Total gross debt, Feb. 28, 1921	24,051,000,000
June 30, 1927, it was	18,512,000,000
Reduction	5,539,000,000
Grand total reduction from Aug. 31, 1919, to July, 1927	8,084,000,000
The amount of reduction prior to Mar. 4, 1921, $2,545,000,000, plus Treasury receipts from cash assets left by Wilson administration, $3,786,000,000	6,332,000,000
Total reduction for which Harding-Coolidge administrations supplied money	1,752,000,000

ADDRESS OF HON. FRED S. PURNELL

Mr. WOOD. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address delivered by my colleague Hon. FRED S. PURNELL, of Indiana, as permanent chairman of the Republican State convention of Indiana, held at Indianapolis, Ind., May 23–24, 1928:

ACHIEVEMENTS OF THE REPUBLICAN PARTY

Some one has said it is impossible to draw an indictment against a whole people. If that task were assigned me, I should charge that the one great fault of the American people lies in the fact that in the prosperity and contentment of to-day we forget the adversities and the discontent of yesterday. Every American citizen, and certainly every Republican, could with profit to himself and his country read and reread the matchless story of progress written by this Nation under the policies of our party. The history of the Republican Party is so interwoven with that of the Nation that to read one is to know and understand the other. The real story of progress in this Nation covers that period in our history from 1860 to this hour. During that period of 68 years the Republican Party has, with the exception of two brief periods, been in continuous power. Grover Cleveland served for eight years and Woodrow Wilson, by virtue of an unfortunate division within our own ranks, served a like period. So that, with the exception of 16 years, this entire period of 68 years has seen the Republican Party in control of and responsible for the welfare of the Nation.

During the period of 68 years this Nation has grown from one in swaddling clothes, with a national wealth of less than 16 billions, with no standing among the nations of the earth, with little influence at home or abroad, until to-day it stands triumphant with a prosperous, contented, and equal people, more than 110,000,000 in number, representing a national wealth of more than $350,000,000,000. The United States of America stands to-day not only as the richest nation of the world but it is without question the most powerful, the most influential, the most Christian, and the most unselfish. It is the only solvent nation on this earth and is the one land of opportunity under the sun. Though we are cordially hated by most of the European nations, it is not strange that millions of their subjects are looking with longing eyes toward America and praying for an opportunity to renounce allegiance to kings and queens and make this country their country.

It is my purpose to discuss as briefly as possible some of the things that have made this Nation great and to show, as I think I can, that this Nation is what it is to-day by reason of the policies of government advocated and put into practice by the Republican Party.

By their fruits ye shall know them. The Republican Party is not ashamed to look backward nor afraid to look forward; the history of the Republican Party is its own best campaign document. Let it be said to its everlasting credit that it stands to-day upon the great fundamental principles of government exactly where it stood in the beginning and where it has stood throughout its long and honorable history.

I am afraid I can not say as much for the Democratic Party, which through all these years has been its principal opponent. While this great Rock of Gibraltar has been lashed by the waves of Democratic fury in many campaigns, it still stands unmarked and has lived to see each issue of its opponent sink in the foam of repudiation at its feet.

When the Democratic Party advocated slavery it was wrong. They would no more advocate it to-day than would the Republican Party, which opposed it then.

When the Democratic Party advocated State rights it was wrong. The Republican Party believed in a strong, centralized government then, and it believes in it now, just as the Democratic Party believes in it now.

When the Democratic Party advocated free trade it was wrong. The Republican Party believed in protective tariff then; it believes in it now. More than that, both parties understand fully that the policy of a protective tariff is not only the basis of our great wealth, but, more than that, is directly responsible for the equality of opportunity and the happiness that fills every home in America. Not only has American industry been protected, but through that protection the American laborer has been lifted from the ranks of the ignorant and underpaid of other lands and set among his countrymen as an equal. The humblest home in America may to-day contain the President of to-morrow.

The Democratic Party now enters the plea that it is no longer a free-trade party and that it no longer thinks in "pre-war" terms. The fact is that upon the tariff question the Democratic Party has during the last half century boxed the compass. It has denounced the protective tariff policy as unconstitutional. It has declared for a tariff for revenue only, a competitive tariff, an economic tariff, a tariff for revenue without domestic injury (a sop thrown to the sugar producers of Louisiana), has insisted that tariff is a "local question," and has conceded that the Underwood-Simmons bill contained "incidental projection." So confused have some of their Representatives in the South become in an effort to keep up with the changing sentiment within their party that one of them, in answer to an inquiry from a constituent whose position he did not know as to how the Representative stood on the tariff, replied, "I am in favor of raising it where it is too low and lowering it where it is too high."

But always they knock at the door where Republicans are writing a tariff bill and pray that the products of their several States be given a full measure of protection. It is said that during the consideration of the Fordney-McCumber tariff bill almost every Democratic Senator secured the adoption of an amendment giving protection to some product from his State, but later voted against the bill when satisfied there were sufficient Republican votes to pass it.

There are many ways of demonstrating loyalty to America, but I know of no more practical way to express it than for us all to be quite certain that when we need articles of either necessity or luxury that we buy goods made in the United States, where a decently filled pay envelope is the reward for toil and service. Every dollar of American money spent on imported goods feeds cheap foreign labor, deprives skilled American labor of wages, reduces American labor's ability to purchase from American retailers, and undermines our American living standards.

Not only have our Democratic friends changed their position on the tariff, but tongues that once propounded the doctrine of free silver are forever silenced. When the Democratic Party advocated this fallacious financial program it was wrong. The Republican Party was right, as time has demonstrated, when it met this unsound proposal with a demand for gold standard.

In a recent campaign the Democratic Party, with all the spirit of the crusaders, pledged the nations of Europe that if their party should be retained in power this great Nation would enter the League of Nations and join them in the discussion and settlement of their own political problems. When they advocated our entrance into the League of Nations, they were wrong, and, save for a scattering few, the members of that party join to-day in giving thanks to that vast majority of more than 7,000,000 which, under the leadership of the Republican Party, heeded the admonition of George Washington, the father of our country, who urged that we avoid the political entanglements of Europe.

The League of Nations issue has been relegated to that vast Democratic cemetery wherein rest the bones of State rights, slavery, free trade, free silver, anti-imperialism, Government ownership of railroads, and a score of other abandoned and forgotten issues. May they rest in peace.

This inclination to be led astray by strange gods and false issues suggests Abraham Lincoln's story of the irresponsible calf which broke through the fence and followed a runaway bull until it was lost in a cloud of dust. The disgusted farmer pursued the wayward calf a short distance, but gave up in disgust with the parting injunction: "Run, durn ye, you'll learn your mistake at feedin' time."

What issue will they raise in the coming campaign? Some say it will be corruption. If so, corruption is a personal and not a political matter. It must be remembered that a strong, courageous, and honest man in the

person of Calvin Coolidge sits in the White House and will continue to preside over the destinies of this Republic until he is relieved of that duty on the 4th of March next by another equally honest and equally courageous Republican. Does anyone dare to think that there is a dishonest drop of blood in the veins of Calvin Coolidge? He meant it when he said: "No man will be persecuted because he is a Democrat, and no man will be protected because he is a Republican."

The results in this campaign will not rest upon the personality of any individual or group of individuals, but rather upon the record of the parties based upon service rendered. Our Government is comparable with a great financial institution. Would you destroy a strong, successful bank because one or more employees had proven false to their trust? Would you wreck the institution and denounce the policies that made it great because a cashier or clerk, or even its president, had not measured up to all that was expected of him?

The Republican Party is larger than any individual or group of individuals in it and enters the coming campaign unashamed and unafraid. Its record is an open book to which every American, without regard to party, can point with pride.

What is the record? For the purpose of giving you a comprehensive picture, let me refer briefly to conditions as they existed immediately preceding the great World War. The Underwood tariff law again demonstrated that a Democratic tariff means closed factories and hard times. It became a law in October, 1913, and by the early summer of 1914 the unemployment situation became serious. The operations of the law prostrated industry. Notwithstanding the fact that Woodrow Wilson characterized it as "psychological," the railroads nevertheless laid off thousands of workmen and their yards became filled with empty cars. Factories and mills closed indefinitely and the Nation was threatened with a serious panic. Then came the great World War, which immediately stopped all imports and increased our exports beyond all precedent. The war automatically suspended the effects of the Underwood tariff law and gave to the Nation a tariff equivalent to an embargo.

It is unnecessary to retell the financial story of our participation in the World War. Money in unheard-of sums, borrowed from the people, was spent with a lavishness heretofore unknown to the world. Indeed, so liberal were those who held the purse strings of the Nation that more than $10,000,000,000 was loaned to foreign governments without security or any written or verbal promise to pay. As a matter of fact, I doubt if these foreign countries ever expected to repay this money. I doubt if our Democratic friends who turned it over to them ever expected to ask them for it. My views in this regard have been strengthened by a more or less recent interview given out by Newton D. Baker, Secretary of War in the Wilson Cabinet and a close personal friend of William G. McAdoo, in which he advocated cancellation of all these debts. Like a profligate son who suddenly comes into an inheritance, the Nation indulged in an era of reckless extravagance and waste, from which it has not yet fully recovered. The borrower, however, must ultimately pay and the day of reckoning was at hand.

Daniel Webster, in his famous reply to Hayne, used the figure of a storm-tossed mariner taking the first opportunity of a reappearing sun to ascertain the true position of the ship to see how far it had drifted from its course. By a majority of more than seven million, the voters of the Nation in 1920 again intrusted the Government to the hands of the Republican Party. As our Democratic friends backed off the stage our party, like the mariner, took advantage of this reappearing sun to learn the true position of the ship of state.

When the Republicans came into power in 1921 we found that the national debt, which was less than $1,000,000,000 in 1913, had reached the gigantic sum of $24,000,000,000; that the annual interest on the debt was more than the original debt itself; that, although two years had elapsed since the signing of the armistice, we were still technically at war; that 19 nations had borrowed nearly $11,000,000,000 of the people's money for which there was no evidence except mere scraps of paper given as receipts; that Government bonds to the extent of $20,000,000,000 purchased by 15,000,000 loyal Americans were selling in the open market at 85; that 5,000,000 men were walking the streets restless and jobless; that a steady stream of immigrants, many of them the undesirables of Europe, was pouring into this Nation displacing American workmen and adding terror to the Nation. Five hundred thousand had entered the year before.

We found that the railroads were demoralized by admitted mismanagement which cost the country in taxes $2,950,000,000, wages alone having been increased $1,765,000,000.

We found that a vast merchant fleet had been built for war use at a cost of more than $3,000,000,000, which in 1921 was appraised at less than $500,000,000, with claims filed against it for more than $200,000,000.

We found the farmers again facing ruin because of the low prices they were receiving under the Underwood tariff law. The low tariff rates of the Underwood bill not only permitted our markets to be flooded with foreign farm products but with foreign manufactured products as well. It was the old story of what happens under a tariff for revenue bill.

The American manufacturer lost to a large extent the American market. Our factories were compelled to close down, with the result that in the spring of 1921 the 5,000,000 men who were out of employment were no longer able to purchase the products of the farm except in a most limited degree. We found that in order to meet the operating expenses of the Government a new high level of taxes to the extent of nearly $6,000,000,000 per year was being levied upon the people. Four million soldiers who had been inducted into the service of their country were back in private life restlessly seeking to find employment and sadly in need of helpful legislation. Maimed and disabled soldiers were in need of hospitalization and vocational training while the dependents of those who made the supreme sacrifice or were physically incapacitated looked with longing eyes toward their Government for relief.

With a spirit born of an experience gained in handling great governmental problems, as well as a determination to save the Nation and restore peace at home and abroad, the Republican Party gritted its teeth, rolled up its sleeves, and faced this herculean task. The story of reconstruction, covering the last seven years, forms the most interesting chapter in the glorious history of the Republican Party, as well as the Nation itself.

In view of that unexampled record of achievement, what issue can our Democratic friends hope to raise in the coming campaign?

They can not criticize us, because we have established a Budget system which has resulted in reducing the annual operating expenses of the Government from $6,000,000,000 to less than three and one-half billions, thus putting the Government for the first time in its existence upon a sound financial basis.

They can not complain, because we have reduced the national debt from twenty-five billions to less than eighteen billions in a period of seven years, with the result that a load of more than $300,000,000 per year in interest on the national debt has been lifted from the backs of the people.

They dare not make an issue of the fact that in 1921 we passed the emergency tariff law to supplant the iniquitous Underwood law until we could later pass the Fordney-McCumber tariff law, an act which has given impetus to the restoration of industry, labor, and agriculture.

They can not hope to make a successful appeal, because we have, through the Budget system and the practice of rigid economy, taken more than 100,000 employees off the Government pay roll and sent them back to private life.

They can not complain, because we have established peace with the nations of the world, with whom we were still at war when we came into power.

An appeal to labor would fall upon deaf ears, because labor in the main is generally employed, and at good American wages.

They can not cry out because we have enacted a stringent immigration law which serves to protect American labor and preserve America for Americans. To my mind this is one of the outstanding achievements of the Republican reconstruction program. Picture, if you can, the motley herd of undesirables numbering 500,000 which poured into this country from the four corners of the earth during the year preceding the passage of the present immigration law. Such a body is equal to 27 Army divisions. If they were to march down Fifth Avenue in New York City in regular formation it would take four days and four nights for this vast army to pass a given point. Recognizing that you can not make a trotter out of a draft horse by puting him into a stable; that you can not make a well-bred dog of a mongrel by teaching him tricks any more than you can make an American out of an undesirable alien by putting an American flag in his hand and having him sing the Star-Spangled Banner, the Republican Party not only saved America through the passage of the immigration law, but has reaffirmed its faith by repeatedly strengthening it.

They can not charge us with lack of appreciation, because we have enacted legislation and liberalized it from time to time so as to give justice to the World War soldiers and their dependents.

They can not complain because we have funded the foreign debts which were inherited from our Democratic friends. Original debts aggregating more than $10,000,000,000 have been funded so that the United States will in the end receive in principal and interest more than $22,000,000,000. The funding of the debt of Great Britain, providing for the repayment of $4,600,000,000 over a period of 62 years, is the largest financial transaction in the history of the world.

They can not complain because we have reorganized and improved our Diplomatic and Consular Service.

They can not complain because of the revision of postal rates which has put the Post Office Department on a self-supporting basis.

They can not take issue because we have expanded and improved aviation in the Army and Navy and provided a definite building program.

They will not make an appeal for votes because we have reduced Federal taxes more than $2,000,000,000 nor because 80 per cent of the reductions were made for the benefit of the average taxpayer rather than for the benefit of the rich.

Those who seek an issue dare not criticize the Republican Party because of the Federal road act under which we are rapidly spreading a network of hard-surfaced roads throughout the United States which

will, when completed, consist of approximately 170,000 miles of improved highways, touching every community of 5,000 inhabitants or over.

Our Democratic friends will not attack us because, through sound business policies, Government bonds selling at 85 were brought to par and above, as a result of which $3,000,000,000 were added to the pockets of the people.

What then will be the issue? Little is left save an appeal to the prejudice of the American farmer because of the admitted inequality which exists between American agriculture on the one hand and industry and labor on the other. The present condition of agriculture, however, is not due to the Fordney-McCumber tariff law but rather agriculture is in as good condition as it is to-day because of that law. There is no commodity that the farmer buys to-day for which he pays as much as he paid the day the Fordney-McCumber tariff went into effect, and there is not a farm commodity which does not bring more money on the market to-day than when the same tariff act became a law. The American market is the prize market of the world, and it is protected for the American farmer just as it is protected for American industry and American labor. The farmer sells 90 per cent of his products in America in the very finest market in the world. When the factories, mines, and railroads are running and prosperous, labor is employed at high wages, and it likewise prospers. This means that the great army of laboring consumers in this country are able and do buy in great quantities the product of the farm. Factories, mines, and railroads run and are prosperous because of the Republican protective system which keeps out the cheaply made products of foreign countries. Any tariff less than a protective tariff cripples industry, with the result that millions of American workmen are thrown out of employment and walk the streets. Men without employment must live on short rations, sometimes soup, and thus the farmer's best and only market is destroyed. The protective tariff system makes it possible for American wage earners to receive wages amounting to more than $12,000,000,000; salaried employees more than $5,000,000,000 and for millions to enjoy incomes amounting to more than $13,000,000,000. These figures are based upon an estimated national income of from thirty to forty billion dollars. I can not believe that our farmers will listen to the cry of those who would lead them into free trade and thus destroy their home market and reduce them to further distress.

Democratic Senators and Representatives know, and many of them admit, that anything short of protection means disaster to the country. One of the most influential and highly respectable Democratic Representatives from a Southern State made an appeal to his colleagues on the Democratic side when the present tariff law was under discussion, and said: "If the duty is lifted on cattle, it will drive every cattleman into bankruptcy." A Senator from a rock-ribbed Democratic State, where free trade has been as sacred as liberty, voted for a duty of 3 cents per pound on peanuts because there are more than 2,000,000,000 pounds of peanuts exported yearly from the West Coast of Africa, British Isles, and China, of which we take about 50,000,000 pounds of peanuts and 15,000,000 pounds of oil. Similar illustrations could be cited with other products from other States. These men, though they are Democrats, know that Argentina can produce livestock for a mere fraction of the cost of production in the United States; that Argentina and Canada can raise wheat for a fraction of what it costs to produce wheat in the United States; that New Zealand and Australia can raise sheep and export wool and mutton for much less than the cost of production in the United States; that citrus products can be grown in other countries more cheaply than in the United States; that Denmark and New Zealand can produce butter more cheaply than the United States; that sugar can be raised in Cuba at a much lower cost than in this country; that China and Japan can produce soy beans for less than the United States; that olives can be grown abroad more cheaply than in California; that Argentina can raise flax for less than the Dakota farmer can produce it; that Argentina and Canada can produce oats, rye, and barley for 15 to 20 cents per bushel less than they can be produced in the United States; that Argentina, Canada, Dominican Republic, and Kwangtung can produce corn for at least 15 cents per bushel less; that China, Japan, Siam, British India, Mexico, and India can produce rice more cheaply and gladly paid $2,000,000 in one year for the privilege of selling us 40,000,000 pounds of rice. There is no halfway place, as far as the farmer is concerned, between protection and free trade. If we do not give the American farmer a tariff that actually protects, we may as well give him none. Without a tariff the farmer must either go out of business or come down to the standard of foreign farmers. The Republican Party is unwilling to slip the wooden shoes of European peasants upon the feet of the American farmer.

Notwithstanding the tariff, agriculture is not yet on a parity with industry and labor. This is attributable very largely to two major causes. First, the tariff is ineffective upon products of which we have an exportable surplus. Second, by reason of the magnitude of the business of farming, it does not easily adapt itself to organization, and therefore has been unable to recover as quickly from the effects of the war as have industry and labor. To correct these two conditions, farm leaders in and out of Congress have devoted the better part of the last six years to a study of this problem in the hope that a legislative solution may be found. To those who have become impatient with the delay and who perhaps may border upon disgust, let me suggest that this is the most comprehensive problem the Congress of the United States or any committee thereof has ever undertaken to solve. I have faith that a solution will be found and am convinced it will be found by the Republican Party. It will not be accomplished by destroying the protective tariff system.

There are those who would create the impression that the Republican Party is and has been unfriendly to agriculture. Let me remind them that one of the first acts after the foundation of the Republican Party was the signing by Abraham Lincoln of the Morrill bill, which gave the proceeds from the sale of certain public lands for the creation of the land-grant colleges for the specific purpose of teaching agriculture. The first Republican President, therefore, stands as sponsor for ours, the greatest system of agricultural education on earth.

The Department of Agriculture itself was established by the Republican Party in 1863. When established, it had only 29 employees on the pay roll, and the first appropriation for carrying on its activities was only $1,000. It has grown until to-day its personnel totals 21,524 and the appropriation for the fiscal year ending June 30, 1929, was $156,276,729. It started with one office, and to-day includes 20 comprehensive bureaus, among which are included the Weather Bureau, Bureau of Animal Industry, Bureau of Dairy Industry, Bureau of Plant Industry, Bureau of Chemistry and Soils, Bureau of Entomology, Bureau of Biological Survey, Bureau of Public Roads, Bureau of Agricultural Economics, Bureau of Home Economics, Food, Drug, and Insecticide Administration, Federal Horticultural Board, Packer and Stockyards Administration, Grain Futures Administration, Forest Service, and a number of other important bureaus.

The Hatch Act passed in 1887 created the agricultural experiment stations. This act was later supplemented by the Adams Act, passed by a Republican Congress in 1906 and signed by President Roosevelt, appropriating additional Federal money for the support of these institutions and the further scientific study of farming.

In 1925 a Republican Congress passed the Purnell Act, which appropriated additional funds for the agricultural experiment stations and made available Federal money for the scientific study of marketing farm products. This act was signed by President Coolidge.

The farmers of the country will not forget that the Rural Free Delivery Service of the United States, which has no prototype anywhere else in the world, was authorized by a law passed by a Republican Congress and signed by President Taft. By this act the Republican Party gave evidence of its desire and determination to give to the farmer the same expeditious mail service as is enjoyed by those who live in the cities.

The parcels post law, passed by a Republican Congress and signed by President Taft, likewise is a measure of peculiar benefit to the farmer.

Several homestead laws and internal development laws have been passed by Republican Congresses and signed by Republican Presidents.

The dairy industry of the country was recognized by the Republican Party in the establishment of a dairy bureau within the Department of Agriculture.

The Republican Party sponsored and enacted an amendment to the Federal farm loan act by increasing the amount extended to any borrower from $10,000 to $25,000 and by giving authority to increase the rate to 5½ per cent on the bonds, so they would sell more easily.

The intermediate credit act, enacted by a Republican Congress and signed by a Republican President in 1923, providing for a flexible banking and credit system under the supervision of the Federal reserve act, extends farmers credit corresponding to their production without any departure from sound banking practices.

In 1918 a Republican House and Senate enacted the farmers' emergency tariff law, which gave quick relief to the farmers of the country who were almost bankrupt by reason of the Underwood tariff law. President Wilson vetoed the bill, but in the very next session it was repassed by a Republican Congress and signed by President Harding. The Republican Party showed its interest in the American farmer by immediately passing this farmers' emergency relief and by not waiting until we could work out a general tariff law. The agricultural schedule in the farmers' emergency relief were later incorporated in the Fordney-McCumber tariff law.

The War Finance Corporation was amended and had its life extended three different times to save the farmers by making agricultural loans. The act empowered the corporation not only to loan money to banking institutions but also to associations of producers themselves.

The Federal Reserve Board act was amended so that agriculture should have representation upon the board as well as the financial, industrial, and commercial interests of the country. Membership of the board was increased to make place for a farmer representative.

The United States warehousing act was amended renewing the limitation upon the products that could be stored under the law and providing that banks must loan money at a fixed rate of interest to anyone who presents a United States warehouse receipt.

Cooperative marketing associations were given recognition by a Republican administration under a law passed in 1922. The act authorized

those who engage in the production of agricultural products and livestock, including dairymen, planters, and fruit growers, to form associations for collecting, preparing, and marketing their product with authority to engage in interstate and foreign commerce. This act expressly exempts farmers from prosecution under the antitrust laws.

The butter standards act, passed in 1923 by a Republican Congress and signed by a Republican President, was enacted to prevent the flooding of the market with adulterated products, misbranded as butter. These products were not only lacking in nourishment because of their cheap production, but were driving genuine butter out of the market. The purpose of this act was to establish a standard for all products sold as butter, fixing a minimum percentage of butterfat, and other necessary food ingredients.

The filled milk act was approved in 1923 and prohibits the shipment of filled milk in interstate or foreign commerce. Filled milk is an imitation of natural cow's milk made by mixing vegetable oils with skimmed milk. This act is of particular benefit to dairymen and those interested in pure food for the protection of the health of infants and children.

A Republican Congress passed and a Republican President signed the packer and stockyards act in 1921, which prohibits livestock marketing agencies from charging unreasonable rates or engaging in unjust discriminatory or deceptive practices. This act is calculated to give to the producer of livestock the very highest dollar for his product.

The grain futures act passed by a Republican Congress has eliminated the "bucket shops" by providing for a prohibitory tax upon every transaction which does not actually involve real grain. The effect of this act has been to eliminate manipulation and curtail violent market-depressing fluctuations.

The grain standards act passed by a Republican Congress and signed by a Republican President authorized the establishment of a uniform set of standards for all grain entering interstate or foreign commerce and eliminates fraud and misrepresentation on the part of dealers and shippers of grain.

The Federal road act was amended by a Republican Congress so as to protect the Federal expenditures as well as insure the construction and maintenance of highways according to the best engineering practices.

A recent Republican Congress passed the so-called Hoch-Smith resolution providing for an adjustment of freight rates by the Interstate Commerce Commission with the least delay, so as to insure to agricultural products, including livestock, the lowest possible rates compatible with the maintenance of adequate transportation service.

The present Republican Congress passed the Mississippi flood control act, which is of inestimable value to that great army of producers who live within the area adjacent to this greatest of all American rivers.

The legislative enactment of the preceding Congress, supplemented by that passed by the present Congress, has deepened the channel of the Mississippi and its main tributaries and enlarged the barge line transportation so as to furnish a ready outlet to the markets for the abundant products of the Mississippi Valley. This will unquestionably affect the reduction of transportation rates to the extent of 5 cents per bushel, which will mean an increase to the farmer of 5 cents per bushel for each bushel of grain produced. This is now recognized as one of the most important measures ever passed in the interest of American agriculture.

Last, but by no means least, the Republican Party passed and a Republican President signed the present Republican tariff law, which repealed the iniquitous Democratic Underwood tariff law and replaced it by passing a bill which gives protection to American agriculture unparalleled in the history of the country. By the terms of this act practically everything the farmer produces is given protection and everything he buys is placed on the free list. If our Democratic friends contend that we ought to revise the tariff downward in order that the farmer may buy what he uses for less, let me remind you that the following articles which the farmer purchases are admitted to the country free of duty under the present Republican tariff act: Agricultural implements and repair parts for same, binding twine, fertilizer, building material, brick, cement, stone, shingles, pickets, palings, hoops, logs and timber, gloves, boots, shoes, saddles, harness, whetstones, horsepads, barbed wire, coal (both hard and soft), and other commodities he purchases in which wood enters.

For the purposes of comparison, let me here call your attention to some outstanding differences between the Republican tariff act of 1922 and the Democratic tariff act of 1913:

Comparison of protection afforded farm products under Republican tariff act of 1922 and Democratic act of 1913

	Republican tariff, 1922	Democratic tariff, 1913
Wheat (originally 30 cents per bushel)	42 cents per bushel [1]	Free.
Corn	15 cents per bushel	Do.
Rye	do	Do.
Oats	do	6 cents per bushel.
Butter (originally 8 cents per pound)	12 cents per pound [1]	2½ cents per pound.

[1] Rates of duty increased by President Coolidge under flexible provisions of the tariff act.

Comparison of protection afforded farm products under Republican tariff act of 1922 and Democratic act of 1913—Continued

	Republican tariff, 1922	Democratic tariff, 1913
Eggs	8 cents per dozen	Free.
Poultry, live	3 cents per pound	1 cent per pound.
Milk	2½ cents per gallon	Free.
Cream	20 cents per gallon	Do.
Honey	3 cents per pound	10 cents per gallon.
Alfalfa seed	4 cents per pound	Free.
Clover seed	1 to 4 cents per pound	Do.
Millet seed	1 cent per pound	Do.
Timothy seed	2 cents per pound	Do.
Beef and veal, fresh	3 cents per pound	Do.
Cattle	1½ to 2 cents per pound	Do.
Meats prepared or preserved	20 per cent	Do.
Lamb, fresh	4 cents per pound	Do.
Mutton, fresh	2½ cents per pound	Do.
Sheep	$2 per head	Do.
Swine	½ cent per pound	Do.
Ham and bacon	2 cents per pound	Do.
Lard	1 cent per pound	Do.
Lard compounds	4 cents per pound	Do.
Hay	$4 per ton	$2 per ton.
Potatoes	50 cents per hundred pounds.	Free.
Onions	57 cents per bushel	20 cents per bushel.
Wool, scoured	31 cents per pound	Free.

In conclusion let me again suggest that the Nation has come to associate prosperity with Republican rule. It is the party of progress, a debt-paying rather than a debt-making party. Its record is an open book, and its history is inseparably linked with the growth and progress of the Nation.

May I express the hope that each of you will go forth inspired by patriotic devotion akin to that which has guided those who have gone before and through whose devotion to party and country we have received this priceless heritage? I trust you will retell the story in every home and rekindle in every breast a love for the things for which it stands, to the end that the torch of liberty may burn on and on forever, to the further end that this Government—Abraham Lincoln's Government—of, by, and for the people shall not perish from the earth.

MOUNT RUSHMORE NATIONAL MEMORIAL COMMISSION

Mr. LUCE. Mr. Speaker, I ask unanimous consent for the present consideration of Senate 3848, creating the Mount Rushmore national memorial commission and defining its purposes and powers.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent for the present consideration of a Senate bill, which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. SCHAFER. Mr. Speaker, reserving the right to object, what is the bill?

Mr. LUCE. The Mount Rushmore national memorial commission bill.

The SPEAKER. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, what is this bill?

The SPEAKER. The Clerk will report the entire bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That a commission is hereby created and established, to be known as the Mount Rushmore national memorial commission (hereafter referred to as the commission), to consist of 12 members, who shall be appointed by the President. The members shall serve at the pleasure of the President, who shall fill all vacancies that from time to time occur.

The members of the commission shall serve without compensation, except that their actual expenses in connection with the work of the commission may be paid from any funds appropriated for the purposes of this act or acquired by other means hereafter authorized: *Provided*, That the Secretary may be paid such reasonable stipend for his services as may be determined by the commission. Such expenses shall be paid by the treasurer of the commission upon the order of the Secretary thereof, and then only when approved and countersigned by the chairman of the executive committee.

SEC. 2. The commission when appointed shall organize by electing a chairman, a vice chairman, a secretary, and a treasurer: *Provided*, That a treasurer may be selected outside of the commission and may be a bank or trust company. Such treasurer shall execute a bond so conditioned and in such amount as shall insure the protection of funds coming into his possession.

The commission may also create from its own membership an executive committee of five, which shall exercise such powers and functions within the purview of this act as may be authorized by the commission.

SEC. 3. The purpose of the commission is to complete the carving of the Mount Rushmore national memorial to consist of heroic figures of Washington, Jefferson, Lincoln, and Roosevelt, together with an entablature upon which there shall be cut a suitable inscription to be

indited by Calvin Coolidge, and to landscape the contiguous grounds and construct the entrances thereto. Such memorial is to be constructed according to designs and models by Gutzon Borglum, now owned or contracted for by the Mount Harney Memorial Association of South Dakota.

SEC. 4. The commission is authorized—

(a) To receive and take over all property, contracts, rights, and moneys now in the hands of and possessed by the Mount Harney Memorial Association, including memoranda, records, sketches, models, and the incompleted figures on Mount Rushmore.

(b) To receive, solicit, and collect funds and pledges to cover the expense of finishing such memorial, and to pay out the same upon properly receipted vouchers to persons entitled.

(c) To designate solicitors to collect funds and pledges for the prosecution of its work and pay such solicitors such expenses and compensation as it may deem proper.

(d) To employ the services of such artists, sculptors, landscape architects, and others as it shall determine to be necessary to complete said memorial, including the landscaping of the grounds and construction of the entrances thereto.

(e) To procure by purchase or gift such tools, machinery, structures, and equipment as are necessary and proper to complete such memorial with expedition and economy; and generally,

(f) To exercise such powers and functions as are necessary and proper to carry out the purposes of this act.

SEC. 5. That one-half of the cost of such memorial and landscaping shall be borne by the United States, and an appropriation of not to exceed $250,000 is hereby authorized for the purpose. Upon requisition of the executive committee herein provided for, the proportionate share of the United States shall be advanced to the treasurer of said commission from time to time by the Secretary of the Treasury out of any available appropriation, and in sufficient amounts to match the funds collected from other sources by said commission, whether such funds are in the hands of its treasurer or have already been expended upon such memorial by the commission or by its predecessor, the Mount Harney Memorial Association: *Provided*, That the Secretary of the Treasury shall first be satisfied that the funds received from sources other than the United States are actually available in the hands of the treasurer of the commission or have been properly expended in carrying out the purposes of this act.

SEC. 6. That such commission, on or before the 1st day of December of each year, shall transmit to Congress a report of its activities and proceedings for the preceding year, including a full and complete statement of its receipts and expenditures.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, if the bill is to provide for heroic figures and not colossal figures, you may not be able to see them if this mountain is as large as it is stated to be.

Mr. LUCE. The language of the bill, I think, was prepared by the commission.

The SPEAKER. Is there objection?

Mr. GILBERT. Mr. Speaker, reserving the right to object, is this bill identical with the House bill we had up yesterday?

Mr. LUCE. It is an identical bill, but after a conference with the gentleman from Michigan [Mr. CRAMTON] I intend to advise the House to accept certain amendments which appeared in the RECORD this morning, and I think the gentleman from New York has a change of one word which he desires to make. The House bill was identical with the Senate bill, and I am asking to consider the Senate bill rather than the House bill.

Mr. GILBERT. There was a rumor on this side yesterday about which I would like to consult the gentleman from South Dakota [Mr. WILLIAMSON]. The rumor was to the effect that the real purpose was to erect there a monument to the President. In the hearings before the House committee there was no intimation of that kind, and I would like to know if there is any truth in that rumor?

Mr. WILLIAMSON. I will say to the gentleman that I have been a member of the national advisory committee of the South Dakota Rushmore National Memorial Commission ever since its inception, and there has never been any discussion about erecting a monument to any man now living as a part of the memorial. No such thing is in contemplation; it has never been discussed, and has never been thought of by any member of the association. I wish to say that there is absolutely no foundation at all for that rumor. I first heard of it yesterday, and discussed it yesterday. I can assure the gentleman that his fears will never be realized.

Mr. BLACK of New York. If the gentleman will permit, I think I am responsible for that rumor, and I will tell you the genesis of it. An article appeared in the Springfield Republican to the effect that when the President was in South Dakota last summer he was taken to the site of this monument by the sculptor, Gutzon Borglum, and shown the place reserved for his statue.

This rumor has never been denied. The memorial proposes statues to Washington, Jefferson, Lincoln, and Roosevelt, and there is a place for a pedestal for another statue, and at that point Borglum is understood to have said that it was reserved for the President. There is nothing in the bill to prevent a monument being constructed to any living American. In addition, there is a criticism of this bill to the effect that there are no arrangements made for a memorial in the Northwest to a great President of the United States, Mr. Wilson. I promised the gentleman from South Dakota [Mr. WILLIAMSON] I would not object to this bill, because the folks in South Dakota seem to want it. If they want a statue of Coolidge out there to look at or laugh at or do anything else they want with, so far as I am concerned they are welcome to have it.

Mr. WILLIAMSON. Let me point out to the gentleman that I was present at that dedication, and nothing of the kind that the gentleman has suggested occurred there. At least no serious thought was given to any such suggestion. I am very certain of that. The President would be the last man to want to be included in the memorial.

Mr. CRAMTON. Will the gentleman yield?

Mr. LUCE. Yes.

Mr. CRAMTON. The bill does not, in so many words, say that no living person shall have a statue there. It enumerates, however, certain figures, as I recall, that will be placed there, and there is no living person among them. Yesterday we passed a bill without question enumerating the figures of three Presidents to be commemorated at Nashville. There was no word in the bill that Al Smith's figure should not be put there, or any other living person [laughter], but the fact that the name was not enumerated was sufficient assurance to the House that only these three persons would be commemorated there.

Mr. RAGON. Will the gentleman yield to me?

Mr. LUCE. Certainly.

Mr. RAGON. I want to say that my objection yesterday to this bill was not prompted by any belief of any rumor that the figure of anyone, living or dead, other than the four enumerated, would be engraved upon this monument. I feel that if we are going to build memorials of this kind out in South Dakota or down in Tennessee, the States of South Dakota and Tennessee should be the ones to furnish the funds to construct the memorials. If the Republican Members can afford to go down in Tennessee and construct a memorial to Andrew Johnson and neglect here in the city of Washington memorials to William McKinley, General Grant, President Garfield, and various other Republican Presidents I might mention, or if the Democrats could afford to overlook Woodrow Wilson and Grover Cleveland and go down there and build one to James K. Polk, I felt that, in view of the fact that I did not know this Tennessee bill was on the calendar, I ought to withdraw my objection to the pending bill.

Mr. BYRNS. Will the gentleman yield?

Mr. RAGON. Yes.

Mr. BYRNS. So far as the memorial that is to be constructed in Tennessee is concerned, it has been planned for the three Presidents, Andrew Jackson, James K. Polk, and Andrew Johnson, to be erected in Nashville because those three Presidents were citizens of Tennessee at the time they were elected to the Presidency, and the State of Tennessee is contributing 50 per cent of the cost. I understand the same thing to be true with reference to this memorial out in South Dakota; and it seems to me that under these circumstances Congress should not undertake to dictate to South Dakota, any more than to say to Tennessee, what that State shall do with reference to a memorial for ex-Presidents. The only question with Congress is whether or not it is willing, in view of the services of these ex-Presidents, to participate, and I think every President of the United States ought to have a memorial here or elsewhere. [Applause.]

Mr. RAGON. I do, too.

Mr. BYRNS. And so far as I am concerned, I shall never vote against any proposition to provide a reasonable memorial to any man who has enjoyed the high honor of being President. [Applause.]

Mr. RAGON. If I may continue, I share exactly the gentleman's views, but my idea is that when you put a figure out there in South Dakota—I am going to speak frankly because that is the only way for us to understand each other—of Abraham Lincoln, you more or less detract from the wonderful memorial we have constructed to him here. So far as I can call to mind at this time there is not a statue erected by the Government to the memory of Thomas Jefferson, the author of the Declaration of Independence, anywhere.

Mr. BYRNS and Mr. MOORE of Virginia rose.

Mr. JOHNSON of Washington. I may call the gentleman's attention to the fact that there is one in the Capitol itself.

Mr. RAGON. That is a very small affair and I do not think that was put there by the Government. It was put there by the State.

Mr. JOHNSON of Washington. I do not mean in Statuary Hall, but in the Rotunda.

Mr. RAGON. I do not bet, but, as the colored folks down in my country say, I would not be afraid "to lay" you a little it did not cost over $10,000. Thomas Jefferson's home down here is not even owned by the Government. You have not any memorial to one of the greatest Americans that ever lived; and both parties in this country are proud to claim him as an American. I am in favor of giving the Presidents of the United States proper recognition by way of memorials, but let us put them in Washington here where the world can see them and put up something worth while to each one of them.

This was the reason for my objecting to the bill, and had I known that the bill with respect to Tennessee was on the calendar I am frank to say to my friend that I would have accorded it the same treatment, and as soon as I discovered it had been passed I withdrew my objection to this bill.

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. RAGON. Yes.

Mr. MOORE of Virginia. I understand there has been a bill pending for some time before the committee providing for a memorial in Washington to Mr. Jefferson. Does the gentleman know anything about that bill and why it has not received favorable consideration?

Mr. RAGON. I do not. It looks to me, from the way we are erecting memorials here, that we are providing for them on a pork-barrel scale.

Mr. LAGUARDIA. Yes; by building roads and the like. The gentleman gets what I mean.

Mr. RAGON (continuing). And if anybody can go out and get a little monument for his district then he has done something worth while.

Mr. SCHAFER. Did not the gentleman and his Democratic colleagues support the pork-barrel road bill for Virginia?

Mr. MOORE of Virginia. I think the gentleman from Wisconsin has a curious idea of things when he speaks of that bill as a pork-barrel bill. He forgets the history of his country and the reverence we owe to the greatest man the country has produced.

Mr. SCHAFER. The gentleman from Wisconsin does not favor every kind of a raid on the Treasury under the guise of a memorial.

Mr. LUCE. Mr. Speaker, I see my colleague on the committee on his feet. If he desires to make some further remarks I will yield to him.

Mr. GILBERT. Mr. Speaker, I was seeking to make some observations as a member of the Library Committee, which has been severely criticized by the gentleman from Michigan [Mr. CRAMTON] throughout this session as spending so much money, and who on yesterday objected to a memorial to Nancy Hart that was to cost $1,000 on the ground that the committee was running wild.

I supported this bill for $300,000 for the Tennessee memorial, and I am glad to say that I supported the South Dakota proposition. I am glad to say that the gentleman from Tennessee and others express themselves as favoring liberal appropriations for monuments, which meets with my approval. I want merely to have the House know that the intimation that there was something behind the bill—that the President was to have a monument there—had no foundation in fact. The gentleman from South Dakota assures me of that fact.

What Roosevelt gave to the West is well known. I know of nothing that the President has given the West except to have his picture taken last summer in a cowboy suit.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. LUCE. I will yield.

Mr. WAINWRIGHT. Does not the gentleman think that if Congress is to appropriate for a monument to ex-President Roosevelt, that the proper place for it is in the State of New York?

Mr. GILBERT. No; I do not think so. I am glad to see the cooperation of the gentleman from Michigan [Mr. CRAMTON] in supporting the two resolutions calling for $600,000.

Mr. LUCE. The Committee on the Library in the matter of the Roosevelt memorial is waiting the pleasure of the Roosevelt Memorial Association.

Mr. WAINWRIGHT. The question of erecting a monument in the State of New York is a broader question than the Roosevelt Memorial Association, and should be a question for the people of the State of New York. Does the gentleman from Massachusetts consider the Tennessee bill and the bill we are now discussing as fixing a policy for the contribution by the Federal Treasury to any State that desires to erect a memorial to an ex-President of the United States?

Mr. LUCE. The matter has been discussed in committee and will probably receive attention at the next session, but the committee has taken no fixed position on the matter.

Mr. WAINWRIGHT. In other words, if the State of New York should come to Congress with a similar proposition for its ex-Presidents Van Buren, Cleveland, and Roosevelt would that proposal be as liberally entertained as that of the Tennessee proposition and this bill?

Mr. LUCE. The committee seeks to give consideration to all these matters.

Mr. GILBERT. Will the gentleman permit me for one moment?

Mr. LUCE. I do not want to be impatient, but time is getting short. There are but a few hours left, and whatever we do must pass through the enrolling clerk's office and the amendment must be accepted in the other branch.

Mr. GILBERT. There have been so many coming and asking why the Library Committee did not take action toward the monument for Thomas Jefferson in the city of Washington, that I as ranking Democratic member of the Library Committee wish to say that I have voted consistently against these bills because they carried from $100,000 to $150,000. When the time is ripe to build a memorial to a man who occupies the position in history that a President of the United States and the author of the Declaration of Independence did I will support it. I will not support a memorial to Thomas Jefferson in the city of Washington that will cost $150,000 or $200,000, when we have a memorial here to Lincoln and Washington that cost millions of dollars.

Mr. HASTINGS. Will the gentleman yield?

Mr. LUCE. I yield.

Mr. HASTINGS. I did not want to make a speech, but I wanted to ask one question. I remember the other day seeing where a bill passed the Senate to pension the widow of ex-President Woodrow Wilson. I wonder what has become of that bill?

Mr. LUCE. That did not come before the Committee on the Library, and I can not answer the gentleman.

Mr. BLACK of New York. I want to know if the Bureau of the Budget, of which the President is the head, approves of this bill.

Mr. LUCE. Mr. Speaker, the Library Committee recommends this to the House on its own responsibility.

Mr. HASTINGS. And I want to know whether any Member of the Pension Committee is on the floor at the present time who can reply to this inquiry.

Mr. LUCE. I see none present.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. RANKIN. Mr. Speaker, I object.

Mr. BYRNS. I say to the gentleman that a similar bill was passed yesterday by unanimous consent.

The SPEAKER pro tempore. Objection is heard.

LINCOLN ELLSWORTH AND OTHERS

Mr. LUCE. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 3919) awarding a gold medal to Lincoln Ellsworth, which I send to the desk.

The SPEAKER pro tempore. The gentleman from Massachusetts asks unanimous consent to consider at this time S. 3919, which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, do I understand that the amendment I suggested to the gentleman last night will be accepted?

Mr. LUCE. I shall advise the acceptance of the amendment.

Mr. HUDDLESTON. Mr. Speaker, I reserve the right to object. I would like to know what the bill is.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the President of the United States is hereby authorized to present a gold medal to Lincoln Ellsworth, the distinguished American explorer, who, by his conspicuous courage, sagacity, and perseverance, made his famous polar flight of 1925 and the transpolar flight of 1926.

SEC. 2. That the President of the United States is hereby authorized to receive, in the name of the Nation, the American flag which the said Lincoln Ellsworth took over the top from Kings Bay over the North Pole to Point Barrow and Teller, Alaska.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. LAGUARDIA. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 1, line 7, strike out the period and insert the following: "And the President is further authorized to present gold medals of honor to Roald Amundsen, the distinguished Norwegian explorer, and to Umberto Nobile, the distinguished Italian explorer, who participated with the said Lincoln Ellsworth in the trans-Polar flight of 1926."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill (H. R. 12456) was laid on the table.

MOUNT RUSHMORE MEMORIAL COMMISSION

Mr. LUCE. Mr. Speaker, it is my understanding now that the objection made a moment ago to the consideration of S. 3848, will be withdrawn, and I again call it up for consideration.

The SPEAKER pro tempore. Is there objection?

Mr. RANKIN. On account of the gentleman from South Dakota [Mr. WILLIAMSON] I withdraw my objection. He has explained the matter to me.

Mr. BRAND of Georgia. Mr. Speaker, I reserve the right to object. I want to know what the bill is.

The SPEAKER pro tempore. Without objection, the Clerk will again report the bill.

There was no objection, and the Clerk again reported the bill.

Mr. LUCE. Mr. Speaker, I will say to the gentleman from Georgia that this is a bill authorizing the cooperation of the Federal Government on a basis of equal contribution with the State of South Dakota to carve on the face of an immense cliff there the statues or figures of Washington, Jefferson, Lincoln, and Roosevelt.

Mr. BRAND of Georgia. Has the gentleman from Michigan [Mr. CRAMTON] anything to do with this?

Mr. LUCE. No.

Mr. BRAND of Georgia. Then I withdraw my objection.

Mr. LUCE. Mr. Speaker, I offer the following amendments which I send to the desk.

The Clerk read as follows:

Amendments offered by Mr. LUCE: Page 2, lines 3 to 9, inclusive, strike out all of the proviso.

Page 3, line 5, after the word "Dakota," insert the following: "No charge shall ever be made for admission to the memorial grounds or for viewing the memorial. No money hereby authorized to be appropriated shall be expended until the Secretary of the Treasury receives satisfactory assurance that said memorial when completed will be suitably maintained by the State of South Dakota."

Page 3, line 12, strike out the comma and the words "solicit, and collect."

Page 3, strike out all of lines 16 to 18, inclusive.

Page 3, line 19, strike out "(d)" and insert in lieu thereof "(c)."

Page 3, strike out lines 24 and 25, inclusive, and lines 1 and 2, on page 4.

Page 4, line 3, strike out "(f)" and insert in lieu thereof "(d)."

Page 4, line 5, insert after the word "that," the words "not more than."

Page 4, lines 6 and 7, strike out the words "an appropriation of" and after the word "authorized" insert the words "to be appropriated."

Page 4, line 13, strike out the word "collected" and insert in lieu thereof the word "advanced."

Page 4, line 13, strike out the word "by" and insert the word "to."

The SPEAKER pro tempore. The question is on agreeing to the amendments offered by the gentleman from Massachusetts.

The amendments were agreed to, and the bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

GENERAL LEAVE TO PRINT

Mr. TILSON. Mr. Speaker, I think it will be convenient and save time if I now ask unanimous consent for the extension of remarks of Members at the close of the session. Before making the request, however, I wish to state that, as I understand it, permission to extend remarks, not otherwise specified in any way, simply means extending one's own remarks, and does not include the printing of newspaper or magazine articles, newspaper editorials, or anything of that kind.

Mr. GRIFFIN. Mr. Speaker, will the gentleman yield?

Mr. TILSON. Yes.

Mr. GRIFFIN. Does it permit a Member to insert extracts from his own speeches?

Mr. TILSON. Yes; those are his own remarks.

Mr. Speaker, I submit the unanimous-consent request, that for 10 days after the close of the session, and up to the time of the publication of the last number of the RECORD, all Members of the House may have leave to extend their own remarks in the RECORD.

Mr. McCLINTIC. Mr. Speaker, will the distinguished leader yield to me for a question?

Mr. TILSON. Yes.

Mr. McCLINTIC. I would like to ask if it is the gentleman's understanding that where there is a RECORD already printed and something has since transpired, prior to that time set, you can include in your own remarks extracts from a previous speech?

Mr. TILSON. It merely means excluding from the RECORD, as a part of one's remarks, somebody else's articles.

Mr. RANKIN. Anything that has been previously printed in the RECORD may be reprinted?

Mr. TILSON. For a long reprint I understand that you would have to have special permission.

Mr. GARNER of Texas. For the information of the House, I may say that it is the usual thing for the Committee on Printing to have the last RECORD come out about 30 days after the adjournment of Congress, and at any time within those 30 days Members can insert their remarks in the RECORD. If a Member has prepared them and fixed them up within 30 days, he can get them into the RECORD. That, however, can only be brought about by order of the Committee on Printing.

Mr. TILSON. The Joint Committee on Printing has the right to extend the time.

Mr. GARNER of Texas. As I understand, extending one's own remarks does not include platforms of parties or speeches made in conventions or otherwise?

Mr. TILSON. I understand it does not.

Mr. GARNER of Texas. If they are inserted, they must be inserted by authority of another body, which is usually done.

The SPEAKER pro tempore. The gentleman from Connecticut asks unanimous consent that all Members be permitted, up to the date of the publication of the last RECORD, to extend their own remarks. Is there objection?

Mr. CRAMTON. Reserving the right to object, Mr. Speaker, I think it would be well to have it understood whether this permission would apply to more than one extension if a Member so desires.

Mr. TILSON. I understand that a Member can make as many extensions as he wishes, provided they are his own remarks.

The SPEAKER pro tempore. Is there objection?

There was no objection.

RESOLUTIONS ON DEATH OF MARTIN B. MADDEN

Mr. THATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD, and include as a part thereof a copy of the resolutions passed by the Committee on Appropriations on the death of the late MARTIN B. MADDEN.

The SPEAKER pro tempore. The gentleman from Kentucky asks unanimous consent to extend his remarks by inserting the resolution passed by the Committee on Appropriations concerning the work and record of the late MARTIN B. MADDEN. Is there objection?

There was no objection.

Mr. THATCHER. Mr. Speaker, under the leave granted me therefor, I extend my remarks in the RECORD by including therewith the following:

Whereas on the 27th day of April, 1928, at his post of duty in the National Capital, in the full vigor of his faculties, and in the seventy-fourth year of his age, Hon. MARTIN B. MADDEN, Representative in Congress from the State of Illinois, and chairman of the House Committee on Appropriations since July, 1921, died as he wished to die and passed into the great beyond: Be it therefore

Resolved by the committee, as follows:

First. That in the death of its greatly beloved and distinguished chairman the committee has suffered an irreparable loss, and each member of it has been deprived of a loyal friend, comrade, and counselor. The sorrow thus sustained by the members of the committee may be softened only by the memory of his splendid deeds and character, and by the indulgence of the honorable pride which is theirs because of their intimate service with him, and under his wise and effective leadership, in the accomplishment of great tasks of usefulness for the Nation. As chairman of the committee ever since there came to it the greatly increased powers and jurisdiction following the enactment of the Budget

act of 1921, he gave to the Nation and to its taxpayers a service of immeasurable value.

Second. That because of the important work he so long and so ably performed for them—extending without break or interruption from the Fifty-ninth to the Seventieth Congress—his country and his countrymen have also sustained a great and irreparable loss. His courage and sense of duty, his diligence and tact, his unselfish zeal, his marvelous knowledge and grasp of the fiscal and other affairs of the Nation, his broad experience and wide sympathies, his rugged honesty and sense of justice, and his sturdy patriotism were qualities that made him throughout a great generation of our American history an outstanding figure in the conduct of our national affairs. Self-made in the best and fullest sense of the term, and holding always the unstinted respect and esteem of his fellow citizens, his career epitomized and exemplified the richest and noblest values of American life and enterprise. Possessed in the highest degree of the "common touch," ripe with years and honors, and universally beloved, he has gone to his great reward, and his splendid life and achievements have become the heritage of the Nation and the memory of them a vital star in the Nation's firmament.

Third. That his faithful companion and helpmate and the other members of his family have suffered a bereavement which only time, faith, and the remembrance of his rare and noble character and of his all-embracing love and devotion for them may alleviate; and the committee and each member of it conveys to them the assurances of a profound sympathy and a tender solicitude.

Fourth. That these resolutions be made a part of the records of the committee and that a copy of them be furnished to the bereaved family.

DISTRICT JUDGE, NORTHERN DISTRICT OF ILLINOIS

Mr. DYER. Mr. Speaker, by direction of the Committee on the Judiciary of the House, on account of the real emergency existing in the United States court for the district in which Chicago is situated, due to the illness of one of the judges, where the law does not permit a successor to be appointed, I ask unanimous consent to consider Senate bill 4183.

The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent to consider the bill S. 4183, which the Clerk will report.

The Clerk read as follows:

A bill (S. 4183) authorizing the filling of a vacancy occurring in the office of district judge for the northern district of Illinois created by the act entitled "An act for the appointment of an additional circuit judge for the fourth judicial circuit, for the appointment of additional district judges for certain districts, providing for an annual conference of certain judges, and for other purposes," approved September 14, 1922.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. SCHAFER. Reserving the right to object, Mr. Speaker, do I understand the gentleman to say that the Committee on the Judiciary is unanimously in favor of this action?

Mr. DYER. Yes.

Mr. GARNER of Texas. This is not the creation of an additional judge?

Mr. DYER. Under the law as it exists now one of the judges appointed several years in the Chicago district is ill and no successor can be appointed to succeed him. The present judge can not perform his duties any more, and this bill is to authorize the President to appoint a successor to him. That is all.

Mr. GARNER of Texas. It does not create an additional judge?

Mr. DYER. It does not create an additional judge.

Mr. GARNER of Texas. While this judge is living?

Mr. DYER. No.

Mr. LAGUARDIA. Does the gentleman intend to call up any more bills providing for the appointment of judges?

Mr. DYER. If I get permission, I will.

Mr. LAGUARDIA. You will have to call up the bill providing for New York judges before you will get permission to call up any more bills for additional judges, I can assure you.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That a vacancy occurring at any time in the office of district judge for the northern judicial district of Illinois, created by the act entitled "An act for the appointment of an additional circuit judge for the fourth judicial circuit, for the appointment of additional district judges for certain districts, providing for an annual conference of certain judges, and for other purposes," approved September 14, 1922, is authorized to be filled.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

SPEECH OF HON. TOM CONNALLY, OF TEXAS

Mr. McREYNOLDS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech made by the Hon. TOM CONNALLY, a Member of this House, on his record in the House.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. McREYNOLDS. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the following speech by Hon. TOM CONNALLY, a Member of this House, on his record in the House:

RECORD IN CONGRESS

Mr. Chairman and the Democrats of Texas, to the midst of the splendid district which has honored me with a seat in the House of Representatives of the United States I have come to open my campaign for United States Senator from Texas. Twelve years ago the people of this district elected me to Congress. Since that time I have had two contests for renomination. In the first the people gave me a majority of 22,500 votes. In 1926 I received a majority of 26,500. For your confidence and support I am deeply grateful. It has been my constant endeavor to render faithful and efficient service, with a vision of comprehending not simply your local interests but including the interests of Texas and all of the people of the United States. In response to the invitation of those who have repeatedly honored and trusted me, I embrace this opportunity to launch my campaign for the United States Senate among those who have known me longest and who know me best. Their friendship and support have sustained me in the past and now give me strength and confidence as to the future.

A candidate for public office should lay before the people his views upon political issues and public policies. During 11 years of service, by my votes and speeches in the Congress, a public record has been made of my views and actions respecting most of the public questions now attracting attention. It will not be possible in a single speech to review, even briefly, legislation upon which my duty has required me to take action. It is due the public that I express my views on matters of current national interest.

EIGHTEENTH AMENDMENT

The eighteenth amendment is a part of the Constitution of the United States. I am sworn to uphold and defend it. In Congress I have consistently voted for its faithful and efficient enforcement. I stand for the enforcement of the law. Since of voting age I have uniformly voted for local option and prohibition.

RAILROAD RATES

I favor the repeal of section 15 (a) of the Esch-Cummins transportation act and the restoration of "a reasonable rate" as a basis of rate making. On the 26th of May, 1921, I introduced a bill, H. R. 6642, to accomplish that result. I voted against the Esch-Cummins bill. Freight rates on agricultural products and commodities which the farmer must buy are too high. I favor a survey of the whole rate structure with a view to its readjustment to meet present conditions.

HELPFUL FARM LEGISLATION

All legislation in behalf of agriculture that is beneficial and economically sound has had my consistent support. Legislation providing for an agricultural member on the Federal Reserve Board, the establishment and continuance of the War Finance Corporation to aid in financing the exportation of agricultural products and products of the ranch, the establishment of intermediate credit banks to provide loans for carrying farm products and giving rediscount privileges for a longer period, and measures to promote cooperative marketing are among the measures which I have urged and advocated.

The Aswell farm relief bill, offered by the Representative of a cotton district in Louisiana, had my active support. It provided $250,000,000 capital with which export corporations should buy and carry cotton and farm products for farmers and maintain prices. This bill was in conformity to a Democratic platform demand.

The Crisp farm relief bill, by Mr. CRISP, of Georgia, based upon the same general plan, with $250,000,000 with which to finance it, received my hearty support. Neither bill provided any tax or fee on the already overburdened farmer.

NEW USES FOR COTTON

On December 21, 1926, I offered in the House an amendment to the agricultural appropriation bill to provide $50,000 for a scientific investigation to discover new and further uses for cotton and aid the cotton farmer. When the bill reached the Senate an amendment of Senator HARRIS, of Georgia, for $25,000 was adopted in the committee and became a law. The Department of Agriculture is conducting a research under the direction of a Texan, Dr. B. Youngblood, until recently director of the Texas experiment station, a part of the Agricultural and Mechanical College, and under this plan has already accomplished much

toward the discovery of new and additional uses of cotton in the industries, to the benefit of the cotton producer.

CENSUS OF COTTON CARRY-OVER

Congressman MARVIN JONES, of Texas, on December 7, 1926, began the movement to provide a census of the cotton carry-over from year to year. The Jones bill had my hearty support and in substantial form became a law. It is intended to establish a record of the amount, the grade, and staple of the cotton surplus and stocks carried from year to year. It seeks to prevent low-grade stocks from depressing the market of the entire crop. Unspinnable and "dog-tail" cotton in carry-over stocks had a tendency to depress the market.

NEED FOR FARM RELIEF

The depression in agriculture has admittedly been caused by the high Republican tariff, which forces the farmer to sell his products in a cheap world free market and buy his goods in a high protected market. Under Republican economic polices we have seen agriculture prostrated. The greatest industry in the land has been made to suffer hardships it has never heretofore known through the favoritism of the Republican Party to manufacturing and other pampered industries. The Republican Party, the author of the farmer's distress, plans to fasten the tariff on the farmer forever.

Republican representatives from the farm States of Iowa and the Northwest are so wedded to the high-tariff policy that they join the eastern Republicans in robbing their own people. Their so-called relief bills are intended to rivet tariff shackles more firmly on the farmer. Their prime purpose is to perpetuate the tariff and rob the farmer under the pretense of aiding him. Farm prices are further depressed by the dumping of cotton on a seasonal market of three months rather than over an annual period.

RELIEF PLAN PROPOSED

How can these wrongs to the farmer be remedied? I have introduced a bill to create a Federal farm board, with power to organize an export corporation for each primary farm product, such as cotton and wheat. The Connally bill provides a revolving fund of $500,000,000, to be supplied by the Treasury of the United States. In periods of depression the cotton export corporation would go into the market and buy and hold cotton and feed it out into the market over an annual period. The bill further directs that the Treasury issue to exporters, farmers, cooperative societies, and others Treasury certificates on farm products exported to foreign countries. Certificates of 3 cents per pound on cotton and 21 cents per bushel on wheat are provided. The certificates are negotiable and may be sold for cash and are tenderable in payment of tariff customs on goods imported. The bill would directly bring to the farmers of the South $200,000,000 per year. Through stimulation of the market and the reduction in cost of manufactured goods it would give still greater indirect farm relief. The export corporations, with $500,000,000, will have sufficient funds to finance an entire crop without taxing the farmers with a new and burdensome tax. Other farm bills take money out of the farmer's pocket in the form of equalization fees of $10 to $25 per bale on cotton. My bill carries no unjust or unconstitutional fee. It adds $15 to the value of every bale of cotton instead of subtracting $15 to $25. It provides no army of employees and taxeaters to be paid for out of the farmer's pocket. It gives the farmer an export bounty on his cotton exported just as the manufacturer gets a bounty out of the tariff on imports. It costs the farmer nothing.

The industrial sections have been made prosperous at the expense of the farmer. The stock market is prosperous. Securities of the great corporations are active. The manufacturing centers are growing richer and richer. The farming sections have been growing poorer and poorer. The discrimination against agriculture must be destroyed. The Connally bill takes the tariff off the farmer's back and gives him sound and real and workable relief.

REGULATION OF COTTON EXCHANGES

A bill introduced by me proposes to place the cotton exchanges under Government supervision and regulation. It is notorious that in the fall of 1927 the cotton market was scandalously manipulated and farmers were robbed by juggling and gambling. The August Government report of more than 13,000,000 bales put cotton up. Under a later estimate of a million bales less cotton the price was forced down $30 per bale. Through "washing" and "straddling" the operators and manipulators of the cotton-future markets, through the accumulation in New York of large stocks of low-grade cotton, were able to depress the market in an endeavor to "shake out" spot cotton of the farmers and merchants and buy it at ruinous prices. The cotton farmers of the South have been robbed of hundreds of millions of dollars through the cotton exchanges. The Connally bill provides criminal prosecution for its violation. It prohibits juggling and manipulation. It prevents gambling and "straddling" and "washing" the market, yet permits legitimate transactions. It will correct abuses and give the farmer relief. It will give the farmer an honest and fair market.

VETERANS OF AMERICAN WARS

Liberal provisions for hospitals for veterans of the World War and other wars, adequate care of dependents, the adjusted compensation act, measures for training and rehabilitation and other veteran relief, and the gold star mothers' bill providing a trip to Europe for mothers of soldiers who sleep in France had my active support. In time of national danger, when war is forced upon our country, when at last the sword must be drawn in defense of the lives and liberties of our people, the young manhood of the Nation has always responded, and with rifle and bayonet has marched away to the battle field. In the Spanish-American War our troops shed their blood in the fever-infested swamps of Cuba and in the distant jungles of the Philippines. In the World War, American boys from every section of the Republic answered the summons, and on every fighting field in Europe, from Cantigny to the forests and ravines and wire entanglements of the Argonne, blazed a pathway of glory. They gathered up the richest garlands of victory and laid them at their country's feet. Thousands sleep on the hillsides where they fell. Other thousands in their maimed and broken bodies will bear all the way to the tomb the badge of their courage and their sacrifice for their country. Others are infirm and ill from the seeds of the disease contracted in camp and in the trenches. Our great Republic must not be ungrateful to its heroic defenders. In times of peace we must adequately provide for those who served and suffered in times of war.

Veterans of the Spanish-American War were ignored for nearly 30 years. I actively advocated the pension acts which gave tardy recognition to the veterans in 1898.

In the World War we drafted the man power of the Nation. Industry and resources should be drafted if war should come again. Profits and wealth are no more sacred than human life.

NICARAGUAN INTERVENTION

As a member of the Committee on Foreign Affairs, I have vigorously opposed the course of the administration in Nicaragua. Intervention ought to be limited to protecting American life and property. The United States should not have recognized the government of Diaz, the usurper and dictator who has been repudiated by the people of Nicaragua. The administration has become his partisan supporter, and with the Navy and marines has forced him upon the people of that Republic. Not one American civilian has been killed in Nicaragua. No American property has been destroyed. The only American blood that has been shed has been that of marines who were sent into the jungles of Nicaragua without having their will consulted. A considerable number of marines have been killed and wounded in the unauthorized war in Nicaragua. Congress has not declared war, but the State Department is waging war in the name of the American Government. I would not give the life of one American boy from an American home for all the concessions in Nicaragua. The blood of American boys is too dear to pour it out in the wilderness of Nicaragua in guerrilla warfare.

RIVERS AND HARBORS

Deep-water ports and channels are necessary for modern commerce. Through the Gulf of Mexico the products of Texas find their markets in distant corners of the earth. Deep-water ports reduce freight rates. They give an outlet to the world.

They add revenue to what we sell and cheapen what we buy. They are not local. They serve the whole State. They are necessary to the prosperity of the Southwest. Improvement of all Gulf projects and all Texas ports and the Houston ship channel and the intercoastal canal have had my earnest support, as well as meritorious projects elsewhere. Such shall be my policy in the future.

SAVE MUSCLE SHOALS

At Muscle Shoals, on the Tennessee River, in Alabama, the Government during the war began the building of a great dam and electric-power plant to manufacture nitrogen for the manufacture of munitions of war. The plant has cost $150,000,000. Electric-power interests have endeavored to secure control of the project.

Muscle Shoals should not be turned over to the Alabama power interests and I shall oppose their efforts to secure control. That great plant should be operated to produce fertilizer for the farmers and power for the public. The soil is being impoverished and its fertility must be renewed. We should manufacture nitrate fertilizers at home, instead of importing them from Chile. Muscle Shoals can supply munitions in time of war.

NATIONAL DEFENSE—ARMY AND NAVY

So long as naval armament is not limited by agreement of the powers I favor the maintenance of a Navy adequate to national needs. A Navy can not be quickly constructed in time of danger. American commerce and our possessions, as well as self-defense, require such a Naval Establishment as will insure our complete protection. So long as foreign nations refuse to agree to the limitation of naval armament, I favor the maintenance of a Navy as powerful as that of any other nation.

A large standing army in time of peace is not necessary. It is both expensive and dangerous to liberty and to peace. The present strength of the standing Army is sufficient for our national needs. However, proper preparedness requires liberal appropriations for the maintenance of the National Guard, the Organized Reserves, the Reserve Officers' Training Corps, and citizens military training camps. These services

must be maintained to train civilian officers to command and train the civilian armies called to the colors in time of war. I have vigorously urged proper support of these services.

AVIATION IS VITAL

Aviation is a vital arm of the military and naval service. Its development has worked a revolution in warfare. Lack of aircraft preparedness was a handicap in the Great War. Obsolete planes and equipment hampered our gallant aviators in their daring exploits over the lines. We must not again send our boys into danger and death through false economy. The marvelous flights of Colonel Lindbergh have demonstrated what training and proper preparation and lofty courage can achieve. Aircraft is a powerful weapon of defense against hostile fleets and a mighty instrument of offense. I favor generous appropriations for the development of aircraft equipment, for the training of aviators, and for military and naval aircraft. I favor the gradual extension of the air mail service. We must keep pace with the world in the development of both military and commercial aviation.

PROBLEM OF THE TARIFF

The Democratic Party is opposed to high protective tariffs. I stand with my party for a tariff for revenue only or a tariff so adjusted as to derive revenue from imports, instead of shutting out imports by prohibitive rates. I spoke and voted against the Fordney-McCumber tariff bill. I favor a competitive tariff, with rates so adjusted as to equalize the costs of production at home and abroad, considering the cheaper labor abroad and other elements of cost. A competitive tariff is a tariff for revenue, because it promotes healthy competition and produces revenue.

So long as the Government is committed to a tariff policy, I favor the inclusion of farm products and the products of the ranch. The tariff should not discriminate against the farmer and the ranchman, either as to their raw products or articles manufactured abroad from such raw products. They are as much entitled to the protection of the tariff as the manufacturers.

GOOD ROADS PROGRAM

The Federal Government, because of its interest in post and military roads has a distinct interest in the maintenance of highways. Federal aid has always had my active support. It shall be my policy to advocate the extension of Federal aid in proportion to the advancement of road building programs throughout the United States. Texas receives more money from this source than any other State.

POSTAL LEGISLATION

For many years the salaries of postal employees and carriers were much lower than those of others in Government employ. I have voted for the adjustment of salaries to equalize them. The efficiency of the Postal Service should be maintained.

RESTRICTING IMMIGRATION

In Congress I have supported restrictive immigration legislation. The conditions in Europe following the World War demanded that the United States protect its own interests and those of its people by preventing an influx of aliens. I voted against Japanese immigration and took an active part in preventing the administration from handling that question by a "gentlemen's agreement." To have tolerated such a policy would have given immigration the color of being an international question. It is purely a domestic question, subject alone to the action of Congress and the American people. No other nation nor foreign influence has any right either to dictate or suggest to the people of the United States what their policy shall be with reference to immigration.

WAR DEBTS OF EUROPEAN COUNTRIES

By vote I opposed the cancellation of war debts due the Government of the United States by European countries. The bonded war debt is a mortgage upon the people of the United States. The debts of foreign nations to the United States should be paid. Their payment will relieve the burden of American taxpayers.

TAXATION AND CITIZENSHIP

The many billions in Liberty bonds and war obligations must be paid by Federal taxation. I have stood for so adjusting income and other taxes, as to place the burden upon those most able to bear it, considering, however, the fact that the payment of taxes in some amount quickens the responsibility of the citizen and increases his interest in behalf of an economical administration of the Government. Graduated rates with a reasonable exemption afford the best standard. I have stood with the Democrats in Congress in support of tax reduction bills. In the tax reduction bill now pending I voted for the repeal of the excise tax on automobiles and for the repeal of nuisance taxes. They were imposed as war measures and should be removed.

LAWS ORIGINATED

While a member of the Texas House of Representatives I was one of the authors of the Connally-Meachum antitrust law of Texas of 1903. It has brought millions of dollars into the treasury of Texas.

When the national defense act of 1920 was before Congress I was instrumental in securing the adoption of a number of amendments which liberalized that legislation.

I offered in Congress and secured the approval of legislation requiring the discharge from the Army and Navy of boys under 21 years of age who enlisted without the written consent of their parents. Under the former law, boys of immature years were enticed from home to enlist for long periods in the military or naval services against the wishes of their parents and to the neglect of their education.

In 1921 I proposed an increase in the fee on passports. The policy was adopted and brought into the Treasury, during its operation, approximately $5,000,000 annually.

On April 2, 1921, I offered an amendment to the naval appropriation bill to call an international conference on disarmament. The amendment was defeated by Republican votes. However, when the bill reached the Senate, Senator Borah's amendment was adopted and the conference was called.

SPECIAL INTERESTS

Legislation in the interest of special classes is harmful to the interest of the people. Selfish interests have their lobbyists at each session of Congress. They are there to kill legislation that may destroy the preference they are enjoying or that may investigate or regulate them. Powerful lobbies, through propaganda, through political pressure, and by the seductive blandishments of personal and political assistance and advantage, seek to influence Members of the House and Senate. As your Senator I shall oppose the granting of special favors and shall resist the efforts of the paid or secret lobbyists to secure them.

MONOPOLY AND THE TRUSTS

With the inauguration of the Republican administration in 1921 there immediately began an era of favoritism which has debased the public service and robbed and exploited the people of the United States. Under official sanction and favor there have been formed many gigantic mergers of corporate properties in industry and business. Consolidation is centering in New York the control of industries that reach into every corner of the Republic. Individual business enterprise is being hard pressed to survive. The Department of Justice has been indifferent to the growth of monopoly. The destruction of competition hurts honest and lawful business as surely as it oppresses the public. The control of great industries by a few men is dangerous to the economic freedom of the people. Large corporate organizations are necessary in modern finance and industry. However, when they become so large or so powerful through combination as to become a monopoly, competition is destroyed and their power becomes an economic menace. Self-defense in such a case requires regulation and control. An instance is found in the case of the Chicago packers. Not content with control of the meat-packing business, they were acquiring control of the fruit, vegetable, and food canning business, and were invading the general grocery field. They were threatening to acquire a dominant position in the control of the food supplies of the American people. Regulation of their operation was the only remedy that could be employed. In the interest of the people the Government was reluctantly forced to adopt that policy. Competition must be preserved. The small business and the individual of small capital is as much entitled to the protection of the law as the powerful concerns. I shall favor an investigation of the organization, methods, operations, and financing of monopolistic concerns to determine whether they are violating the Federal antitrust laws or are operating in violation of wholesome regulation of interstate commerce.

FEDERAL TRADE COMMISSION

The Federal Trade Commission was created to investigate unfair trade practices and the operation in interstate commerce of business concerns under the antitrust laws. It was conceived for a useful purpose. The Republican administration has deliberately stacked the commission. It has placed in control men who are boldly the friends of the trusts and the malefactors whose conduct the commission was created to investigate. Under the present chairman the Federal Trade Commission is the champion of monopoly. It is the haven of refuge for unfair and cutthroat business. It is a safe port for pirates and buccaneers who exploit the American people and prey upon their commerce. The $2,000,000,000 Bread Trust found safety under its protecting wings. As a Senator I shall endeavor to make the Federal Trade Commission an impartial arbiter between the people on the one hand and the interests it is to investigate on the other.

INVESTIGATION OF POWER TRUST

Senator TOM WALSH, of Montana, performed outstanding service to the American people in his drastic unmasking and the liberty and corruption involved in Teapot Dome and the Sinclair-Fall-Doheny oil-leasing scandals. Senator WALSH offered a resolution in the United States Senate providing for the investigation by a senatorial committee of the financing and organization of the Electric Power Trust engaged in interstate business. The people have a right to know the truth about their Government and about the control and regulation on monopoly. They

ought to know the truth. Monopoly can exist only by the consent of government. The Government belongs to the people. The power which government exerts belongs to the people. The Government is responsible to the people for the exercise of that power.

An investigation of the Power Trust could do no more than reveal the truth. The efforts of the Power Trust to secure control of the water-power sites belonging to the people is a matter of legitimate governmental concern. The people ought to know the truth about contributions by the Power Trust to political campaigns and to candidates for office.

When the Walsh resolution came before the United States Senate the stand-pat Republicans were against it. One of the most powerful lobbies ever gathered in Washington began to dig its grave. It did not want any investigation. Especially it did not want Senator WALSH to conduct the investigation. Everybody knows that Senator WALSH is honest. Everybody knows he would dig out the truth. Fearful of public indignation if the resolution were killed outright, the lobby determined to first cripple it and then bury it alive. If investigation must come, it must be made by its friends. The burial ground was selected in the Federal Trade Commission. The hard-boiled Republicans in the Senate voted to send it there. A group of Democratic Senators joined them. Senator MAYFIELD voted with the Republicans and the lobby.

The Senate investigated Teapot Dome and Fall, Doheny, and Sinclair. Had that investigation been sent to the Federal Trade Commission, Fall would still be in the Cabinet with his black satchel filled with $100,000 in cash and $233,000 in Liberty bonds. Sinclair would still have Teapot Dome, and Doheny's oil rigs would be dotting the slopes of Elk Hills. JIM REED, of Missouri, and a Senate committee investigating VARE in Pennsylvania and Frank Smith in Illinois and exposed the astounding corruption in election frauds. Could not the Senate be trusted to get at the truth as to the Power Trust?

INSULL CAMPAIGN CONTRIBUTIONS

Mr. Samuel Insull, one of the commanding figures in the Power Trust, gave $125,000 to the campaign fund of Frank L. Smith, candidate for Senator in Illinois. Why was Mr. Insull so deeply interested in having a friend in the United States Senate? Did he fear the Walsh resolution? Did he hope to have a Senator to vote to send it to the Federal Trade Commission? Mr. Insull when he contributed $125,000 did not want a Senate investigation. He refused to tesitfy about his contributions until compelled by the court to do so. He does not want an investigation now. Mr. Frank Smith would have voted to send the Walsh resolution to the Federal Trade Commission. Mr. Frank Smith was thrown out of the Senate for receiving the Insull contribution. Some Senators who voted to oust him voted just as Smith would have voted had he been there. Even Illinois in the election last Tuesday repudiated Frank Smith for his alliance with Insull. Illinois has rebelled against her Senator becoming tied to the Power Trust. He was ingloriously defeated.

The Democratic Party is not the enemy of business. The proposal of the Democratic Senators to investigate the Power Trust was not an act of enmity to business. I am not against business. I am not a baiter of corporations. This is the electric age. We need power companies. I welcome them to Texas. I am glad they are here. I want them to get a fair and just return on their investment. I want to see their properties protected. As a Senator I shall not be unfair to them. All that I demand is that they submit to the laws and to investigation as other business enterprises. They enjoy corporate existence by grace of the public. They are granted franchises and special privileges by the people. They are engaged in a public service. In their very nature they are monopolies. They possess enormous economic power and billions of dollars in financial resources. They ought not to object to proper investigation. In return for the privileges, franchises, and patronage given to them by the people they owe the people the duty to neither conceal the truth nor resist proper investigation. I hope that the power companies will not follow the lead of Mr. Insull.

LABOR AND JUSTICE

Human labor applied to natural resources creates all wealth. In mine and factory, field and shop, and in industry and commerce muscle and mind combine to produce the necessities and comforts of modern life. Labor is entitled to a fair return for its contribution to the creation of wealth and is entitled to enlightened and modern working conditions. Legislation giving fair and just consideration to labor has had my support. Labor has the right to organize and to bargain collectively with the industries which it serves. Industry is organized, and only through organization can labor effectively present its claims.

The man who toils is the basis of all industry and commerce. He feeds and clothes the world. In the congested city and in the country sweating brows and bending backs bear the burden of civilized society. Toiling hands erect the skyscraper of stone and steel. The fleets that carry the commerce of modern times are manned by men who toil. Through the day and through the night laboring men, amidst danger and peril, operate the railways that serve all mankind. The mass of our people are toilers and workers. Justice requires full and fair protection of and regard for the rights of labor.

WATERS OF THE RIO GRANDE

The uninterrupted use of the waters of the Rio Grande in Texas is vital to Texas citizens and to the Magic Valley. Some permanent agreement regarding their appropriation ought to be secured from Mexico. Two-thirds of the water of the Rio Grande comes from the Mexican side. The property of the entire valley is dependent upon the permanence of the water supply. The waters of the Colorado River originate in the United States. Yet about 200,000 acres of land in Mexico, just below the California border, is irrigated from the Colorado. The United States, through control of the Colorado River, can effect an agreement with Mexico to secure continued use of the waters of the Rio Grande.

The United States should not grant to Mexico the use of waters of the Colorado without securing to our citizens the use of the Rio Grande. I shall urge our Government to negotiate with Mexico a treaty confirming the right to use water from the Rio Grande. The use of the Rio Grande waters is necessary to the life of the valley.

CAMPAIGN EXPENDITURES

Beginning with Newberry in Michigan and most recently in the cases of VARE in Pennsylvania and Smith in Illinois, selfish interests have expended millions of dollars in primary elections to elect Senators who would be subservient to their masters. Large sums of money are given with expectation of a return on the investment. Stupendous sums corrupt the ballot and degrade the public life of the country. Such practices are vicious and dangerous to free government.

WILL SUPPORT NOMINEE

I am a Democrat. I shall support the nominee for President of the Democratic National Convention at Houston, whoever he may be. It has been my uniform practice to support the nominees of my party.

To-day the American people are confronted by the tremendous issue of corruption in high office. In 1921 the Republicans came into power. They made haste to plunge into an orgy of bribery and conspiracy. They made merchandise of the oil resources of the Nation. The reserves pledged to the Nation's defense in time of war were bartered for gold, corroded with shame.

The Department of Justice, established to prosecute violators of the law, became a nest of conspiracy against the law.

The office of Alien Property Custodian criminally betrayed maimed and wounded veterans and pilfered the sacred funds of hospitals. It perpetrated vast frauds upon the Government. Members of the President's Cabinet disgraced and debauched their high office and dragged the public service to the lowest depths of degradation. Never did there come from the head of the Republican Party rebuke or condemnation. Never did there come from the White House either denunciation or scorn. The tainted and odious spoils of bribery and barter found their way into the national treasury of the Republican Party. High officials of that party, with guilty knowledge, condoned and concealed the foul and corrupt scandal that debauched the Cabinet itself. More than $3,000,000 were poured into the ballot boxes by Republicans in a senatorial primary in Pennsylvania. In a Republican senatorial primary in Illinois a million dollars and more tarnished the election booths of that State. The successful candidates accepted contributions from a power magnate while still serving on the State commission which fixed power rates. Never was there such a putrid mass of corruption and scandal under any administration in the history of the Republic. The Democratic Party is the only instrumentality with which the American people can drive from power the party responsible for those terrible wrongs. The Democratic Party is the only hope of redemption of the public honor. Honesty and public purpose are eternal issues. On those issues a united Democracy deserves to win. A united Democracy can win. There is no place in the United States Senate for a Texas Democrat who votes with the enemies of democracy.

KU-KLUX KLAN

I have never been and never expect to be a member of the Ku-Klux Klan. I am opposed to secrecy in politics or government. One of the dearest traditions of America is that its Constitution guarantees to every citizen religious freedom, free press, and free speech. Secrecy in government is contrary to the genius of a free people. It was against the closed doors of the secret star chamber of the King that the champions of English liberty hurled their attacks.

The secret court of the Crown was a terrible and tyrannical instrument of oppression of the subject. The courts, legislative halls, and agencies of government ought to be conducted without the mask of secrecy. There should be no chamber the people can not enter. There should be no whispered words that the ear of the people can not bear—no screen behind which the eye of the people can not see. Secret political organizations are dangerous to free government and to the liberties of the citizen. Sooner or later they are employed by selfish and designing men for their own political or financial or personal gain. I am opposed to the participation of such organizations in politics or in an effort to control the Government.

GROUP GOVERNMENT

Government by any group or bloc is an attack on democratic institutions. This Government belongs to all the people and it ought not to be

controlled or dominated by any bloc, faction, or interest. Representative institutions are based upon the right of all of the people to rule. Whenever a group or faction undertakes to gain control of the Government or endeavors to secure control of a political party for selfish advantage it is undermining real democracy and representative government.

In submitting my candidacy, I appeal to no clique, faction, bloc, group, nor special interest. My appeal is to all of the Democrats of Texas, as citizens and as lovers of free government. If elected I shall be the servant of all the people and not the tool of any secret or sinister master. My country and its people shall be my only masters.

THE CONSTITUTION

When a Senator takes the oath of office he does not swear allegiance to the Government of the United States. He makes no pledge of loyalty to the President or to the courts or to the Congress. He assumes no oath of fealty to any administration. He makes no promise to support any official in Washington or out of it. His pledge is of deeper, stronger, and more fundamental things. He swears to support and defend the Constitution of the United States. That is the measure of his responsibility. That is the length and breadth of his duty.

The Constitution invests the Government with whatever power and jurisdiction it possesses. It sets the limits and boundaries of governmental authority. By it the citizen is guaranteed rights that are placed beyond the reach of the arm of government. The Constitution prescribes and defines the functions and duties of the three departments of our system. It is the fundamental basis of American institutions. It is the charter of our rights and liberties as citizens of the United States. The Senate not alone possesses legislative power but under the Constitution has the function of confirming or rejecting appointments of ambassadors, judges, and of all officers, civil and military.

As a court of impeachment it may sit in solemn judgment on the Supreme Court and upon the President himself.

A treaty with a foreign nation is effective only when ratified by the Senate. Failure to obtain its consent dooms it to defeat. With its vast powers under the Constitution, the Senate of the United States is today the most powerful governmental assembly on this revolving globe. Its duties and responsibilities are commanding. As a forum for lofty service it is without an equal on this earth. A station so great challenges all that is finest and best in one who counts it an honor to serve his country, and whose ambition is to advance the interests of his countrymen. If elected a Senator of the United States, I shall endeavor to keep inviolate the sacred obligation which the Constitution imposes. No other oath or obligation shall stand in its way. A discharge of that duty comprehends a due regard for the welfare, the prosperity, and the rights of every citizen under the flag.

With confidence in the Democrats of Texas and as assurance that I shall ever strive to justify their confidence by a faithful discharge of the tremendous responsibilities of the high station to which I aspire, I submit my candidacy for the United States Senate to the Democracy of Texas.

CAMP CLARK, NEVADA, MO.

Mr. JAMES. Mr. Speaker, I ask unanimous consent for the present consideration of H. R. 12951, a bill providing for the purchase of 640 acres of land, more or less, immediately adjoining Camp Clark, at Nevada, Mo., and authorizing an appropriation therefor.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent for the present consideration of H. R. 12951, which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. SCHAFER. Mr. Speaker, reserving the right to object, how much of an appropriation is involved?

Mr. JAMES. Seventy thousand dollars. It is approved by the Director of the Budget and the War Department.

Mr. SCHAFER. And unanimously reported by the committee?

Mr. JAMES. Yes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That a sum not to exceed $70,000 is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the purchase of 640 acres of land, more or less, described as follows: The south half of section 12, township 35 north, range 31, and the south half of section 7, township 35 north, range 30, immediately adjoining and for use in connection with the present military reservation of Camp Clark, at Nevada, Mo.; and the Secretary of War is hereby authorized to make such purchase.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

DAM ACROSS THE KANKAKEE RIVER AT MOMENCE, ILL.

Mr. DENISON. Mr. Speaker, I ask unanimous consent for the present consideration of H. R. 13831, relative to the dam across the Kankakee River at Momence, Kankakee County, Ill.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent for the present consideration of H. R. 13831, which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. SCHAFER. Mr. Speaker, reserving the right to object, what is this bill?

Mr. DENISON. It permits the construction of a small dam across a small river in northern Illinois.

Mr. SCHAFER. By a private corporation?

Mr. DENISON. It is a conservancy district and this is for city park purposes.

Mr. SCHAFER. It will not be constructed for power purposes?

Mr. DENISON. No. The bill contains a provision which expressly prevents that.

The SPEAKER pro tempore. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, I reserve the right to object for the purpose of making a statement. I will not object to the consideration of this bill, but we have had two days on the Consent Calendar and the Private Calendar. We are winding up this session and I hope too many requests will not be made for unanimous consent to consider bills which the House has not had a chance to look over, and when the various Members whose duty it is to object to these bills may not be present on the floor of the House. I have no objection to this bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the consent of the United States be, and is hereby, given to the Menominee conservancy district and to its successors and assigns, without further authority from the United States, to construct and maintain a dam across the Kankakee River at Momence, in Kankakee County, Ill., and to repair and improve same, expressly reserving to the United States, however, the right to alter, amend, or repeal this act as the needs of navigation may hereafter require: *Provided, however,* That this act shall not have the effect of changing in any manner the liability of the owners of said dam for injury or damages to adjacent property.

With the following committee amendment:

Strike out all after the enacting clause and insert the following:

"That the consent of Congress be, and is hereby, granted to the Momence conservancy district, its successors and assigns, to construct, maintain, repair, and improve a dam across the Kankakee River at Momence, in Kankakee County, Ill.: *Provided,* That work shall not be commenced until the plans therefor have been submitted to and approved by the Chief of Engineers, United States Army, and by the Secretary of War: *Provided further,* That in approving the plans for said dam such conditions and stipulations may be imposed as the Chief of Engineers and the Secretary of War may deem necessary to protect the present and future interests of the United States: *And provided further,* That this act shall not be construed to authorize the use of such dam to develop water power or generate hydroelectric energy.

"SEC. 2. The authority granted by this act shall cease and be null and void unless the actual construction of the dam hereby authorized is commenced within one year and completed within three years from the date of approval of this act: *Provided,* That from and after 30 days' notice from the Federal Power Commission, or other authorized agency of the United States, to said Momence conservancy district, or its successors and assigns, that desirable water-power development will be interfered with by the existence of said dam, the authority hereby granted to construct, maintain, repair, and improve said dam shall terminate and be at an end; and any grantee or licensee of the United States proposing to develop a power project at or near said dam shall have authority to remove, submerge, or utilize said dam under such conditions as said commission or other agency may determine, but such conditions shall not include compensation for the removal, submergence, or utilization of said dam.

"SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

DIVERSION OF COMMERCE FROM UNITED STATES PORTS TO CANADIAN PORTS

Mr. BEEDY. Mr. Speaker, I ask unanimous consent for the present consideration of House Resolution 184, which I send to the Clerk's desk.

The SPEAKER pro tempore. The gentleman from Maine asks unanimous consent for the present consideration of House Resolution 184, which the Clerk will report.

The Clerk read the resolution, as follows:

Whereas during the past 10 years there has been diversion of commerce from United States ports to Canadian ports, particularly in grain and other farm products, so great as to threaten the foundation of the future commerce and prosperity of the ports of the United States and to affect seriously the agricultural and transportation interests of this country, including the development of its merchant marine; and

Whereas this diversion of commerce is the result of (1) more favorable railroad rates between points in the United States and Canadian ports than between the same points and United States ports; (2) more stringent regulations as to grading and inspection of grain at ports of the United States than at Canadian ports, especially the higher grain standards and the dockage rules of the United States; (3) the preferential customs regulations of Canada, giving lower tariffs on products imported into Canada directly through Canadian ports than on those routed through ports of the United States; and (4) the preferential schedules of other ports of the British Empire, imposing lower duties or more favorable regulations on products of the United States routed through Canadian ports than on those shipped from United States ports; and

Whereas the adoption by Congress of constructive legislation to meet these conditions is imperative and depends on the solution of problems within the respective provinces of the Department of State, the Department of Agriculture, the United States Shipping Board, and the Interstate Commerce Commission: Therefore be it

Resolved, That the Secretary of State, the Secretary of Agriculture, the United States Shipping Board, and the Interstate Commerce Commission are requested (1) to investigate, in cooperation with each other, the factors which are contributing to the diversion of commerce from points in the United States to Canadian ports and practicable remedies for preventing such diversion, and (2) to report thereon to the House at the beginning of the next regular session of the Seventieth Congress.

The SPEAKER pro tempore. The Chair will ask the gentleman whether he is authorized by the committee to bring up this resolution?

Mr. BEEDY. No. The resolution simply calls for an investigation. It has been passed by the Senate, and it asks for no appropriation. Several of the departments have been working on this matter, and we thought it would be helpful to have them work together.

The SPEAKER pro tempore. The resolution was referred to the Committee on Interstate and Foreign Commerce, and the Chair would not want to recognize the gentleman to call up the resolution without the authorization of the committee.

Mr. BEEDY. That committee will have no objection to it.

The SPEAKER pro tempore. The Chair would not want to recognize the gentleman under those conditions.

Mr. GARNER of Texas. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GARNER of Texas. I thought I understood just what bills would probably be considered this afternoon under suspension of the rules. I have just been told by the gentleman from Oregon [Mr. HAWLEY] that I was probably in error with reference to one bill and that it was intended to call up the so-called Austrian debt settlement bill. If that is so, I wish the Chair would advise me at this time, because I am very much opposed to that bill, and if I can, by parliamentary methods or otherwise, defeat the consideration of that bill between now and the adjournment at 5.30 I hope to do so.

The SPEAKER pro tempore. As far as the present occupant of the chair is concerned, he knows of no intention to call up that bill under suspension of the rules.

Mr. GARNER of Texas. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GARNER of Texas. Is it the purpose to bring in a rule to consider that particular bill?

The SPEAKER pro tempore. The Chair can not tell the gentleman at the present time, because he does not know.

THE IMPORTATION OF FOREIGN PRODUCTS

Mr. CROWTHER. Mr. Speaker, I ask unanimous consent to proceed for two minutes and to extend my remarks.

The SPEAKER pro tempore. The gentleman from New York asks unanimous consent to proceed for two minutes and to extend his remarks. Is there objection?

There was no objection.

Mr. CROWTHER. Mr. Speaker, every dollar of American money spent on imported goods feeds cheap foreign labor, deprives skilled American labor of wages, reduces American labor's ability to purchase from American retailers, and undermines the American living standards, of which you as an American have been and should be justly proud. [Applause.]

BE LOYAL TO LABOR IN AMERICA

There are many ways of demonstrating our loyalty to America, but I know of no more practical way to express it than for us all to be quite certain that when we need articles of either necessity or luxury that we buy goods made in the United States of America, where a decently filled pay envelope is the reward for toil and service. Money spent for goods made in foreign countries does not put a dollar in the pay envelopes of American workers. The American workman has shorter hours, better working conditions, and higher wages than the workmen of any country in the world. He is enabled to not only purchase the necessities of life, but enjoys as well the luxuries, and has an opportunity to lay aside a few dollars for the proverbial rainy day.

TOO MANY FOREIGN GOODS ON STORE SHELVES

Foreign-made merchandise is sold at a tremendous profit, even after the tariff charges are paid by the importer. This is a result of starvation wages paid to labor in the countries where these goods are produced. Compared with the great mass of American workers, these people are just able to eke out a mere existence. America is the Mecca of the importer who has no pay roll to meet, and sends good American money to Europe to help the foreign manufacturer pay his employees, and fattens his own bank account with the profits that represent the difference between cheap foreign goods and the high-price tag that is placed on them when offered for sale to the American public. Our stores are filled with pottery, china, glassware, jewelry, silks and satins, broadcloth, woolen textiles, dress goods, and every conceivable kind of novelty. These imported articles have not furnished a single hour of labor to American workmen, and have not added a single dollar to an American manufacturer's pay roll.

WE NEED A TARIFF THAT REALLY PROTECTS

Allow me to present a few of the importations since the Fordney-McCumber bill became law. The Democrats wept and wailed at the passage of that bill, declaring that the rates were so high that it would be impossible for the European countries to do any business in this country. The fact is that our foreign trade has increased by leaps and bounds and imports have increased to such an extent that we have averaged to take in at the customhouses $550,000,000 a year:

Woolen fabrics imported, 1923–1927 ——square yards——	106,000,000
Carpets and rugs imported, 1923–1927, annually ——do——	3,000,000
Total value in five years, over	$90,000,000
Scotch sweaters imported:	
1926	297,000
1927	446,000
Knitted gloves imported:	
1922	645,365
1926	6,534,515
1927	6,247,267
Knitted gloves produced in United States of America:	
1921	21,308,700
1925	8,339,612

Knitted outer wear, wool, imported, in 1926 increased 360 per cent over 1922, in spite of the fact that a fair rate of duty was collected on these importations.

EXCESSIVE IMPORTATIONS OF CONSTRUCTION MATERIALS

To appreciate the growing ascendancy of Europe in the markets of American construction industries it is necessary only to digest the following, by which the significance of trade movements may be gauged:

Common brick imports have increased from 2,648,000 in 1923 to 114,343,000 in 1926.

Iron and steel imports in 1926 were 87 per cent of the 1920 figures, while exports were only 23 per cent.

In glass and glassware, imports in 1926 represented 245 per cent of those in 1920, while exports represented only 30 per cent.

In plate glass, exports had almost entirely disappeared, whereas imports had increased to 390 per cent of the 1920 figures.

Cast-iron pipe exports dropped from $9,750,000 in 1920 to $4,094,000 in 1926, while imports were increasing from $41,074 in 1920 to $2,500,000 in 1926.

In the case of cement, in 1920 imports were valued at $1,310,000 and exports at $10,000,000, while in 1926 imports were valued at $5,487,000 and exports at $2,995,000.

These figures show that Europe is extending its encroachment of American markets to every construction material.

The effect of this invasion is not distinctly apparent to the casual observer in periods of national prosperity, but the individual industries are feeling the pressure and unemployment, as a result of shops running part time, is gradually cutting down the pay roll and reducing the purchasing power of the workmen of this country.

EVERY DAY'S LABOR WE IMPORT TAKES THE PRICE OF A DAY'S LABOR FROM THE INCOME OF THE AMERICAN WAGE EARNER

As a new country we believed in encouraging immigration until within the last decade the tide of immigration rose to more than a million a year. Congress then deemed it wise to make our immigration more selective and to reduce the number of immigrants to a total that can be readily assimilated.

Labor favored this restrictive legislation since the labor market was becoming glutted and American standards of living seriously threatened. Sane labor leaders to-day agree that if this restrictive legislation is beneficial when applied to men it should apply to their handiwork as well, and that we should not cripple our industries and deliberately create unemployment by permitting the importation of vast quantities of commodities produced abroad by these potential immigrants under conditions with which American labor can not compete. [Applause.] Every day's labor we import takes the price of a day's labor from the income of the American wage earner. [Applause.]

We have had in this country for a long period of years a protective tariff which has tended to build up the rate of wages, and at the same time has created a grade of values growing out of the wages of the labor that produced our buildings, machinery, and other capital investments. An increase in wage scales has resulted from the new immigration laws.

THE AMERICAN FARMER

Why do the leaders of the Democratic Party persist in classing the farmers of this country as a group of citizens who must have their thinking done for them? Let me advise my Democratic friends that the American farmer no longer wears long chin whiskers, chews a straw, and swallows the time-worn doctrine of free trade with a little dash of "tariff-for-revenue-only sauce" to make it a little less nauseating.

The American agriculturist rides in the first division and usually rides in his own limousine. He enjoys a greater degree of independence than perhaps any other citizen in the land, no matter what his position or mode of making a living may be. The American farmer is the greatest individualist of society to-day. Each man's problem as to acreage, rotation of crops, soil analysis, the kind of stock most profitable, marketing conditions, and shipping facilities is an individual one, and Mr. American Farmer solves them as they develop. He avails himself of such assistance as his State agricultural department and his Federal agencies afford him and mixes with it a little common sense and American genius. But do not lose sight of the fact that farming is a brow-sweating, back-breaking job, even with the tremendous advantage supplied by modern machinery, and nowhere does this old adage, "Man works from sun to sun, but woman's work is never done," so well apply as on the farms of the country. They well deserve all the comforts and luxuries that have become a part of their daily program.

Mr. Speaker, the average American farmer knows as much about the benefits of a protective tariff as the average Congressman can tell him. He keeps abreast of the times, is active in the grange, and subscribes to farm journals that provide him with up-to-date news, and the telephone and radio keep him posted on current events and market conditions.

He knows that we as a people can not be successful and prosperous in groups; we must prosper together. He realizes that his chances of marketing a profitable crop are better when the industrial plants of his neighboring cities are distributing a full-sized pay envelope to their employees regularly every Saturday night. He is young enough to vision a still greater prosperity in this greatest of nations and old enough to remember the days of free trade when public soup houses were established and the price the farmers could command for their produce would scarcely pay for seed. Everything was cheap in those days, but as a general proposition where commodities are cheapest the people are least able to buy.

PURE UNADULTERATED HYPOCRISY

During this session of Congress the Democratic leaders have been pleading the cause of the American farmer. Let me call to your attention the fact that when the Democratic Party was in power and wrote the Underwood-Simmons tariff bill they ignored the farmer completely. His case was given scant consideration, for, as they informed him, they were not believers in a protective tariff, and the result was that he was entirely out of the picture. If you will just glance at the following comparison of rates in the Underwood bill and the Fordney-McCumber bill you observe that the Democrats told the American farmer where to get off and helped him to dismount. This list has been published before, but it can not be published too often, as it illustrates the absolute hypocrisy manifested by the Democratic Party when they announce themselves as the real friend of the farmer.

Commodity	Act of 1922, Fordney-McCumber	Act of 1913, Underwood-Simmons
Beef and veal, fresh	3 cents per pound	Free.
Live cattle	1½ and 2 cents per pound	Do.
Oleo oil	1 cent per pound	15 per cent.
Oleo stearin	do	Free.
Tallow	½ cent per pound	Do.
Goats	$2 per head	Do.
Fresh lamb	4 cents per pound	Do.
Fresh mutton	2½ cents per pound	Do.
Sheep	$2 per head	Do.
Bacon and hams	1 cent per pound	Do.
Lard	2 cents per pound	Do.
Lard compounds and substitutes.	4 cents per pound	Do.
Fresh pork	¾ cent per pound	Do.
Pork shoulders	2 cents per pound	Do.
Swine	½ cent per pound	Do.
Extract of meat	15 cents per pound	10 cents per pound.
Fluid	do	5 cents per pound.
Fresh meats	20 per cent	Free.
Cream	20 cents per gallon	Do.
Cream powder	7 cents per pound	Not dutiable.
Malted milk	20 per cent	Free.
Condensed milk, sweetened	1½ cents per pound	Do.
Condensed milk, unsweetened.	1 cent per pound	Do.
Skimmed milk powder	1½ cents per pound	Not dutiable.
Whole milk powder	3 cents per pound	Free.
Butter [1]	8 cents per pound	2½ cents per pound.
Oleomargarine	do	Free.
Cheese	5 cents per pound	20 per cent.
Live poultry	3 cents per pound	1 cent per pound.
Dressed poultry	6 cents per pound	2 cents per pound.
Dried egg albumen	16 cents per pound	3 cents per pound.
Frozen egg albumen	6 cents per pound	1 cent per pound.
Dried egg yolk	18 cents per pound	10 per cent.
Frozen egg yolk	6 cents per pound	Free.
Eggs of poultry in shell	8 cents per dozen	Do.
Dried whole eggs	18 cents per pound	10 cents per pound
Frozen whole eggs	6 cents per pound	2 cents per pound..
Barley	20 cents per bushel	15 cents per bushel.
Buckwheat	10 cents per 100 pounds	Free.
Corn	15 cents per bushel	Do.
Corn meal	30 cents per 100 pounds	Do.
Oats	15 cents per bushel	6 cents per bushel.
Unhulled ground oats	45 cents per 100 pounds	30 cents per 100 pounds.
Rice (brown hulls removed)	1¼ cents per pound	⅜ cent per pound.
Rice flour	½ cent per pound	¼ cent per pound.
Milled rice (bran removed)	2 cents per pound	1 cent per pound.
Paddy or rough (rice)	1 cent per pound	⅜ cent per pound.
Rye	15 cents per bushel	Free.
Rye flour	45 cents per 100 pounds	Do.
Wheat [2]	30 cents per bushel	Do.
Crushed or cracked	78 cents per 100 pounds	Do.
Flour and semolina	do	Do.
Coconuts	½ cent each	Do.
Peanuts, not shelled	3 cents per pound	⅜ cent per pound.
Shelled peanuts	4 cents per pound	¾ cent per pound.
Castor beans	½ cent per pound	15 cents per bushel.
Cottonseed	½ cent per pound	Free.
Flaxseed	40 cents per bushel	20 cents per bushel.
Poppy seed	32 cents per 100 pounds	15 cents per bushel.
Soy beans	½ cent per pound	Free.
Alfalfa seed	4 cents per pound	Do.
Alsike clover seed	do	Do.
Crimson clover seed	1 cent per pound	Do.
Sweet clover seed	2 cents per pound	Do.
Red clover seed	4 cents per pound	Do.
White clover seed	3 cents per pound	Do.
Dried beans	1¾ cents per pound	25 cents per bushel.
Dried peas	1 cent per pound	10 cents per bushel.
Tomato paste	40 per cent	25 per cent.
Turnips	12 cents per 100 pounds	15 per cent.
Hay	$4 per ton	$2 per ton.
Straw	$1 per ton	50 cents per ton.
Sugar	$0.0176 per pound	$0.01005 per pound.
Wool	12 to 31 cents per pound	Free.

[1] Tariff on butter increased by Tariff Commission to 12 cents per pound.
[2] Tariff on wheat increased to 42 cents.

BENEFITS TO AGRICULTURE OF FLEXIBLE CLAUSE

Based on the investigations made by the Tariff Commission under the flexible clause of the Fordney-McCumber bill, the President has adjusted rates of duty on six agricultural products—a raise on wheat from 30 to 42 cents a bushel; wheat flour, from 78 cents to 1.04 cents per hundred pounds; butter, from 8 to 12 cents per pound; and Swiss cheese, from 5 cents per pound and not less than 25 per cent ad valorem to 7½

cents per pound and not less than 37½ per cent ad valorem. The duty on mill feeds, such as bran, shorts, and other by-product feeds, which the farmers purchase for feeding livestock, was reduced from 15 to 7½ per cent ad valorem.

DEMOCRATIC INCONSISTENCY REGARDING TARIFF

The spectacle of Democratic leaders loudly abusing the policy of a protective tariff and then bending their united efforts to secure protection for the commodities produced or manufactured in their own States is highly amusing. We have a few Democratic Members of the House and Senate who are consistent in their attitude, and after they secure these favorable rates in the tariff act they vote for the bill. The great majority, however, vote against a Republican tariff bill, but vote with their fingers crossed, praying that it will pass and that their constituents may benefit by its provisions.

Right here I desire to present a letter signed by the governors of nine great Southern States, in which they request that the Tariff Commission give no heed to the demand for a reduction on vegetable oil:

To the President of the United States and Honorable Tariff Commission:

We, the undersigned chief executives of the cottonseed-producing States, feel impelled to collectively petition you on a matter which is of grave importance to our farmers.

There is now pending before the Tariff Commission a petition to reduce the duty on vegetable oil. We are informed that final determination of this matter will soon be made.

We desire to stress the fact that the only possible reason anyone can have for reducing the duty on vegetable oil is to reduce the market price of vegetable oil. This positively will reduce the price of cottonseed oil, which automatically will reduce the price the farmer can get for his cottonseed, as the price of cottonseed is completely controlled by the vegetable-oil market.

The foregoing statement of fact is the beacon light which should be kept steadily in view by those who are seeking the truth.

The national administration has repeatedly declared its desire to help the farmer. If the duty on vegetable oil is reduced, it will mean millions of dollars taken from the farmers of this country. Those seeking a reduction of duty on vegetable oil are enjoying the duty that was given them on their manufactured products.

On behalf of the farmers of this country we ask that the duty on vegetable oil be not lowered.

CLIFFORD WALKER, *Governor of Georgia.*
THOS. G. MCLEOD, *Governor of South Carolina.*
HENRY L. FUQUA, *Governor of Louisiana.*
JOHN W. MARTIN, *Governor of Florida.*
M. E. TRAPP, *Governor of Oklahoma.*
WILLIAM W. BRANDON, *Governor of Alabama.*
HENRY L. WHITFIELD, *Governor of Mississippi.*
AUSTIN M. PEAY, *Governor of Tennessee.*
TOM J. TERRAL, *Governor of Arkansas.*

The commodities involved in the case are as follows: Cottonseed oil, animal and fish oils, peanut oil, coconut oil, soy-bean oil, and olive oil.

UNDER PROTECTIVE TARIFF FARMERS TREBLE INCOME FROM WOOL IN LAST SIX YEARS

Farmers of Minnesota, North Dakota, South Dakota, and Montana have trebled their income from wool in the last six years, according to a report published by the Ninth Federal Reserve Bank of Minneapolis. The 1927 income totaled $12,000,000, as compared with $4,290,000 in 1921, the bank states, adding that "all signs point to a larger income in 1928 than in 1927." The estimated wool clip in these States has increased from 26,454,000 pounds in 1920 to 36,787,000 in 1927, with Montana furnishing two-thirds of the clip from the district.

The farm price of wool has not been below 22 cents a pound since June, 1922, the bank points out, and for the last three years the income has averaged between $11,500,000 and $12,000,000.

All signs point to a larger income from wool in 1928 than in 1927—

The review states—

The number of sheep on farms has increased from 4,855,000 on January 1, 1927, to 5,162,000 on January 1, 1928. The farm price of wool in Montana and South Dakota was 5 cents a pound higher in January and February than in the previous year.

There also has been a gradual increase in the weight of the individual fleece. The average Montana fleece in 1927 weighed 8.6 pounds, compared with 8 pounds in 1920. South Dakota fleeces averaged 8 pounds in 1927, compared with 7 pounds in 1920. There were similar increases in the weight per fleece in Minnesota and North Dakota.

AGRICULTURAL PRICES REACH HIGHER LEVELS

Prices of farm products are higher in May, 1928, than they have been at any time in the past several years, except for four months in 1925, says Dr. G. F. Warren, agricultural economist at Cornell University, in a statement on the agricultural situation.

An index of farm prices in the United States, based on prewar levels, rose from 141 in March to 145 in April, due to the general increases in many products. Of the shifts that occurred during the past months, eggs advanced 24 points, wool advanced 9, beans 18, cotton 7, corn 6, oats and butter moved up 4 cents each, and potatoes advanced 3 points. Other changes were slight.

Prices of cattle and cattle products may be expected to continue high for several years, Doctor Warren says, because low prices resulted in a great reduction in the number of cattle. As for other farm products, some advances in prices may be temporary, however, he points out.

Food production has been declining while population has been increasing. Such a condition inevitably results in an improvement in the farm situation.

INDUSTRIES SUFFERING THAT WERE PLACED ON FREE LIST—SHINGLES AND POTASH

The great shingle industry of the Northwest has been almost paralyzed as a result of having cedar shingles placed on the free list. The loss in revenue alone to the Government since the duty was removed amounts to nearly $20,000,000. The great mills of that region have been idle for months, while trainload after trainload of Canadian shingles produced by oriental labor at low wages have flooded the United States market. We have all received shingles from the State of Washington, and the label on the package reads as follows:

Hundreds of men are out of employment; families and communities are suffering because American labor can not compete with orientals; cedar mills idle—logging camps idle—tariff protection at this session of Congress is vital.

This is a fair sample of what happens when protection is denied to an American production. Are the shingles any cheaper in price to the American consumer? Oh, no; that never happens when an article is placed on the free list. Potash was placed on the free list presumably to help the farmer, but once on the free list the German and French combination proceeded at once to raise the price. When the European manufacturers find that an American article has been placed on the free list they sell at a price that will completely destroy the industry in this country, and then proceed to raise the price all the traffic will bear. The promise of the Democrats that low tariff or free trade would result in the benefit of low prices to the ultimate consumer has never been fulfilled.

CEMENT

Cement is on the free list, and the importations from Europe are becoming a serious menace to the American producers. Imports in the last few years total 9,000,000 barrels, and the effect of this foreign competition upon the American industry has been to deprive the American plants of the markets they were built to supply; to lose to labor in the cement mills $4,000,000 in wages in curtailing employment; to cost the American seaboard mills more than $16,000,000 in lost revenue, due to displacement of domestic cement.

These losses have been without compensation to the consumer of cement or of the concrete in which it is used. Cement is purchased for concrete work by contractors, who estimate their costs on the basis of the market price for American cement. If they are able to purchase foreign cement for the particular job at a saving, their contract price for the finished concrete does not change. In other words, the contractor pockets the profit, as under his contract he is not required to pass the saving to the consumer, whether the consumer be a private concern or a public body. This has been demonstrated in cases where bidders were required to specify the use of either foreign or domestic cement, in which cases the cost to the consumer was shown to be the same.

For these 9,000,000 million barrels of cement imported not a pound of domestic coal or gypsum was used. As a result, domestic coal mines lost the sale of 787,958 tons of coal and receipt of $1,741,387, of which the American coal miner would have received in wages $1,044,832. Gypsum mines lost revenue of $148,587, from which the gypsum miner would have received $52,005 in wages.

The cement industry is one of the best customers of the cotton farmer and the textile mill. Ten per cent of the 1926 business of domestic textile bag manufacturers was in cotton sacks for the cement industry. The foreign cement producer patronizes neither. He ships his cement in jute because it is cheaper. Cotton textile mills lost over one-half million dollars which should have been spent for cotton cement sacks but which was not because of foreign cement. The textile worker as a result was poorer by $132,082. And the cotton farmer, whose

income is not too encouraging at any time, dropped an additional $300,000.

Let us carry the picture a little further. Cement and the materials for making it and carrying on its operations are bulk freight. This pays immense sums to American railroads. Almost all foreign cement is sold in seaboard markets and pays little or no freight. If these more than 9,000,000 barrels of foreign cement had not displaced a similar amount of cement of domestic production, American railroads would have received a total of revenue from them of over $6,000,000. Of this, the rail worker would have received 43 per cent, or $2,724,753.

LEATHER AND BOOTS AND SHOES

No one industry has been harder hit than the tanners whose products, including calf leather, were placed on the free list. Nearly 8,000,000 pounds of sole leather were imported during 1926, and that figure has increased tremendously during 1927. Imports of calf leather will reach a total of 40,000,000 square feet for 1927. Importations of boots and shoes are gradually increasing, and the shoe and leather business is having a hard fight to continue its existence. The Shoe and Leather Reporter says:

> It may be said that the losses have been astounding. In spite of the large volume of business resulting from keeping the feet of the American people properly shod it is merely a question of arithmetic to demonstrate that the making of shoes and the tanning of leather has degenerated into an unprofitable business. It is well known that many firms have liquidated their affairs and abandoned the trade rather than to throw good money after bad. We need protection if any business ever did.

Those of you who live in the vicinity of cities or towns where the leather-tanning industries were once prosperous, and where shoe shops ran full time with a full pay roll, have all seen the gradual decline of the business, and the unemployment, that means hard times.

Wages

France:		
Average hourly wage in Paris	cents	15
Other cities and suburbs	do	9½
Ten-hour day		$0.95–$1.50
Poland, skilled labor: Iron works, metal industries, and textiles	cents per day	55–97
Japan: Average daily wage skilled textile workers	do	54
Belgium, plate-glass workers	dollars per day	1.45
United States, plate-glass workers	do	5.44
Germany, textile workers:		
Male	do	1.60
Female	do	1.00
Germany, steel workers, rolling mills	dollars per week	8.40
United Kingdom, steel workers, rolling mills	do	13.40
United States, steel workers, rolling mills	do	32.00

These are a fair sample of the wide discrepancy between wages paid in the United States and in foreign countries. The tremendous advantage that this gives to the European producer is plain to be seen. The fact is that the difference in production costs is becoming greater instead of less. Wages have gradually increased in this country since the World War and have decreased in Europe.

Let us all unite in a common effort to maintain the wage scale that now prevails, and fight against any attempt that may be made to flood our country with cheap labor's products. The most important thing we must insist on is that the purchasing power of our people shall not be destroyed.

Democratic rule means low tariff, just as near free trade as they dare to go. This is their declared purpose, they boast of it, and seem quite delighted to present to the workers of the United States a plan that has always worked a hardship on our people, filled the streets with unemployed, established soup houses, driven the workers into debt, caused great business losses, and produced a general condition of chaos.

THE PAY ROLL, THE PAY ROLL

I have already called attention to the American pay roll, the result of three-quarters of a century of well-nigh unbroken Republican protection, now much larger than that of all the rest of the world. Are you interested to know what becomes of this huge sum, which, including salaries, exceeds $500,000,000 each week of the year?

Most of it is promptly spent for necessities, or comforts, or luxuries or foolishness. The balance is as promptly invested or deposited for some one else to use or invest. Much of it goes direct to the store. From the store it goes to the producer of what the merchant sells, then again to the pay roll, and back to the store. President McKinley estimated that wages and salaries made the circuit and back to the pay roll once a month.

Early in the spring it was ascertained that 1,800,000 were unemployed. The effect on trade was noticeable, and Democrats featured it. The condition was temporary, but it suggested what would have resulted had the number been as large as when President Wilson retired.

Samuel Gompers, president of the Federation of Labor, a close friend and adviser of President Wilson, estimated the unemployed at that time at 5,000,000. And that number was but half of the estimate when General Coxey led his army of unemployed across the country during Cleveland's administration.

Under present conditions, with foreign competition just reaching high tide, a Democratic tariff will send more than 10,000,000 into the streets seeking work, and their children seeking bread.

At the present scale of wages the discharge of 10,000,000 from the ranks of the gainfully employed will cut our cash pay roll more than $200,000,000 per week.

The American pay roll is the one thing that distinguishes us from all other people. The American pay roll is the one thing that enables us to reduce our public debt while every other country increases theirs, and the preservation of this pay roll is the only issue of this campaign worth considering.

A DEMOCRATIC SCARECROW SCOTCHED

Have you ever heard of the Republican "tariff wall"? Of course you have. Democrats talk much about it, and international bankers talk of little else. It may interest you, therefore, to know that nothing of the kind exists. On the contrary, we always—not sometimes, but always—import more with ample protection than under a tariff for revenue only.

The quarrel between the parties relates solely to the nature of the things imported. Under adequate protection we import little except raw material to keep our factories running, noncompetitive merchandise, and luxuries. Under a tariff for revenue our markets are at once flooded with competitive products, such as we have hitherto produced. This must and does cut our pay roll, which restricts the buying power of our people. Then even imports drop to the minimum.

This is the most logical thing in the world, and there has never been an instance when it has failed to work exactly that way.

In his published answer to certain international bankers who had insisted that we must lower our tariffs and allow other nations to share our markets on terms of equality with ourselves or they would be unable to pay their debts to us, Secretary Mellon first showed from the records published by the Bureau of Foreign and Domestic Commerce that at that very time we were importing more than under the Underwood tariff during its last year, and that our foreign commerce—imports and exports combined—was more than twice what it was in 1914.

Mr. Mellon then explained that ample protection by creating general prosperity always increases both imports and exports. He then formulated the fundamental truth in language all should remember and heed:

> It is the purchasing power of our people and not tariff rates that determine imports.

Republicans are quite as anxious for large imports as Democrats. But Republicans see to it that they shall consist of noncompetitive products so as not to demolish the pay roll. Protect the American pay roll and imports will be always large.

HALLOO, KINFOLKS

Governor Shaw tells of having been diverted by the salutation his mountaineer companion on one of his campaigns through the hill country of Virginia would shout to men and women he chanced to see in field or yard. "Halloo, kinfolks" was his ever-ready greeting.

Kinfolks—

Says Governor Shaw—

> is the cardinal principle of protection, and he who fails to recognize a true kinship with everyone beneath the flag has no right to call himself a Republican.

Democratic tariff legislation always proceeds on the assumption that it matters not who produces the things we need, provided they are cheap. Republicans insist it is relatively unimportant what we pay if we buy of ourselves, get what we pay for, and keep the money in the family. They promise to throw open to us the cheapest markets in the world in which to buy. We promise to protect for you the best market in the world in which to sell. You can take your choice, but you can not have both.

As a result of this kinfolks principle when applied to politics, with ample protection for every product of soil as well as toil, our farms produce more than the farms of any other country on the map; we transport from the one State of Minnesota and leave in Ohio alone more iron ore than any other country mines; we have builded about the same mileage of railroads as all the rest of the world; our retail trade alone is the equal of all the international trade of creation; we manufacture more

than Great Britain, France, Germany, and Japan added together plus thirty thousand million dollars' worth every 12 months; and we pay out in wages vastly more than all the rest of the human family. "Halloo, kinfolks."

Our population is one-sixteenth of the aggregate on earth, but because of our enormous pay roll, wages and salaries combined exceeding $500,000,000 each week, passing as it does to the store or the bank and back again to the pay roll, we possess a buying power that astonishes even ourselves. Listen: We are the ultimate consumers of more than one-third of all the coal mined, nearly one-half of all copper, more than one-half of all coffee, two-thirds of all rubber, and of every gallon of petroleum pumped from mother earth the United States demand three quarts, while fifteen times as many people scattered elsewhere in the world get the other quart, and have all their needs require.

Will you not, by your vote, help protect that American pay roll now at issue?

ATTENTION FIRST VOTER

Both political parties promise in their platforms, and each as soon as in power enact tariff laws. Both parties, therefore, believe in a tariff. But as they radically disagree on the purpose of tariff laws their enactments are entirely different, and bring opposite results.

Republican tariffs are designed to foster industry. They foster all industries—industries of farm and factory, mill and mine, merchant and mechanic, North, South, East, and West.

The Democratic tariff machine had its origin with the old ante-bellum slaveholder, with whom labor was a reproach. Their tariffs are based upon the theory that it is better to import that revenue may result than to produce that pay rolls may multiply. The third and fourth generation of these good people clinging religiously to the traditions of their ancestors, vote to legislate as did their fathers and grandfathers.

But because a few southern Democrats desire protection on peanuts, citrus fruits, vegetable oil, and cane sugar, some ill-advised people think the tariff issue has been taken out of politics. Not until Democratic platforms promise general rather than sectional protection, and Democratic legislation make good these promises will protection of the American pay roll cease to be the paramount issue of every campaign. Few would be thoughtless enough to place an osteopathic practitioner in charge of an allopathic hospital simply because he had been known to buy castor oil for his own children.

A FACT ELUCIDATED

Republicans always give Americans an advantage in their own markets. This is called protection, and is accomplished by tariff rates that compel importers to pay into our Treasury such portion of what they receive as will fully offset the much higher wage paid in this country. This insures the pay roll.

Democrats insist that protection is not only vicious in practice, but that it violates the Constitution. They always so adjust their tariff rates as to give the foreigner such advantage in our markets as will permit importations of what American labor has hitherto produced. This is called "tariff for revenue only," and by demoralizing the pay roll it insures the soup house.

Only once in the memory of man has a Democratic tariff failed to work universal ruin. The one exception was when the World War afforded protection. The prosperity of the Wilson administration was war prosperity, and that ceased when the war ended. There were 5,000,000 men out of work when President Harding was inaugurated. The emergency tariff, which was immediately enacted, brought prompt relief, and the present tariff law, plus immigration restriction, made unprecedented prosperity possible.

Let Tammany once get control and the floodgates not only of tax-free products from the ends of the earth, but of immigration of the worst elements of Europe will be swung wide. Either of these will spell ruin to the American pay roll.

THE FORDNEY-M'CUMBER ACT

A few words should be added concerning the status of our foreign trade since the Fordney-McCumber Act went into operation. We have in the last five years experienced a volume of imports and exports never before equaled in the history of the country. Imports since the act has been in force have averaged over $4,025,000,000, while the highest average ever attained under any previous act was $2,965,000,000, which occurred during the Underwood Act of 1913. Other features of interest are found in the fact that the duty collected since the act went into operation have amounted to two and a quarter billion dollars or an annual average in excess of $550,000,000. Such a statement is all the more interesting when it is realized that the percentage of duties collected to total imports is lower under the Fordney-McCumber Act than any other act in history since 1860, with the exception of the Underwood Act. Duties collected under the Fordney-McCumber Act average 14.4 per cent of the volume of total imports, while under the Underwood Act they were equivalent to 9.1 per cent and 19.3 under the Payne-Aldrich Act, before which time they were always in excess of 20 per cent.

The Department of Commerce has recently published an estimate that the volume of importations into the United States for 1926 was 78 per cent greater than it was in 1913, which was the highest point in history prior to the war. These few bits of evidence are enough to indicate that the Fordney-McCumber Act is undeserving of the criticism that has been directed against it to the effect that it would stifle our import trade. Realization of the significance of these facts is important in considering the problem of the tariff of to-morrow.

DEMOCRATIC PROMISES BETRAYED

The platform on which Woodrow Wilson and a Democratic Congress were elected in 1912 contained the following:

> We denounce the profligate waste of the money wrung from the people by oppressive taxation through the lavish appropriations of recent Republican Congresses. We demand a return to that simplicity and economy that befits a democratic government and a reduction in the number of useless officers, the salaries of which drain the substance of the people.

Within 12 months they added 10,000 additional names to the roster and $10,000,000 to the pay roll. Extravagances multiplied and revenues dropped until President Wilson recommended an increase of $100,000,000 in income taxes to meet the growing deficiency.

On April 10, 1914, three years before we entered the war, Representative Fitzgerald, chairman of the Committee on Appropriations, denounced his party in these words:

> Whenever I think of the horrible mess I shall be called upon to present on behalf of the Democratic Party, I am tempted to quit my job.

A week before that Congressman Sisson, of Mississippi, had said:

> We are writing ourselves down as the most outrageously and criminally extravagant Congress that ever sat on the American Continent.

And just two days before John Sharp Williams, also of Mississippi, had said:

> The poor, dear, old foolish Democratic Party is going through the same game she can be generally depended upon to go through soon after she gets into power. That is its history. That is what led dear old Tom Reed to say in 1894, "You can not last. You can not govern the country. You can not govern yourselves."

And Speaker Champ Clark had left the chair to utter his protest, in the course of which he had said:

> Tell it not in Gath, proclaim it not in the streets of Askalon, that the Democratic Party will not keep faith with a confiding public.

And dear old Ben Tillman, of South Carolina, had graphically expressed himself thus:

> The wild asses of the desert, athirst and hungry, have broken into the green corn. That applies all along the line. The Senators themselves are green and the Democrats have been out in the cold so long they are simply wild.

If that was their record under Wilson, what will it be under Tammany?

DEMOCRATS AND INTERNATIONAL BANKERS WOULD DESTROY PROTECTION

The Democratic Party has a new ally in its attack upon the policy of a protective tariff. The international bankers who are vastly more interested in the industrial success of Europe than of America are urging the removal of tariff barriers. They have loaned vast sums to European countries for the rehabilitation of their manufacturing plants and they are moving heaven and earth to provide a market in the United States for these goods produced by the poorest-paid labor in the world. This same group is desirous of canceling the European war debt owed to this country.

The Republican Party demands a continuance of high-living standards for our workers, payment of the war debts, a continuation of restrictive immigration, and the maintenance of the policy of a protective tariff.

Every country in the world has raised its tariff rates since the World War ended, except Canada. The United States is the best cash customer in the world, and this country has been flooded with literature and professional propagandists during the last few years, all for the purpose of creating discord and to discredit the protective policy. They would have us throw the gates wide open for the entrance of their manufactured goods and farm products, which would eventually drag our folks down to the level of European workers who just merely

exist and do not live as we desire American workmen and their families to live. Let's keep America for Americans, see to it that we purchase goods made in the old United States of America, keep the pay envelope well filled, give our working folks a chance to educate the children, dress them comfortably, nourish them with good food, and at the same time allow them to enjoy not only the necessities of life but a few of the comforts and luxuries. The folks that devote their lives to labor and production are and will always be in the great majority; they are the backbone of the Nation, and it is our duty as Americans to keep the standard of their living high, and their field of opportunity the widest in all the world. [Applause.]

INTERPARLIAMENTARY UNION

Mr. BURTON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 13930) to authorize an appropriation for the American group of the Interparliamentary Union, with Senate amendments, and concur in the Senate amendments.

The SPEAKER pro tempore. Has the gentleman authority from his committee to submit the request?

Mr. BURTON. I have not been able to poll the committee, but I am aware, however, it is favored by all the members of the committee.

Mr. GARNER of Texas. Reserving the right to object, Mr. Speaker, I understand from the gentleman from Ohio that the only difference in this resolution as it passed the House is that the appropriation is made immediately available.

Mr. BURTON. It is made immediately available and that is necessary because of the delay; otherwise the bill would be ineffective.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the bill and Senate amendment.

Mr. CRAMTON. I want the RECORD to show just what we are doing. I am not going to object, but the amendment is not to make the appropriation immediately available, but is to make it an appropriation instead of an authorization.

Mr. BURTON. Yes; that is what it is.

Mr. CRAMTON. I simply wanted the RECORD to show that. I do not object.

The Senate amendment was agreed to.

MAJ. CHARLES F. EDDY

Mr. HICKEY. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 12871) for the relief of Maj. Charles F. Eddy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. HICKEY. Mr. Speaker, I ask unanimous consent that the Senate bill (S. 3942) be substituted for the House bill.

The SPEAKER. Without objection, the Clerk will report the Senate bill.

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to credit the account of Maj. Charles F. Eddy, Finance Department, United States Army, on account of the loss of public funds amounting to $2,872.85, for which he was responsible, and which were intrusted to Warrant Officer Clark T. Browning, United States Army, at Fort Bragg, N. C., on or about January 14, 1928, who embezzled these funds and deserted the service.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

CIVIL AVIATION

Mr. OLIVER of Alabama. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on civil aviation by printing a speech delivered by me in the House on January 9, 1928, while the bill H. R. 8269 was under consideration.

The SPEAKER pro tempore. Without objection it is so ordered.

There was no objection.

SPEECH OF HON. WILLIAM B. OLIVER, OF ALABAMA, IN THE HOUSE OF REPRESENTATIVES, JANUARY 9, 1928

Mr. OLIVER of Alabama. Mr. Chairman and gentlemen of the committee, the comprehensive statements of my colleagues, Mr. SHREVE and Mr. ACKERMAN, make it unnecessary for me to detain the House with further general statements relative to the pending bill as a whole. I feel, however, that the House may be interested in some data as to the progress of civil aviation. You will recall that the act authorizing Government aid was passed in 1926 and that the Bureau of Civil Aeronautics was later created in the Department of Commerce and placed under the Hon. William P. McCracken, Assistant Secretary of Commerce. The first appropriation made for this service was carried in the deficiency act for the fiscal year 1927 and amounted to $550,000. The next appropriation was $3,700,000 plus, and then comes the appropriation carried in this bill approximating $4,300,000. Before this Congress adjourns in June a further request will be made for an appropriation approximating $1,725,000, and I think the House can now feel assured that the deficiency bill will later carry this additional sum for the service. These amounts total about $9,725,000 and represent the sums heretofore spent and the additional amount to be spent during the fiscal year 1929. Aside from the salaries paid to service personnel the amount appropriated has been expended in lighting and mapping the airways over which mail is carried and in providing equipment and emergency fields.

On the map before you will be found marked in red the airways lighted during the fiscal year 1927, in blue the airways lighted during the fiscal year 1928, and in yellow the unlighted airway routes over which mail is regularly being carried under contract. The yellow with the blue lines show the airway routes that are to be considered for lighting during the fiscal year 1929. I will later ask the House for permission to insert a small copy of this map in the RECORD. (By way of parenthesis I will here say that while permission was granted by the House to insert the map, yet I found the information could be better communicated by providing a larger map than could be inserted in the RECORD; and such larger map, properly colored, will be mailed by me to every Member of the House.) From the map it will be seen that there was lighted 4,121 miles of airways prior to June 30, 1927; that during the fiscal year 1928, 3,577 miles of lighted airways have been added, making the total on June 30, 1928, of lighted mail airways 7,698 miles. This will leave unlighted on June 30, 1928, 6,264 miles of air routes over which mail is now being carried under contract. The appropriations carried in the pending bill and to be carried in the deficiency bill for the fiscal year 1929 will provide sufficient funds for the department to light approximately 5,300 miles of additional airways. This will give on June 30, 1929, about 13,000 miles of lighted airways. It is well to remember in this connection that we are the only country in the world that has lighted its airways, and yet without lighted airways night flying is neither safe nor practicable.

The map, you will observe, also shows additional airways which the Post Office Department is considering letting mail contracts for. Army airway routes are shown on the map and also 58 radio stations now established. The radio stations will be largely increased during the fiscal year 1929. Emergency or intermediate fields about 10 miles apart are maintained at the expense of the Government along this 13,000 miles of air routes.

Certainly this chart furnishes a very gratifying and graphic picture of how rapidly our country has advanced since 1926 in the utilization of aircraft for the transportation of mail, freight, and passengers. This advance is accompanied by such a widespread public confidence in aircraft as to insure the continuance of a liberal policy by Congress that will serve to stimulate, enlarge, and maintain on a thoroughly efficient basis the commercial, the Army, and the Navy air services of the country. From the standpoint of national defense and commercial advancement the importance of these three services can not be overemphasized.

On and off the present mileage of existing air routes will be found 482 municipal and commercial fields in operation, and about 50 more under construction. Something like 400 more are being proposed and considered for early construction. When you add to the existing municipal and commercial fields the emergency fields, the Army and Navy fields, we have about 1,600 safe landing places for planes.

No progressive city should overlook the importance of providing an adequate airport. Nothing is more certain than that the transportation of mail, packages, and passengers by airplanes will rapidly increase in the next few years, and the city without an airport will be like a town without a railroad. Some of our transcontinental rail lines are preparing now to establish a joint rail and air service, and when you further consider that many large business companies are providing planes for transporting their officials and advertising their products, the necessity of modern airports should be apparent to every forward-looking city.

We now have air service with Cuba, and soon will have service with Haiti, San Domingo, Porto Rico, and Canada, and we hope with Mexico. The great oceanic liners, arriving and departing, are also installing an airship service, and it requires no dreamer to vision how communities in our country, pro-

vided with airports, may contemplate in the next five years daily trips to and from any State of the Union—yes; trips made under conditions insuring greater safety and comfort than could be found in motoring on long stretches of highways.

Further evidence of the wide public interest shown by our people in civil aeronautics will be found in the educational and research work along this line at a number of our leading technical colleges. A large number of students are taking courses leading to degrees in aeronautical engineering. The liberal financial assistance extended these colleges by the Daniel Guggenheimer fund for the promotion of aeronautics has resulted in the establishment of aeronautical professorships and the addition of special equipment and buildings for research work and study.

Schools for the training of pilots under Government supervision and direction are maintained at different places, and very high physical and mental exactions are required for admission to such schools.

Referring again to the map, you will find that a proposed air-mail route is being considered from New Orleans to Laredo or Brownsville, Tex., with the expectation that it will be extended later to the City of Mexico and from there to the countries farther south.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield there?

Mr. OLIVER of Alabama. Certainly.

Mr. WAINWRIGHT. Is it contemplated that the routes southerly from the Mexican border and from Mexico down through Central America are to be an all-American-operated air service? In other words, is it contemplated that we shall extend our air mail route through Mexico?

Mr. OLIVER of Alabama. That will be determined later by agreement with those countries. It is the confident hope that a satisfactory agreement can be made whereby those routes will be extended. Up to this time no definite arrangement or agreement has been reached. The route from Key West to Habana will likely be extended early during the fiscal year 1929 to Colon and the route will likely go first to Yucatan, then to British Honduras, to Honduras, to Nicaragua, to Costa Rica, and from there to Colon.

Mr. WAINWRIGHT. That is not a definite project yet?

Mr. OLIVER of Alabama. No; but likely we will have definite information of it when Congress meets in December.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. LAGUARDIA. Do we maintain those routes by treaties?

Mr. OLIVER of Alabama. No; but I am sure there is a keen and friendly interest as to the matter between the countries concerned, and it may not be long before those routes are established. That is the hope entertained in considering the establishment of this air line to Laredo or to Brownsville.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. WAINWRIGHT. When I was in Salvador and Guatemala last spring I found that one of the things that they were most interested in was the establishment of air mail service.

Mr. OLIVER of Alabama. My impression is that all of the countries are friendly and well disposed toward the establishment of connecting air routes. The details must be worked out. We look forward to the execution of the projects in the near future. In this connection, you will recall that the Pan American aviation treaty was drafted and approved in February, 1928, and is now awaiting ratification by the various countries. When the treaty is ratified international communication with all countries to the South of us will be encouraged and I trust speedily realized.

Mr. KELLY. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. KELLY. There is a bill pending now before the Committee on the Post Office and Post Roads to authorize the Postmaster General to fix the rates on aircraft for carrying the mail at $2 a mile.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. JOHNSON of Texas. I observe that the air mail between Washington and Texas is not satisfactory. The mail does not arrive any more promptly than the ordinary mail. May I inquire if that blue line delineated on the map goes to New Orleans?

Mr. OLIVER of Alabama. Yes. From there it will be extended to Texas at an early day, I think.

Mr. JOHNSON of Texas. At this time air mail is not expedited because it has to go to New Orleans and return?

Mr. OLIVER of Alabama. Yes; but with the route extended into Texas from New Orleans the delay you refer to will be corrected.

Mr. CRAIL. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. CRAIL. Can the gentleman tell us what is the comparative cost and the receipts from the service?

Mr. OLIVER of Alabama. From the Post Office Department?

Mr. CRAIL. Yes.

Mr. OLIVER of Alabama. I think the gentleman from Pennsylvania [Mr. KELLY] could, perhaps, give more accurate information relative to the proceeds received by the Post Office Department than I could. I would be very glad to yield a few moments to him.

Mr. KELLY. We have figures received from the Post Office Department covering the fiscal year 1927 and nine months of the fiscal year 1928, as follows:

Contract air mail service

CONSOLIDATED STATISTICAL REPORT FOR FISCAL YEAR 1927

Month	Length of routes	Frequency (round trips per month scheduled)	Miles of service		Total weight of mails dispatched	Amount paid to contractors
			Scheduled	Actually flown		
1926	*Miles*				*Pounds*	
July	3,912	298½	222,370	214,585	26,673	$82,619.12
August	3,912	299½	220,284	214,368	32,404	91,367.70
September	5,301	307	248,570	228,775	35,246	100,474.42
October	5,456	325	269,062	256,189	42,070	121,908.12
November	5,456	312	289,109	257,057	37,686	109,878.18
December	5,178	297	286,254	239,433	39,340	114,087.74
1927						
January	4,495	262	244,010	205,612	32,510	93,552.23
February	4,495	240	223,412	191,383	35,037	101,293.52
March	4,495	274	251,778	233,308	42,111	121,987.91
April	4,618	275	246,333	231,998	45,856	133,129.25
May	4,618	298½	256,363	248,109	46,133	133,738.10
June	4,618	298	253,648	250,491	55,026	159,201.84
Total			3,015,993	2,776,108	470,092	1,363,208.13

CONSOLIDATED STATISTICAL REPORT FOR 10 MONTHS, FISCAL YEAR 1928

1927						
July	6,617	329	377,336	375,923	99,589	$250,891.15
August	6,617	338	379,991	376,998	102,047	258,963.45
September	7,340	384½	455,052	444,519	146,486	312,809.88
October	7,340	394	466,638	449,562	153,649	329,531.51
November	7,360	385	456,534	413,054	141,080	304,082.70
December	7,804	428½	485,594	402,267	165,768	353,253.21
1928						
January	7,804	453½	494,629	431,310	144,289	300,281.34
February	8,815	505½	520,785	450,058	153,363	329,379.70
March	8,815	553	561,693	523,287	173,929	368,191.21
April	8,872	527	544,716	513,144	171,028	359,182.12

Mr. OLIVER of Alabama. The statistics furnished by Mr. KELLY, of Pennsylvania, show a very gratifying increase in our air mail, and in that connection it should be stated that aid-mail pilots fly every day more than 25,000 miles. The gentleman from Pennsylvania told the House a few days ago that legislation now pending before his committee would be favorably reported at this session, and, if passed, would result in a substantial reduction of rates on air mail. The Post Office Department estimates that the reduction of rates which will follow the passage of this legislation will increase the volume of air-mail business more than 100 per cent.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. WAINWRIGHT. May I ask whether the gentleman is going to touch on the subject of passenger transportation?

Mr. OLIVER of Alabama. I will be very glad to do that.

Mr. WAINWRIGHT. And enlighten us as to the number of passengers that have been carried in connection with the air-mail service.

Mr. OLIVER of Alabama. You understand that from New York to Chicago, from Chicago to San Francisco, from San Francisco to Seattle and San Diego, from Salt Lake City to Los Angeles, and from Boston to New York—all of the routes are now operated as mail and passenger routes. It is estimated that during 1927 there were more than 19,000 passengers carried on the mail routes. On independent routes not connected with the mail service and from private landing

fields it is estimated that more than 600,000 passengers were carried.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. LAGUARDIA. Of course, that includes the short rides over fields?

Mr. OLIVER of Alabama. Yes.

Mr. LAGUARDIA. That is not from one point to another?

Mr. OLIVER of Alabama. That number includes short rides.

Mr. LAGUARDIA. That includes short rides over fields, where they go up for a few minutes?

Mr. OLIVER of Alabama. Not merely short rides over fields, but short-distance rides from local fields.

Mr. LAGUARDIA. I looked into that because I was so startled by the figures.

Mr. WAINWRIGHT. May I say to the gentleman that I think the significant figures are the large number who traveled over scheduled air routes in connection with their various avocations.

Mr. OLIVER of Alabama. It might be interesting to mention that the contractor who has the route from Chicago to San Francisco is putting on within the next few weeks three large planes each capable of carrying 12 passengers.

Mr. MANLOVE. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. MANLOVE. The gentleman has very explicitly explained concerning this Army route. I would like to ask whether or not there will be any conflict by reason of the fact that that is designated as an Army route, which comes down through Springfield, Mo., and Joplin, Mo., my home town?

Mr. OLIVER of Alabama. No. In other words, the Army is cooperating splendidly with the civil aviation branch and has been very helpful in making inspections and establishing routes. The Army routes may be used for commercial purposes, and when a paying business is developed on these routes the Government will light them.

Mr. MANLOVE. That is, the Army routes?

Mr. OLIVER of Alabama. Yes. We are undertaking now to light only those airways over which mail is carried.

Mr. PARKER. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. PARKER. How many passengers were carried between Cleveland and Detroit by the Ford outfit?

Mr. OLIVER of Alabama. I am not prepared to say.

Mr. PARKER. I am informed about 20,000 in the last year.

Mr. OLIVER of Alabama. That number, doubtless, is included in the total I gave.

Mr. MANLOVE. I understand no passengers were lost on that route, and I think that is very significant.

Mr. OLIVER of Alabama. I would like to invite the attention of the House to page 45 of the hearings, where will be found an interesting tabulation of air accidents and giving causes therefor. In most instances it will be found that the accidents were due to inexperienced pilots or to the use of unlicensed planes—one or both. The Department of Commerce is prepared to give full information as to schedules maintained on air routes, the name of the contractors on the several routes, type of equipment used, and so forth.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. LAGUARDIA. Is it not fair to state at this point that the casualties on the regular lines, flying on schedules, are down to the minimum?

Mr. OLIVER of Alabama. Yes.

Mr. LAGUARDIA. That the few casualties we have had have mostly taken place in the rides over the fields and before the Department of Commerce could establish supervision over them.

Mr. OLIVER of Alabama. The information I referred to on page 45 of the hearings discloses that.

Mr. PARKER. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. PARKER. I made the statement, when we were discussing the civil aviation bill in the last Congress, that the one thing we needed to accomplish in order to make flying a success was the safety of the passengers. Does the gentleman concur in that?

Mr. OLIVER of Alabama. Absolutely so, and it is important in that connection to remember that the bill as it finally passed did not clothe the department with authority to regulate intrastate flying. Intrastate flying unregulated may become a great menace to interstate flying, and when Mr. Lindbergh was before our committee, we asked his opinion as to the importance of centering authority in some one to control all air flying, and he gave hearty concurrence to the great importance of centering authority in one Government agency to promulgate rules and regulations, to which all pilots and planes must conform. We have had very few accidents to carefully inspected planes operated by license pilots.

The House, you will remember, in passing the air commerce act, undertook to provide a centralized control over air flights, both intrastate and interstate. The Senate limited the authority to interstate largely. It is interesting to note that many States have shown a sympathetic desire to cooperate, and some have gone so far as to require that before a plane can be flown it must be inspected by the proper Federal officers and a license obtained for the operator.

Mr. PARKER. Will the gentleman yield again?

Mr. OLIVER of Alabama. Yes.

Mr. PARKER. I will say for the gentleman's information that the reason that was left out was because the commercial aviation bill could not have passed with that provision in it.

Mr. OLIVER of Alabama. Yes.

Mr. ARENTZ. Will the gentleman from Alabama yield?

Mr. OLIVER of Alabama. Yes.

Mr. ARENTZ. The other day I very briefly stated the history of the pioneer air-mail pilots, and the gentleman spoke about my putting in some history regarding the routes, and so forth. I wish the gentleman would do that in his discussion here to-day. I found it impossible because of lack of information. The Post Office Department did not have the information at its fingers' ends. When we think of the air-mail routes being established in 1918 and think of all this pioneering work with millions of miles flown and 381,000 miles for each casualty, and then consider the months of pioneering with only 32 crashes, it is a wonderful record, and I hope the gentleman and the other Members present here to-day will assist before the Committee on the Library in bringing about the establishment of the memorial asked in the joint resolution to which I have referred.

Mr. OLIVER of Alabama. It was a most deserving tribute that the gentleman paid these patriotic fliers, and I shall be very glad to cooperate with him in getting the information for insertion in the RECORD either as an extension of the gentleman's remarks or as a part of mine.

Mr. ARENTZ. I thank the gentleman.

Mr. McDUFFIE. May I interrupt the gentleman to ask how the development of commercial aviation in this country compares with that of other nations?

Mr. OLIVER of Alabama. We think it is rapidly approaching what any other country has accomplished. Of course, the routes here are very much longer, and while we may not reach every part of our territory so well as some of the smaller countries do, yet we have established much longer routes than any of them; and when we consider how far one could go in the countries of Europe over our 13,000 miles of airways, more than one-half of which are lighted, you will understand we occupy an advanced place. No country has better planes, better pilots, and the industry here is well financed and fairly prosperous.

Mr. LAGUARDIA. In that connection, should it not be stated that all the foreign companies that have shown any development have received direct subsidy from the government for the operation of such lines, and we have no direct subsidy, of course?

Mr. OLIVER of Alabama. We have not thought it necessary, and reports indicate that many operating companies are making money.

Mr. KELLY. If the gentleman will permit a further answer to the question, in Germany, which is regarded as the foremost country in commercial aviation, they pay a subsidy of 77 cents a mile where the total cost is $1.11 a mile. We hear a great deal about the amount of freight carried there. The mail carried on all German lines is about 600,000 pounds a year. In the last six months in the United States on the air-mail lines we carried 800,000 pounds, so that in six months we have carried more than they carried in an entire year.

Mr. WAINWRIGHT. How about passenger service? How does the carriage of passengers compare?

Mr. KELLY. As to passengers, Germany carried 52,000 passengers during the last year for which figures are available.

Mr. LAGUARDIA. Mostly Americans at that.

Mr. KELLY. Yes; mostly Americans.

Mr. BRIGGS. I would like to ask the gentleman from Alabama whether the appropriation carried in this bill for the aviation features are commensurate and in keeping with the spirit of the provision made for the five-year program with reference to commercial aviation?

Mr. OLIVER of Alabama. I am not prepared to make the comparison. However, we are keeping fairly well up with the demands of the Post Office Department and, of course, that de-

termines largely our appropriations for lighting. The gentleman will be interested to know that the area from Dallas to Galveston is in the area to be soon lighted.

Mr. BRIGGS. I am delighted to hear that, and I simply wanted to know whether there are funds enough provided to carry through the development.

Mr. OLIVER of Alabama. I am glad the gentleman has asked the question. Some question has been raised since this bill was reported as to whether we had provided funds sufficient to light the airways already let by the Post Office Department, and inquiries are now being prosecuted by the members of our subcommittee with a view of determining what additional amount, if any, is required. I am confident that an additional sum will be needed, and when the amount is definitely estimated for it will be provided in the deficiency bill this session.

Mr. BRIGGS. I am very glad to hear that.

Mr. BACHMANN. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. BACHMANN. I understand the Government has nothing to do with the establishment of airports; is that correct?

Mr. OLIVER of Alabama. Yes.

Mr. BACHMANN. But they do provide these large beacon lights and the radio operators at the different places?

Mr. OLIVER of Alabama. Yes; at emergency fields and at points along the routes where radio stations are located. The emergency fields are supposed to be located about 10 miles apart, and large beacon lights every 30 miles. The emergency fields are well lighted and, though small, furnish safe landing places. An airport is a well-constructed field provided with full repair facilities and other requisites and is supposed to comprise an area of from 120 to 160 acres. Emergency fields are maintained at the expense of the Government, but airports are maintained by municipalities or private companies.

Mr. BACHMANN. What control does the Government maintain over this transcontinental route or its feeders?

Mr. OLIVER of Alabama. Only over emergency fields and the air routes. They have no control over airports. These are owned and controlled by the towns, cities, or private interests.

Mr. BACHMANN. If a private company were incorporated to carry passengers over this transcontinental route, could it do so without having a permit from the Government?

Mr. OLIVER of Alabama. It would have to secure a permit from the Government. Their planes must be inspected and registered and their pilots would have to be licensed.

Mr. BACHMANN. Then, any company could enter the field for the transportation of passengers if it had the necessary permit and met the tests?

Mr. OLIVER of Alabama. Yes; provided they met the requirements and observed the regulations of the department. They could not land at airports without the consent of the towns or cities that owned them. It is thought that airports eventually will prove sources of revenue. They keep fuel and maintain repair shops, and will be prepared to accommodate the public, just as railroad passenger stations do.

Mr. BACHMANN. Does the gentleman know whether there are any great number of these private companies now engaged in the transportation of passengers over this transcontinental route?

Mr. OLIVER of Alabama. Yes; several.

Mrs. KAHN. Are these emergency fields owned by the Government?

Mr. OLIVER of Alabama. They are either owned or leased. Most of them at present are rented, but a few are owned. We are paying from $7 to $10 an acre rent for emergency fields. In future lease contracts there will be carried a provision giving the Government the right to purchase within the lease period for an agreed sum.

Mr. ANDREW. Will the gentleman state how many emergency fields there are?

Mr. OLIVER of Alabama. There are about 107, and this number is rapidly increasing.

Mr. MANLOVE. As I understand, anyone with a Government license can have the benefit of these lights and travel the same route?

Mr. OLIVER of Alabama. Provided they comply with Government regulations. The plane has to be identified, and certain rules must be observed by the pilots to insure safety.

Mr. MANLOVE. But anybody in Missouri or Nebraska who has a State license would have the right to use the lighted way in that State without a Government license?

Mr. OLIVER of Alabama. Yes.

Mr. MANLOVE. Are we not coming to a point where that situation will have to be corrected?

Mr. OLIVER of Alabama. I think so.

Mr. PARKER. The use of the Government-lighted ways corresponds exactly to the use of the waterways. The bill was drawn with that in view?

Mr. OLIVER of Alabama. Yes; and to the use of the highways.

Mr. PARKER. If they conform to the rules of the road and the rules set down by the Government, they have a right to use it?

Mr. OLIVER of Alabama. Yes.

Mr. BACHMANN. I notice from the press that some fliers were unable to fly over this route on account of a blizzard or snowstorm. Does the gentleman know whether there is any movement to have the route placed farther south?

Mr. OLIVER of Alabama. It is contemplated that sooner or later there will be a southern transcontinental route; its western terminal will likely be San Diego, Calif. You will find it sketched on the map.

Mr. BACHMANN. And over that southern route they will be able to transport the mails at all times?

Mr. OLIVER of Alabama. Yes; there are not many days they can not fly over the present transcontinental route. They are sometimes prevented from landing. Machines can fly in all kinds of weather, but they can not always make a safe landing on account of fog or soft fields. The planes not infrequently are forced, because of weather conditions, to pass over some of the regular landing fields.

Mr. BACHMANN. I notice that in reading the speech made by the gentleman last year he referred to Charles A. Lindbergh being the first air-mail pilot that flew from Chicago to Dallas—that he was the first man to fly over that lighted route and the thermometer was below zero.

Mr. OLIVER of Alabama. You will be interested to know that over that route, where he was the pioneer up to that time, there has never been an accident. They are never behind time. [Applause.]

Mr. LaGUARDIA. Will the gentleman yield?

Mr. OLIVER of Alabama. Certainly.

Mr. LaGUARDIA. The interest the gentleman has taken has been a great contribution to the aviation of the country. [Applause.] May I suggest that the committee give some study to the advisability or desirability of offering a substantial prize for some fog piercing or penetrating light. When I flew from New York to Minnesota and back we laid in Cleveland 31 hours waiting for the fog to clear up. Would it not be well to offer a prize to develop some fog-piercing light so that we could overcome that difficulty?

Mrs. KAHN. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes; certainly.

Mrs. KAHN. I had a long talk with the Assistant Secretary of Aviation on that very subject because that is one of our troubles in San Francisco—the fog and low visibility. He told me that the department is making scientific research in order to discover something which will either dissipate the fog or render greater visibility.

Mr. OLIVER of Alabama. Mr. Chairman, the Bureau of Standards is making a study of that, and the department has allocated funds for the purpose of having a study made along those lines.

Mr. PARKER. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. PARKER. Has the gentleman the figures of the percentages of landings and time of the air mail?

Mr. OLIVER of Alabama. No; I have not, but there have been very few delays.

Mr. PARKER. As I understand it, the mail is delivered on time in over 90 per cent of the cases.

Mr. OLIVER of Alabama. I think the percentage is greater than 90 per cent. [Applause.]

Mr. Chairman, I ask unanimous consent to insert in my remarks these items to which I have referred.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to extend his remarks in the RECORD by inserting the data he used in the course of his remarks. Is there objection?

There was no objection.

FARM RELIEF

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. ABERNETHY. Mr. Speaker, ladies and gentlemen of the House, ever since farm-relief legislation has been before this body I have been a consistent supporter of the McNary-

Haugen bill, equalization fee and all included, but at the beginning of this session I began to see that it was a presidential year and there was a great diversity of opinion and that we would be expected to get up here at the tail end of the session and give a further excuse to the farmer, that on account of a division there would not be any farm-relief legislation.

The gentleman from Illinois [Mr. WILLIAMS], who spoke just a few moments ago, is now trying to relieve the administration of its failure to put through legislation for farm relief. Suppose certain farm leaders did say they wanted no legislation unless they had the McNary-Haugen bill with the equalization fee. Does this relieve the responsible leadership of the dominant party for its failure to bring in a bill that would give relief to the farmers, that would meet the views of the Executive?

Now, we have had plenty of time since the veto of the President was not sustained for the responsible leadership of this House and the other body to get together and give the farmers of this country some substantial relief by bringing out a bill we could vote for, and not adjourn this Congress without giving such relief.

You can not get by with any such excuse any longer. [Applause.]

ANNIVERSARY OF THE BATTLE OF WYOMING

Mr. LUCE. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 14034) to establish a commission for the participation of the United States in the observance of the one hundred and fiftieth anniversary of the Battle of Wyoming, an emergency measure.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object——

Mr. LUCE. Mr. Speaker, this involves no expense. It is simply for the appointment of a commission, one by the President, three by the President of the Senate, and three by the Speaker of the House.

Mr. CRAMTON. And after you get the commission, what are they going to do—develop a plan for an ornamental highway from here to Wyoming?

Mr. LUCE. No; the celebration takes place the first week in July, and they will hardly have time to be that fertile.

Mr. CRAMTON. If there is one commission that is not going to cost us anything, I am for it.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby established a commission to be known as the United States Commission on the Sesquicentennial of the Battle of Wyoming (hereinafter referred to as the commission) and to be composed of seven commissioners, as follows: One to be appointed by the President of the United States, three Senators by the President of the Senate, and three Members of the House of Representatives to be appointed by the Speaker, to cooperate with the Wyoming Commemorative Association and the Wyoming Monument Association in the observance of the sesquicentennial of the Battle of Wyoming. The commission shall serve without compensation and shall select a chairman from among their number.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A TRIBUTE TO HON. W. FRANK JAMES

Mr. HILL of Alabama. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein a tribute to the gentleman from Michigan, Mr. W. FRANK JAMES, by General Summerall, Chief of Staff of the Army, together with a short editorial from the Ironwood Globe.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. HILL of Alabama. Mr. Speaker, under leave granted me to extend my remarks in the RECORD, I place herein the following tribute to the distinguished gentleman from Michigan, the acting chairman of the Committee on Military Affairs, Hon. W. FRANK JAMES, by the Chief of Staff of the Army, Maj. Gen. Charles P. Summerall, together with editorial on General Summerall's tribute from the Daily Ironwood Globe of May 21, 1928:

[From the Marquette Mining Journal, of Marquette, Mich., May 19, 1928]

SUMMERALL LAUDS JAMES IN ADDRESS IN THEATER

Preliminary to his address yesterday afternoon in the Delft Theater, Major General Summerall, Chief of Staff of the United States Army, paid a warm tribute to Congressman W. FRANK JAMES, of the twelfth district, as follows:

"My presence here is due not only to my desire to share with my comrades of 1898 the observance of the day but to the even more potent appeal of your distinguished Representatives in Congress, W. FRANK JAMES. Indeed, without his presentation of your very generous invitation, I should not have understood the significance of this event. Congressman JAMES needs no testimonial from me to his fellow citizens and constituents. I can not, however, resist the desire to pay even a small tribute to his services to the Nation.

"His lofty patriotism, his sterling integrity, his sound judgment, his keen insight into men and national affairs, and his absolute unselfishness make him one of the greatest men in public life to-day. His force of character and his honesty of purpose have won for him the complete confidence of all who know him.

"As acting chairman of the Committee on Military Affairs in the House of Representatives, he has contributed, as few men have, to the development of every phase of the national defense. To me it has been an especial privilege to enjoy his friendship. The people of this congressional district are particularly fortunate in the choice of such a Representative, and after seeing you I feel that he but reflects the character and the ideals of his community and his State. His influence, and yours through him, is far-reaching and irresistable for the good of the country."

[Editorial in Daily Ironwood Globe, of Ironwood, Mich., May 21, 1928]

SUMMERALL PRAISES JAMES

Preliminary to an address he made at Marquette recently on the occasion of a celebration by the Spanish War veterans of that city, Major General Summerall, Chief of Staff of the United States Army, spared no words in his tribute to W. FRANK JAMES, Congressman from this district.

General Summerall declared that "his lofty patriotism, his sterling integrity, his sound judgment, his keen insight into men and national affairs, and his absolute unselfishness makes him one of the greatest men in public life to-day. His force of character and his honesty of purpose have won him the complete confidence of all who know him. As acting chairman of the Committee on Military Affairs of the House of Representatives, he has contributed, as few men have, to the development of every phase of the national defense. To me it has been an especial privilege to enjoy his friendship."

Because of the aggressive manner in which Congressman JAMES has sponsored better living conditions for the United States Army and has otherwise contributed to the morale of the standing forces of the country, General Summerall would feel duty bound to praise Mr. JAMES in the Congressman's own bailiwick. Yet no seasoned veteran like Summerall would go to such length to pay tribute to a Congressman unless he thoroughly meant it. Old Army men are not prone to lavishness in praise. Under the circumstances the tribute to Mr. JAMES is all the greater.

RENT FOR UNITED STATES VETERANS' HOSPITAL NO. 90, MUSKOGEE, OKLA.

Mr. HASTINGS. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 13199) authorizing the payment to the State of Oklahoma the sum of $4,955.36 in settlement for rent for United States Veterans' Hospital No. 90 at Muskogee, Okla.

The SPEAKER. Has the gentleman the authority of the committee?

Mr. HASTINGS. No; but it is the unanimous report of the committee. It is on the calendar, and it is recommended by the Veterans' Bureau.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the State of Oklahoma the sum of $4,955.36, out of any money appropriated for rent, maintenance, or support of hospitals, the same being in full settlement for rent of United States Veterans' Bureau Hospital No. 90 at Muskogee, Okla., from February 11 to April 30, 1925, being the date of passing of title to the Government of the United States for said hospital.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

CONTRACTS WITH THE SECRETARY OF WAR TO BE IN WRITING

Mr. JAMES. Mr. Speaker, I call up the conference report on the bill (H. R. 12352), requiring certain contracts entered into by the Secretary of War or by officers authorized by him to make them to be in writing, and for other purposes.

The Clerk read the conference report.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12352) to require certain contracts entered into by the Secretary of War, or by officers authorized by him to make them, to be in writing, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the language proposed to be inserted by said amendment insert the following: "*Provided*, That this act shall cease to be in effect after June 30, 1930"; and the Senate agree to the same.

W. FRANK JAMES,
L. A. FROTHINGHAM,
WILLIAM C. WRIGHT,
Managers on the part of the House.

DAVID A. REED,
FRANK L. GREENE,
DUNCAN U. FLETCHER,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12352) to require certain contracts entered into by the Secretary of War, or by officers authorized by him to make them, to be in writing, and for other purposes, submit the following written statement explaining the effect of the action agreed on by the conference committee and submitted in the accompanying conference report:

On No. 1: The amendment to the measure agreed to by the Senate provided that the provisions of the act expire on June 30, 1929, thereby giving but one year. An agreement was reached extending this time one year, making the date for the expiration June 30, 1930, and giving the War Department time to give the subject further study and recommend further legislation on the subject.

W. FRANK JAMES,
L. A. FROTHINGHAM,
WILLIAM C. WRIGHT,
Managers on the part of the House.

The conference report was agreed to.

NECESSARY LEGISLATION

Mr. SCHAFER. Mr. Speaker, I ask unanimous consent to proceed out of order for five minutes.

The SPEAKER. Is there objection to the gentleman from Wisconsin?

There was no objection.

Mr. SCHAFER. Mr. Speaker, I voted against both resolutions providing for adjournment this afternoon, because I believe there is a great deal of legislation which this Congress should have written into law before adjourning, legislation such as the Boulder Dam bill, the bill to restrict the immigration of Mexicans, farm relief, abolishment of the "lame-duck" session of Congress, Federal employee retirement liberalization, regulation of lobbyists, prohibition of tyrannical injunctions in labor disputes, modification of the Volstead Act, and complete investigation of the administration of alien property.

I sincerely hope that when Congress reconvenes in December the rules of this House will be liberalized so that a little powerful group of the Rules Committee will not control and prevent the House from considering legislation which committees have reported. [Applause.]

I introduced H. R. 6098, a bill to regulate lobbyists and prevent their pernicious activity. [Applause.] Anyone who has followed the investigations of the Power Trust and the brazen, high-powered lobby for the repeal of the inheritance tax can not but reach the conclusion that the legislation as embodied in H. R. 6098 should be written into law. Under the existing conditions we have the disgraceful and deplorable spectacle of former Members of Congress serving as highly paid propagandists and lobbyists and using the privilege of the floor of the House and Senate while those bodies are considering legislation which they are attempting to defeat or to pass.

One of the sections of H. R. 6098 provides that any former Member of the Senate or the House who is employed as a lobbyist shall be denied the privilege of the floor of the House and the Senate or the cloakrooms while he is employed as such. [Applause.]

I hope the rules of the House will be so amended that legislation modifying the Volstead Act can be brought before the House and a roll call had, so that the country will be able to see some of those Members who are on both sides of the fence on this question jump one way or the other. [Laughter and applause.]

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. SCHAFER. I can not yield; I have only a few minutes.

Mr. CRAMTON. When you did get a roll call you were sorry for it afterwards.

Mr. SCHAFER. Oh, let me state to the gentleman that the roll call which he has in mind and to which he has frequently referred on the floor was not a roll call on modification, and the gentleman can not convince even the most ardent dry that it was. In 1926 the voters of Wisconsin, by an overwhelming majority in a referendum vote, favored the modification of the Volstead Act to permit the manufacture and sale of beverages containing not more than 2.75 per cent of alcohol by weight. The citizens of my congressional district voted 15 to 1 in favor of such modification. I introduced legislation to carry out the mandate of my constituents, and, in fact, have introduced modification bills in each Congress to which I have been elected. From the standpoint of the people of Wisconsin it is not only a question of modification but of principle, because political platforms in Wisconsin for many years have contained planks in favor of the initiative, referendum, and the recall. [Applause.]

Since the Legislature of Wisconsin submitted to the people of the State the question of modification, and they voted overwhelmingly in favor of modification, I believe all of the Representatives of the State whose constituency voted for such modification should have introduced bills carrying out the mandate of their constituents, both in this and in the other body of Congress. Preaching in favor of referendum when running for office and failing to heed a referendum carried by an overwhelming vote is political dishonesty and obtaining public office by false pretense.

Mr. HOLADAY. Mr. Speaker, will the gentleman yield?

Mr. SCHAFER. Yes; for a question.

Mr. HOLADAY. Has not Wisconsin very recently indorsed a dry candidate for the Presidency?

Mr. SCHAFER. I say to the gentleman that I did not indorse any dry candidate, to whom he refers, and did not vote for the delegates pledged to him, not only because he was a consistent dry, but because he voted for the World Court, and for the discriminatory native-origin scheme for determining immigration quotas. On those three vital principles I could not agree with the politicians who brought forth their dry, World-Court, native-origin presidential candidate. I am aware there is some sentiment in Wisconsin for the Tammany chieftain, Al Smith, mostly because he is classed as a liberal in so far as modification of the Volstead Act is concerned. If the Tammany chieftain, Al Smith, runs for the Presidency on a dry platform, controlled by the Ku-Klux Klan and the Anti-Saloon League, he can never hope to carry the State of Wisconsin next November. [Applause.]

THE LATE REPRESENTATIVE THOMAS S. BUTLER

Mr. TILSON. Mr. Speaker, to-day in Pennsylvania is being laid to its last rest the body of one of our most beloved Members, the late Representative THOMAS S. BUTLER. This is the exact hour fixed for the funeral, 2.30 o'clock in the afternoon. As a mark of respect to his memory, I ask unanimous consent that the House now pause in its deliberations, and that the Chaplain be asked to lead us in prayer.

The SPEAKER. Without objection it will be so ordered.

There was no objection.

The CHAPLAIN. Almighty God, Father of our Lord and Saviour, Jesus Christ, Thou art our Father and we are Thy children. Thou wilt surely hear us when we call and answer us when we pray. We lift our eyes unto the hills whence cometh our strength. Do Thou arrest our minds and stay our deliberations as we pause and meditate upon the brevity and uncertainty of life. In this consciousness we praise Thee that Christ, our Saviour, has become the first fruits of them that sleep. As in Adam all die, even so in Christ shall all be made alive again.

We ask Thy consoling blessing upon the sorrowing ones to-day. Be there as well as here and here as well as there. O Lord, help us in our limitations, pity us in our weakness, pity us in our frailties, pity us in our tendencies, pity us in our sins, pity us in the moment of death, and catch us when we fall. Abide with all of us in the measure of a great peace. Grant, O God, that the memory of Mr. BUTLER may be held as

a sacred memory in our lives. His stability, his conscientiousness, his manly bearing, his just decisions are all virtues worthy of our emulation. The workman dies, but the work goes on forever.

Now, as we are on the very verge of the last moments of this session, Thou God of infinite mercy, abide with all of us in the measure of a great peace, and as we move forward, and as the summer months pass by, may no plague come nigh our dwellings. Give wisdom to direct us; bless us with mercy to make us considerate of our fellows; and, Heavenly Father, regard us always in divine favor, and at the last, when one door is closing, may another door open; when earth begins to recede, may the skies eternal appear and lead us up the stairway through the darkness to the Father's house, to the Father's arms, to the Father's breast, to the Father's heart, to the Father's home, and we shall go out no more forever.

The Lord is my shepherd; I shall not want.

He maketh me to lie down in green pastures: He leadeth me beside the still waters.

He restoreth my soul: He leadeth me in the paths of righteousness for His name's sake.

Yea, though I walk through the valley of the shadow of death, I will fear no evil: for Thou art with me; Thy rod and Thy staff they comfort me.

Thou preparest a table before me in the presence of mine enemies; Thou anointest my head with oil; my cup runneth over.

Surely goodness and mercy shall follow me all the days of my life: and I will dwell in the house of the Lord forever. Amen.

ELECTION INVESTIGATION COMMITTEE

The SPEAKER. The Chair appoints the following Members to the election investigation committee in accordance with the resolution passed this morning.

The Clerk read as follows:

Mr. LEHLBACH, of New Jersey; Mr. NEWTON, of Minnesota; Mr. NELSON, of Maine; Mr. RAGON, of Arkansas; Mr. BLACK, of New York.

PRISONS BOARD

The SPEAKER. The Chair appoints the following Members of the Prisons Board.

The Clerk read as follows:

Mr. COOPER, of Ohio; Mr. KOPP, of Iowa; Mr. TABER, of New York; Mr. BELL, of Georgia; Mr. BOYLAN, of New York.

ADDRESS OF THE PRESIDENT AT GETTYSBURG MAY 30, 1928

Mr. TILSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein an address which the President of the United States will deliver at Gettysburg to-morrow.

The SPEAKER. Is there objection?

There was no objection.

MEMORIAL DAY ADDRESS OF PRESIDENT COOLIDGE

Mr. TILSON. Mr. Speaker, in accordance with consent granted by the House, I insert herewith copy of an address to be delivered by the President of the United States at Gettysburg on May 30, 1928.

The address is as follows:

MY FELLOW AMERICANS: This returning Decoration Day brings our entire Nation in reverence and respect to the graves of our departed soldiers. Each year their number has increased, as that long blue line which stood so valiantly for the cause of the Union has grown thinner and thinner, until to-day it has almost vanished from earthly view.

"On Fame's eternal camping ground
Their silent tents are spread.
And Glory guards with solemn round
The bivouac of the dead."

We do not come to lament, but to give thanks. With one acclaim the people bestow upon them all that divine salutation, "Well done, thou good and faithful servant."

To express our devotion we have come to the field of Gettysburg. It ranks as one of the great historic battle grounds of this continent. In the magnitude of its importance it compares with the Plains of Abraham, with Saratoga, and with Yorktown. It is associated with a great battle between the Union and Confederate forces and with one of the greatest addresses ever delivered by one of the greatest men ever in the world, Abraham Lincoln.

The respect in which the United States hold its service men is indicated by something more substantial than lip service. Between $6,000,000,000 and $7,000,000,000 have gone out of the United States Treasury in pensions and gratuities to those who fought in that war which reached its crest upon this hard-fought field. These payments are still going on at the rate of about $200,000,000 each year. To the account of those who took part in the World War, for benefits and compensations in the short period of 10 years since its close already, there has been set aside almost $5,000,000,000, and payments are going on at the rate of about $560,000,000 each year. Our people do something more for their service men and their dependents besides giving them a kind word while they live and placing a wreath on their last resting place when they are gone.

All the countries on earth in all their history, all put together, have not done as much for those who have fought in their behalf as our country alone has done in the past 50 years. Our appreciation and our devotion is evidenced by something more than tributes and monuments and yearly assemblages devoted to their praise.

While making these tremendous expenditures for the benefit of those who have seen military service, our country at the same time is making outlays in excess of those ever before made in time of peace for the purpose of national defense. Yet our military force is exceedingly moderate, our standing Army is small, our National Guard and Reserve represent little more than a supplementary police force, when we consider our great area at home and our obligations in our outlying possessions. Our naval force necessary for the protection of our commerce, which is world wide and not exceeded in importance by that of any other country, while of very respectable proportions, needs to be strengthened in cruisers and other auxiliary craft. Such construction is already under way and plans are maturing for the necessary increases. Our air forces are being steadily improved and enlarged.

While we are maintaining these moderate forces, we are especially anxious for the world to know that they are purely for defensive purposes and to promote general peace and tranquillity. No other nation has anything which we would think of taking by force. Our restrictive immigration law is a declaration of national policy against the acquisition of the territory of any foreign people. Though we have at this time some of our forces in Haiti, Nicaragua, and China, they are in none of these places for the purpose of making war, but for the purpose of insuring peaceful conditions under which the rights of our nationals and their property may receive that protection to which they are entitled under the terms of international law. Our further purpose in Haiti and Nicaragua is to assist the peoples and governments of those two countries in establishing stability, in maintaining orderly and peaceful institutions in harmony with civilized society. We are there at their express invitation and in accordance with explicit agreements.

The world-wide interests of the United States aside from the dictates of humanity make us view with peculiar disfavor not only any danger of being involved in war ourselves, but any danger of war among other nations. Our investments and trade relations are such that it is almost impossible to conceive of any conflict anywhere on earth which would not affect us injuriously. The one thing that we want above all else for ourselves and for other nations is a continuation of peace. Whether so intended or not, any nations engaging in war would thereby necessarily be engaged in a course prejudicial to us.

The strength of this Nation, however, is not expressed merely in terms of an Army and Navy. A yet greater power is derived from the happiness and contentment of the people. During recent years this has been our national position to a greater extent than ever experienced by any other people. A realization of the benefits derived from our political and economic institutions naturally results in patriotic devotion. The efforts made to establish a Government free from tyranny, in which the fullest freedom consistent with order and justice would be granted, and where opportunity would be open and industry attended with the largest rewards, all have an important bearing on the subject of national defense.

But to the contentment and patriotism of the people there must be added the resources that are derived from prosperous industry, agriculture, and commerce. Good credit, which is derived from sound financial conditions, is the principle foundation of national defense. That country which has so ordered its finances as to be in a position to furnish the largest amount of money will always be in the best position to protect itself. Reduction of our national debt, permitting a reduction of taxes which stimulates private enterprise and increases our credit, is an important addition to our national strength. The industrial advance, the agricultural development, the financial resources, strengthened by wise policies in time of peace are of inestimable value in time of war.

A people which gives itself over to great armaments and military display runs great danger of creating within itself a quarrelsome war spirit. But these other elements of power, although their importance is usually ignored, by contributing to the happiness and contentment of the people, are important influences for peace. Those who seek for vast military establishments requiring enormous expenditures of money are not necessarily contributing so much to national defense as those who would apply more of our revenue to the payment of our debt and a corresponding reduction of our taxes, which would be reflected in increased prosperity. With this method of preparedness, the more we have of it the more peaceful we become.

It can be said of our country that in all its history it has never made preparations to attack any other country. Whenever it has been engaged in conflict it has entered it in such a state of unpreparedness

as to demonstrate that it was not sought or even expected. While others have felt that they were forced to prepare for war, our situation has been such that we have always been preparing for peace.

It is our theory that while the Army and Navy are an important and necessary part, they are by no means the only agency of national security. We know that there are times when race antagonisms and national animosities break out in the world in the most unexpected way. At other times all nations are subjected to more or less domestic tumult. In such cases the presence of adequate armed forces is the only practical method of protection for life and property. But the world has advanced far enough now in civilization and experience so that a great conflict is not likely to arise so much from design as from accident. It is realized that war can not be profitable. The trend of civilization is undoubtedly toward peace.

The reason for this is not far to seek. War means the application of force. Peace means the application of reason. War is complete lawlessness. Peace is the rule of law. The principal effort of civilization, after all, is to bring the world under obedience to law. The great conflict which raged upon this battle field had for its ultimate decision the question of whether the power of the sword or the power of the Constitution was to be supreme. Under republican institutions an industrious and law-abiding people will make a peaceful nation, while a lawless and riotous people will make a warlike nation. Like many other of our problems, the solution runs back to the individual and the home. If around the Nation's fireside respect for authority, reverence for holy things, and obedience to parental discipline are taught, the surest foundation for peace will be laid. Where these home influences are lacking the danger of conflict increases.

While the people of the United States as a whole are peaceful and law-abiding to a remarkable degree, it can not be denied that we have had sporadic outbreaks of crime, especially those of violence, which are exceedingly disturbing. Such a condition will indicate, if continued, a loosening of the moral fiber of the Nation. It is very easy to cast the blame upon the police authorities, the prosecuting officers, and the courts. But if a criminal condition, continues to prevail, the blame goes beyond these officials. We live under a system of popular government. Our officers reflect to a very large degree public opinion.

If the people themselves show that they are determined to have crime stamped out, there will be no lack of vigilance on the part of the police, no lack of energetic action on the part of prosecuting attorneys, and no lack of adequate penalty on the part of the courts. If the people are careless and indifferent, if they look with complacency on crime and assume a sentimental attitude toward criminals, little reform can be hoped for. If, on the other hand, the people remember that good government only can be secured by the exercise of eternal vigilance, that it is necessary constantly to resist evil tendencies, if they will take such action as is necessary to give adequate expression to their determination to terminate lawlessness and crime, it can be done.

For the purpose of promoting a reign of law in the world there is a special obligation resting upon all public officials. In our own country, and in most others, the Government is one of limited powers. The purpose, as has been so well expressed, is to provide a government of law and not of men. The great majority of offices are those created by statute. Those who fill such places should be alert to ascertain the powers with which they have been invested and scrupulous to observe the law under which they have been appointed. But in addition to these there is a considerable body, executive, legislative, and judicial in its functions, which derive their authority directly from constitutional sources. None of these are all-powerful, but are held within strict limits. They have all come into existence because the people have decreed by their Constitution that they should be clothed with certain limited authority.

The chief temptations to go beyond the bounds which the people have set arise in legislatures. In their desire to take some action which they conceive to be in the public interest, they oftentimes manifest a disposition to exceed their constitutional authority. Such action is a larceny of power. Responsibility for it can not be evaded by the weak plea to let the law be passed and the courts can decide its constitutionality. Legislators are required to qualify upon their solemn oath. That oath is not that they will leave the courts to defend and support the Constitution, but that they themselves will defend and support it. When additional authority is required, they should apply to the people to amend the Constitution, and not atempt to evade it or strain it by subterfuge and misconception.

The same necessity for being law-abiding at home applies to our citizens when they are abroad. Our people are granted free access on the same basis as others into all the countries of the world. As a general policy they go with the encouragement of our Government to engage in all kinds of enterprise. But when once they have set foot in foreign land, it is their duty to render obedience to the domestic and international law which is applicable to their proposed actions. Our Government necessarily has rights over its citizens and their property in whatever country they may be. While we do not and can not undertake to interfere in the application of domestic law to our nationals unless it contravenes the rights of our Government and people under international law, nevertheless the carelessness of some of our citizens abroad in violating domestic law and in assuming an arrogant attitude toward the local inhabitants tends to bring our country into disrepute and endangers the continuance of friendly relations.

A Government of the United States that failed in its duty to protect the lives and property of its citizens would be justly condemned at home and covered with derision abroad. But our citizens ought to remember that it is their duty so to conduct themselves in their relations with foreign interests that they are worthy of whatever protection they may need from their home Government.

Obedience to international law, however, is a reciprocal duty. It is necessary not only that we scrupulously observe it ourselves, but that it be known that we shall require such observance from others. When we make agreements with other nations we must see that they are performed. If they are ever to be abrogated, it must be only in accordence with their terms. For us to insist at all times and places on the observance of international law is to strengthen the main foundation of peace. By our influence and by our example we can do much to discourage all acts of international lawlessness.

After all, peace is a spiritual attainment. We can set up material safeguards like fortifications and armaments, which will afford us much protection against attack, but unless we cultivate and cherish sentiments of friendship and understanding they are no guaranty of peace. One method of arriving at a better state of understanding, so that friendship may be preserved, is to provide before the event for methods of negotiating and adjudicating matters in dispute. In furtherance of the plan of this Government to settle international controversies by pacific means and thereby lessen the causes of war, the United States is now negotiating new arbitration treaties and additional conciliation treaties with the principal nations of the world.

The Pan American Conference, which met at Habana in January, 1928, passed a resolution calling a conference of all the American States to meet in Washington within a year to draft treaties of arbitration and conciliation. For that purpose, such a conference probably will be held in Washington the latter part of this year. The peace of the world can not, of course, be obtained by any one single act, but every treaty of arbitration and conciliation and every agreement against resorting to war adds another barrier against those conflicts which from time to time have recurred in the history of nations, and it is the hope of mankind that these repeated steps may in time establish a mode of thought and a custom of action that will do much to prevent war.

As is well known, we are also engaged in conversations with different powers for putting peace on a new basis and making it still more permanent. In June, 1927, M. Briand, the French Minister of Foreign Affairs, made a historic proposal to this Government. He suggested that France and the United States sign a treaty condemning recourse to war and renouncing it as an instrument of national policy in their mutual relations. During the 11 months that have since elapsed this suggested has been developed into one of the most impressive peace movements that the world has ever seen. The United States has accepted the principle underlying M. Briand's suggestion and has advocated its extension so as to include within the scope of the proposed treaty not only France and the United States, but also Great Britain, Germany, Italy, and Japan, and any other nations of the world that might care to join with these six powers in a common renunciation of war.

In order to facilitate discussion and to demonstrate that a treaty such as that desired by the United States could be short, simple, and straightforward, Mr. Kellogg, Secretary of State, submitted on April 13, 1928, for the consideration of the other interested powers, a preliminary draft of a treaty representing in a general way the form of treaty which he suggested we were prepared to conclude. This draft treaty has met with very favorable reception. Not only has the idea of a multilateral treaty for the renunciation of war been indorsed by public opinion here and abroad but the governments themselves have approached the matter with an interest and a sympathy which is most encouraging.

We have gathered to pay tribute to our soldier dead. This day is consecreated to their memory. It seems to me that the greatest honor that we can do to those who have died on the field of battle that this Republic might live is soberly to pledge ourselves to bend our every effort to prevent any recurrence of war. The government of the people, by the people, for the people, which Lincoln described in his immortal address, is a government of peace not of war, and our dead will not have died in vain if, inspired by their sacrifice, we endeavor by every means within our power to prevent the shedding of human blood in the attempted settlement of international controversies. It is my earnest hope that success may crown the negotiations now in progress, and that the ideals which have inspired the French Minister of Foreign Affairs and the Secretary of State of the United States in their joint efforts to find a solution of the problem of peace may find a practical realization in the early making of a multilateral treaty limiting future resort to war.

COMMITTEE TO NOTIFY THE PRESIDENT

Mr. TILSON. Mr. Speaker, I offer the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 237

Resolved, That a committee of two Members be appointed by the House, to join a similar committee appointed by the Senate, to wait upon the President of the United States to inform him that the two Houses have completed the business of the present session and are ready to adjourn, unless the President has some other communication to make to them.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

The Chair appointed the following members of the committee: Mr. TILSON, of Connecticut, Mr. GARNER, of Texas.

RESIGNATION OF A MEMBER

The SPEAKER. The Chair lays before the House the following communications, which the Clerk will read.

The Clerk read as follows:

MAY 29, 1928.

The SPEAKER,

House of Representatives, United States.

DEAR MR. SPEAKER: Herewith I hand you, for presentation to the House, copy of a telegram which I have sent to the Governor of the State of Oregon tendering my resignation as a Member of this House, to take effect on the 31st of this month.

Respectfully yours,

N. J. SINNOTT.

WASHINGTON, D. C., *May 29, 1928.*

Hon. I. L. PATTERSON,

Governor of Oregon, Salem, Oreg.

MY DEAR GOVERNOR: I hereby tender my resignation as Representative in Congress from the second district of Oregon, to take effect May 31.

N. J. SINNOTT.

The SPEAKER. The letter and the accompanying telegram will be printed in the RECORD.

AID FOR AUSTRIA

Mr. BURTON. Mr. Speaker, I ask unanimous consent to proceed for four minutes.

The SPEAKER. The gentleman from Ohio asks unanimous consent to proceed for four minutes. Is there objection?

Mr. BURTON. Mr. Speaker, in view of the vigorous opposition expressed by the gentleman from Texas [Mr. GARNER] to House Joint Resolution 247, which is entitled:

A resolution to authorize the Secretary of the Treasury to cooperate with other relief creditor governments and make it possible for Austria to float a loan in order to obtain funds for the furtherance of its reconstruction program and to include an agreement for the settlement of the indebtedness of Austria to the United States—

And in view of the further fact that the gentleman from Texas has announced that he would resort to every parliamentary device to defeat that resolution, I regard it as utterly futile to bring it up this afternoon. But I can not too strongly express my regret that action has not been taken upon this measure at this time.

What is the history of this measure? Under an act passed in 1920 the United States Grain Corporation, an agency of the Nation, sold to Austria some $25,000,000 worth of food; speaking exactly, $24,055,000 worth of food. For those sales bonds were taken. Austria at that time was in a worse condition than any country in Europe. Her people were starving. At the same time other countries of Europe, friend and foe alike, advanced about $95,000,000 worth of food to her. Payment was guaranteed by the taxes on tobacco and other commodities, in fact, all the revenues of Austria. In 1922 an act was passed by Congress postponing the payment of this amount until 1943, and in the year 1923 a loan of $120,000,000 was made to Austria from divers countries, some of which guaranteed payment.

That country, which formerly had some 40,000,000 people, is now reduced to 6,000,000, with Vienna, which was the metropolis of a great region, shut off from other parts of Europe by restrictive regulations and statutes of contiguous countries.

She is in a condition of great distress, and it is desired that a further loan, amounting to $100,000,000, be made, and that the loan of this $24,055,000, to be paid in 1943, be postponed in its lien as above described so that a further loan of $100,000,000 can be contracted by Austria. In an agreement to that effect, each of the countries of Europe which furnished food have joined for the much larger amount due to them—Denmark, France, Great Britain, Italy, the last three at war with Austria during the great contest; also the Netherlands, Norway, Sweden, and Switzerland.

And what is our attitude in failing to pass this resolution? That while these countries, some of them enemy countries of Austria, are willing to be generous and postpone their lien for the amounts due to them, we decline to do so; that while Austria is suffering and desirous of negotiating this loan, the United States alone, of nine countries, holds aloof. My friends and Members of the House, I can not face this situation with equanimity. I think it gives ground for the accusation made in Europe—I do not think it is rational, but it will cause the accusation to be made—that Uncle Sam is a Shylock. [Applause.]

The SPEAKER. The time of the gentleman from Ohio has expired.

Mr. BURTON. Mr. Speaker, I ask for another minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. BURTON. I want to say that just as soon as the House meets next December I shall make every effort to bring this resolution up for consideration and passage. It was reported by the Committee on Ways and Means. There is no dissenting report filed. So far as I know, the report was made, if not with practical unanimity, with general agreement. I have the greatest sympathy with that suffering country. I have visited it on several occasions since the Great War, and if there is any country of Europe, any country in the Old World or in the new, to which we should hold out a helping hand, it is Austria. I trust that next December, while I fear it may be too late to render efficient aid, we may pass this resolution by an overwhelming majority. [Applause.]

COMMITTEE ON IMMIGRATION AND NATURALIZATION

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent that the Committee on Immigration and Naturalization of the House be permitted to sit in Washington after the termination of this session and prior to the beginning of the next session and employ stenographers for the purpose of codifying the immigration act and preparing proposed legislation.

Mr. DICKSTEIN. What is the purpose of this?

Mr. JOHNSON of Washington. The purpose is to get rid of what we have, 150 bills, introduced by Members of Congress, so that if Members make inquiries concerning those bills after the election we may work with the stenographers for three weeks before the assembling of Congress.

Mr. DICKSTEIN. Can the gentleman state what particular legislation they are going to discuss during this time?

Mr. JOHNSON of Washington. A rather important bill will be that with reference to naturalization.

Mr. MACGREGOR. I would ask the gentleman to withdraw his request for a few minutes until we can find out about the matter.

Mr. JOHNSON of Washington. That is all there is to it. The committee can not do the work in the time at its disposal. It has not sufficient help, and we can have the help and aid of the solicitor of the State Department and others.

Mr. MACGREGOR. Mr. Speaker, I will object for the time being.

CLARK MEMORIAL COMMISSION

The SPEAKER. The Chair appoints on the Clark Memorial Commission, Mr. WOOD, of Indiana; Mr. VESTAL, of Indiana; and Mr. GILBERT, of Kentucky.

BOARD OF ENGINEERS TO EXAMINE AND REPORT ON THE BOULDER DAM BILL

Mr. ARENTZ. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate Joint Resolution 164, to appoint a board of engineers to examine and report upon the dam to be constructed under H. R. 5773, the Boulder Dam bill, and consider the same.

The SPEAKER. The gentleman from Nevada asks unanimous consent to take from the Speaker's table Senate Joint Resolution 164. Is there objection?

Mr. LEATHERWOOD. Reserving the right to object, what is the purpose of it?

Mr. ARENTZ. There has been some question brought before this House by the objectors to the Swing-Johnson bill that there has not been sufficient engineer investigation to demonstrate the cost of material, the height of the dam, the site of the dam, and other features entering into the construction of this meritorious work. This resolution has to do with the appointment of five nationally known engineers, one of whom must be a retired Army officer. These men will investigate every feature of this proposed construction and report to Congress.

Mr. LEATHERWOOD. Does the gentleman admit the truth of his statement?

Mr. ARENTZ. I am willing to do everything I can to make sure in the mind of the gentleman from Utah that the engineering features of the construction of the dam are sound. I

want these engineers to report back the exact truth, so that you will be satisfied, and if they find there is something wrong, or if they find there is nothing wrong, in the material, the site and height of the dam, and all other features going into the construction is true I want that to be brought out.

Mr. LEATHERWOOD. Does the gentleman claim that it is necessary to pass this resolution?

Mr. ARENTZ. Yes; it is the thing to do.

Mr. LEATHERWOOD. Who is to appoint the commission?

Mr. ARENTZ. The Secretary of the Interior will pick out well-known engineers from all over the United States—men of national reputation—and tell them to go down to the Colorado River and investigate; tell the men to go into the office of the Reclamation Service, study the maps and the details and everything.

Mr. LEATHERWOOD, I regret, Mr. Speaker, to find myself in doubt as to this resolution. Only a few days ago I took up the question with the Secretary of the Interior as the result of a bill almost exactly the same in its provisions as the resolution before us, being called up in the Committee on Irrigation and Reclamation. I wrote the Secretary of the Interior at that time and asked him if it was his purpose if such a bill or resolution was passed to investigate and have further engineering work done on Boulder Dam. In his reply he stated that it had no connection whatever with Boulder Dam. Therefore I am constrained to believe that the gentleman from Nevada must be laboring under a serious mistake, and I object.

Mr. SMITH. Mr. Speaker, I move that the rules be suspended and pass Senate Joint Resolution 164, to appoint a board of engineers to examine and report upon the dam to be constructed under H. R. 5773, the Boulder Dam bill.

The SPEAKER. The gentleman from Idaho moves to suspend the rules and pass Senate Joint Resolution 164. Is a second demanded?

Mr. LEATHERWOOD. I demand a second.

Mr. DOUGLAS of Arizona. I demand a second.

The SPEAKER. The Chair thinks that in view of the fact that the gentleman from Arizona [Mr. DOUGLAS] led the opposition when the bill passed the House that he should be recognized. He is a member of the committee and also a member of the minority.

Mr. DOUGLAS of Arizona. Mr. Speaker, I will yield in favor of the gentleman from Utah.

Mr. LEATHERWOOD. Then, Mr. Speaker, I demand a second.

Mr. SMITH. I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Idaho?

There was no objection.

The SPEAKER. The gentleman from Idaho is entitled to 20 minutes, and the gentleman from Utah to 20 minutes.

Mr. SMITH. Mr. Speaker, this resolution is almost identical with the provision which was incorporated in the Boulder Dam bill when it passed the House. The only difference being special reference is made to the Boulder Dam project. The gentleman from Utah is correct in his statement that a somewhat similar bill is pending before the Committee on Irrigation and Reclamation, but that bill was general in its provisions.

This resolution is supported by the proponents as well as the opponents of this legislation in the Senate. It was offered by Senator PITTMAN, of Nevada, and was unanimously adopted with very little debate. I, as chairman of the Committee on Irrigation and Reclamation, have been requested by those who are opposing as well as those who are supporting the Boulder Dam legislation to bring the resolution up this afternoon, so that the engineers could be appointed and an investigation made during the summer months. As has been stated by the gentleman from Nevada, this action is intended to meet the objections which have been raised to the engineering feasibility of this great enterprise. It is important, in my opinion, that the legislation should be enacted at once.

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. SMITH. Yes.

Mr. CRAMTON. I have read the resolution as it appears in the RECORD, and it seems to me to be word for word the same thing as was embodied in the amendment to the Boulder Dam bill, when it recently passed, offered on the floor of the House by the gentleman from California [Mr. SWING], including also the amendment to that amendment which I offered, and also the amendment to that amendment with reference to the approval of the President and his sanction, which was offered by the gentleman from Virginia [Mr. MOORE]. In other words, every syllable of this was approved by the House in the passage of the bill.

Mr. SMITH. With the exception that the resolution contains a provision with reference to the legislation embodied in H. R. 5773.

Mr. CRAMTON. Certainly, a reference to it.

Mr. KINDRED. And this is intended to safeguard in a double way, so that all the conditions there would be favorable and proper.

Mr. SMITH. Absolutely so. It is important to have this investigation made and report submitted by December next.

Mr. DENISON. The resolution provides that the engineers are to be selected by the Secretary of the Interior?

Mr. SMITH. Yes; with the approval of the President.

Mr. BACON. I am very glad of that. I reserve the remainder of my time.

Mr. LEATHERWOOD. Mr. Speaker and Members of the House, I am not one of those who would in any way put any obstacle in the way of passing legislation to safeguard life and property. I have asked for a second at this particular time simply to challenge the attention of the House to what has been contended all along by the opponents of this bill. Ever since the Weymouth report came out, one volume of which was suppressed, and access to which we were only recently able to get, it has been contended that nothing remained to be done so far as the engineering features of the Boulder Dam were concerned and with respect to an economic survey. The opponents of the bill have at all times claimed that there was practically no engineering foundation for it; that we were simply groping in the dark. I have claimed the floor to again call attention to the fact that at last the chairman of my committee and the proponents of this bill admit what we have contended all along, that there is nothing upon which to base the estimate as to the cost of this great dam. I am not opposed to doing anything that may be necessary to protect the people and the property below this proposed great dam. I again call attention to the fact that the Secretary of the Interior has denied that he needs this legislation. We have already incorporated it in the bill which was passed here last week. If, however, it is deemed necessary to protect the life and property of any people down there in the valley below the dam, I am the last man to put a straw in its way. I again call attention to the fact that now it is admitted that what has been claimed so strenuously all during the campaign for this bill was erroneous and was not based upon facts.

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. LEATHERWOOD. Yes.

Mr. CRAMTON. Instead of the action now proposed admitting any such thing, instead of its admitting any doubt as to the soundness of the plans on which they are now proceeding, on the contrary, it demonstrates their confidence in those plans and their willingness to have them submitted to the scrutiny of a new and independent board of engineers. [Applause.]

Mr. LEATHERWOOD. Oh, yes! Mr. Speaker, I recognize that the gentleman from Michigan [Mr. CRAMTON] is the great guardian of the West; and that he and he alone is able to speak the last word on anything that affects this great work. The only trouble with the gentleman is that he has not sat in on the hearings and heard the declarations about which I have been talking. Had the gentleman heard the claims made by the proponents of this bill, he would not have had the temerity to get up here and make such a statement. Under different circumstances I might agree with the gentleman from Michigan [Mr. CRAMTON], but I again say that this bill has never been based upon facts, and now I hope you will pass this resolution so that we may get some facts upon which to proceed. [Applause.]

Mr. DOUGLAS of Arizona. Mr. Speaker, will the gentleman yield?

Mr. LEATHERWOOD. Yes.

Mr. DOUGLAS of Arizona. Would it not be wise to ask unanimous consent that the resolution be amended to provide that the President shall make the appointment?

Mr. LEATHERWOOD. The resolution, I understand, provides that the President shall approve the appointments. The appointments are to be made subject to the approval of the President. I have very great confidence in the President. We had one experience with fact finders that were appointed for a certain purpose, that being to ignore the rights of certain of the upper-basin States of the Colorado River Basin. If the President approves these appointments, I have confidence that my State will be protected.

Mr. DOUGLAS of Arizona rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. DOUGLAS of Arizona. To ask unanimous consent that the resolution be amended to provide that the President shall make the appointment.

The SPEAKER. That would not be in order. The question is on suspending the rules and passing the resolution.

The question was taken; and, in the opinion of the Chair, two-thirds having voted in favor thereof, the rules were suspended and the resolution was agreed to.

INTERNATIONAL CONFERENCE FOR SAFETY OF LIFE AT SEA

Mr. TEMPLE. Mr. Speaker, I ask unanimous consent to call up from the Speaker's table Senate Joint Resolution 131.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to call up Senate Joint Resolution 131, which the Clerk will report.

The Clerk read as follows:

Joint resolution (S. J. Res. 131) providing for the participation by the United States in the International Conference for the Revision of the Convention of 1914 for the Safety of Life at Sea

Resolved, etc., That the sum of $100,000, or so much thereof as may be necessary, is hereby authorized to be appropriated for the expenses of participation by the United States in the International Conference for the Revision of the Convention of 1914 for the Safety of Life at Sea, to be held in London, England, in 1929, including travel and subsistence or per diem in lieu of subsistence (notwithstanding the provisions of any other act), compensation of employees, stenographic and other services by contract if deemed necessary, rent of offices, purchase of necessary books and documents, printing and binding, printing of official visiting cards, and such other expenses as may be authorized by the Secretary of State.

The SPEAKER. Is there objection?

Mr. SCHAFER. Mr. Speaker, reserving the right to object, I think in these closing days of Congress when unanimous requests are submitted to the House, Members should rise in their places in the House, so that the rest of the Members will know what legislation is being called up. I shall object to other requests to-day in cases where the Members propounding the requests for unanimous consent walk up in the well to submit their requests.

The SPEAKER. The gentleman from Pennsylvania was on his feet, and I think the Chair made a proper request.

Mr. LAGUARDIA. Reserving the right to object, Mr. Speaker, I objected to this resolution the other day and yesterday, not on the merits, but because I thought the amount sought to be authorized was excessive. At that time the distinguished gentleman stated that he would furnish information respecting the necessity of expending $100,000. The information that he submitted was not at all sufficient to show the necessity of that amount. Now the gentleman from Pennsylvania points out that this is only an authorization, and states that he would submit to the Committee on Appropriations the information he obtains, and the committee will decide what is really necessary. Personally, I do not think you will need more than $25,000, but inasmuch as this is only to send these delegates abroad, there will be no expenditure made until the money is appropriated.

Mr. GARNER of Texas. The gentleman does not expect this appropriation to be made at this Congress?

Mr. LAGUARDIA. No.

The SPEAKER. Is there objection to the gentleman's request?

Mr. GARNER of Texas. Mr. Speaker, reserving the right to object, it is now within a couple of hours of the time when the House will adjourn under the resolution. I want to inquire whether or not by the passage of these bills it is possible to get them to the President for his signature before we adjourn?

The SPEAKER. The Chair thinks it is possible. Is there objection?

There was no objection.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

A similar House resolution was laid on the table.

INTERNATIONAL AERONAUTICAL CONFERENCE

Mr. TEMPLE. Mr. Speaker, I have one more resolution to submit. I ask unanimous consent to call up from the Speaker's table Senate Joint Resolution 161.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to call up from the Speaker's table Senate Joint Resolution 161, which the Clerk will report. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Senate Joint Resolution 161

Joint resolution authorizing the President to invite representatives of foreign governments to attend an international aeronautical conference on civil aeronautics in Washington on December 12, 13, and 14, 1928

Resolved, etc., That the President be, and he is hereby, authorized and requested to invite representatives of foreign governments to attend an international aeronautical conference on civil aeronautics to be held in Washington, D. C., December 12, 13, and 14, 1928.

SEC. 2. That the sum of $24,700, or so much thereof as may be necessary, is hereby authorized to be appropriated for the expenses of such meeting, including salaries in the District of Columbia or elsewhere, rent in the District of Columbia, printing and binding, transportation, subsistence or per diem in lieu of subsistence (notwithstanding the provisions of any other act), contract stenographic reporting services, official cards, and such expenses as may be actually and necessarily incurred by the Government of the United States by reason of such invitation in the observance of proper courtesies.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

STILL FURTHER MESSAGE FROM THE SENATE

A still further message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. 1769) entitled "An act for the relief of the legal representatives of the estate of Haller Nutt, deceased."

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 802. An act to correct the military record of Curtis P. Wise;

H. R. 3221. An act for the relief of Ross F. Collins;

H. R. 3241. An act for the relief of Seymour Buckley;

H. R. 3539. An act for the relief of Frank Murray;

H. R. 4380. An act for the relief of Martha Andrew Virginia Johnson;

H. R. 6432. An act for the relief of James E. Moyer;

H. R. 6669. An act fixing the salary of the Public Printer and the Deputy Public Printer;

H. R. 10073. An act to change the name of Railroad Avenue between Nichols Avenue and Massachusetts Avenue;

H. R. 10166. An act to amend the Foreign Service Buildings act, 1926;

H. R. 11951. An act to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by the acts of March 6, 1920, and February 27, 1926;

H. R. 11981. An act to authorize officers of the Medical Corps to account certain service in computing their rights for retirement, and for other purposes;

H. R. 325. An act repealing existing law requiring the Postmaster General to report action taken on claims of postmasters;

H. R. 1533. An act for the relief of Theodore Herbert;

H. R. 3170. An act for the relief of Franklin B. Morse;

H. R. 3723. An act for the relief of John M. Andrews;

H. R. 3844. An act for the relief of Myra Madry;

H. R. 5944. An act for the relief of Walter D. Lovell;

H. R. 7354. An act to allow the Postmaster General to promote mechanics' helpers to the first grade of special mechanics;

H. R. 8529. An act authorizing the Court of Claims to hear and determine questions of law involved in the alleged erroneous collection of tonnage taxes in 1920 and 1921 on three vessels operated by the Standard Oil Co. of New Jersey, under bareboat charter from a Danzig corporation;

H. R. 8628. An act for the relief of Amos Dahuff;

H. R. 8728. An act to authorize the Postmaster General to give motor-vehicle service employees credit for actual time served on a basis of one year for each 306 days of eight hours served as substitute;

H. R. 9051. An act to amend section 1 of the act of February 22, 1875, entitled "An act regulating fees and costs, and for other purposes";

H. R. 9319. An act for the relief of the Glens Falls Insurance Co., of Glens Falls, N. Y.;

H. R. 9320. An act for the relief of the Home Insurance Co., of New York, N. Y.;

H. R. 9710. An act for the relief of the State of South Carolina;

H. R. 10244. An act to credit the accounts of Richard J. Shand, United States property and disbursing officer, Illinois National Guard;

H. R. 12311. An act to provide for the payment of compensation to William J. Tilson;

H. R. 12605. An act to enable the Postmaster General to purchase and erect community mail boxes on rural routes and to rent compartments of such boxes to patrons of rural delivery;

H. R. 10885. An act to amend sections 23 and 24 of the general leasing act approved February 25, 1920 (41 Stat. L. 437);

H. R. 13621. An act to authorize preparation and publication of supplements to the Code of Laws of the United States with perfecting amendments, printing of bills to codify the laws relating to the District of Columbia, and of such code and of supplements thereto, and for distribution;

H. R. 5894. An act for the relief of the State Bank & Trust Co. of Fayetteville, Tenn.;

H. R. 7236. An act for the relief of James M. Long;

H. R. 11859. An act for the relief of B. C. Miller;

H. R. 12951. An act providing for the purchase of 640 acres of land, more or less, immediately adjoining Camp Clark, at Nevada, Mo., and authorizing an appropriation therefor;

H. R. 13406. An act to authorize the city of Fort Thomas, Ky., to widen, improve, reconstruct, and resurface Fort Thomas Avenue and to assess the cost thereof against the United States according to front feet of military reservation abutting thereon, and authorizing an appropriation therefor;

H. R. 13778. An act authorizing Alex Gonzales, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Rio Grande near the town of Ysleta, Tex.;

H. R. 10435. An act providing for the extension of the time limitations under which patents were issued in the case of persons who served in the military or naval forces of the United States during the World War;

H. R. 11758. An act authorizing the Secretary of War to grant a right of way for a levee through Chalmette National Cemetery;

H. R. 12280. An act for the relief of Lula Lewis;

H. R. 12354. An act to grant to the city of Leominster, Mass., an easement over certain Government property;

H. R. 12938. An act for the relief of the State of Ohio;

H. R. 13447. An act authorizing and directing the Secretary of Agriculture to establish and maintain a dairy and livestock experiment and demonstration station for the South at or near Lewisburg, Tenn.;

H. J. Res. 243. Joint resolution to provide for the striking of a medal commemorative of the achievements of Thomas A. Edison in illuminating the path of progress through the development and application of inventions that have revolutionized civilization in the last century;

H. J. Res. 307. Joint resolution to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River;

H. R. 13182. An act authorizing the Secretary of the Navy, in his discretion, to deliver to the custody of the State of Alabama the silver service presented to the United States for the battleship *Alabama;*

H. R. 13048. An act for the relief of James Aloysius Manley;

H. R. 13318. An act authorizing the Val Verde County Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near Langtry, Tex.;

H. R. 13399. An act authorizing the Baltimore Gas Engineering Corporation, a Maryland corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near Dunbar, W. Va.;

H. R. 13644. An act authorizing the Secretary of Commerce to sell at private sale a portion of the Pointe Aux Herbes Lighthouse Reservation, La.; and

H. R. 13777. An act authorizing the State of Louisiana and the State of Texas to construct, maintain, and operate a free highway bridge across the Sabine River at or near Burr Ferry, La.

The message also announced that the Senate concurred in the resolution (H. Con. Res. 43) establishing a commission to be known as the United States Yorktown Sesquicentennial Commission.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which concurrence of the House was requested:

S. 4514. An act to authorize the Secretary of War to purchase certain property and real estate, to protect the interests of the United States, conveyed by the Charleston Industrial Corporation, of Charleston, W. Va., in trust to secure the payment of certain indebtedness due to the United States;

S. 2069. An act to extend the provisions of section 1814 of the Revised Statutes to the Territories of Hawaii and Alaska;

S. 4179. An act to amend the corrupt practices act by extending the same to candidates for nomination and election to the offices of Representative and Senator in the Congress of the United States, and for other purposes;

S. 4588. An act for the relief of Gustave Hoffman;

S. 3936. An act to regulate the practice of the healing art to protect the public health in the District of Columbia;

S. 1314. An act to authorize the Secretary of War to secure for the United States title to certain private lands contiguous to and within the Militia Target Range Reservation, State of Utah;

S. 4566. An act authorizing the New York Development Association (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the St. Lawrence River near Alexandria Bay, N. Y.;

S. J. Res. 132. Joint resolution to create a commission to secure plans and designs for and to erect a memorial building for the National Memorial Association (Inc.), in the city of Washington, as a tribute to the negro's contribution to the achievements of America; and

S. J. Res. 166. Joint resolution to pay certain employees of the Senate and committees a sum equal to one month's compensation of each thereof.

The message further announced that the Senate had passed the following resolution:

Senate Resolution 259

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. THOS. S. BUTLER, late a Representative from the State of Pennsylvania.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect the Senate stand in recess until 1.30 o'clock p. m.

The message also announced that the Senate had passed the following resolution:

Senate Resolution 260

Resolved, That a committee of two Senators be appointed by the Presiding Officer of the Senate to join a similar committee appointed by the House of Representatives to wait upon the President of the United States and inform him that the two Houses, having completed the business of the present session, are ready to adjourn, unless the President has some other communication to make to them.

The message also announced that the Vice President had appointed Mr. SWANSON, Mr. REED of Pennsylvania, Mr. EDGE, Mr. BINGHAM and Mr. WAGNER members on the part of the Senate, of the United States Yorktown Sesquicentennial Commission, pursuant to House Concurrent Resolution No. 43.

The message further announced that the Vice President appointed Mr. WATSON, Mr. FESS, and Mr. MCKELLAR members on the part of the Senate, of the George Rogers Clark Sesquicentennial Commission, pursuant to Senate Joint Resolution No. 23.

CODE OF LAWS OF THE UNITED STATES OF AMERICA

Mr. ROY G. FITZGERALD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 13622) to amend and supplement the Code of Laws of the United States of America. It corrects the errors in the Code that have been discovered up to date. I ask that the House concur in the Senate amendment, which simply enlarges the phrase "prima facie evidence" in the law, and none of the present law is repealed.

The SPEAKER. The Clerk will report the bill and the Senate amendment.

The Clerk read as follows:

A bill (H. R. 13622) to amend and supplement the Code of Laws of the United States of America.

The Senate amendment was read.

The Senate amendment was agreed to.

THE REVENUE BILL

Mr. CHINDBLOM. Mr. Speaker, I ask unanimous consent to proceed for two minutes.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. CHINDBLOM. Mr. Speaker, at 8 o'clock this morning the President, by his signature, gave Executive approval to H. R. 1, the revenue act of 1928. The passage of this law marks the fourth great legislative participation in the reduction of Federal taxes since the World War. This tax reduction, together with the economic rehabilitation and stabilization of the United States since the Great War, is the greatest financial

achievement of any nation in all history. The act which goes into effect to-day, through its schedules and rates of taxation, reduces the taxes to be collected from the people for the Federal Government $222,450,000. It is the fourth great Federal tax reduction since the war. The first one, embodied in the revenue act of 1921, reduced such taxes by approximately $663,000,000 for the fiscal year 1923, as compared with the collections which would have been made under the prior law. The second similar act, the revenue act of 1924, granted like reductions amounting to $519,000,000. The revenue act of 1926 added similar relief to the people amounting to $422,000,000, and the present act, which was passed by Congress on May 26, 1928, has added over $222,000,000 to these reductions. Each of these laws in turn reduced taxes by the amount stated as compared with the amount which would have been collected under the act which it superseded. The total of these reductions is an amount in excess of $1,826,000,000. All of these tax reduction laws were passed by Republican Congresses during the Harding-Coolidge administrations, in the years 1921 to 1928. They were made possible by the efficiency and economy of the administration of the Government by the executive department and by the careful, consistent, and persistent reduction of appropriations by the several Congresses, under the leadership in the House of Representatives, which initiates appropriations, of the two chairmen of the House Committee on Appropriations, who served during that period, first, the Hon. James W. Good, of Iowa, and thereafter the late Hon. Martin B. Madden, of Illinois, whose service as chairman was unbroken from July 21, 1921, to his lamented death on April 27, 1928.

In the work of both the executive and legislative branches the most effective agency in the achievement of these great results was the Bureau of the Budget, which was established through a law passed by the Republican majority in the Sixty-seventh Congress, and went into effect on June 10, 1921. With the establishment of this bureau came also the centralization of the jurisdiction of appropriations, in the House of Representatives, in the single Committee on Appropriations instead of the distribution of that jurisdiction among a number of committees which previously had recommended expenditures independently of each other and without reference to any unified attempt at striking a balance between the income and outlay of the Federal Government. This wise establishment of legislative machinery by the Republican Congress has borne fruits in enormous savings to the taxpayers, represented, as stated, by tax reductions amounting to over one and three-quarters billion dollars in the brief space of seven years. Hand in hand with these reductions of expenditures and appropriations has gone the unprecedented efficient handling of the refunding and other fiscal operations of the Government under the masterful guidance of the distinguished Secretary of the Treasury, the Hon. Andrew W. Mellon. [Applause.]

REDUCTION OF TAXES

The revenue act of 1921 superseded the revenue act of 1918. While the latter act may be said to have been more or less distinctly a war measure, it was not passed by Congress and approved by the President until February 24, 1919, more than three months after the armistice. It was retroactive, however, as of January 1, 1918, in practically all of its provisions with reference to the computation and collection of taxes. This act continued in effect throughout the years 1919 and 1920, during which the Democratic administration under President Woodrow Wilson remained in power. It was not until the Republicans obtained control of the executive as well as the legislative branches of the Government in 1921 that they were able to give relief to the American people from the burdens of the war taxation. These burdens have been successively lightened by the four revenue acts passed by Republican Congresses in the years 1921 to 1928. Not only is the amount of these reductions, which is more than one and three-quarters billion dollars, most extraordinary, but the character and extent of the changes made in rates and schedules are equally notable.

The income tax was, in the act of 1918, and is yet in the act of 1928, the main source of Federal income. An analysis of the differences between these two acts as to income-tax rates and schedules shows the nature and extent of the reductions which during the decade in question have been effected in this tax.

COMPARISON OF INCOME-TAX RATES

REVENUE ACT OF 1918 AND REVENUE ACT OF 1928

Part I.—Individuals

The revenue act of 1918 imposed a normal tax of 6 per cent on the first $4,000 of the net income of individuals in excess of the personal exemptions and credits and 12 per cent on the remainder of such income. In addition to the normal tax there was imposed a surtax beginning with 1 per cent on net incomes in excess of $5,000, and continuing at constantly increasing rates until amounts of net income in excess of $1,000,000 were subjected to a surtax of 65 per cent. No earned income deduction was allowed.

The revenue act of 1928 imposes a normal tax of 1½ per cent on the first $4,000 of the net income of individuals in excess of the personal exemptions and credits, 3 per cent on the second $4,000 of such income, and 5 per cent on the remainder of such income. In addition to the normal tax there is imposed a surtax beginning with 1 per cent on net incomes in excess of $10,000 and continuing at constantly increasing rates until amounts of net income in excess of $100,000 are subjected to a surtax of 20 per cent. In addition to personal exemptions and credits there is also allowed a 25 per cent tax credit in the case of earned incomes amounting to $30,000 or less.

The above can be shown more concisely and accurately by the following tables:

A. *Personal exemptions*

	1918	1928
Single person	$1,000	$1,500
Married person	2,000	3,500
Additional exemption for each dependent	200	400

B. *Normal rates*

	1918	1928
	Per cent	*Per cent*
Rate on first $4,000 of net income (in excess of A)	6	1½
Rate on second $4,000 of net income (in excess of A)	12	3
Rate on amount of net income over $8,000 (in excess of A)	12	5

C. *Surtax rates*

Net income class	1918	1928
	Per cent	*Per cent*
$5,000 to $6,000	1	
$6,000 to $8,000	2	
$8,000 to $10,000	3	
$10,000 to $12,000	4	1
$12,000 to $14,000	5	1
$14,000 to $16,000	6	2
$16,000 to $18,000	7	3
$18,000 to $20,000	8	4
$20,000 to $22,000	9	5
$22,000 to $24,000	10	6
$24,000 to $26,000	11	7
$26,000 to $28,000	12	7
$28,000 to $30,000	13	8
$30,000 to $32,000	14	8
$32,000 to $34,000	15	9
$34,000 to $36,000	16	9
$36,000 to $38,000	17	10
$38,000 to $40,000	18	10
$40,000 to $42,000	19	11
$42,000 to $44,000	20	11
$44,000 to $46,000	21	12
$46,000 to $48,000	22	12
$48,000 to $50,000	23	13
$50,000 to $52,000	24	13
$52,000 to $54,000	25	14
$54,000 to $56,000	26	14
$56,000 to $58,000	27	15
$58,000 to $60,000	28	15
$60,000 to $62,000	29	16
$62,000 to $64,000	30	16
$64,000 to $66,000	31	17
$66,000 to $68,000	32	17
$68,000 to $70,000	33	17
$70,000 to $72,000	34	18
$72,000 to $74,000	35	18
$74,000 to $76,000	36	18
$76,000 to $78,000	37	18
$78,000 to $80,000	38	18
$80,000 to $82,000	39	19
$82,000 to $84,000	40	19
$84,000 to $86,000	41	19
$86,000 to $88,000	42	19
$88,000 to $90,000	43	19
$90,000 to $92,000	44	19
$92,000 to $94,000	45	19
$94,000 to $96,000	46	19
$96,000 to $98,000	47	19
$98,000 to $100,000	48	19
$100,000 to $150,000	52	20
$150,000 to $200,000	56	20
$200,000 to $300,000	60	20
$300,000 to $500,000	63	20
$500,000 to $1,000,000	64	20
$1,000,000 up	65	20

D. *Earned income credit*

Up to $30,000:

1918: None.

1928: Twenty-five per cent of tax.

E. *Capital gains*

Limit to tax:
1918: None.
1928: Twelve and one-half per cent of profit.

F. *Tax yield*

Year:	Total tax collections from individuals
1918	$1,127,721,835
1919	1,269,630,104
1920	1,075,053,686
1921	719,387,106
1922	861,057,308
1923	661,666,133
1924	704,265,390
1925	734,555,183
1926	727,479,429
1927 (estimated)	732,000,000
1928 (estimated)	728,000,000

In order to visualize the results of the very substantial reductions in tax between 1918 and 1928 to the individual there is set forth below the total tax paid by a married man with no dependents with the specified net income under the 1918 and 1928 acts, assuming that the maximum amount of income is earned:

Net income	Total tax	
	1918 act	1928 act
$3,500	$90.00	None.
$5,000	180.00	$16.88
$7,000	390.00	39.38
$10,000	830.00	101.25
$20,000	2,630.00	618.75
$30,000	4,930.00	1,488.75
$50,000	11,030.00	4,588.75
$80,000	23,930.00	10,968.75
$100,000	35,030.00	15,768.75
$1,000,000	703,030.00	240,768.75

Part II.—Corporations

The revenue act of 1918 imposed a tax of 12 per cent upon the net income of all corporations. In the case of domestic corporations an arbitrary exemption of $2,000 of the net income was allowed. In addition to the above tax there was imposed an excess-profits tax upon all corporations whose net income was more than the excess-profits credit of $3,000 plus an amount equal to 8 per cent of the invested capital of the company. This excess-profits tax was at the rate of 30 per cent on the amount of the net income in excess of the excess-profits credit and not in excess of 20 per cent of the invested capital, and at the rate of 65 per cent on the amount of the net income in excess of 20 per cent of the invested capital. In addition to the excess-profits tax there was also imposed a war-profits tax which in certain cases levied a tax as high as 80 per cent on certain portions of the net income of the corporation.

The revenue act of 1928 imposes a tax of 12 per cent upon the net income of all corporations. In the case of corporations with net incomes of $25,000 or less an arbitrary exemption of $3,000 is allowed. There is no excess-profits or war-profits tax under the 1928 act.

The above can be shown more concisely and accurately by the following tabulations:

A. *Exemptions*

	1918	1928
To corporations with incomes of not more than $25,000	$2,000	$3,000
To corporations with incomes of more than $25,000	2,000	None.

B. *Normal corporation rates*

Standard corporation rate:	Per cent
1918	12
1928	12

C. *Excess-profits tax rates*

	1918	1928
1. On corporations earning less than 8 per cent of their invested capital plus $3,000	*Per cent* None.	*Per cent* None.
2. On corporations earning more than 8 per cent and less than 20 per cent of their invested capital	30	0
3. On balance of earnings over 20 per cent of the invested capital	65	0

D. *War-profits tax*

	1918	1928
In certain cases	*Per cent* 80	*Per cent* None.

E. *Total tax yield—Corporations*

Year	Total tax	Tax yield per dollar of net income
		Cents
1918	$3,158,764,422	38
1919	2,175,341,578	23
1920	1,625,234,643	20½
1921	701,575,432	16
1922	783,776,268	11¼
1923	937,106,798	11¼
1924	881,549,546	11½
1925	1,170,331,206	12¼
1926 (estimated)	1,250,000,000	12¼
1927 (estimated)	1,250,000,000	12¼
1928 (estimated)	1,127,000,000	11

In this connection it should be noted that the tax yield is always less than the tax rate, due to the exemptions to which the rate does not apply.

It is obvious from the above that since the year 1918 when the excess-profits tax was abolished there has been no decrease in the corporation tax until the current year (1928). In fact, from 1922 to 1927, inclusive, there was a slight increase in the corporation tax yield, owing to the fact that the elimination of the capital stock tax brought a less decrease in revenue than was the increase in revenue from the higher income tax rates, imposed in lieu of the capital-stock tax. The revenue act of 1928 therefore gives quite belated relief to the corporations of the country.

All other taxes, aside from income taxes, have also been correspondingly reduced since 1921.

In the matter of the estate tax, the 1918 act fixed a maximum of 25 per cent of the amount by which the net estate exceeded $10,000,000, while under the revenue act of 1926, which was not repealed by the revenue act of 1928, the maximum rate is reduced from 25 per cent to 20 per cent on a net estate exceeding $10,000,000. In addition, of the estate tax now collected by the Federal Government a credit is allowed on account of similar taxes paid to the States to the extent of 80 per cent of the Federal tax. Also, the exemption has been increased from $50,000 to $100,000.

The transportation tax, imposed by the revenue act of 1918, has been entirely repealed, as has also the tax on domestic insurance policies of all kinds.

The tax on distilled spirits and still wines has been restored to the pre-war basis.

The tax on cereal beverages, which under the act of 1918 was 15 per cent of the sale price, has been entirely removed, as has also the vexatious tax, under the revenue act of 1918, of 1 cent for each 10 cents collected upon the sales of all kinds of soft drinks.

The tax on cigars received a substantial reduction in the revenue act of 1926.

There was no exemption from the 10 per cent admissions tax under the revenue act of 1918. Under the revenue act of 1928 this tax is collected only where the ticket price exceeds $3.

The sales tax on automobiles and parts and accessories thereof has been totally eliminated, as have also the sales taxes on musical instruments, sporting goods, chewing gum, cameras, photographic films and plates, candies, hunting knives, portable electric fans, thermos bottles, pipes and other smokers' articles, automatic slot vending machines, liveries and livery boots, hunting and shooting garments, fur manufactures, toilet soaps and powders, motion picture films, art works, carpets and rugs, all kinds of wearing apparel, all kinds of jewelry, perfumes and similar other toilet articles, and various brands of medicines.

The capital stock tax on corporations has been repealed, as has also the tax on brokers and proprietors of theaters, museums, and circuses and other forms of public exhibitions, the tax on proprietors of billiard rooms, shooting galleries, and riding academies, and on persons operating and renting passenger automobiles for hire.

Other taxes that have been abolished are those on manufacturers of tobacco, cigars, and cigarettes, based on the amount of sales, and the stamp taxes on drafts, checks, notes, conveyances, proxies, powers of attorney, and parcel-post packages.

In short, practically all of the obnoxious "nuisance" taxes imposed by the revenue act of 1918 have been removed and the consequent hinderances to business and enterprise obliterated. Such have been the beneficent results of Republican revenue legislation.

CURTAILMENT OF EXPENDITURES

Hand in hand with these tax reductions has gone the constant curtailment of expenditures under direction of the Bureau of the Budget and by the action of the Congress. When the first

Republican Congress subsequent to President Wilson's election took up the matter of appropriations in May, 1919, it reduced the appropriations in eight supply bills, which had passed the House, but fortunately had failed of passage in the Senate during the Sixty-fifth Congress, from $3,768,000,000 to $2,828,000,000, a decrease of $940,000,000. The estimates of the Democratic administration for the fiscal years 1921 and 1922 were reduced by Congress $2,950,000,000. With the advent of the Harding administration came the creation of the Bureau of the Budget, and since then, with the vigorous cooperation of the Congress which uniformly has reduced even the Budget estimates, appropriations have been kept at the lowest possible figures necessary for the administration of the Government, with the result that large surpluses have enriched the Federal Treasury, running from a minimum in 1921 of $86,723,000 to a maximum in 1927 of $635,810,000. The total of the surpluses in the Treasury for the years 1921 to 1928 has been in excess of $2,800,000,000. With the reduction in expenditures and appropriations has also come the reduction of the public debt which at its peak on August 31, 1919, totaled $26,600,000,000, and on July 1, 1928, stood at $17,755,711,828, a decrease of $8,844,288,172.

REFUNDING OF INDEBTEDNESS

Not the least important of the achievements of the Republican administration of national affairs during the last eight years has been the refunding of the national debt. Large short-time issues of securities have been replaced at constantly reduced rates of interest. On March 4, 1921, when President Harding was inaugurated, seven and one-half billion dollars of short-term obligations were maturing within two and one-half years and another three and one-half billion dollars, including the third Liberty loan, were due in September, 1928. During the period from March, 1921, until September, 1928, over $11,000,000,000 of national securities bearing high rates of interest will have been retired or refunded into obligations carrying lower rates of interest. In 1921 the average interest rate on the public debt was 4.29 per cent, while on January 1, 1928, that rate was 3.88 per cent. Upon a principal of $18,000,000,000, the approximate total of our national debt, the saving in interest by these refunding processes alone amount to more than $73,000,000. In addition, by wise negotiation, settlements have been secured with our principal foreign debtors, so that returns are now coming to the Federal Treasury out of payments from that source. The total of the debts so refunded is $11,522,354,000.

THE FUTURE

The American people have great energy, industry, and initiative. They deserve the success which attends their efforts individually and collectively. Beyond question our greatest national asset is the high character, clean living, and inherent honesty of our citizens. But other nations have like qualities. The collective life of a people gives the opportunity for and encouragement to individual effort. We are mighty in natural resources, capable in productive efficiency, enviable in geographic location and climatic conditions, but all of these prerequisites to success would not insure our welfare, if our Government were not properly administered. Discontent and rebellion are often most rife among those who are accustomed to the greatest advantages. Our people must be prosperous to be happy. They must be well clothed, well fed, and well sheltered to remain serene and satisfied. For these reasons an economic and efficient administration of our Government is of paramount importance. That result has been attained by the administration which has been given to the Nation by President Coolidge and his associates, supported by the Republican Congress. The people will not repudiate these achievements.

EXTENSION OF REMARKS

Mr. JOHNSON of South Dakota. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentlemen will state it.

Mr. JOHNSON of South Dakota. If a Member of the House has secured permission to extend his remarks on a specific subject this would be an added permission on some other subject?

The SPEAKER. Yes.

Mr. TILSON. This gives leave to extend as many different speeches as a Member may wish to extend if those speeches cover only his own remarks.

ALLOWANCES IN LIEU OF TRANSPORTATION IN KIND

Mr. SPEAKS. Mr. Speaker, I ask unanimous consent, with the approval of the Acting Chairman of the Committee on Military Affairs, for the present consideration of Senate bill 1825, to amend section 12 of the act approved June 10, 1922, entitled "An act to readjust the pay and allowances of commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended by the act of June 1, 1926 (44 Stat. L. 680), so as to authorize an allowance of 3 cents per mile, in lieu of transportation in kind, for persons using privately owned conveyances while traveling under competent orders.

The SPEAKER. The gentleman from Ohio asks unanimous consent for the present consideration of Senate bill 1825, which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GARNER of Texas. Mr. Speaker, I regret that I do not feel justified in permitting Senate amendments of this kind to be agreed to unless the Member has had an opportunity to submit them to the committee. The Speaker made such a ruling some time ago and I think it was a wise ruling, and we have adhered to it ever since. Where it is a very minor amendment, where the House has passed the bill, and when the only thing done by the Senate amendment is to correct a word, or something of that kind, naturally there would be no objection, but it seems to me that a bill of this importance which changes the whole basis of pay, should be considered by the committee.

Mr. SPEAKS. Will the gentleman permit a statement?

Mr. GARNER of Texas. Yes.

Mr. SPEAKS. All this bill seeks to accomplish is this: For instance, an officer is ordered to proceed from Washington to New York; he prefers to use his own automobile if the Government will allow him 3 cents a mile for gasoline, instead of going to the quartermaster, receiving railroad transportation and Pullman fare in addition. It means a saving of money to the Government.

Mr. FROTHINGHAM. In addition, might I say that this is not a Senate amendment, but it is a Senate bill.

Mr. GARNER of Texas. I know it is a Senate bill, and the best information I can get on this side of the House and on that side of the House is that the bill should be passed. I do not feel like taking the responsibility of making an objection to a matter I know absolutely nothing about, but I do say that in passing Senate bills an opportunity should be given to the committee to consider them before consent is asked to take them up in the House. It seems to me that a Senate bill which changes the basis of pay of military officers is of considerable importance.

Mr. SPEAKS. There is absolutely no change of pay rates embodied in the bill.

Mr. GARRETT of Texas. If the gentleman will permit, I will say to my colleague from Texas that the purpose of this bill is to allow an officer 3 cents a mile for gasoline when he uses his own automobile instead of giving him railroad fare. It has developed in recent years that many officers travel hundreds of miles in their own automobiles; they have to buy their own gas but they prefer to travel that way rather than to go on a train. So the purpose of this bill is to give them an opportunity to use their own cars if they want to and to collect 3 cents a mile instead of riding on the train.

Mr. McSWAIN. Will the gentleman from Ohio yield?

Mr. SPEAKS. Yes.

Mr. McSWAIN. The only point in the mind of the gentleman from Texas is whether or not the committee has ever considered this legislation and reported it. I will say to the gentleman that the committee has considered it and there is a bill on the calendar reported favorably by the committee.

Mr. GARNER of Texas. That is all I wanted to know, and this bill is identical with the House bill?

Mr. McSWAIN. Yes.

The SPEAKER. The Chair will state that he agrees entirely with the principles suggested by the gentleman from Texas, and he is not recognizing to-day, nor has he been for some time, any Member to take up a Senate bill or a House bill with Senate amendments unless the Chair is assured that the Member has submitted it to his committee and has at least the unofficial approval of the committee. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 12 of the joint service pay act of June 10, 1922, as amended, be further amended by inserting between the first and second paragraphs the following:

"Individuals belonging to any of the services mentioned in the title of this act, including the National Guard and the reserves of such services, traveling under competent orders which entitle them to transportation or transportation and subsistence as distinguished from mileage, who, under regulations prescribed by the head of the department concerned, travel by privately owned conveyance shall be entitled, in lieu of transportation by the shortest usually traveled route now

authorized by law to be furnished in kind, to a money allowance at the rate of 3 cents per mile for the same distance: *Provided,* That this provision shall not apply to any person entitled to traveling expenses under the 'subsistence expense act of 1926.'"

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

JUDGES OF THE TERRITORIES AND INSULAR POSSESSIONS OF THE UNITED STATES

Mr. DYER. Mr. Speaker, I call up the bill (H. R. 11463) to fix the salaries of certain judges of the Territories and insular possessions of the United States, with Senate amendments, and move to concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments.

Mr. DYER. Mr. Speaker, the bill as passed by the Senate is just the same as passed by the House, with one exception, and that is to increase the pay of the circuit judges for the Territory of Hawaii. The bill which the Committee on the Judiciary reported to the House included that, but it was eliminated upon the floor of the House under a unanimous consent agreement.

By authority of the committee, I move to concur in the Senate amendments.

The Senate amendments were agreed to.

CLAIMS AGAINST THE DISTRICT OF COLUMBIA

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 3581) authorizing the Commissioners of the District of Columbia to settle claims and suits against the District of Columbia.

The Clerk read the title of the bill.

Mr. GILBERT. Mr. Speaker, reserving the right to object, I understood the gentleman was going to bring up the House bill. I am opposed to the Senate bill. The wording is different and the effect is very different.

Mr. ZIHLMAN. I will say to the gentleman that this bill was on the calendar. It comes from my committee and is a Senate bill.

Mr. GILBERT. I understand; but I am opposed to the Senate bill. Did we not have a House bill?

Mr. ZIHLMAN. We have a House bill on the calendar, and we also have a Senate bill.

Mr. GILBERT. The Senate bill is different and the people who are advocating the House bill are opposed to the Senate bill.

Mr. ZIHLMAN. I did not so understand it, I will say to the gentleman.

Mr. GILBERT. I will have to object, Mr. Speaker.

NATIONAL CAPITAL PARK AND PLANNING COMMISSION

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 4126) authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights to reserved and limited rights in land and authorzing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

Mr. COLLINS. Mr. Speaker, I object.

THE RIGHT OF SELF-GOVERNMENT

Mr. CROSSER. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. CROSSER. Mr. Speaker and Members of the House, that which men practice in life, rather than what they preach, constitutes the gauge by which their worth is generally measured. Hence the common saying, "Practice what you preach." However much men may talk about honesty if they act dishonestly then others will shun them. No matter how much men claim to love justice, if because they are powerful, they oppress others, then will they be hated.

As it is with individuals, so it is with nations, for nations are merely groups of individuals. If a nation advocates justice in the conduct of nations toward each other and then itself practices injustice toward weaker nations, such nation will become despised. If a nation proclaims the power of reason and the supremacy of mind in the adjustment of disputes between nations, but in practice strives to have the most powerful material instrument of force with which to compel submission to its demands, then such nation will be hated by the rest of the world. So, too, if a nation proclaims the righteousness of the principle that all nations are free and independent and have the right to govern themselves without interference from other nations and then, after declaring this, seeks by force to dictate the laws for the government of smaller nations, such nation will be distrusted by all other nations and will be despised by lovers of justice everywhere.

Mr. Speaker, the declaration made to the world on July 4, 1776, by the people of America, is the greatest statement in the history of this country. On that day was issued to the world the Declaration of Independence of the United States of America. That immortal document contains the following most important statement:

> Governments are instituted among men, deriving their just powers from the consent of the governed.

That principle is sound. Upon obedience to that principle depends the life and welfare of the American Nation. That principle was, by the signers of our Declaration of Independence, applied to all the peoples of the earth and we must respect it as a right of all other nations if we would have it respected as a right of the United States. He who would receive justice from others must be ever willing to do justice to others.

And yet, Mr. Speaker, during recent years I have noted a tendency to disregard this sound and fundamental principle of government. Those intrusted by the American people with the power of government have more and more interfered with the right of the people of other nations to govern themselves.

The people of the Philippine Islands have for almost three decades been pleading to be allowed to govern themselves, but instead of granting that request Congress has recently been urged to take away from them some of the power which is still possessed by the people of the Philippines.

Some years ago United States officials forcibly took charge of the government of the Dominican Republic, and by so doing aroused toward our Government the ill will of the Dominican people. A few years ago our Government assumed control of the Republic of Haiti, and United States officials are still in control.

I might refer to other instances where the United States Government has forcibly interfered in the affairs of other nations, but the cases to which I have referred illustrate sufficiently the fact that the Government in recent years has disregarded the great principle announced by the signers of the Declaration of Independence, expressed in the words:

> Governments are instituted among men, deriving their just powers from the consent of the governed.

The most common excuse given for the use of force by one government for the purpose of dictating policies and laws to another government is that some citizen of the government which uses force against the other has been wrongly denied privileges to which he thinks himself entitled.

Now, Mr. Speaker, one of the principal reasons advanced in support of popular government is that there are very many opinions as to what is right and what is wrong. Popular government allows every citizen to express his opinion, upon the understanding that the opinion supported by the largest number of citizens shall prevail. Certainly no one will claim that the majority of the people of the nations which were invaded approve such invasion. Moreover, when a powerful nation adopts a form of government disliked by other nations which consider themselves as more advanced and intelligent, that dislike is generally shown by words only. Why this difference in methods of showing dislike and opposition? Is it honorable for nations to use force against small nations only when victory is certain?

While we are showing such regard for the rights of those who go to foreign countries to seek their fortunes it might be well to consider also the rights of all the people who are content to live in their own country. Everybody is not only willing but eager to guarantee to every citizen, as fully as possible, every right he has under the laws governing the country. Is it just, however, that the people of a country should be required to pay millions and even billions to send abroad great navies and armies and to sacrifice the lives of their sons in order to enforce what some self-important person, dwelling beyond the limits of his own land, claims to be his rights in another country? It is sometimes assumed that international law upholds such a claim, but Oppenheim on International Law says:

> No citizen abroad has by international law a right to demand protection from his home State.

That statement of law is in accord with reason and justice. When nations recognize and acknowledge the right of other nations to adopt such form of government and laws as they

consider best, we shall have gone a long way toward establishing world peace. When a nation no longer tries to control the government of another country, on the pretext of upholding some fancied and questionable right of one of its citizens living in such country, then it can feel sure of the good will of the people of that country.

When his own Government is, because of its fairness, trusted by the people of other countries, a citizen of this or any other Nation may be sure of friendly treatment when he visits foreign lands.

When the nations of the world cease to strut, when they rid themselves of their foolish conceit and their false sense of superiority, world peace will be assured.

The United States on its part should reaffirm its adherence and sincere devotion to the principle of "government by consent of the governed," which, at its birth as a Nation, it solemnly declared to the world.

If we had always acted according to this principle, we would have avoided very many of the troubles we have had in the West Indies and in Central America. [Applause.]

ROADS

Mr. WARE. Mr. Speaker, I ask unanimous consent to proceed for one minute and to revise and extend my remarks by including some excerpts from statements of the Bureau of Roads and also an editorial from the Courier-Journal on the subject of roads.

The SPEAKER. The gentleman from Kentucky asks unanimous consent to address the House for one minute and to revise and extend his remarks and to include therein some excerpts from reports of the Bureau of Roads and an editorial from a newspaper on the subject of roads. Is there objection.

There was no objection.

Mr. WARE. Mr. Speaker, a great deal has been said during this session of Congress upon the subject of roads and bridges. My State is particularly interested in this subject because of the fact it has on its northern, eastern, and western boundaries 759 miles of navigable streams.

The gentleman from Illinois [Mr. DENISON] has introduced a bill in this Congress which I had hoped would be passed, or at least given some consideration, relative to the regulation of tolls upon bridges.

Public attention is being continually directed to the development of vehicular traffic in this country, and it necessarily follows that the construction and maintenance of roads and bridges throughout the country is a question of vital importance and challenges the vision of those intrusted with making the laws and preserving the interests of the people both in the Federal and State Governments.

From the time of the invention of the automobile a little more than a quarter of a century ago, the automobile industry has grown to be the largest manufacturing industry in America, producing more than 4,000,000 motor vehicles annually of a wholesale value of more than $4,000,000,000. Registration of motor vehicles in this country will probably reach 30,000,000 cars within the next five years. We have now approximately 23,000,000 motor vehicles registered in the United States. A survey of this field of industry arouses keen interest because it controls a large place among the gigantic enterprises of the Nation. It is a fact that from 1921 to 1926 the registration of motor vehicles much more than doubled in number. For the year 1926 motor vehicle taxes approximated $720,000,000, paid by purchasers and users of cars to the Federal, State, and municipal governments of this country, and it is estimated that more than $600,000,000 of this sum was paid to the States and political subdivisions for registration, license fees, gasoline taxes, and personal-property taxes. We may assume that these revenues will continue to increase with the added ownership of cars. With the development of this industry a similar scale of development has been and is going on in the construction of roads and bridges and their maintenance at great cost to the Federal Government and the States of the country.

We have in the United States 3,000,000 miles of roads, not including city streets, and there are 600,000 miles of what are termed "surface" roads. During the year ending June 30, 1927, the Bureau of Public Roads reports that there were completed 8,306.9 miles of the system of Federal-aid highways, bringing the total mileage of roads improved by Federal aid up to 64,209.7 miles. At the end of that year construction was in progress on 10,103 miles, and projects involving the construction of 2,395.6 additional miles had been approved, and with the end of another year we will have approximately 76,708.3 miles of improved Federal-aid roads. The Federal-aid roads selected by the Federal and State authorities for improvement for highway traffic amount at this time to 185,722.2 miles. When compared with the 3,000,000 miles of roads it will be found that they cover the most important highways. Practically all the mileage completed on Federal-aid roads has been done since 1921; that is, with the exception of 7,000 miles. Of course, in addition to the Federal-aid roads the States are making and completing many thousand miles without aid from the Federal Government. The total of the State highways systems selected is about 300,000 miles, 115,000 miles more than the roads selected for Federal aid, which indicates the responsibility of the States in connection with construction and maintenance of roads. During the past few years—from July 1, 1921, to June 30, 1927—the Federal Government has contributed to Federal-aid roads the sum of $544,884,911.72, and when projects now approved are completed within another year it will exceed $675,000,000. During the last year it contributed $81,330,357.82 to Federal-aid roads. The disbursements made by the States on other than Federal-aid roads amounted to $453,000,000, and this does not include the expenditures of counties independent of State control, which it is estimated will equal, if not exceed, that expended by the States. In fact, the expenditures for the construction and maintenance of public highways in the United States on the whole exceed more than $1,000,000,000 annually, and it is estimated by some at as much as one and one-third billion dollars.

With the construction of roads, and as a necessary adjunct to them, bridges have been completed during the year ending June 30, 1927, aggregating 45.9 miles in length on the system of Federal-aid roads. Adding this number of miles to those already completed we have 167.6 miles of Federal-aid bridges in the United States. These are essential to the Federal and State system of highways, and publicly owned bridges, either free or ultimately to be free, should be encouraged.

The Congress has indicated its desire that the Federal-aid system of highways, so far as is possible, shall be free by providing in the Federal highway act of 1921 that—

> All highways constructed or reconstructed under this act shall be free from tolls of all kind.

However, by an act passed by the Sixty-ninth Congress the States are permitted to finance their portion of the cost of Federal aid bridges by the collection of tolls, thus avoiding the necessity of toll bridges owned by private interests on important highways. The States may now avail themselves of this concession on the part of the Federal Government and where necessary the States may erect toll bridges and apply the tolls in payment of the cost thereof, and thus eventually make them free to the public. This in some measure removes the necessity of having privately owned toll bridges. Certainly, whenever it is possible on important highways made at the expense of the people the burden of privately owned toll bridges should be removed.

On this subject the Chief of the Bureau of Roads in his last report says:

> It is to be hoped that the increase in Federal-aid bridge construction evident in the mileage recently completed and under construction will continue, and that to a greater degree the States will resort to this means of reducing the local expense of large bridge structures rather than the distinctly objectionable means of permitting such important structures to be privately financed.
>
> The bridges are an essential part of the Federal-aid system. Congress has given abundant evidence of its intention that this interstate system shall, so far as possible, be free for the use of the citizens of all States by forbidding the collection of tolls on all roads in the construction of which the Government participates and by prohibiting the use of Federal funds for the improvement of roads which constitute the immediate approach to toll bridges.
>
> The act passed at the last session, which permits the financing of the State's portion of the cost of Federal-aid bridges by means of tolls collected by the State or its subdivision, removes the last reasonable excuse for permitting expensive bridges to be built by private initiative.
>
> The large earnings of toll bridges on important highways are made possible by the public improvement of the highways. The very great attractiveness of such bridges to private investors is proof of the high return upon the capital invested. It is common knowledge that the entire cost of many expensive and important structures operated privately has been repaid by the tolls charged in a very few years, leaving the subsequent earnings, less a small amount for maintenance, as clear profit.

The large expenditures of public money to provide the pathway for motor vehicle transportation has created a great demand for the privilege of building bridges by private enterprise, and these utilities constructed by private interests at strategic points in the United States, will reap a harvest for themselves unless regulated and restrained by law in the interest of public welfare. The public roads of the Nation are being

commercialized by the continually increasing number of privately owned bridges, and this exploitation of the people, stimulated by our improvement of the roads, should not be permitted to go on unregulated and unrestrained. It is asserted that many of these bridges levy an exhorbitant tribute on the motoring public, which far exceed what may be considered a reasonable return upon the amount invested. Figures given out by the American Automobile Association state there were 233 toll bridges in operation at the beginning of this year of which 191 were privately owned, and that 29 new toll bridges are under construction and 163 are proposed. Of the 163 proposed 100 will be constructed and operated on a toll basis by privately owned interests. All of the 425 toll bridges in operation, under construction, or proposed, as of January, 1928, are located on the Federal-aid highway system; that is, on the 185,000 miles of the main State and interstate roads built at public and Government expense.

Referring to roads and bridges in my own State of Kentucky, we expended during the calendar year of 1927 the sum of $16,430,000 in the construction of State and Federal-aid roads, which does include the expenditures of the counties, and the total of roads under State maintenance at the beginning of this year was 3,260 miles. It is probable that more miles will be constructed in the State of Kentucky during this coming year than ever have been constructed in a similar period. The general assembly of Kentucky recently passed an act under the concession made by the Federal Government enabling the State highway commission to construct bridges and issue bonds to pay for their construction where necessary, with the provision that the bonds shall be retired from tolls received, and after the bonds are retired the bridges to become free to the traveling public. Like other States we are interested in the future of Federal highways and interstate bridges, because there is attracted to the State annually a large number of tourists, and she has to-day a great project to make the world wonder Mammoth Cave a national park. On four of the Federal highways in Kentucky between given points it is estimated that 4,000,000 cars pass annually. There passed over these four highways during the four summer months of 1927 more than one-half million foreign cars; that is, from without the State of Kentucky, carrying tourists to the number of 1,500,000 people.

Kentucky is also interested in the future of free bridges, because it is surrounded on three sides by 759 miles of navigable water, having the Big Sandy on the east with 57 miles, the Ohio on the north with 653 miles, and the Mississippi on the west with 60 miles. In addition it has several hundred miles of navigable streams within the State.

The bureau with reference to Kentucky road construction says:

> The Federal-aid highway system includes 3,702.5 miles, of which 898 miles have been improved with Federal aid. Of the improved mileage, 110.6 miles were added during the year. At the close of the year 393.4 miles were under construction and 42.8 miles were approved.
>
> The mileage improved with Federal aid consists of 411.2 miles of graded and drained earth roads, 160.6 miles of gravel, 41.4 miles of water-bound macadam, 153.4 miles of bituminous macadam, 126.9 miles of Portland cement concrete, and 3.9 miles of brick, in addition to which there are bridges with a total length of 0.6 mile.
>
> The total cost of all Federal-aid roads completed, including 111.3 miles of stage construction, was $24,510,594.46, of which the Federal share was $10,092,978.19. The disbursement of Federal funds to the State was $1,420,029.31. This added to the disbursements made during the previous years and subtracted from the State's total apportionment of $1,463,756, leaves a balance of $3,300,565.05 unexpended funds to the credit of the State.

With the development of the automobile industry and the enormous expenditure of public money in the construction and maintenance of public highways, it may also be borne in mind that the growth of our population during the ensuing three or four decades will, it is estimated in the United States, bring it to 200,000,000 people, and as this population increases the greater will be the demand for an unhampered and unrestricted communication between the several States. The effect produced by the motorization of America has had a great influence in the social and economic order of our people, and brings them into closer social and economic business relations. The people generally in America have attained a mobility that was a few years ago unknown and unexpected, like many advances of our age. It is said that the system of State and Federal highways now being constructed in accordance with the plans already approved will, when completed, connect practically every town or city in this country of 5,000 or more inhabitants, and 90 per cent of the Nation's population will live within 10 miles of a Federal-aid road, and practically all the remainder will be equally close to State roads of important character. Let us hope that this prediction will soon be realized. It is also estimated that 40,000,000 of our people at this time spend at least a part of their vacation in motor travel and in touring over the great country which is unexcelled in scenery and unparalleled in progress.

In view of what has been attained along the lines suggested, and what may be expected in the future development of our country, it is certain that the highways of the country ought to be free and tolls should be avoided wherever possible. Just as tolls have been abolished on the roads of the Nation, so should the tolls of ferries and bridges be superseded by free bridges at as early a date as possible, and with the development in this country of industry, transportation, and population our vision must necessarily carry us forward to that time when in a few decades we will be linked together by bridges as free as the highways within the borders of our States.

There is now pending before the Committee on Interstate and Foreign Commerce a bill introduced by the gentleman from Illinois [Mr. DENISON] providing for an amendment of the act of March 3, 1906, to regulate the construction of bridges over navigable streams by the Secretary of War and having the further purpose of providing for the valuation of all bridges and the regulation of tolls on all bridges over navigable streams by the Interstate Commerce Commission.

Of course, it is well settled that the Federal Government has full power to regulate the operation of bridges over navigable streams, and it has for a long time regulated the construction of bridges over navigable waters, both interstate and intrastate, Congress has unlimited power to determine whether or not a bridge may be built over a navigable stream, and having that power it is invested with the right to impose the terms and conditions upon which any grant may be made. A policy has been adopted in all bridge bills granting to private persons or corporations the privilege of constructing bridges, providing for their recapture by a State or political subdivision thereof, and that they may be acquired and taken by purchase or by condemnation in accordance with the laws of the States.

While this provision in these bridge bills may limit the power of the persons or corporations and restrict them in the overcapitalization of a company, yet it is not certain that it will have the effect intended for it or preserve the real value and original cost for the benefit of the Government or the people who may in after years seek to take them over. The only way in which the Government and the people of the States may be protected against future unlawful encroachment by the owners of bridges operated as private enterprises is to make it unlawful for any bridge company to issue any capital stock or any bonds or securities or other evidence of debt or to assume any obligation or liability unless and until it shall be authorized so to do by the Interstate Commerce Commission and that it pass upon the purpose and needs of the proposed issues and the use of proceeds thereof. Stocks, bonds, or securities should not be issued by any such company except for some lawful object within its corporate purpose and compatible with the public interest and which is necessary or appropriate for or consistent with the proper performance by the company of its service to the public and such as will not impair its ability to perform that service at a reasonable cost.

In my judgment, the measure introduced by the gentleman from Illinois [Mr. DENISON] providing an amendment to the act of March 23, 1906, in so far as it regulates the construction of bridges over navigable streams and provides for the valuation of bridges and the regulation of tolls, is proper and should receive the approval of the Congress, but it should be amended to provide for supervision of the issue of stocks, bonds, and securities by Interstate Commerce Commission. They should not be left to supervise their own acts in this respect.

It is important that the proposed legislation undertakes to regulate all bridges over navigable streams. The act of March 23, 1906, regulating the construction of bridges and investing the Secretary of War wi. . power to regulate the tolls applied only to bridges built under the act subsequent to its passage. So also the recapture clause inserted in private bills applies only to the bridges specifically provided for by them. What we need is a general law regulating all privately owned traffic bridges whenever built.

In my judgment the bill, in addition to providing for the valuation and the regulation of tolls by the Interstate Commerce Commission, should also provide for the regulation of the issue and sale of stocks and bonds and securities by any person, firm, or corporation operating and controlling a privately owned bridge across any navigable stream. The purpose of the bill to value the bridges and regulate the tolls is a step forward, but I feel that the question of the regualtion of the issue of securities is of equal importance.

I am satisfied that bridge companies not supervised may so manipulate the issue of stocks and bonds or the sale of their property as to greatly increase their capital without giving an equivalent in money or property. And while the provision in the recapture clause may apply as between the company and the Government, yet if stocks and securities are found in the hands of the unsuspecting public, those who may hereafter desire to take over the bridge may find themselves in the position of having to pay the capital value rather than the real value, or do a great injustice to uninformed or unsuspecting holders of securities who may in future years acquire stock from such corporations. There are many ways of manipulating the purchase and sale of property in the construction as well as after construction of bridges so as to inflate the value of the project from time to time. The restrictions in the bridge bills may not be adhered to unless there is some supervision or regulation by a duly authorized agency of the Government.

It seems to be a matter of common knowledge that there are many privately owned bridges paying dividends on their investments of from 40 to 150 per cent, and all of this is the result of increased travel over the public-road system of the country which is built at public expense. Of course, there may be many privately owned bridges operating on a sound business basis yielding a moderate and reasonable return and it is certain that these would not object to such regulations as will protect the public; and on the other hand, it is quite certain that where you find objection to proper regulation, it will be due to the fact that they seek returns in excess of a reasonable profit and that they are enjoying some privilege or exacting some toll not sanctioned in good conscience.

We have made much progress in the development of free highways and there must be no step backward in this respect, but rather we should continue to move forward with a progressive purpose to eliminate wherever possible the toll bridges that link together our great free system of highways. This may not be done all at once, but with a vision of the future needs and benefits to be derived therefrom we may prepare the way for the elimination of toll bridges and by proper regulation of privately owned bridges, connecting Federal-aid interstate highways or over navigable streams either interstate or intrastate, protect the public interest.

Upon this subject I desire to quote with approval the following recently published editorial of the Louisville Courier-Journal:

America's automobile traffic, the greatest revenue producer yet developed, has been seized upon by promoters of privately owned toll bridges as an opportunity for enrichment, and now an effort is being made to gain control of motor highways and to place them under private operation and control for the sake of the income to be derived therefrom. This distinct step backward in the direction of the old toll roads is proposed in Congress in a bill which would establish, the country over, so-called "express highways," connecting important cities in a direct line, these to be constructed by private concerns by permission of the Government, with tolls to be charged for their use.

"Fair and free is the king's highway," runs the old song, and certainly the American national highway system, which has been the Nation's boast since the old tollgate system was wiped out, should not deteriorate into a series of private holdups. Once such a group as this, which proposes building public toll roads, gets hold of the privilege, its next step would be to block the construction of free public roads and to make the public pay at every mile post.

The automobile clubs and the automobile manufacturers have been most vigorous in their attacks upon this congressional proposal for toll roads, and Alfred Reeves, general manager of the National Automobile Chamber of Commerce, has warned the public of this obvious effort to seize the Federal highway system. Toll roads should not be tolerated and toll bridges should be approved only under the most strict supervision. As to bridges, Mr. Reeves admits that there are times when a State or city can not afford immediately to finance such construction out of current funds, in which cases tolls may be charged until they are paid for.

"All toll bridges should be constructed, owned, and administered by the State," Reeves holds. "At present there is an organized move for the private construction of toll bridges. This is dangerous and should be avoided wherever possible. In any circumstances, it should be provided that the bridge should ultimately revert to the public. All financial operations, as well as the administration of the bridge, should be under the control of the State."

Illustrating the tendency to set up and operate private toll bridges are figures of the United States Bureau of Public Roads, which show that 233 toll bridges were in operation in this country at the beginning of 1928, only 42 of which were owned by States or other political subdivisions. Twenty-nine new toll bridges are now under construction, of which 20 are privately owned. Another 163 are proposed, of which 100 would be built by private capital. Clearly, the interests of the public need to be safeguarded.

In most States, and surely in Kentucky, the motorist is paying sufficient taxation to build and maintain all the roads that can possibly be constructed efficiently and honestly. Kentucky's experience of the past has proved that many bridges can be built out of current funds. The new toll bridge law permits State construction and reimbursement through tolls. This power should be exercised with restraint. Condemnation proceedings should be begun immediately to take over the few remaining private toll bridges on important State highways.

It seems to me that the establishment of a free system of highways in this country is so confirmed by a settled public opinion that there can be no turning back in any sense of the word; but, on the other hand, it would seem that the whole trend of the public mind is uniformly in the direction of further unhampered development of free highways. We are glad to see that Congress has passed and the President has signed the bill to continue appropriations for Federal-aid roads.

The free use of the roads should not be hampered by excessive tolls pending the solution of the bridge problem, and the Congress can at least adopt some regulation of privately owned bridges throughout the country and by the measures herein suggested prevent inflation of property or capital values of all bridges over navigable streams in the country. It is the only Government agency authorized to regulate interstate bridges. It will serve a present need in providing a reasonable toll, where it can not at present be dispensed with, and protect the future welfare by guarding against intrenched, enlarged, or excessive vested rights.

DISCONTINUANCE OF CERTAIN REPORTS

Mr. MacGREGOR. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 12064) to discontinue certain reports now required by law to be made annually to Congress and concur in the Senate amendment. I have talked with the chairman of the committee and the ranking Democratic member on the committee, and it is agreeable to them.

The SPEAKER. The Clerk will report the bill and the amendments.

The Clerk read the title to the bill and the Senate amendments.

The Senate amendments were agreed to.

QUARTERS FOR THE CHIEF OF NAVAL OPERATIONS

Mr. WOODRUFF. Mr. Speaker, I ask unanimous consent for the present consideration of S. 4402, authorizing the Secretary of the Navy to assign to the Chief of Naval Operations the public quarters originally constructed for the Superintendent of the Naval Observatory in the District of Columbia.

The SPEAKER. The gentleman from Michigan asks unanimous consent for the present consideration of S. 4402, a similar bill having been reported and on the calendar. Is there objection?

Mr. LaGUARDIA. Reserving the right to object, when this matter first came before the House it was a proviso on the appropriation bill. At that time I made a point of order against it and it went out. Subsequent to that it came upon the Consent Calendar. I then opposed it, pointing out that the approval of this bill would dispossess the Superintendent of the Naval Observatory in his present home. We worked out a plan, where upon the grounds can be constructed a house for the superintendent, allowing him to vacate the large house. Now, I have such an amendment which I will offer. It provides for a sum not exceeding $30,000 for the construction of quarters for official residence for the Superintendent of the Naval Observatory and the second section provides for the transfer from the present quarters.

Mr. CRAMTON. Can the gentleman give me some information? I understand that they have out there a team of coach horses and a coachman on the pay roll, but they have no coach. Would the gentleman be willing to accept an amendment to provide the coach so that they may have this anomalous condition cured? [Laughter.]

Mr. WOODRUFF. I am sure the gentleman from Michigan is not serious in his remarks.

Mr. CRAMTON. The information I am giving is very accurate, but I do not desire to insist on the amendment.

Mr. BYRNS. Does the gentleman say the horses are on the pay roll?

Mr. CRAMTON. The coachman is on the pay roll but somewhere they have lost the coach.

Mr. McCLINTIC. Mr. Speaker, reserving the right to object, I understand that the Superintendent of the Naval Observatory at this time desires to give up the possession of the building. I would like to have the gentleman give some information along that line, because this information was not available yesterday

when I objected. I thought it was the beginning of a movement of one branch of the naval service to dispossess the officers in another branch, and I did not think the House would countenance anything of that kind.

Mr. WOODRUFF. I wish to say that in the last 20 minutes I have discussed the matter with Captain Freeman, the commandant of the Naval Observatory, over the telephone, and he assures me that he will be very much pleased to give up the present quarters and permit the Chief of Naval Operations to take them.

Mr. McCLINTIC. In case the bill is considered, would the gentleman have any objection to an amendment that no additional allowance for quarters will be asked for by the Chief of Naval Operations?

Mr. WOODRUFF. I can not see any good of it, but I would not object to an amendment of that kind.

Mr. McCLINTIC. It seems that inasmuch as we are going to turn over the building with 20 rooms to the Chief of Naval Operations, he ought not to try to draw an allowance for quarters——

Mr. WOODRUFF. He can not under the law.

Mr. LINTHICUM. Does the amendment of the gentleman from New York provide $30,000 for the construction of a home?

Mr. LAGUARDIA. I am going to make it $20,000.

Mr. WOODRUFF. I have no objection to the amendment, but I think that any gentleman in the House who knows the cost of construction in Washington will not object to that.

Mr. LINTHICUM. I know a good deal about construction, but $30,000 is a good start.

Mr. LAGUARDIA. When you consider union labor and wages, you can not expect to build much of a home unless we pay the price.

Mr. SCHAFER. Mr. Speaker, I am in favor of union labor, but in my city where we build houses with union labor we do not pay $30,000 for them, and I am going to object.

Mr. LAGUARDIA. I have reduced that amount to $20,000.

Mr. SCHAFER. Did the gentleman say that there was a 20-room house that they were going to vacate?

Mr. LAGUARDIA. Yes.

Mr. SCHAFER. Then I suggest that they take about $5,000 and make two apartments of 10 rooms each out of it.

Mr. BACON. This is only an authorization. It has to be appropriated for later on.

Mr. SCHAFER. You have Army and Navy officers in Government buildings where they have their wives and their poodle dogs and have a 10 or 15 room house.

Mr. COLLINS. Mr. Speaker, I object.

The SPEAKER. The gentleman from Mississippi objects.

AMENDING RETIREMENT ACT

Mr. GIBSON. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 13565, to amend the act entitled "An act for the retirement of employees in the classified civil service and for other purposes," approved July 3, 1926, which I send to the desk.

The SPEAKER. The gentleman from Vermont asks unanimous consent for the present consideration of the bill H. R. 13565, which the Clerk will report.

The Clerk read the bill.

The SPEAKER. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, what committee reports this bill?

Mr. GIBSON. The Civil Service Committee.

Mr. LAGUARDIA. Is this the retirement bill, so called?

Mr. GIBSON. No.

Mr. HUDSON. Does the gentleman expect to bring up the retirement bill this afternoon?

Mr. O'CONNOR of New York. Mr. Speaker, reserving the right to object, is this a companion bill to the Dale retirement bill that we are waiting for?

Mr. GIBSON. No; it is not. This simply takes care of a few employees in the architect's office here in the Capitol who got beyond the retirement age before they were covered in under the retirement act, under the act of 1927.

Mr. O'CONNOR of New York. Mr. Speaker, until the Dale retirement bill is brought up I am forced to object.

The SPEAKER. Objection is heard.

APPOINTMENT OF BRIGADIER GENERALS

Mr. WAINWRIGHT. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 13244, to make chiefs and assistant chiefs of branches of the Army eligible for appointment as general officers of the line.

The SPEAKER. The gentleman from New York asks unanimous consent for the present consideration of the bill H. R. 13244, which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, reserving the right to object, here is a bill that it is contemplated to pass just an hour and a half before we adjourn. We have considered the Consent Calendar and we have considered the Private Calendar and have gone through each of them. I think gentlemen ought not to call up these bills by unanimous consent at this time under the conditions now existing in the House. The gentleman from Mississippi [Mr. COLLINS] said that he objected to this yesterday, but that he now withdraws his objection. It is not my purpose to object, because I do not know anything about it; but I think it is bad practice to continue to call up bills by unanimous consent at this time when the bills have been objected to under unanimous consent heretofore.

The SPEAKER. Is there objection?

Mr. HUDDLESTON. Mr. Speaker, I reserve the right to object until we know something about the bill.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That chiefs and assistant chiefs of branches of the Army and officers who have served as such shall be equally eligible under the law for appointment as brigadier generals of the line with colonels of the line of the Army.

Mr. CRAMTON. Is this the bill that was introduced by the gentleman from New York and when the committee reported it out was changed in one section and then as to which the gentleman filed a minority report?

Mr. WAINWRIGHT. Oh, no. The gentleman is quite in error. That was the promotion retirement bill.

Mr. HUDDLESTON. What is the necessity for action at this time?

Mr. WAINWRIGHT. This is a meritorious measure.

Mr. HUDDLESTON. Why not wait until the next session and give the bill more deliberate consideration?

Mr. WAINWRIGHT. The bill has had very deliberate consideration.

Mr. HUDDLESTON. I think the House ought to consider it under conditions so that we may know something about it.

Mr. WAINWRIGHT. If the gentleman has any doubt about it——

Mr. HUDDLESTON. Yes; I have doubts about it, and, Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. GARNER of Texas. Mr. Speaker, I think I shall submit a unanimous-consent request that the House stand in recess until half past 4 or for an hour so that we will not be engaged in passing any of this legislation.

The SPEAKER. The Chair will state to the gentleman that there are several other matters here which the Chair thinks it important to consider.

ADDRESS OF HON. J. WILL TAYLOR

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting therein the Nashville Banner account of a speech by the gentleman from Tennessee [Mr. TAYLOR] as temporary chairman of the Republican State Convention of Tennessee, at Nashville, on May 2, last.

The SPEAKER. Is there objection?

There was no objection.

The speech is as follows:

[From the Nashville Banner, May 2, 1928]

TAYLOR SEES G. O. P. VICTORY—REPUBLICAN "KEYNOTER" DEFENDS POLICIES OF PREVIOUS ADMINISTRATIONS

Defending the policies of previous Republican administrations and expressing pity for Democrats, with raps for the Wilson administration, Senator JIM REED, and the Chattanooga News, J. WILL TAYLOR, national committeeman and State G. O. P. leader, to-day in his keynote address before the State convention predicted a sweeping victory for the ticket, State and National.

His address in full follows:

Mr. Chairman and fellow Republicans of Tennessee: It is indeed a great privilege and a very distinguished honor to preside over such a magnificent convention of stalwart Republicans as have convened here on this eventful and auspicious occasion. The Republicans of Tennessee have been exceedingly kind to me, and at the very outset I want to take advantage of the moment to acknowledge my sincere and everlasting gratitude. By their grace and consideration I have had the honor

to serve them in practically every capacity in the party organization, from precinct committeeman to their representative on the greatest and most powerful political body on earth, the national Republican executive committee. In the exercise of the various positions that I have held in the party, naturally and undoubtedly, I have made mistakes, but, my fellow citizens, my actions at all times have been inspired by a conscientious desire to render the highest possible quality of service to the party. Necessarily and inevitably I have made enemies. I am not a miracle worker, and therefore I have not been able to master the impossible by giving two or more applicants the same position. Nevertheless, my allegiance and devotion to the party of the immortal Lincoln is such that I stand now, as I have always stood, perfectly willing to submerge my every personal feeling and ambition in the interest of party harmony and party success.

RAPS CHATTANOOGA NEWS

Notwithstanding the fact that certain hostile newspapers—one in particular—has devoted much news space and consumed much editorial ink and effort in an attempt to discredit the existing Republican organization in Tennessee, I assert to-day boldly and emphatically that the party has never had an organization that was more loyal or more consecrated to its welfare than the one that is now functioning. We boast of the fact that it is free from any entangling alliances with the opposition party, and if those who profess to be Republicans who stand off like the Pharisee and content themselves with criticism; if those who have seen fit, in other words, "to sit in the seat of the scornful," will come forward in true sportsmanlike fashion and give the party the support they owe it, we will work miracles in this poor, old, jaded, hide-bound, ring-ruled, tax-ridden Commonwealth next November. If the present party organization does not suit you, don't try to cripple it and discredit it by methods ordinarily employed by the bushwhacker; don't play the part of the dog in the manger; but go out in manly fashion using the orderly processes which are amply provided and change the organization to your own notion. For God's sake, don't stab the party in the back in order to revenge yourself on some individual or set of individuals—that's poor sportsmanship—but employ the regular instrumentalities to correct the evils, real or imaginary, that you think exist. Any time the Republicans of my district or the State, in their will and wisdom, see fit to retire me to the ranks, you shall hear no recrimination from me. I shall not sulk in my tent and nurse a grouch, but on the contrary, as a good Republican and a loyal party man, I shall submit gracefully to the verdict of the majority. This is the doctrine upon which our republic stands, and no party and no government can function successfully that does not recognize and support these principles.

NO OUTSIDE MONEY

There is one thing, fellow Republicans, for which I am preeminently proud—a thing which has not happened before since I have had any knowledge of Tennessee politics—and that is, that not one single, solitary penny has come into this State from the outside to influence the election of a single delegate to our national convention. I hail this as a most excellent and salutary omen, and I trust that this wholesome precedent may never be violated in the future. It is immaterial to me who your choice may be for President, and I do not profess to know what great Republican the Kansas City convention may nominate; however, I make this prediction: That whoever he may be, he will be inaugurated as the Chief Executive of this Nation on the 4th of March, 1929. Personally, I am not concerned as to who your choice may be for United States Senator or governor, and I have no idea who our party may put forward, but with absolute confidence I make you this prophecy that with two strong men nominated for these positions, if every Republican will do his full duty by our party and its nominees, we will not only carry the State for the electoral ticket, but we will elect both a governor and United States Senator.

There is a little, so-called newspaper over at Chattanooga daily expressing great solicitude for the Republican Party of Tennessee. Its every issue is brim full of fatherly advice to the Republicans of this State. My friends, beware of "Greeks bearing gifts." Why should the Chattanooga News be so terribly concerned about Republican harmony and Republican success in Tennessee? Be not deceived. This irresponsible, disreputable sheet is only endeavoring to foment strife and factionalism in our party in order that Democratic candidates may profit thereby. The Republican Party of Tennessee is amply able to take care of its own affairs without any gratuitous suggestions or dictation from George F. Milton, jr., or any of his ilk.

The Democratic Party has already inaugurated its usual campaign of scandal, slander, and calumny which will meet with the same rebuke at the hands of the voters as it has in the past. There is no argument in abuse, and no man or party was ever favored by the electorate because he or it was possessed of the greatest capacity for the promulgation of vilification. That great apostle of vitriol from Missouri, the Right Hon. JIM REED, has revived, revamped, and rejuvenated that old threadbare, weather-beaten slogan, "Turn the rascals out." In the light of the colossal graft, corruption, and incompetency of the Wilson administration, how any Democrat can have the sublimated brass, the attenuated gall and nickel-plated nerve to charge anybody with being crooked is simply beyond my power of comprehension. "Turn the rascals out," cries the inflammatory REED in sonorous and stentorian tones. My God, my friends, is it possible that JIM REED is so dumb that he does not know that this was done by the American voter in 1920, and that by such a staggering, overwhelming majority that they will not soon return again.

SORRY FOR DEMOCRATS

Personally, my friends, I entertain no feeling of animosity whatever for Democrats; I am just sorry for them. I have always contended, and I insist to-day that there are worse things than being a Democrat. Yes, my friends; undoubtedly, there are worse things than being a Democrat, but to save my life I can't think of just what it is at this time.

My fellow citizens, I regret to say that during recent years I have observed a tendency and disposition on the part of Republicans to wear their party garments a little too loosely. I am a stanch believer in party regularity and party responsibility. I can remember the days when if a Republican was guilty of party apostasy he became an outcast, and when his neighbors saw him approaching on the highways, as in Biblical days, they threw up their hands and cried, "Unclean, unclean!" I would like to return again to those good old days of party loyalty. There is a tradition over in Union County, the county where I was born and raised, that many years ago, while going through a large forest, a Republican was caught in a terrific storm. The thunders roared, the lightning flashed, and the wind blew with great violence, and the poor fellow every moment expected to meet a tragic death. Finally he sought refuge in a convenient hollow log. He crawled up into the cavity of the log until he felt perfectly secure from the ominous onslaught of the angry elements. The rain descended in torrents on the log until finally it became soaking wet and began to swell and contract. He began to feel the log close in upon him and it began to look like it was only a question of a few minutes until he would be smothered to exhaustion. Just at that moment, however, in his reflections and meditations he happened to think that, though a professed Republican, he had voted the Democratic ticket in the last election, and he instantly became so small that with very little difficulty he slid out of the log to safety. Many of the old settlers can point out the identical log to you to this good day.

PROUD OF G. O. P.

My fellow citizens, when we contemplate the magnificent record of the Republican Party since its birth beneath the historic oaks in Michigan, three-quarters of a century ago, is there any reason why we should not be proud of the fact that we hold membership in the grand old party? Some one has suggested that a history be written chronicling the achievements of the Republican Party, but this is entirely unnecessary and superfluous, because the history of the United States of America during the last 75 years is substantially a history of its exploits and achievements. Only on two occasions since the great Civil War have the American people entrusted this Government to the Democrats—one under Grover Cleveland and the other time under Woodrow Wilson.

There are doubtless many in this vast audience to-day who with feeling of genuine anguish can remember the distressful Grover Cleveland times. Those days of panics, bread lines, and free-soup dispensaries, when a sheep could not be sold for 50 cents a head and when a choice yearling could be bought for less than $2. I have entirely too much sympathy and compassion in my heart to agonize your souls further, my friends, by referring to the heartaches and hard times of the Grover Cleveland administrations.

Everybody admits that the election of Woodrow Wilson in 1912 was the result of a fluke, pure and simple. Three-quarters of a century ago the immortal Lincoln repeated that old Biblical verity that "a house divided against itself can not stand." The Republicans attempted to refute this time-honored aphorism, and as a result Woodrow Wilson was elected President. However, my friends, it is consoling to reflect that notwithstanding the fact that thousands of good Republicans, disgusted with the selfishness and shortsightedness of our leadership at that time, refrained from casting their ballots, and thousands of others still more disgusted actually voted the Democratic ticket, the combined popular vote of Taft and Roosevelt far exceeded that of the Democratic candidate. Woodrow Wilson was inaugurated President on March 4, 1913, and almost automatically the business activities of this country began to slow down, until, when the war broke out in Europe in 1914, business stagnation was practically general throughout the country. As a result of the Underwood tariff law our mills and factories ceased to operate and 5,000,000 workers were thrown out of employment. The grim old specter of want that had been banished since the days of Grover Cleveland returned from his exile and cast his ghastly shadow over every city and hamlet in the land. While it was, indeed, a great catastrophe to the world, the European war was certainly a godsend to the Democratic Party. In 1914 the great European nations discontinued the manufacture of articles of peace and proceeded to devote their energies and industries to the production of implements of war. The United States, being the only nation in a position to supply the sinews of war, Europe looked to us to not only furnish the necessaries for their armies but for their civilian population as well. Factories that had closed down after the inauguration of the

Democratic administration, with its unfriendly policies, suddenly resumed operations at maximum capacity, and for 24 hours per day. The 5,000,000 workers who had been walking the byways and highways of this country seeking employment immediately found work at a scale of wages hitherto unknown. Soup houses which had made their appearance in the large centers of population instantly vanished, and the United States became a veritable beehive of industry.

In 1916 another presidential election came on. Wilson was again put forward by the Democrats. The war in Europe had been going on for two years and notwithstanding the fact that repeated depredations had been committed against the sovereignty of our Nation and its flag, we had not become involved in that titanic struggle. In support of the reelection of Mr. Wilson, his lieutenants were busy spreading the propaganda that Wilson had kept us out of war, and that the sure and certain way to stay out was to reelect him President. The world had never before seen such a brazen campaign of deception and misrepresentation as that of 1916. The great President on more than one occasion declared that "We are too proud to fight." "Peace at any price" was the chief Democratic slogan. These specious claims and promises were made with the absolute and deliberate knowledge that a condition had been permitted to develop which rendered war inevitable. My friends, I want to say to-day as I have said heretofore that in my humble opinion the election of Woodrow Wilson in 1916, represented the rankest embezzlement of public confidence that has ever been practiced by any party, political or otherwise, in the history of the world.

Well do we remember those strange, those abnormal days. Hundreds of thousands of good Republicans voted their first Democratic ticket in that November election for no other reason that they had been led to believe that the election of Wilson meant peace, whereas the election of Hughes meant war, I can see a typical old Republican patriarch leaving his home to go to the polls to cast his ballot on that crisp November morning. I can see his good wife follow him to the gate. I can see her throw her arms around his neck and with tears in her eyes, and with a voice almost choked with emotion, I can hear her say: "John, I know you are a good Republican, I know you have never scratched a ticket, but for God's sake, for my sake, and for the sake of our boys, please vote the Democratic ticket to-day and keep our country out of war and our boys at home." I can see that old father's frame shake with anguish as he reluctantly gives his wife the promise which gladdens her heart. I can see him shamble down to the polling place, call for a ballot and stagger hesitatingly into a booth. I can see the pallor overspread his face as he unsteadily marks his first and last Democratic ticket. The mockery performed, his sacred suffrage perverted and despoiled by willful deception, I see him fold his arms in humble contrition and resignation, and with his head bowed in humility, I see him return to his home and hear him confess to his household that he never felt more miserable and despicable in all the days of his life.

Who could go up against a campaign of this character and hope to survive, my friends, and yet if California had run true to form we would have won in spite of these reprehensible tactics.

TAKE YOUR CHOICE

Occasionally we hear Democratic spellbinders prate about the "prosperity" of the Wilson administration. Lord forgive them for they know not what they do. Prosperity of the Wilson administration! "Ye gods and little fishes!" Prosperity based on human bloodshed and human misery. I wonder if the American people would like to have that species of prosperity again. Prosperity that cost the taxpayers of this country more than twenty-five billions and which will ultimately result in an aggregate cost of perhaps a hundred billions; prosperity that takes the young men of our country from happy homes and peaceful pursuits to foreign soil to sacrifice their lives and health fighting on foreign battle fields for people who do not appreciate the sacrifice. Or would they rather have the sort of prosperity that the Republican Party always vouchsafes—prosperity of the McKinley, Roosevelt, and Coolidge variety—prosperity based on sound economic business principles.

My friends, the Republican Party has always stood for a firm, unequivocal and constructive foreign policy. The Republican Party does not visualize Uncle Sam as a swaggering bully with a chip constantly on his shoulder, but it does believe in the sanctity of American citizenship, and that the American citizen is entitled to protection wherever he may be, on land or on sea. This policy of the Republican Party is undergoing the acid test at this very moment in Nicaragua. For 30 years Nicaragua enjoyed an era of absolute peace, and during this period she invited American capital to come into her midst and help her develop her natural resources. As a result of this invitation, in perfect good faith, millions of American dollars have gone into Nicaragua. Under its magic influence vast tropical orchards, coffee plantations, and mining projects have been established. Several thousand American citizens have gone to Nicaragua to develop and superintend these various enterprises. Almost over night a revolution was precipitated which placed American life and American property in jeopardy. In pursuit of well-established precedents the State Department dispatched the marines to Nicaragua to protect American property. Immediately a loud protest was sounded from Democratic quarters, supplemented by attacks from certain newspapers in the United States, which from all appearances are financed by Bolshevist gold from abroad.

There is an element in the United States and also a certain press organization that sympathizes with and supports every other nation against our own. In our recently strained relations with Mexico they espoused the cause of Mexico. They have all the while been on the side of Russia and now they are terrifically exercised lest Uncle Sam discipline too severely the bandit Sandino and his little army of desperadoes. They are the loudest champions of war-debt cancellation, disarmament, or anything else that is contrary to the spirit of the Republican party and this administration. If they don't like Uncle Sam's style, if Old Glory has no appeal to their ideals and imagination, why don't they go to Mexico, Russia, or Nicaragua, or some other clime that is more acceptable to their tastes? It was perfectly satisfactory to these holier-than-thou critics when Woodrow Wilson sent the marines to Haiti and San Domingo in 1913 and 1914, where in an attempt to force down the throats of the almost defenseless Haitians and San Domingans a government whose constitution was actually written in the State Department at Washington, killed more than 2,500 natives. Nothing that begins to approach this episode has occurred or will occur in Nicaragua.

THE MONROE DOCTRINE

In addition to protecting life and property in Nicaragua, the Government has a valuable canal right to maintain, to say nothing of our duty to defend and preserve the Monroe doctrine. When President Monroe promulgated that celebrated creed, he guaranteed, by implication if not expressly, protection to the nationals of other Governments who might go to these Latin-American countries and find themselves or their property in jeopardy. In this instance, not only was American life and American investments jeopardized, but the lives and properties of the nationals of other countries were endangered. If we had not promptly employed aggressive measures in Nicaragua, England, France, Japan, and perhaps other countries who had nationals there might have done so, which would have constituted an invasion of the Monroe doctrine which might have involved us in a war with a major nation.

Congressman TAYLOR then addressed himself to the condition of the country when Harding was inaugurated, declaring that the Republicans were confronted by a government disorganized in every department. He pointed out that the Harding administration was confronted with a bonded indebtedness of twenty-seven billions and a floating indebtedness of three-quarters of a billion. He said that Liberty bonds were being sold at 85 cents on the dollar and that approximately 5,000,000 workers were idle. He stated that the Harding administration immediately set about to reduce the Federal pay roll, adopted a budget system and installed the most rigid and drastic measures of economy. He pointed out that within two years Liberty bonds which had sold for 85 cents on the dollar were bringing par, and boasted that the same Liberty bonds now were current at a premium. He stated that during Harding-Coolidge administrations the public debt had been reduced from twenty-seven billions to less than seventeen billions, and asserted that if Coolidge could be continued in the executive office and Andrew Mellon in charge of the Treasury, the public debt would soon be extinguished altogether.

Mr. TAYLOR devoted some time to a discussion of the tariff, declaring that a high protective tariff was the salvation of the American laboring man. He said that with our high standards of living it was impossible for the American independent laborer to compete with the pauper labor of foreign countries. He defended the merchant marine, declaring that "we must establish foreign markets to take care of our surplus production," and that "this can only be done by the establishment of an adequate merchant marine. We must consume more, produce less, or find a market for our surplus," he declared.

IMMIGRATION LAW

Mr. TAYLOR devoted some time to a discussion of the immigration question, saying that to the Republican Party was due the credit for the passage of the first real restricted immigration legislation. He contended that as a result of immigration legislation passed since 1921, the influx of foreigners to our shores has been reduced from almost a million to about one hundred and fifty thousand. He said that the immigration laws are to labor what a protective tariff is to industry—that both reduce competition from abroad.

Mr. TAYLOR closed his speech by declaring that the Democratic Party was in a pathetic and pitiable plight. He said that if they nominated Al Smith with his well-known wet and Tammany Hall entanglements, he would lose the support of thousands of good Democrats who had well-defined views on these vital subjects, and that if they did not nominate Smith, the Smith adherents and Tammany would penalize whoever may be nominated. "It is a case of be damned if they do and be damned if they don't," declared Taylor. He said the Democratic situation reminded him of an incident that occurred in Union County many years ago. Two men were going through a field when a large bull appeared on the scene. One of them was wearing a red shirt, which

greatly agitated the bovine. With horns in the air and with his tail hoisted the excited bull made a rush for the two men, when one of them scampered up a tree and the other sought refuge in a cave near by. The bull rushed up to the mouth of the cave and began to bellow, paw up the ground with his hoofs, and skin the saplings with his horns. The fellow in the cave would ever and anon emerge to the mouth of the cave and peek out. The bull would make a vicious rush at him and he would retreat into the cavern again. Finally he appeared at the mouth of the cave, and his associate, who was safely ensconced amidst the branches of the tree, yelled out to him and said: "Why don't you stay in the cave, John, until the bull subsides and goes away!" "Stay in the cave, the devil," yelled back John, "there is a bear in the cave." Closing, he said that this story fairly illustrated the precarious predicament of the Democratic Party in this campaign.

STONE MOUNTAIN MEMORIAL

Mr. BELL. Mr. Speaker, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Stone Mountain Monumental Association, and ask that it be now read by the Clerk.

The SPEAKER. Without objection, the Clerk will read the resolution.

The Clerk read as follows:

Whereas the Congress of the United States passed a special joint resolution providing for the appointment of a committee of 10 Members of the House of Representatives and five from the Senate to act as the accredited representatives of the Senate and House at the exercises held at Stone Mountain on April 9, 1928, incident to the unveiling of the mounted statue of Gen. Robert E. Lee, and the Speaker of the House, Hon. NICHOLAS LONGWORTH, subsequently appointed Hon. THOMAS M. BELL, of Georgia; Hon. JOHN Q. TILSON, of Connecticut; Hon. WILLIAM W. HASTINGS, of Oklahoma; Hon. C. WILLIAM RAMSEYER, of Iowa; Hon. W. H. SPROUL, of Kansas; Hon. CHARLES L. FAUST, of Missouri; Hon. C. R. CRISP, of Georgia; Hon. CLARENCE F. LEA, of California; Hon. JOHN J. O'CONNOR, of New York; and Hon. WILLIAM W. ARNOLD, of Illinois, and said Representatives visited Atlanta and were present at the exercises referred to;

Resolved, That the thanks of the Stone Mountain Monumental Association are hereby extended to the Congress of the United States for their gracious act in giving official recognition to this auspicious event in the manner recited, together with sincere assurances of the grateful appreciation of this association and all connected therewith, we being desirous of formally testifying to the high regard we entertain and feel for this renewed evidence of the sympathy and support of the Congress for the great monument being built upon Stone Mountain, on a prior occasion evidenced in such notable and historic manner.

I hereby certify that the above and foregoing is a true and correct copy of a resolution passed at a meeting of the executive committee of the Stone Mountain Confederate Monumental Association regularly and properly held on the 11th day of April, 1928.

Witness my hand and the corporate seal of said association this 11th day of April, 1928.

ROGERS WINTER,
Secretary Stone Mountain
Confederate Monumental Association.

PERMISSION TO ADDRESS THE HOUSE

Mr. HOWARD of Nebraska. Mr. Speaker, I ask permission to speak a little while before we have the recess.

Mr. ZIHLMAN. Mr. Speaker, will the gentleman withhold that for a moment in order that I may submit a unanimous-consent request?

Mr. HOWARD of Nebraska. Yes; I will do anything for the promotion of harmony.

SETTLEMENT OF SUITS AGAINST THE DISTRICT OF COLUMBIA

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 3581. The gentleman from Kentucky [Mr. GILBERT] has withdrawn his objection to the present consideration of this bill.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (S. 3581) authorizing the Commissioners of the District of Columbia to settle claims and suits against the District of Columbia

Be it enacted, etc., That the Commissioners of the District of Columbia be, and they hereby are, empowered to settle, in their discretion, claims and suits, either at law or in equity, against the District of Columbia whenever the cause of action—

(a) Arises out of the negligence or wrongful act, either of commission or omission, of any officer or employee of the District of Columbia for whose negligence or acts the District of Columbia is prima facie liable to respond in damages.

(b) Arises out of the existence of facts and circumstances which place the claim or suit within the doctrines and principles of law decided by the courts of the District of Columbia or by the Supreme Court of the United States to be controlling in the District of Columbia.

SEC. 2. No proceeding to cancel a tax assessment, or to recover taxes paid, shall be brought after one year from the date of the decision of a court of last resort holding void the law under which the tax was levied or paid.

SEC. 3. No settlement of any claim or cause of action herein authorized to be made by the Commissioners of the District of Columbia shall in any event exceed the sum of $3,000, and all settlements entered into by the Commissioners of the District of Columbia acting under the terms and provisions of this act shall be presented to the Congress, together with a brief statement of the nature of the claim or suit, the amount claimed, and the amount of the settlement, with a summary of the evidence and circumstances under which the settlement was made. Appropriations for the payment of such settlements are hereby authorized, payment thereof to be made in the same manner as are other expenditures for the District of Columbia.

SEC. 4. This act shall take effect from and after its passage, but nothing herein contained shall be construed as prohibiting the Commissioners of the District of Columbia from proceeding according to the terms and provisions hereof to settle any claim or suit pending at the time of the enactment hereof, irrespective of the date of presentation of the claim to the Commissioners of the District of Columbia or the date of the filing of the suit.

With committee amendments, as follows:

Page 2, line 6, strike out all of section 2 and insert:

"SEC. 2. The Commissioners of the District of Columbia are hereby authorized and empowered to grant relief in claims for refund of taxes paid, or for cancellation of assessments heretofore made in such cases where like assessments, or assessments against property of similar character, have been held to be void or erroneous by decision of the Supreme Court of the District of Columbia, the Court of Appeals of the District of Columbia, or the Supreme Court of the United States: *Provided*, That any claims for refunds of taxes heretofore paid or for cancellations of assessments heretofore made shall be filed within one year from the approval of this act.

"Nothing contained in this act shall be construed as reducing the period of the statute of limitations."

Page 3, line 2, strike out "$3,000" and insert "$5,000."

The SPEAKER. The question is on agreeing to the committee amendments.

The amendments were agreed to.

The SPEAKER. The question is on the third reading of the Senate bill as amended.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

A similar House bill was laid on the table.

ACQUISITION OF LAND IN THE DISTRICT OF COLUMBIA BY THE UNITED STATES

Mr. ZIHLMAN. Mr. Speaker, I move to suspend the rules and pass the bill H. R. 13461 as amended.

The SPEAKER. The gentleman from Maryland moves to suspend the rules and pass the bill H. R. 13461 as amended. The Clerk will report the bill as amended.

The Clerk read as follows:

Be it enacted, etc., That whenever the head of any executive department or independent bureau, or other officer of the United States, or any board or commission of the United States, hereinafter referred to as the acquiring authority, has been, or hereafter shall be, authorized by law to acquire real property in the District of Columbia for the construction of any public building or work, or for parks, parkways, public playgrounds, or any other public purpose, such acquiring authority shall be, and hereby is, authorized to acquire the same in the name of the United States by condemnation under judicial process whenever in the opinion of such acquiring authority it is necessary or advantageous so to do; and in every such case the Attorney General of the United States, upon the request of such acquiring authority, shall cause a proceeding in rem for such condemnation to be instituted in the Supreme Court of the District of Columbia, holding a special term as a district court of the United States, which court is hereby vested with jurisdiction of all such cases of condemnation with full power to hear and determine all issues of law and fact that may arise in the same.

INSTITUTION OF PROCEEDINGS

SEC. 2. Every such condemnation proceeding shall be instituted by filing in said court a verified petition which shall contain or have annexed thereto the following:

(1) A statement of the authority under which and the public use for which the lands are to be acquired.

(2) A description of the lands to be acquired sufficient for the identification thereof. Where such lands, taken together, constitute all privately owned land in any square in the city of Washington, it shall be

sufficient to designate the same by the number of the square as the same appears on the records of squares in the office of the surveyor of the District of Columbia.

(3) A plan showing the lands to be acquired.

(4) The names of the owners of the lands to be acquired, so far as ascertainable by reasonable inquiry, and of the persons in actual and open possession of the same. If it shall appear from the land records of the District of Columbia that a right, title, interest, or estate in said lands was formerly vested in any person who is known or may be presumed to be deceased, which right, title, interest, or estate, if valid and subsisting, would be adverse to the person in present possession claiming to be owner of said lands, and the names of the heirs or devisees of such deceased person are not known, it shall be sufficient to describe them in the petition and in any order of citation or publication or other process thereon as "the unknown heirs or devisees" of such deceased person. And such designation shall be valid and effective to all intents and purposes as if all persons claiming by, through, or under said deceased person had been specifically named.

(5) A statement of the estate or interest in said lands which petitioner intends to acquire for the public use stated.

(6) A prayer that said lands be condemned and taken for the use of the United States and that the title to the same in fee simple, or such estate or interest as may be specified, be vested in the United States.

CITATION AND NOTICE

SEC. 3. The court shall cause public notice of the institution of such proceeding to be given by an order of citation requiring all persons claiming to have any right, title, interest, or estate in the lands to be acquired, or to be entitled to compensation in respect of the taking of the same, and all persons occupying the same, to appear in said court on a day to be named in said order of citation to answer the petition and make claim for the compensation to which they deem themselves entitled.

SEC. 4. Such order of citation shall contain a description of the lands to be acquired sufficient for the identification thereof and the names of the persons given in the petition as claiming to have any right, title, interest, or estate in said lands or to be entitled to compensation in respect of the taking of the same and as occupying the same. If any such person is alleged in said petition to be a nonresident of the District of Columbia, the order of citation shall also state the last place of residence of such person, if known.

SEC. 5. Said order of citation shall be published at least once a week for three consecutive weeks in some newspaper of general circulation published in the District of Columbia.

SEC. 6. Upon the filing of said petition, the court shall pass an order directing a citation to issue for each of the persons named therein who is, so far as ascertainable by reasonable inquiry, residing, or sojourning at the time within the District of Columbia, to be served in the same manner as a citation in action at law and to be returned by some day to be named in said order, not less than 10 days or more than 20 days from the day of filing of said petition. If personal service be not had before the return day, the order may be renewed from time to time as the court may think proper. If any such person is reported nonresident or unknown, or is returned non est, the court may order the United States marshal for the District of Columbia to set up a copy of the order of citation for such persons upon the property. The court shall also require notice of said proceedings to be given by mailing, by registered mail, postpaid, a copy of said order of citation to such of the persons named therein as may be shown by said petition or by affidavit, or by information acquired by the United States marshal, to be nonresidents of the District of Columbia, such copy to be addressed to such person or persons at the last-known place of residence.

DEFAULT IN APPEARANCE

SEC. 7. If default of appearance on or before the return day specified in said order of citation (or on or before such further day as the court for cause shown may allow for the purpose) every person having any right, title, interest, or estate in the lands described in said order, or entitled to compensation in respect of the taking of the same or entitled to the possession of, or occupying the same, shall be deemed to have consented to the taking and condemnation of said lands for the public purpose stated at and for such compensation as may be finally awarded therefor in the proceeding and shall be bound by all orders, judgments, and decrees that may be entered in said proceeding.

SEC. 8. The court may, by order, upon application and for cause shown, at any time prior to final judgment permit any person claiming any right, title, interest, or estate in the lands to be acquired or to be entitled to compensation in respect of the taking of the same to appear in said proceeding upon such terms and conditions as the court may direct.

GUARDIANS AD LITEM

SEC. 9. If any person having, or claiming to have, any right, title, interest, or estate in the lands to be acquired, or entitled, or claiming to be entitled, to compensation in respect of the taking of the same, or entitled or claiming to be entitled, to the possession of the same, appears to be under legal disability by reason of infancy, insanity, idiocy, or other like cause, the court, after the return day specified in the order of citation, upon the application of any person interested, shall appoint some suitable person as guardian ad litem to appear for such person under disability. Failure to apply for the appointment of a guardian ad litem for any such person under disability shall not affect the validity of the proceedings.

VESTING OF TITLE AND RIGHT TO COMPENSATION

SEC. 10. The petitioner may file in the cause, with the petition or at any time before judgment, a declaration of taking signed by the authority empowered by law to acquire the lands described in the petition, declaring that said lands are thereby taken for the use of the United States. Said declaration of taking shall contain or have annexed thereto—

(1) A statement of the authority under which and the public use for which said lands are taken.

(2) A description of the lands taken sufficient for the identification thereof.

(3) A statement of the estate or interest in said lands taken for said public use.

(4) A plan showing the lands taken.

(5) A statement of the sum of money estimated by said acquiring authority to be just compensation for the land taken.

Upon the filing of said declaration of taking and of the deposit in the registry of the court, to the use of the persons entitled thereto, an amount equal to the assessed value of the land to be taken, title to the said lands in fee simple absolute, or such less estate or interest therein as is specified in said declaration, shall vest in the United States of America, and said lands shall be deemed to be condemned and taken for the use of the United States, and the right to just compensation for the same shall vest in the persons entitled thereto; and said compensation shall be ascertained and awarded in said proceeding and established by judgment therein, and the said judgment shall include, as part of the just compensation awarded, interest at the rate of 6 per cent per annum on the amount finally awarded as the value of the property as of the date of taking, from said date to the date of payment; but interest shall not be allowed on so much thereof as shall have been paid into the registry. No sum so paid into the registry shall be charged with commissions or poundage.

Upon the application of the parties in interest the court may order that the money deposited in the registry of the court, or any part thereof, be paid forthwith for or on account of the just compensation to be awarded in said proceeding. If the compensation finally awarded in respect of said lands or any parcel thereof shall exceed the amount of the money so received by any person entitled, the court shall enter judgment against the United States for the amount of the deficiency.

Upon the filing of a declaration of taking, the court shall have power to fix the time within which and the terms upon which the parties in possession shall be required to surrender possession to the petitioner. The court shall have power to make such orders in respect of encumbrances, liens, rents, taxes, assessments, insurance, and other charges, if any, as shall be just and equitable.

SETTING DATE FOR TRIAL AND SELECTION OF JURY

SEC. 11. When all the persons who have been summoned or published against in said case, as hereinbefore provided, have either answered or are in default as aforesaid, and all persons under legal disability have answered by their guardians ad litem, or, in the judgment of the court, ample opportunity has been given for the same, the case shall be regarded as ready for trial, and, upon the application of any party to said suit, the court shall forthwith set an early date to be especially fixed by it, not less than 10 nor more than 20 days from the date of such application, for the trial of the issues of law and fact raised in said case and the ascertainment of the compensation or damages to be awarded for the taking of the lands to be condemned. The court shall thereupon order the jury commission to draw from the special box provided for by law the names of as many persons, not less than 20, as the court may direct, and to certify said names to the clerk of the Supreme Court of the District of Columbia as a panel of prospective jurors. The persons so certified shall be thereupon summoned by the United States marshal for the District of Columbia to appear in said court on the day specially fixed for the trial of said cause. Before selecting or impaneling said jury the court may, in its discretion, cause a second, third, or other further list of prospective jurors to be drawn, certified, and summoned in like manner. From the persons so certified and summoned the court, after examination on oath and in open court as to their qualifications, shall select and impanel a jury of five capable and disinterested persons who shall have the qualifications of jurors as prescribed by law for the courts of the District of Columbia, and in addition thereto shall be freeholders of said district and shall not be in the service or employment of the United States or of the District of Columbia.

OATH OF JUROR

SEC. 12. To the jurors so selected and impaneled the court shall administer an oath or affirmation that they are not interested in any manner in the lands to be condemned and that they are not to their knowledge related to any person interested therein, and that they will impartially and to the best of their judgment ascertain, appraise, and award just compensation for the lands to be condemned and taken in said proceeding.

VIEW

SEC. 13. After being selected, impaneled, and sworn, and before hearing the evidence, the jury shall be taken by the marshal upon the lands to be acquired at a time to be fixed by the court in order to view the said lands; and all parties in interest, their attorneys, and representatives shall have the right to be present at such view.

TRIAL

SEC. 14. After such view and the jury shall have returned to the court, the trial of said cause shall be proceeded with before the court and jury. Any person who has appeared in the cause claiming any right, title, interest, or estate in the land to be taken, or compensation on account of the taking of the same, shall have the right to submit evidence concerning the value of such land, parcel by parcel, the nature and extent of his right, interest, or estate therein, and the compensation justly due for the taking of the same. No new structure or substantial alteration of a permanent nature, the purpose or natural effect of which is to enhance the value of the land to be taken, erected, or made thereon after the institution of the condemnation proceedings shall be taken into consideration in assessing and awarding compensation for said land. If the land to be valued shall have been taken by virtue of a declaration of taking, as provided in this act, said land shall be valued for the purposes of compensation as of the date of such taking; and if, by act of the owner or other party claiming to be entitled to compensation, the value of the land for the use for which it is to be taken has been diminished, as by cutting trees, excavating, grading, or otherwise altering its physical condition, allowance, if petitioner so elects, shall be made in assessing compensation for such diminution in value. Every party, whether petitioner or respondent, may except to any ruling of the court admitting or excluding evidence, granting, rejecting, or modifying prayers for instruction, or other ruling made in the cause in like manner as in other civil trials.

VERDICT

SEC. 15. At the close of the evidence the court shall charge the jury as in other trials at law and furnish them with a written form to be used in returning their verdict. The members of the jury may separate when not engaged in the consideration of their verdict. When the jury, or a majority thereof, shall have agreed upon their verdict they shall, through their foreman, so notify the court, which shall thereupon pass an order setting a day for the return of the verdict in open court. The verdict shall be in writing subscribed by the jurors concurring therein, and shall set forth, parcel by parcel, the compensation to be paid for the taking of the lands to be condemned.

SETTING ASIDE VERDICT

SEC. 16. The court shall have power to set aside or vacate the verdict of the jury, or any award contained therein, and to grant a new trial upon the same grounds as in other trials at law and upon the ground that said verdict, or any award contained therein is, in the judgment of the court, grossly excessive, or inadequate, or otherwise unreasonable or unjust. In case the verdict or any award contained therein is set aside or vacated, the court shall award a new trial with respect to the lands as to which said verdict or such award is set aside or vacated; and the court shall fix a date for a new trial and order a new panel of prospective jurors to be drawn, certified, and summoned as hereinbefore provided; and the cause shall be proceeded with as if no such verdict or award had been rendered.

PROCEEDINGS AFTER VERDICT

SEC. 17. No motion for a new trial or to set aside or vacate the verdict, in whole or in part, or any award contained therein, shall be made after the expiration of 20 days, Sundays and legal holidays excluded, from the rendition thereof; and if no such motion be filed within such time, the verdict and the award or awards contained therein shall become final and conclusive, and judgment shall be entered thereon.

JUDGMENT

SEC. 18. In the event that any verdict or any award contained therein shall become final by lapse of time or that any motion filed to set aside or vacate the same or to grant a new trial in respect thereof shall have been denied or overruled, the court shall enter judgment against the United States in favor of the parties entitled for the sum or sums awarded as just compensation, respectively, for the lands condemned for the use of the United States.

PAYMENT OF JUDGMENT

SEC. 19. Any final judgment rendered against the United States under any provision of this act shall have like force and effect as a money judgment rendered against the United States by the Court of Claims in a suit in respect of which the United States has expressly consented to be sued; and the amount of any such final judgment shall be paid out of any specific appropriation applicable to the case, if any such there be; and when no such appropriation exists, said judgment shall be paid in the same manner (except with respect to interest) as judgments rendered by the Court of Claims in cases under its general jurisdiction.

APPEAL

SEC. 20. Any party aggrieved by any final judgment in a proceeding under this act may appeal therefrom to the Court of Appeals of the District of Columbia, and upon such appeal said court shall have power to review said judgment and affirm, reverse, or modify the same as on appeals in other actions at law. No such appeal, nor any bond or undertaking given therein, shall operate to prevent or delay the vesting of title to said lands in the United States, but upon the filing of a declaration of taking or (if no declaration of taking is filed) upon payment to the party entitled or deposit in the registry of the court, of the amount awarded by any judgment, title shall vest in the United States, saving to all parties their right to just compensation. In the event that the compensation finally awarded and adjudged for such lands shall exceed the amount awarded and adjudged by the judgment appealed from, said court shall enter judgment for the deficiency with interest as hereinbefore provided.

PAYMENT OF COMPENSATION INTO COURT

SEC. 21. Payment into the registry of the court for the use of all parties entitled of the sum of money adjudged to be just compensation for the lands to be condemned and taken, or for any parcel thereof, or any interest therein, shall constitute payment of such compensation. Upon such payment the petitioner shall be entitled to an order declaring that the title to the lands in respect of which such compensation is so paid is vested in the United States of America. The money so paid into the registry of the court shall be deemed to be vested in the persons owning or interested in said lands, according to their respective estates and interests, and said money shall take the place and stand in lieu of the lands condemned. The court, upon the application of the petitioner or of any party in interest, shall have power to determine and direct who is entitled to receive payment of the money so paid into the registry, and may, in its discretion, order a reference to the auditor of the court or a special master to ascertain the facts on which such determination and direction are to be made.

DELIVERY OF POSSESSION

SEC. 22. In cases in which possession shall not have been awarded pursuant to a declaration of taking, when the adjudged compensation shall have been paid into the registry as directed in the judgment of the court and a certified copy of such judgment, with a certificate of the clerk of the court showing such payment, has been served upon the person in possession of said lands, such person shall, upon demand, deliver possession thereof to the petitioner. In case possession is not delivered when so demanded, the petitioner may apply to the court without notice (unless the court shall require notice to be given) for a writ of assistance, and the court, upon proof of the service of the copy of the final order or judgment and certificate of the clerk showing payment as aforesaid, shall thereupon cause such writ to be issued, which shall be executed in the same manner as when issued in other cases for the delivery of possession of real property.

AMENDMENTS

SEC. 23. In all proceedings under this act the court shall have power at any stage of the proceeding to allow amendments in form or substance in any petition, citation, summons, process, answer, declaration of taking, order, verdict, or other proceeding, including amendment in the description of the lands sought to be condemned, whenever such amendment will not impair the substantial rights of any party in interest.

GENERAL PROVISIONS

SEC. 24. In all proceedings under this act, where the mode or manner of conducting the proceedings is not expressly provided for by law, the court shall have power to make all necessary orders and give all necessary directions to carry into effect the object and intent of this act and of the several acts of Congress heretofore or hereafter enacted conferring authority to acquire lands for the use of the United States.

PROVISIONS FOR SAVING PENDING PROCEEDINGS

SEC. 25. The repeal, express or implied, of any existing law or the alteration or amendment thereof by virtue of anything in this act contained shall not affect (1) any act done or any right, including the right to appeal, accruing or accrued under the law so repealed, altered, or amended, or (2) any suit or proceeding pending in the Supreme Court of the District of Columbia, or in the Court of Appeals of the District of Columbia, or the Supreme Court of the United States upon writ of error, appeal, certificate, writ of certiorari, or upon application for writ of error, appeal, certificate, or writ of certiorari, at the time of the taking effect of this act; but all suits and proceedings shall be proceeded with and disposed of in the same manner and with

the same effect as if this act had not been passed, save and except only that in any condemnation suit or proceeding for the condemnation of land for the use of the United States pending in the Supreme Court of the District of Columbia in which commissioners of appraisement shall not have been appointed by the court at the time of the taking effect of this act, the trial of said condemnation suit or proceeding shall proceed and be conducted from that point forward in accordance with the provisions of this act; and all evidence as to the value of the property to be condemned and taken shall be given before the court and jury as in this act prescribed and the matter shall be proceeded with and disposed of in the same manner and with like effect as if the proceeding had been originally begun and the petition filed and all prior proceedings had under and pursuant to the provisions of this act and after the taking effect of the same.

PROCEEDINGS ON BEHALF OF THE DISTRICT OF COLUMBIA NOT AFFECTED BY THIS ACT

SEC. 26. This act shall not affect any suit or proceeding begun, now pending, or hereafter to be instituted under chapter 15 of the Code of Law for the District of Columbia, by or on behalf of the Commissioners of the District of Columbia for the condemnation of land for sites of schoolhouses, fire or police stations, or for a right of way for sewers, or for any other municipal use; but as to all such suits and proceedings, and the right of said commissioners to institute the same, said chapter shall be and remain in full force and effect as if this act had not been made.

During the reading of the bill the following occurred:

Mr. SCHAFER. Mr. Speaker, I suggest the absence of a quorum.

The SPEAKER. The gentleman from Wisconsin makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and forty-five Members are present—not a quorum.

Mr. ALDRICH. Mr. Speaker, I move a call of the House.

Mr. LEHLBACH. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 90]

Allen	Cullen	Igoe	Reece
Almon	Darrow	Johnson, Okla.	Reid, Ill.
Andrew	Davey	Jones	Rutherford
Anthony	Dempsey	Kearns	Sabath
Auf der Heide	De Rouen	Kelly	Sanders, N. Y.
Bacharach	Dickinson, Mo.	Kemp	Sanders, Tex.
Bachmann	Dickstein	Kendall	Shreve

Cox	Hudspeth	Quayle	Yates
Crisp	Hughes	Ransley	Yon

The SPEAKER. Two hundred and seventy-two Members are present, a quorum.

Mr. SNELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Clerk will continue the reading of the bill.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that the further reading of the bill be dispensed with.

The SPEAKER. Is there objection?

Mr. SCHAFER. I object.

Mr. GARNER of Texas. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GARNER of Texas. Is the motion to suspend the rules and pass the bill with amendments?

The SPEAKER. With amendments; yes. The Clerk will continue the reading of the bill as proposed to be amended.

The Clerk concluded the reading of the bill.

The SPEAKER. Is a second demanded?

Mr. SCHAFER. Mr. Speaker, I demand a second.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

Mr. SCHAFER. Mr. Speaker, I object.

Mr. ZIHLMAN and Mr. SCHAFER were appointed tellers.

The House divided; and the tellers reported that there were—ayes 98, noes 2.

So a second was ordered.

Mr. SCHAFER. Mr. Speaker, I object to the vote on the ground that there is no quorum present.

The SPEAKER. The gentleman from Wisconsin makes the point of order that there is no quorum present. The Chair will count.

Mr. SCHAFER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SCHAFER. From the fact that the teller vote has not revealed a quorum, it appears that automatically a call of the House on the point of no quorum is ordered.

The SPEAKER. The Chair overrules the point of order. The Chair will count. [After counting.] Two hundred and sixty-five Members are present, a quorum. The gentleman from Maryland is recognized for 20 minutes and the gentleman from Wisconsin is recognized for 20 minutes.

Mr. ZIHLMAN. Mr. Speaker and Members of the House, I am going to be very brief. I will state that the bill before the House is a new condemnation law for the use of the Federal Government. It does not apply to condemnation proceedings of the District of Columbia. It is to amend the condemnation laws for the taking of public land in the District of Columbia. It is a meritorious measure; it is drafted by the Department of Justice and the National Capital Park and Planning Commission, and I certainly hope this bill will pass.

Mr. Speaker, I reserve the balance of my time.

ACQUISITION OF LAND IN THE DISTRICT OF COLUMBIA BY THE UNITED STATES

Mr. SCHAFER. Mr. Speaker, we are considering House bill 13461, making drastic changes in the condemnation proceedings of the District of Columbia. The committee reported this bill on May 15, but has not seen fit to have it brought up for consideration in the House, where full and free debate could be had and opportunity given to offer and consider amendments. The committee reporting this bill have admitted——

Mr. FULBRIGHT. Will the gentleman yield for a question?

Mr. SCHAFER. Yes; I will yield for a question.

Mr. FULBRIGHT. Is the gentleman for or against this bill?

Mr. SCHAFER. I will state to the gentleman that if he will control his Democratic colleagues I will proceed and he will ascertain whether I am for or against the bill.

Mr. FULBRIGHT. I want to say that most of the disorder comes from the opposite side of the aisle.

Mr. SCHAFER. I refuse to yield further. I appreciate the feeling of the membership of this House at this late hour, and over in the other body this morning we witnessed the same spectacle, when a gentleman was exercising his rights under the rules of the other body in representing the views of his constituents——

Mr. KINCHELOE. Will the gentleman yield?

Mr. SCHAFER. Yes; I will yield to the gentleman from Kentucky.

Mr. KINCHELOE. The gentleman said the committee saw fit. He does not mean an epileptic fit, does he?

Mr. SCHAFER. Well, that facetious question does not merit a reply and I refuse to yield further. The Committee on the District of Columbia at this late hour admit that the bill as reported was not in proper shape to pass because the committee has incorporated far-reaching amendments with the motion to suspend. The Members have not even had an opportunity to look at the bill with the drastic amendments incorporated. I for one do not intend to see this legislation logrolled through in the last hour of this session of Congress under suspension of the rules, and have therefore been using every opportunity under the parliamentary situation to prevent its passage, and if that can not be done, to delay its passage so that action can not be completed by the other body before adjournment.

The committee amendments, which the House had no notice of but which you are incorporating in this long bill of 20 pages, provide that in the condemnation proceedings the owners will be paid the assessed valuation and then they will wait until the courts determine the full amount to be paid, but imme-

diately upon payment of the assessed valuation the title to the property will vest in the Government.

This may protect the Government but it does not protect the rights of the citizens.

Mr. BLACK of New York. Will the gentleman yield now?

Mr. SCHAFER. I can not yield right now.

Section 10, as embodied in the bill reported by the committee, is not the section 10 which you are adopting if you vote for the motion to suspend the rules, because the committee has submitted a very drastic amendment to section 10. The committee report states:

> Section 10 provides a method by which, when desired, not only possession but the vesting of absolute title to the land in the United States may be secured by making deposits of the estimated value in the registry of the Supreme Court of the District of Columbia, the right to just compensation for the property taken at the same time vesting in the persons entitled thereto.

The amendment which you are asked to incorporate in the bill, when you vote to pass the bill with the amendments which the committee include in the motion to suspend, provides for the assessed valuation instead of the estimated compensation.

Page 3 of the committee report contains an argument in favor of the passage of the bill reading as follows:

> Third. At present the owner retains the title, possession, and control of the property in this District until the completion of the condemnation proceedings, until the final award is determined, and final payment has been made for the property to be taken. As a result it has occurred that owners, being opposed to the taking, have seriously injured the value of the property as to the public purposes for which it is sought, namely, by cutting down forests, excavating and grading the land, filling valleys and streams, removing the growth and the top soil, and otherwise greatly damaging the property for park development or other public uses. Section 14 has been framed to prevent recurrence of such experiences.

Now, is this Congress in the last hour of the session going to pass a 20-page bill, drastically amended by the committee, without having an opportunity to study the amendment, many Members not having an opportunity even to hear the amendments which are going to so drastically change the condemnation procedure and affect the property rights of the American citizens owning property in the District of Columbia just because, perhaps, in the past there have been a few abuses?

Mr. BLACK of New York. Will the gentleman yield?

Mr. SCHAFER. I will yield for a pertinent question, but not for any political interjection.

Mr. BLACK of New York. I want to point out to the gentleman that the gentleman himself voted for the same sort of amendment to the Mississippi flood control bill when he voted with the gentleman from New York [Mr. LAGUARDIA] and myself on the LaGuardia amendments.

Mr. SCHAFER. I will say to the gentleman I did no such thing. [Laughter and applause.] When I voted for the LaGuardia amendments I knew what amendments the gentleman from New York [Mr. LAGUARDIA] was going to offer to the bill.

Mr. BLACK of New York. They were the same as this amendment.

Mr. SCHAFER. Those amendments were also debated and are not the same in fact or principle as the provisions of this bill.

Mr. BLACK of New York. Does the gentleman think the people of the Mississippi Valley are entitled to as much protection as the people of the District?

Mr. SCHAFER. I fear if Tammany is going to protect the people of the Mississippi Valley they will not get very much protection.

Mr. BLACK of New York. They all voted for the bill.

Mr. SCHAFER. They especially will not get much protection if the practically impossible should happen and we should have a Tammany President, with Mr. Guffey, of alien-property fame, in the Cabinet, if we may take his record in handling the alien-property situation in New York and elsewhere under the Wilson administration as a criterion. We could not then look for much protection for the people of the Mississippi Valley or any of the other taxpayers. [Applause.]

Mr. ABERNETHY. Will the gentleman yield?

Mr. SCHAFER. Yes; I yield.

Mr. ABERNETHY. Does this have anything to do with flood control? The gentleman said something awhile ago about flood control.

Mr. SCHAFER. I will state to the gentleman that the gentleman from New York, one of the assistant chieftains of Tammany, interjected the flood-control question. The bill under consideration does not have anything to do with flood control, but with condemnation proceedings in the District.

Mr. ABERNETHY. What does it concern? What is it all about?

Mr. SCHAFER. Does not the gentleman know?

Mr. ABERNETHY. I would like to know. The gentleman is trying to explain it.

Mr. SCHAFER. Yes; I am trying to explain it, and I believe there are a great many Members of Congress who do not know what it is all about, especially since amendments have been incorporated in the motion to suspend, of which they had no previous notice.

I do not see why the District Committee desires to jam this bill of 20 pages through at this hour. Thirty minutes from now the Congress adjourns. Does that committee hope that the bill will be passed by the Senate at this session? If the bill which changes the condemnation proceedings and the property rights of the American citizens is so urgent, then I say the Committee on the District of Columbia should have made arrangements for its consideration on one of the District days.

We had several District days when Congress adjourned at half past 3 or 4 o'clock in the afternoon. If this legislation were so urgent, why did not the committee bring it before Congress at that time?

Mr. UNDERHILL. I think the gentleman is serious in his position and I want to answer his question. The District has had but two days this session. The last two days that the District was entitled to were taken for other legislation. This bill is necessary and will save the Government, if enacted, a million and a half to two million dollars.

Mr. SCHAFER. On one of those two days when we had the Van Winkle bill up the District Committee of the House was willing to adjourn about 4 o'clock and did adjourn.

Mr. Speaker, I can see the writing on the wall. I know from my experience in prior Congresses that in the closing hours some bills are passed very hurriedly without much consideration. I ask the Members before they cast their vote for this bill, before they adopt this 20-page bill with drastic amendments, under suspension of the rules, to hesitate a moment. The bill can not be engrossed and passed by the Senate at this session, so why be stampeded?

I appreciate the fact that when the Government is in the market to purchase property for a school site or a site for a Government building the owners ask for the property many times its assessed valuation. I can tell the District Committee how they can stop that practice. The present Supreme Court site has been under consideration by the Government for some time. The owners of the property have submitted a valuation and there is a great deal of other vacant property in the District of Columbia. Let us change the site of the Supreme Court and tell the assessors to assess the owners of the present proposed site on the full valuation that they have themselves now placed upon it. You will thereby notify all those who demand exorbitant prices for property which the Government desires to purchase that the Government will not be exploited. [Applause.]

The SPEAKER. The time of the gentleman has expired. The question is on suspending the rules and passing the bill.

The question was taken; and on a division (demanded by Mr. SCHAFER) there were 272 ayes and 34 noes.

Mr. SCHAFER. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from Wisconsin demands the yeas and nays. All those in favor of taking the question by the yeas and nays will rise. [After counting.] Two Members standing, not a sufficient number, and the yeas and nays are refused.

So two-thirds having voted in favor thereof the rules were suspended and the bill was passed.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 325. An act repealing existing law requiring the Postmaster General to report action taken on claims of postmasters;

H. R. 802. An act to correct the military record of Curtis P. Wise;

H. R. 3221. An act for the relief of Ross F. Collins;

H. R. 3241. An act for the relief of Seymour Buckley;

H. R. 3539. An act for the relief of Frank Murray;

H. R. 4380. An act for the relief of Martha Andrew Virginia Johnson;

H. R. 6669. An act fixing the salary of the Public Printer and the Deputy Public Printer;

H. R. 6685. An act to regulate the employment of minors within the District of Columbia;

H. R. 7354. An act to allow the Postmaster General to promote mechanics' helpers to the first grade of special mechanics;

H. R. 7492. An act for the relief of Capt. Louis C. Brinton;

H. R. 8628. An act for the relief of Amos Dahuff;

H. R. 9051. An act to amend section 1 of the act of February 22, 1875, entitled "An act regulating fees and costs, and for other purposes";

H. R. 10073. An act to change the name of Railroad Avenue, between Nichols Avenue and Massachusetts Avenue;

H. R. 10166. An act to amend the Foreign Service buildings act, 1926;

H. R. 10244. An act to credit the accounts of Richings J. Shand, United States property and disbursing officer, Illinois National Guard;

H. R. 10435. An act providing for the extension of the time limitations under which patents were issued in the case of persons who served in the military or naval forces of the United States during the World War;

H. R. 11463. An act to fix the salaries of certain judges of the Territories and insular possessions of the United States;

H. R. 11758. An act authorizing the Secretary of War to grant a right of way for a levee through the Chalmette National Cemetery;

H. R. 11951. An act to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by the acts of March 6, 1920, and February 27, 1926;

H. R. 11981. An act to authorize officers of the Medical Corps to account certain service in computing their rights for retirement, and for other purposes;

H. R. 12064. An act to discontinue certain reports now required by law to be made annually to Congress;

H. R. 12280. An act for the relief of Lula Lewis;

H. R. 12311. An act to provide for the payment of compensation of William J. Tilson.

H. R. 12352. An act to require certain contracts entered into by the Secretary of War, or by officers authorized by him to make them, to be in writing, and for other purposes;

H. R. 12605. An act to enable the Postmaster General to purchase and erect community mail boxes on rural routes and to rent compartments of such boxes to patrons of rural delivery;

H. R. 12938. An act for the relief of the State of Ohio;

H. R. 12952. An act to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by act of March 6, 1920;

H. R. 13039. An act to amend the World War veterans' act, 1924;

H. R. 13048. An act for the relief of James Aloysius Manley;

H. R. 13108. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a toll bridge across the White River at or near Newport;

H. R. 13182. An act authorizing the Secretary of the Navy, in his discretion, to deliver to the custody of the State of Alabama the silver service presented to the United States for the battleship *Alabama;*

H. R. 13248. An act to authorize an increase in the limit of cost of one fleet submarine;

H. R. 13318. An act authorizing the Val Verde County Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near Langtry, Tex.;

H. R. 13399. An act authorizing the Baltimore Gas Engineering Corporation, a Maryland corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near Dunbar, W. Va.;

H. R. 13447. An act authorizing and directing the Secretary of Agriculture to establish and maintain a dairy and livestock experiment and demonstration station for the South at or near Lewisburg, Tenn.;

H. R. 13512. An act to amend the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act, and for other purposes," approved June 3, 1924;

H. R. 13621. An act to authorize preparation and publication of supplements to the Code of Laws of the United States with perfecting amendments, printing of bills to codify the laws relating to the District of Columbia, and of such code and of supplements thereto, and for distribution;

H. R. 13622. An act to amend and supplement the Code of the Laws of the United States of America;

H. R. 13644. An act authorizing the Secretary of Commerce to sell at private sale a portion of the Pointe Aux Herbes Lighthouse Reservation, La.;

H. R. 13651. An act granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Choctawhatchee River in Dale County on the highway now under construction from Dothan to Enterprise;

H. R. 13777. An act authorizing the State of Louisiana and the State of Texas to construct, maintain, and operate a free highway bridge across the Sabine River at or near Burr Ferry, La.;

H. R. 13930. An act to authorize an appropriation for the American group of the Interparliamentary Union;

H. R. 13996. An act granting the consent of Congress to the board of supervisors of Leake County, Miss., to construct, maintain, and operate a free highway bridge across the Pearl River at or near Edinburg, Leake County, Miss.;

H. J. Res. 238. Joint resolution providing for the granting of veterans' proference in civil-service examinations;

H. J. Res. 243. Joint resolution to provide for the striking of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century; and

H. J. Res. 307. Joint resolution to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River.

The SPEAKER announced his signature to enrolled bills and joint resolutions of the Senate of the following titles:

S. 126. An act for the relief of May Gordon Rodes and Sara Louise Rodes, heirs at law of Tyree Rodes, deceased;

S. 343. An act for the relief of Sallie Stapleford, Mrs. J. C. Stuckert, Mary E. Hildebrand, Kate Wright, Mary M. Janvier, Harry L. Gray, Frank D. Carrow, Harry V. Buckson, George H. Swain, Claude N. Jester, and Charles H. Jamison;

S. 363. An act for the relief of Louise M. Cambouri;

S. 433. An act for the relief of Harry C. Bradley;

S. 443. An act for the relief of Larry M. Temple;

S. 444. An act for the relief of H. C. Magoon;

S. 471. An act for the relief of Agnes McManus and George J. McManus;

S. 513. An act for the relief of the Hottum-Kennedy Dry Dock Co., of Memphis, Tenn.;

S. 652. An act for the relief of Edgar Travis, sr.;

S. 1297. An act for the relief of Alice E. Moore;

S. 1486. An act for the relief of the owners of the schooner *Addison E. Bullard;*

S. 1541. An act for the relief of George A. Robertson;

S. 1609. An act recognizing the heroic conduct, devotion to duty, and skill on the part of the officers and crews of the U. S. S. *Republic, American Trader, President Roosevelt, President Harding,* and the British steamship *Cameronia,* and for other purposes;

S. 1645. An act for reimbursement of W. H. Talbert;

S. 1769. An act for the relief of the legal representatives of the estate of Haller Nutt, deceased;

S. 1825. To amend section 12 of the act approved June 10, 1922, entitled "An act to readjust the pay and allowances of commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended by the act of June 1, 1926 (44 Stat. L. 680), so as to authorize an allowance of 3 cents per mile, in lieu of transportation in kind, for persons using privately owned conveyances while traveling under competent orders;

S. 1981. An act for the relief of the owner of Dry Dock No. 6;

S. 2061. An act for the relief of W. H. Kaufman;

S. 2076. An act authorizing the allotment of Carl J. Reid Dussome as a Kiowa Indian, and directing issuance of trust patent to him to certain lands of the Kiowa Indian Reservation, Okla.;

S. 2336. An act for the relief of Nina MacDonald, Zenus V. Johnston, Margaret E. Thompson, Arthur L. Beaman, and May Fee;

S. 2438. An act for the relief of the firm of M. Levin & Sons;

S. 2673. An act for the relief of James E. Trussell;

S. 2738. An act for the relief of C. R. Olberg;

S. 2788. An act for the relief of Charlie McDonald;

S. 2894. An act for the relief of Robert O. Edwards;

S. 3030. An act for the relief of Southern Shipyard Corporation;

S. 3088. An act for the relief of Donald M. Davidson;

S. 3314. An act for the relief of John J. Fitzgerald;
S. 3632. An act for the relief of Commodore J. M. Moore, United States Coast Guard, retired;
S. 3794. An act for the relief of R. E. Hansen;
S. 3919. An act awarding a gold medal to Lincoln Ellsworth;
S. 3931. An act for the relief of Augusta Cornog;
S. 3942. An act for the relief of Maj. Charles F. Eddy;
S. 3954. An act to quiet title in the heirs of Norbert Boudousquie to certain lands in Louisiana;
S. 3991. An act declaring certain designated purposes with respect to certain parts of Santa Rosa Island in Florida to be "public purposes" within the meaning of the proviso in section 7 of the act approved March 12, 1926, entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes;
S. 4022. An act authorizing the Secretary of the Interior to lease land in Stanley County, S. Dak., to Henry A. O'Neil for a buffalo pasture;
S. 4183. An act authorizing the filling of a vacancy occurring in the office of district judge for the northern district of Illinois created by the act entitled "An act for the appointment of an additional circuit judge for the fourth judicial circuit, for the appointment of additional district judges for certain districts, providing for an annual conference of certain judges, and for other purposes," approved September 14, 1922;
S. 4315. An act authorizing and directing the Secretary of War to sell 3,304.8 square feet of the Fort Brown Military Reservation, Brownsville, Tex., to the Gateway Bridge Co.;
S. 4321. An act authorizing the Secretary of the Interior to dispose of two bridges on the San Carlos Indian Reservation, in Arizona, and for other purposes;
S. 4327. An act to relinquish the title of the United States to land in the claim of Seth Dean, situate in the county of Washington, State of Alabama;
S. 4344. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across White River at or near Clarendon, Ark.;
S. J. Res. 5. Joint resolution relating to the immigration of certain relatives of United States citizens and of aliens lawfully admitted to the United States;
S. J. Res. 130. Joint resolution suspending certain provisions of law in connection with the acquisition of lands within the Alabama National Forest;
S. J. Res. 155. Joint Resolution authorizing the Secretary of War to receive for instruction at the United States Military Academy at West Point, Jose J. Jimenez, a citizen of Venezuela.
S. J. Res. 161. Joint Resolution authorizing the President to invite representatives of foreign governments to attend an international aeronautical conference on civil aeronautics in Washington on December 12, 13, and 14, 1928; and
S. J. Res. 164. Joint resolution to appoint a board of engineers to examine and report upon the dam to be constructed under H. R. 5773, the Boulder Dam bill.

MESSAGE FROM THE PRESIDENT

A message from the President of the United States by Mr. Latta, one of his secretaries, announced that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On May 24, 1928:
H. R. 12632. An act to provide for the eradication or control of the European corn borer.

On May 25, 1928:
H. R. 10786. An act authorizing surveys and investigations to determine the best methods and means of utilizing the waters of the Gila River and its tributaries above the San Carlos Reservoir in New Mexico and Arizona;
H. R. 2808. An act for the relief of Ella G. Richter, daughter of Henry W. Richter;
H. R. 5475. An act authorizing the New Cumberland Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near New Cumberland, W. Va.
H. R. 8031. An act for the relief of the Higgins Lumber Co. (Inc.).
H. R. 8926. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across Red River at or near Garland City, Ark.
H. R. 12676. An act to amend section 2 of an act approved February 14, 1926, granting consent of Congress for the construction of a bridge across Red River at or near Fulton, Ark.; and
H. R. 12677. An act to amend section 2 of an act approved March 12, 1928, granting consent of Congress for the construction of a bridge across the Ouachita River at or near Calion, Ark.

On May 26, 1928:
H. R. 5898. An act to authorize certain officers of the United States Army, Navy, and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered;
H. R. 4926. An act for the relief of the Pocahontas Fuel Co. (Inc.);
H. R. 9380. An act for the relief of Frank E. Shults;
H. R. 10014. An act for the relief of A. F. Gallagher;
H. R. 11134. An act to authorize appropriations for construction at military posts, and for other purposes;
H. R. 12063. An act for the relief of the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased;
H. R. 13342. An act to authorize a per capita payment to the Pine Ridge Sioux Indians of South Dakota;
H. R. 12571. An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Iuka, Ky.;
H. R. 13141. An act authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.;
H. R. 13481. An act granting the consent of Congress to the Alabama State Bridge Corporation to construct, maintain, and operate a bridge across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama;
H. R. 8742. An act to authorize the Secretary of War to convey to the city of Baton Rouge, La., a portion of the Baton Rouge national cemetery for use as a public street;
H. R. 12953. An act to authorize the Board of Managers of the National Home for Disabled Volunteer Soldiers to accept the title to the State camp for veterans at Bath, N. Y.;
H. R. 10649. An act providing for the transfer of a portion of the military reservation known as Camp Sherman, Ohio, to the Department of Justice;
H. R. 1931. An act for the relief of Daniel Mangan;
H. R. 12894. An act to extend the times for commencing and completing the construction of an overhead viaduct across the Mahoning River at or near Niles, Ohio;
H. R. 13380. An act authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.;
H. R. 12235. An act authorizing B. F. Peek, G. A. Shallberg, and C. I. Josephson, of Moline, Ill.; J. W. Bettendorf, A. J. Russell, and J. L. Hecht, of Bettendorf and Davenport, Iowa, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Tenth Street in Bettendorf, State of Iowa;
H. R. 13069. An act granting the consent of Congress to the State of Minnesota to construct, maintain, and operate a free highway bridge across the Mississippi River at or near Aitkin, Minn.;
H. J. Res. 47. Joint resolution for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased, United States Marine Corps;
H. R. 1406. An act granting six months' pay to Lucy B. Knox;
H. R. 1951. An act granting six months' pay to Frank A. Grab;
H. R. 2272. An act for the relief of William Morin;
H. R. 2472. An act for the relief of Emile Genireux;
H. R. 2477. An act for the relief of Joseph S. Carroll;
H. R. 2494. An act granting six months' pay to Vincentia V. Irwin;
H. R. 3971. An act for the relief of the owners of the schooner *William Melbourne;*
H. R. 4652. An act for the relief of Charlie R. Pate;
H. R. 4954. An act for the relief of Thomas Purdell;
H. R. 5897. An act for the relief of Mary McCormick;
H. R. 5910. An act for the relief of Ralph Ole Wright and Varina Belle Wright;
H. R. 7268. An act for the relief of John Hervey;
H. R. 7708. An act for the relief of John M. Brown;
H. R. 10702. An act for the relief of Elbert L. Cox;
H. R. 11917. An act granting the consent of Congress to the county of Cook, State of Illinois, to widen, maintain, and operate the existing bridge across the Little Calumet River, in Cook County, State of Illinois;

H. R. 11950. An act to legalize a pier and wharf in Deer Island thoroughfare on the northerly side at the southeast end of Buckmaster Neck at the town of Stonington, Me.;

H. R. 11978. An act granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service;

H. R. 12100. An act to amend the act entitled "An act granting the consent of Congress to the Gateway Bridge Co. for construction of a bridge across the Rio Grande between Brownsville, Tex., and Matamoros, Mexico," approved February 26, 1926;

H. R. 11980. An act granting the consent of Congress to the Fisher Lumber Corporation to construct, maintain, and operate a railroad bridge across the Tensas River in Louisiana;

H. R. 12031. An act to extend the times for commencing and completing the construction of a bridge across the Rio Grande at or near a point 2 miles south of the town of Tornillo, Tex.;

H. R. 12479. An act authorizing the sale of all of the interest and rights of the United States of America in the Columbia Arsenal property, situated in the ninth civil district of Maury County, Tenn., and providing that the net fund be deposited in the military post construction fund;

H. R. 12694. An act authorizing the Secretary of the Navy to provide an escort for the bodies of deceased officers, enlisted men, and nurses;

H. R. 12806. An act authorizing J. H. Harvell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across New River at or near McCreery, Raleigh County, W. Va.;

H. R. 12623. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Sabine River at or near Starks, La.;

H. R. 12913. An act to extend the times for commencing and completing the construction of a bridge across the Allegheny River at or near the borough of Eldred, McKean County, Pa.;

H. R. 1616. An act for the relief of Carl C. Back;

H. R. 2657. An act for the relief of Thomas Huggins;

H. R. 6049. An act to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments;

H. R. 12624. An act to amend section 17 of the act of June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended;

H. J. Res. 292. Joint resolution authorizing the President to invite the States of the Union and foreign countries to participate in the International Petroleum Exposition at Tulsa, Okla., to begin October 20, 1928;

H. R. 6569. An act for the relief of Frank Hartman;

H. R. 10714. An act for the relief of T. Abraham Hetrick;

H. R. 12877. An act authorizing the Los Olmos International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near Weslaco, Tex.;

H. J. Res. 140. Joint resolution to amend sections 1 and 2 of the act of March 3, 1891;

H. J. Res. 318. Joint resolution amending the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924 (43 Stat. 461), as amended by the joint resolution approved March 3, 1927 (44 Stat. 1405);

H. J. Res. 268. Joint resolution requesting the President to negotiate with the nations with which there is no such agreement treaties for the protection of American citizens of foreign birth or parentage from liability to military service in such nations;

H. R. 12706. An act for the relief of the town of Springdale, Utah; and

H. R. 6908. An act for the relief of Michael Ilitz.

On May 28, 1928:

H. R. 4963. An act for the relief of the Randolph-Macon Academy, Front Royal, Va.;

H. R. 12110. An act to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended;

H. R. 12038. An act to authorize the acquisition of certain patented land adjoining the Yosemite National Park boundary by exchange, and for other purposes;

H. R. 12381. An act granting pensions and increase of pensions to certain soldiers and sailors of the regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors;

H. R. 11471. An act extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas;

H. R. 13446. An act to amend the national defense act;

H. R. 14057. An act for the relief of Edmund F. Hubbard; and

H. R. 6518. An act to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services"; and

H. J. Res. 77. Joint resolution concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield, and State of Ohio;

On May 29, 1928:

H. R. 1. An act to reduce and equalize taxation, provide revenue, and for other purposes;

H. R. 7378. An act for the relief of Wade Allen and Ed Johnson;

H. R. 9194. An act authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian Tribes in Hitchcock County, Nebr., fought in the year 1873;

H. R. 11468. An act authorizing the Secretary of the Interior to execute an agreement or agreements with drainage district or districts providing for drainage, and reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of such district or districts that may be benefited by the drainage and reclamation work, and for other purposes;

H. R. 12030. An act to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes;

H. R. 13563. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors;

H. R. 13873. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes;

H. R. 7373. An act providing for the meeting of electors of President and Vice President and for the issuance and transmission of the certificates of their selection and of the result of their determination, and for other purposes; and

H. R. 10487. An act to amend the World War adjusted compensation act, as amended.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to take from the Speaker's table the bill S. 3936. Is there objection?

Mr. SCHAFER. Mr. Speaker, I reluctantly object.

FRED R. MILLER

Mr. MacGREGOR. Mr. Speaker, I present a privileged report from the Committee on Accounts, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 142

Resolved, That there be paid, out of the contingent fund of the House, $200 to Fred R. Miller, for extra and expert services as expert examiner to the Committee on Pensions from January 1, 1928, to March 3, 1928, first session of the Seventieth Congress.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

WALTER C. NEILSON

Mr. MacGREGOR. Mr. Speaker, I present another privileged report from the Committee on Accounts.

The Clerk read as follows:

House Resolution 151

Resolved, That there be paid out of the contingent fund of the House $1,000 to Walter C. Neilson for extra and expert services to the Committee on Pensions, from March 4, 1927, to January 4, 1928, as examiner to said committee by detail from the Bureau of Pensions pursuant to law.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

MARGARET ELMA NAYLOR

Mr. MACGREGOR. Mr. Speaker, I present a further privileged report from the Committee on Accounts.

The Clerk read as follows:

House Resolution 129

Resolved, That there be paid out of the contingent fund of the House $200 to Margaret Elma Naylor for extra and expert services to the Committee on Invalid Pensions, from December 15, 1926, to February 15, 1927, as assistant clerk to said committee, by detail from the Bureau of Pensions, pursuant to law.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

SITTING OF COMMITTEE ON IMMIGRATION AND NATURALIZATION DURING THE RECESS

Mr. MACGREGOR. Mr. Speaker, earlier in the day I objected to a resolution presented by the gentleman from Washington [Mr. JOHNSON]. Since that time the resolution has been revised, and I now withdraw my objection and ask that it be considered.

The SPEAKER. The Clerk will report the resolution.

The Clerk read, as follows:

House Resolution 238

Resolved, That the Committee on Immigration and Naturalization be authorized to sit during the recess and to employ necessary clerical assistance at a cost not exceeding $500, payable from the contingent fund of the House.

The SPEAKER. Is there objection?

There was no objection.

The resolution was agreed to.

YORKTOWN SESQUICENTENNIAL COMMISSION

The SPEAKER. The Chair appoints as members of the Yorktown Sesquicentennial Commission, Mr. FROTHINGHAM, of Massachusetts; Mr. BACON, of New York; Mr. ROY G. FITZGERALD, of Ohio; Mr. BYRNS, of Tennessee; Mr. CRISP, of Georgia.

NICHOLAS J. SINNOTT

Mr. SMITH. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. SMITH. Mr. Speaker, it seems appropriate in this closing hour of the session that we should pay tribute to one of our colleagues, Hon. NICHOLAS J. SINNOTT, of Oregon, whose resignation to the governor of his State was read this afternoon. It was my pleasure to enter this House 15 years ago with Mr. SINNOTT, who, as you know, is retiring in order to accept an appointment on the bench of the Court of Claims by appointment by the President. I have served with Mr. SINNOTT on the Committee on Public Lands and on the Committee on Irrigation and Reclamation during our entire service here together. I am sure that everyone in the House has great respect, admiration, and affection for our colleague who is retiring. [Applause.]

We not only respect and admire Judge SINNOTT because of his ability but also because of his genial personality. Some men succeed in this House because of their intellectual ability, some because they are good speakers, some because they are very learned men, and others largely because of the esteem and affection that the Members have for them. Our friend Judge SINNOTT possesses all of these attributes. [Applause.]

There are two kinds of statesmen in every legislative body. Some are constructive statesmen, who originate and advocate certain changes in the laws of our country. Others fill a very useful place by being obstructionists. Probably those who obstruct legislation are just as important in our form of government as are those who propose legislation. Judge SINNOTT has originated and secured the enactment of a great many laws affecting the western country, particularly, which has been very helpful in developing the resources of the West and has helped to defeat legislation which he regarded as unwise. As chairman of the Committee on the Public Lands, and as a member of the Committee on Irrigation he has made an impress on the Congress and the country, and has to his credit the enactment of splendid laws.

Now that he is about to leave us, it seems most appropriate that we should express our very great regret at his leaving and our esteem for him and our good wishes for him in the important position he is about to assume. [Applause, the Members rising.]

The SPEAKER. The gentleman from Oregon [Mr. HAWLEY] is recognized. [Applause.]

Mr. HAWLEY. Mr. Speaker, in the retirement of my colleague, Hon. NICHOLAS J. SINNOTT, from this House Oregon loses one of the most valuable men who have ever entered into her service. He commands the respect and confidence of the entire State, as he has earned such standing in Congress. His statements are believed as those of an honorable man of great intelligence and ability, who thoroughly prepares himself on any measure and who intends his opinions to stand any test of investigation, no matter how exacting. He is a great lawyer and understands the land laws better than any other person in this country. His discussions are characterized by lucid presentation and forceful analysis.

His kindly character and friendly attitude have won and held the affection and admiration of his associates. He extends a helping hand to those who seek his aid in just causes. I never knew him to do an unkind act or speak an unjust word. He has been a powerful and beneficial influence in the behalf of the western half of the United States, over which the jurisdiction of the Committee on the Public Lands, of which he is chairman, extends. Lasting monuments to him in the form of material and social developments and benefits are found in every Western State. In his work he has developed a real statesmanship. We profoundly regret to have him leave Congress, but extend to him our heartfelt best wishes in his new work. His steady advancement has been due to indefatigable industry, inherent and developed ability, and great nobility of character.

The SPEAKER. The gentleman from Oregon [Mr. SINNOTT] is recognized. [Applause.]

Mr. SINNOTT. Mr. Speaker and my colleagues in the House, this is indeed a very solemn occasion for me, if not a sad occasion. It is my last day of service in the House; in the House where for 15 years I have had most pleasant relations upon both sides of the aisle. I do not think that I have had a harsh word with any Member of the House in all that time. My relations have been so pleasant that I sever them with mingled emotions and with a great deal of regret.

The gentleman from Idaho [Mr. SMITH] has kindly referred to the legislation coming from the Committee on Public Lands. If we have passed legislation of national import, it has been due to the confidence that the House has had in the Committee on Public Lands. The work upon that committee is very exacting. Every bill has to be carefully scrutinized. In the legislation coming from that committee there lurk more or less the possibilities of scandal unless the bills are carefully scrutinized.

I am glad to say that no bills coming from that committee since I have been chairman have been vetoed by the President except one bill, which the Members themselves, the delegations from the States interested, requested the President to veto, so that they might give the matter more careful consideration.

I regret to sever my relations with the House. I regret to sever my official relations with our distinguished fair-minded Speaker. [Applause.] He is a whole year, a whole month, and a whole day older than I am. That is the reason why the top of his head is whiter than mine, and that is the reason why I can affectionately refer to him as the "Old Nick." [Laughter and applause.] And I will say that the hardest and most embarrassing vote I ever cast in this House was when he was a candidate for Speaker and Martin B. Madden was also a candidate. There was a difficult choice to make. We loved them both. As Homer says:

> Not hate, but glory, made these two chiefs contend,
> And each brave foe was in his soul a friend.

[Applause.]

After this demonstration of your regard and affection I shall always consider this House as amicus curiæ of the Court of Claims. [Applause.]

DEMOCRATIC HOPES IN COMING CAMPAIGN

Mr. HOWARD of Nebraska. Mr. Speaker, I ask for permission to speak for five minutes.

Mr. SNELL. Make it one minute.

The SPEAKER. The gentleman from Nebraska asks unanimous consent to speak for three minutes. [Laughter].

Mr. HOWARD of Nebraska. Mr. Speaker, this curtailment of my rights will be distressing, but I will do the best I can. I do not want any of you Republicans to listen. I am going to talk to Democrats alone for three minutes.

A year ago, my friends, there was no hope in any Democratic heart in all the world, but to-night the fires are burning brightly on the Democratic hearth, and why? Until this

blessed year of 1928 we have never entered a Democratic presidential campaign when any of us have had any hope that we would have enough money even to pay the postage bill. [Laughter.] But it is different now. I naturally go out and seek bucolic surroundings when I get a chance, and out in the country recently I overheard the Democratic donkey and the Republican elephant talking together. I could not understand all that I heard.

The Democratic donkey had told about the misfortunes and hardships he had met heretofore without money, but now he looked the elephant square in the eye and said (paraphrasing dear old Milton Nobles in The Phoenix): "In the coming contest I will have an eye as bright and a kick as strong, a voice as loud, and a purse as long as that of the beast I have to grapple with." [Laughter and applause.]

I hand this to you, my Democratic friends, in the hope that it may be as encouraging to you as the dream of it is sweet to me. [Applause.]

EXTENSION OF REMARKS

REVIEW OF MY RECORD IN CONGRESS

Mr. RATHBONE. Mr. Speaker, to my constituents, the people of Illinois: Under the leave granted to Members of the House of Representatives of printing in the RECORD their own statements on any subject, I am taking this opportunity to give a brief review of my record in Congress. I am serving my third term in the House of Representatives, having been elected in 1922 a Member of the Sixty-eighth Congress. I am again a candidate for reelection as Congressman at large. I shall stand or fall by the record I have made, and I welcome this opportunity of rendering an account of my stewardship to my friends and constituents, who have so generously given me their confidence and support.

BUSINESS

I have consistently supported throughout my congressional career economy and business management in all the affairs of government. I have voted for tax reduction, lowering of the income-tax rates, raising of the exemption limits, and the cutting down of the nuisance taxes, as well as the abolition of the war tax on automobiles and auto parts. I have also voted for a revision of the postal rates and for legitimate and necessary expenditures on public buildings.

MERCHANT MARINE

I have voted for the merchant marine bill in order to promote American commerce and keep our flag upon the seas.

PRIMARIES

Nothing is more important to all legitimate business and to the welfare of the Nation in general than that the confidence of the people in their Representatives and Government should be maintained. For this reason, I have introduced a resolution for an amendment to the Constitution of the United States giving power to Congress, which it would seem it does not now possess, to legislate upon the subject of contributions and expenditures in primary elections. I have also introduced a resolution providing for a change in the rules of the House of Representatives which would make the present corrupt practices act applicable to primaries, so that any candidate violating the provisions of the act would be prevented from taking his seat. It is my firm belief that primary elections, being well-nigh, if not quite, as important as general elections, should be safeguarded in the interests of candidates and of Congress, as well as of the Nation.

AGRICULTURE

Every measure that has come before the House of Representatives since I have been a Member of that body in the interests of agriculture has had my earnest and enthusiastic support. Among these have been the various bills for the stabilization of prices for farm products, the corn sugar bill, the corn borer bill, and the Hoch resolution providing for a reduction of freight rates on farm products. The farmers of our State and Nation can count upon my continued cooperation with them in all their efforts to bring about a better condition of American agriculture.

FEDERAL EMPLOYEES

I have bent every effort to improve the condition of the Federal employees in the various branches of the service. Among other things, I have voted for the increase of salaries for postal workers, for a night differential pay bill, and for reasonable allowances to fourth-class postmasters. The rural letter carriers are aware of what I did in securing them a Christmas holiday. I have also supported the Lehlbach and Welch bills and the bill for the customs employees.

CHILD LABOR

The welfare of the children employed in gainful occupation has also had my most sympathetic consideration. Among other measures in their interests that I have supported have been the child labor amendment and the child labor law for the District of Columbia.

RAILROAD MEN

The railroad workers know the part that I played in the battle to secure the abolition of the Railroad Labor Board and of the success which finally crowned our efforts in securing the enactment of the present railroad disputes act. I also helped to pass the longshoremen's and harbor workers' bill, the bills providing for increased salaries for the policemen, firemen, and school-teachers of the District of Columbia, and the workmen's compensation bill.

MINERS

The condition of the coal industry has also claimed my attention. I have made every effort to secure what I believed to be a more fair adjustment of freight rates on coal shipped from the middle-western fields. I served as chairman of a committee of Congress which investigated the subject of prices of coal. I have also introduced a bill for the rehabilitation of the coal industry and better conditions for the miners.

UNEMPLOYMENT

Among the bills which I have introduced in the interests of the working men and women of the United States are two bills on the subject of unemployment, namely, the setting aside of reserve funds for the construction of public works during slack times and the establishment of a system of labor exchanges. Realizing that industrial accidents are a great menace to the well-being of our people, I have introduced a bill providing for a division of safety in the Bureau of Labor Statistics, in order to guard against industrial accidents and occupational diseases. Two other bills for the benefit of workers in special branches of industry that I have been fighting for are one for the laborers in the Postal Service and another for the employees in the Bureau of Animal Industry engaged in meat inspection and providing for the payment of time and a half for overtime work.

IMMIGRATION

Believing that it is essential that America should be kept American and that our standard of living and citizenship should not be lowered, I have wholeheartedly supported restriction of immigration. However, I have also supported the Jenkins' bill, which sought to mitigate some of the harshness of the present law and to permit of parents and children of immigrants already in this country to be reunited with their families, without the number already established by law being exceeded.

WATERWAYS

The improvement of our waterways has been a question of much interest to me for many years. About 10 years ago I served as the chairman of a committee of business men of Chicago, which investigated this subject. I supported the rivers and harbors bill, which became law and which was of great importance to the people of Illinois and the Middle West. This bill removed the remaining obstructions to navigation in the Illinois River, authorized a sufficient diversion of water from the Great Lakes and made possible a deep waterway to the Gulf of Mexico. At the same time I took up with General Jadwin the subject of the pollution of Chicago's water supply through the dumping of industrial waste by industries in Indiana into Lake Michigan, which I am happy to say has been stopped. I have also supported the Mississippi barge bill, as well as the flood control bill for the Mississippi Valley, which has just become law.

POWER

It has been my firm belief that one of the greatest developments of the immediate future, as well as blessings to the human race, lies in the furnishing of cheap power and electricity to the people. In order that the people may not be exploited and may have the full benefit of scientific development of electric power in the home and on the farm at the least cost, I have supported such measures as the Muscle Shoals and Boulder Dam bills, which kept such great public enterprises in the hands of the Government for the benefit of all the people.

ROADS

A national system of good roads is, in my judgment, one of the greatest needs of the Nation. For this reason I have introduced a bill providing for the construction of a transcontinental highway. I have also voted for Federal aid to good roads. I was also the chairman of the committee which drafted and secured the enactment of a traffic act for the District of Columbia.

VETERANS

Hardly a day has passed since I have become a Member of Congress that I have not had an opportunity of rendering some aid to service men or their dependents. There has not been

a measure in their interests that I have not gladly supported, among these being the adjusted compensation act, various hospitalization bills, the disabled emergency officers' bill, and the Civil and Spanish War pension bills. At the instance of the Veterans of Foreign Wars, I have introduced a bill providing for a system of pensions for World War veterans.

RADIO

Firmly believing that the radio is one of the greatest civilizing agencies of the present age, I have supported legislation to bring order out of chaos, prevent interference, and place broadcasting on a sound and permanent basis.

PRESERVING HISTORIC MEMORIES

The memory of the past is the inspiration of the future. Believing firmly in the importance of preserving historic sites, I have introduced a number of bills, which have aroused great interest throughout the Nation. Among these is the bill for the purchase of the famous Oldroyd collection of Lincoln relics, which has become a law. Other bills of a similar character are three bills providing for the survey and construction of Lincoln memorial highways running through and past practically all of the places where Abraham Lincoln and his parents lived and where the most important events of his life took place before he went to Washington. I have also introduced a bill for the reconstruction of Old Ford's Theater and the making of that historic building into a Lincoln museum and central headquarters of the Grand Army of the Republic, a bill for the rehabilitation of the house where Lincoln died and a bill for the erection of a suitable monument to George Rogers Clark at Fort Gage, Ill.

FOREIGN RELATIONS

While I have supported every measure for reasonable national defense, I have also done everything in my power to promote international good will and the peace of the world. I offered an amendment to the naval appropriation bill in the Sixty-eighth Congress, which was later adopted, in favor of the cooperation of this country with other nations in an attempt to bring about a further limitation and reduction of naval armaments. I have also sought to define what I conceived to be the true policy which this country should follow in the matter of our foreign investments by a resolution, which I have introduced. This resolution contains a declaration that the United States will not go to war, intervene, nor exert armed or economic pressure upon other nations in order to compel the payment of private debts.

I trust that the foregoing brief summary will give to my constituents and to those interested some idea of the things that I have stood for. I shall stand for the same principles in the future. My record is my platform.

I am deeply grateful to the 7,000,000 people of the State of Illinois for their confidence and support. I have but one ambition—to serve them and the Nation to the very best of my ability.

BUSINESS CONDITIONS IN 1928

Mr. HOFFMAN. Mr. Speaker, the American people have grown to expect, in presidential election years, unusual and depressing business conditions, and it is therefore not surprising that the early months of 1928 should find a portion of them gullibly accepting wild estimates of unemployment and making ready to gaze at the pessimistic pictures that are bound to be painted during the coming weeks of the campaign by artists who delight in daubing the economic canvas with gloomy colors.

The habit of looking forward to untoward conditions in presidential-election years was formed years ago, long before the Federal reserve system came into being and long before we had shown our ability to withstand fluctuations in industry. In days gone by the approach of a presidential year was believed to threaten the integrity of the monetary system of the country, but that this was a fallacy is shown quite conclusively by a survey made recently by the Cleveland Trust Co., which sets out the interesting fact that "business has improved in election years more often than it has declined, for in 7 of 12 cases the year has closed with business at a higher level than it held when the year opened."

We are nearing the end of the first session of the Seventieth Congress, and it may be well to review the business situation of our country at this time fairly and impartially, so that we may take back to our people a picture of existing conditions. We may tell them that while Bureau of Labor statistics show that there is less employment than in recent years, that the total wages of labor hold up exceedingly well, and that there has been but a slight decline in purchasing power. Building activities are on the increase, the steel business is increasing in volume, the electrical industry continues to expand, as does the automobile business and the lumber business. Statements made by the banks of the country in response to the last call of the Comptroller of the Currency, February 28, indicate heavy deposits and a healthy improvement in banking conditions. Bond prices, on the average, are higher; the volume of trading in stocks is breaking records, and prices have advanced in many listed stocks over the 1927 levels.

Francis I. Jones, director general of the United States Employment Service, says:

The horizon is clearing, and the employment outlook is encouraging. The iron and steel industry, long recognized as a reliable barometer, has shown a definite improvement in both production and employment. Orders for structural materials, railroad cars, rails, and other equipment, not to mention the increase in the demand for automobile materials, practically assure a steady increase to the forces employed in this basic industry. In view of this, there must follow a corresponding increase in allied plants and factories.

WILD ESTIMATES ON UNEMPLOYMENT

On March 5 the Senate passed the Wagner resolution, directing the Secretary of Labor to conduct an investigation and report on unemployment in the United States. In support of his resolution Senator WAGNER, alarmed at "abominable unemployment conditions," stated that he had much evidence of unemployment at hand, and summarized it as follows:

(1) Reports of the Bureau of Labor Statistics show a decline of more than 15 per cent in the number employed in manufacturing establishments. This, of course, does not completely show the extent of unemployment, for many still on the pay roll are employed only part time and are therefore partially unemployed.

(2) A decline of 13 per cent in the forces employed by Class I railroads of the country and a drop in freight-car loadings, with the lessened business activity which that portends.

(3) A sharp increase in the ratio of applicants for work to the number of positions listed by employment agencies.

(4) Account must further be taken of two additional factors, namely, that there has been at least a 5 per cent increase of population between 1923 and 1928, thereby increasing considerably the number seeking employment, and a net flow of population from farm to city of 3,100,000. Of this number, approximately 1,000,000 are in the wage-earning class.

Secretary of Labor Davis did investigate and report. Using the same experts who in 1921 found a shrinkage in pay rolls of 5,735,000, he reported that this year the shrinkage was 1,874,050. The Bureau of Labor Statistics made the survey. One of the leading economists of the United States, Ethelbert Stewart, is the executive head of this bureau. He has had over 40 years' experience in the statistical work of the Department of Labor, and was advanced by President Wilson from chief statistician to his present position, in which he was retained by President Harding and President Coolidge. His bureau maintains contact with 10,772 manufacturing plants in all parts of the country, and it is thus with some degree of authority that Mr. Stewart, whose honesty and accuracy has never been questioned, can say that the number of people out of work is "a very small percentage of the number at work."

In endeavoring to estimate the number of persons unemployed with the greatest degree of accuracy possible under available machinery, the bureau experts took the year 1925 as a standard of comparison, because it was a census year for manufacturing industries and thus provided definite figures on the average or normal number at work. Nineteen hundred and twenty-five was a good year, with business prosperous, wages good, labor well employed, and savings deposits high, yet in comparison with that year it was found that the shrinkage was but 1,874,050. How different from the cry of the alarmists that there are 5,000,000 people out of work.

The "shrinkage" in unemployment among wage earners, including manufacturing, transportation, mining, agriculture, trade, clerical and domestic groups, was said to be 7.43 per cent on the basis of those employed in 1925. Employment in manufacturing was 8,383,781 in January, 1925, as against 7,739,907 for January, 1928. Railroad employment figures were 1,752,589, against 1,643,356 in the initial month of the current year.

Estimates of unemployment ranging from 2,000,000 to 5,000,000 are "wild and harmful guesses," said Secretary Davis.

In the best of times—

He declares—

there are always about 1,000,000 people out of work in the United States. Some are ill or injured. Many have left a job in one city to take a job in another. Some are restless and nomadic. The seasons affect many in the building and garment trades and in farm and outdoor

work. These may be only temporarily out of employment, but on the books from which the records in the Department of Labor are taken these are rated as "unemployed."

It had been widely heralded that there were 75,000 wage earners out of employment in Baltimore. A police census was taken of the city of Baltimore, under the direction of the commissioner of labor of Maryland and the Commissioner of Labor Statistics of the United States Department of Labor. It was found that there were 15,473 wage earners unemployed. Similar statements concerning the volume of unemployment in other cities throughout the country were, upon investigation, found to be greatly overstressed.

FACTORS IN UNEMPLOYMENT SITUATION

There is admittedly a falling off in the number of people employed in agriculture and mining compared with a few years ago. The textile industry, too, is below normal, and has been for some time, both in the North Atlantic section and in some of the southern textile districts. There is a good deal of unemployment in the soft coal districts.

However, among contributing causes of unemployment, Secretary Davis mentions the floods in the Mississippi Valley and in New England, the Florida tornado, the 253,023 immigrants entering the United States last year, and the 2,000,000 boys and girls who become of wage-earning age each year.

The wonder is—

he says—

is that, considering what the country has been through, we have not had an economic catastrophe. * * * We have witnessed a serious disturbance of more than a year's duration in the soft coal industry, and the temporary closing of the largest single motor industry for readjustment. As a consequence we have had a business recession, though comparatively slight and passing.

On top of this, new automatic machinery is steadily displacing hand labor. New scientific management methods and labor-saving devices enable many industries to turn out a greater production than ever, with fewer workers than ever. To cite a single instance, the railroads to-day are handling a record tonnage of freight with vastly fewer men. The same process is going on in industry. And the jobs thus wiped out are gone forever.

GREAT INCREASE IN EMPLOYMENT

In the last five or six years there has been great expansion of employment in many major industries. Between 1921 and 1926 the radio industry is estimated to have absorbed 125,000 workers. The "United States Banker" reports that the automotive industry, including workers in garages, gas stations, on bus lines, as chauffeurs, etc., has given employment to approximately 758,000 more people. The telephone and cable people believe that there are about 73,000 more workers in their line. Additional workers in the electric light and power field are estimated at 53,000; electric refrigeration 20,000; oil heating 10,000; insurance agents 96,000; mail order houses 8,000; construction 100,000. In the professional group, according to this magazine, there are 232,000 more teachers and professors; 25,000 more dentists, 22,000 lawyers and judges, and 150,000 more employed in the motion-picture industry.

While the total employment is less than in recent years, the total wages of labor holds up well, and thereby the usual depressing cycle of events to date has been broken. It is usually the case that unemployment results in lower purchasing power and reduced consumption, but, using the best methods available, it is found that wages have only declined, in comparison with 1919, to 97.7 per cent, while employment has fallen off to 87.9 per cent.

The outlook is most encouraging. We have been able to meet rapid and vital industrial changes, with but little unemployment. Seasonal work is picking up to increase the number of workers and the total pay-roll disbursements. There will be vast municipal, State, and National construction projects to absorb a large percentage of the unemployed.

"Calamity howlers" might profitably employ the time they spend in painting depressing pictures in endeavoring to place in jobs those they know to be unemployed; to exaggerate the present condition can only tend to cause further uneasiness and to defer the return to better times, with every man and woman who want to work in some form of employment.

When it is considered that the Republican Party came into office following an administration that left behind it nearly 6,000,000 of unemployed; that it put these millions back to work and has further absorbed all but a fraction of the millions who have come into labor's ranks through immigration and by reason of attaining working age, and has kept these millions at work despite sweeping advances in labor-saving devices and business methods, it would seem to me that those who would use the "unemployment" cry as a political issue are in reality focusing the attention of the American people upon the great constructive accomplishments of the administration they seek to discredit.

Under President Coolidge we have to-day attained a proud position among the countries of the earth. We have a wealth in dollars undreamed of and our people have investments in every country of the globe. We have a staggering array of physical plants, vast deposits of natural resources, and the highest standard of living in the world. In this glorious environment let every worth-while American pledge his best efforts to keep his country prosperous, so that everyone who desires to do so may be steadily employed, and at good wages.

HERBERT HOOVER'S BOYHOOD IN IOWA

Mr. COLE of Iowa. Mr. Speaker, there was recently organized in the Iowa district which I represent in Congress what is called the Cedar County Hoover Farm Club. Those who read about this in the current news may not have understood its significance. Under leave to extend my remarks in the RECORD I will relate briefly the story back of this organization.

It was in Cedar County, Iowa, in what was then the village of West Branch that Herbert Hoover was born in 1874. The house in which he was born was only once removed from a log cabin. Fortune did not smile on that birth; but neither did poverty frown so long as there was a willing father to toil for the little family.

But if the house in which Herbert Hoover was born was humble the environment of that birth was fine. The country around West Branch is so fair to look upon and it is so abundant in those resources out of which strong men and noble women are produced that if one were permitted to choose the place of his birth, what need to look further?

Herbert Hoover was born not only in a typical American environment but of one of the basic American stocks, a stock from which our Republic has derived many of its most purposeful men, including Theodore Roosevelt and George W. Goethals in recent history.

The American ancestry of the family begins with one Andrew Hoover who in 1740 came from Holland and settled in Maryland. He was accompanied by two brothers. They were members of the Society of Friends, called Quakers. The family, no doubt, derived its religious views direct from William Penn himself. Penn's mother was a woman of Holland who taught her great son the language of her own country, so that he could preach in Dutch as well as in English. In the days of his ministry he sojourned often in Holland and made there many converts among his mother's people. Many of these followed him to America.

The Hoovers, like other Americans of that period, became a migratory people. The lure of those times was ever westward into the great open spaces beyond the mountains. Their first migration was to North Carolina and from there to Ohio in 1802. In Ohio they tarried for nearly two generations. But a newer land of promise began to draw hardy and venturesome men when Iowa was admitted as a State in 1846.

It was in 1853 that many of the Hoovers, accompanied by other Quaker families, crossed the Mississippi and proceeded westward to Cedar County, Iowa. There they founded West Branch and other Quaker settlements in Springdale Township. A well-known publicist of Iowa, William R. Boyd, himself a native of Cedar County, recently paid a notable tribute to the people of the Springdale settlements. He recalled that in a generation no bona fide resident of that township had been convicted of a crime, or had suffered arrest. They obeyed all the laws of man, even as they observed all the laws of God. Mr. Boyd said:

It is an actual fact that the people there did not lock their doors. They were part of the salt of the earth and the best quality of salt, too.

That they were lovers of freedom is attested by the fact that John Brown on his many journeys to and from Kansas always tarried among them. It was in Springdale Township, on the farm of one William Maxson, a Quaker, that Brown drilled a part of the little army with which he made his historic attack on Harpers Ferry, in Virginia. One-fifth of that army were Iowans, many of them Quaker boys who loved freedom even more than they loved peace.

The Iowa Hoovers were a farming folk. But one among them, named Jesse, was of a mechanical turn of mind. He learned a trade and became the village blacksmith of West Branch. He was a strong man physically and an upright man morally. This Jesse Hoover married Huldah Minthorn, a woman of fine character and of many talents. To them were born three children, two sons and a daughter, of whom the second son was called Herbert Clark Hoover.

They were happy in their little home and modestly prosperous. But only for a few years. At the age of 33 the father died of typhoid fever. In that death many fond hopes and fair dreams were shattered. The boy Herbert was then only 6 years old. With all his hard labor at the forge and anvil, the father was able to leave his family a property valued at only $1,800. But part of that little fortune was in the form of a home that sheltered them.

Left with three children to provide for, Huldah Hoover did not despair. She was a woman of brave heart and willing hands. To support her little brood she did whatever her hands found to do, mostly sewing. Stitch by stitch she fed the bodies and nurtured the minds of her growing children.

One might well pause here to pay a tribute to a mother who saw the light, though it must often have been dimly, through the darkness that encompassed her. But it is out of such environments and out of such hardships that God in heaven and mothers on earth have wrought many of the most marvelous miracles in character building. Have not many of the greatest careers of history been shaped in such surroundings? Did not Abraham Lincoln arise out of such conditions to endear himself to the people?

But in a short time Huldah Hoover, the mother, found she had a gift greater than the deftness of her hands. It was the gift of speech and of service. As this became known, she was called more and more to speak in the Quaker settlements throughout eastern and central Iowa. She went everywhere, preaching and comforting her people. It was literally said of her that she went about doing good.

While the mother was thus called away from home the care of the children was intrusted to a granduncle named Benejah Hoover, who was a farmer near West Branch. In this farm home they were well cared for. In speaking before the Iowa Society of Washington last year Mr. Hoover recalled those years on the farm as among the happiest of his life. But it was the happiness of labor and not of idleness. The children were all taught to work. Mr. Hoover called them "days of chores and labor." He spoke of "planting corn, hoeing gardens, learning to milk, sawing wood, and the other proper and normal occupations for boys." He praised "the strong and healthy bodies which come from it all." It was while living on that farm that he acquired the rudiments of an education by walking mornings and evenings 3 miles to and from a country schoolhouse.

In 1884 the greatest of all sorrows for children befell the already bereaved family. It was in that year that Huldah Hoover, the mother, died. She had returned from one of her many visitations suffering from a cold which developed into pneumonia. Herbert was then 10 years of age. He was old enough to know what the death of a mother meant to a son. That bereavement became part of the permanent memories of his life.

What to do with the three fatherless and motherless and homeless children was discussed in a council of the Hoover and Minthorn families. The little property was placed in trust for the children and the children themselves were apportioned among such relatives as could best provide for them. Herbert in this distribution was allotted to an uncle, Allan Hoover, a farmer who provided well for his household. Over this home presided a noble woman whose memory Herbert Hoover still cherishes in the name of "Aunt Millie."

The discipline of the new home was strict and almost severe. The Bible was the great book of the family. Nothing that was not founded on it was deemed good reading matter. There were also long hours spent in a primitive meeting house. "All this may not have been recreation," said Mr. Hoover in the address already alluded to, "but it was strong training in patience." It was out of such experiences that the boy laid the foundations for the man of strength and achievements.

When Herbert Hoover was 11 years old he left Iowa and went to Oregon. He had spent in his native State the formative years of his life. Another uncle, Dr. H. J. Minthorn, his mother's brother, had gone to Oregon with other Quakers. In a settlement near Newburg they had founded an academy of which Doctor Minthorn was the head and his wife the principal. In asking the boy to share their home they were mindful of the education which his mother had craved for him. The long journey to Oregon was Herbert Hoover's first great adventure.

He thrived greatly in his new surroundings. He lived in an atmosphere of books. But nothing was given him. He had to earn it all. The Minthorns, like the Hoovers, believed in work and discipline. The boy paid fully for his care and education by doing the "chores" of the academy. He was a willing worker and an eager student.

While he was growing up in learning and labor, young Herbert heard of a new university to be opened in California—Leland Stanford. He already had a purpose in life and an ideal. To fulfill the one and to attain the other he knew he needed a university education. So he went to Leland Stanford. He had nothing except his willingness to work to offer in return for his schooling. But that willingness was abundant. He literally worked his way through the university. He did whatever his hands found to do. He humbled himself enought to collect even the soiled linen of his more fortunate classmates for a commission from a laundry. But he got more out of the education he paid for in such ways than did those who had their educations given to them.

It was while he was a student in Leland Stanford that he met the young woman who is now Mrs. Hoover, the mother of their two sons. Like himself, Miss Lou Henry had come from Iowa. Her father had been a village banker in Waterloo as his own father had been a village blacksmith in West Branch. It was their mutual interest in geology that first brought them together. She saw the future man in the youth. She believed in his future, although after his graduation as an engineer he could find nothing to do except as a day laborer in a mine.

When Herbert Hoover rose to world fame, first through his work in Belgium, later in his own America, and after the close of the World War throughout afflicted Europe, feeding the people and relieving the distress of widows and orphans, those who had known him as a boy in Iowa and who had known his mother before him, said that the son was following in his mother's footsteps. What she had done in a modest way in the Quaker settlements, he was doing on a world-wide scale.

And many wondered how much of all he did for the orphans of Europe was done in remembrance of his own orphanhood in Iowa.

"Herbert Hoover is doing in the world what his mother, Huldah Hoover, did in the Iowa settlements," is the way one man expressed this idea to me.

It is out of such memories and traditions as I have related that the Cedar County Hoover Farm Club was conceived and formed. It is in every way fitting that the community in which he was born and where his people were known and loved should so express itself at a time when he is a candidate for the highest office in the gift of the American people. They believe and they know he is in every way fitted for such an office.

So immediate was the response that the club had an initial membership of 500, all of them farmers or directly connected with farming. They selected for their president John Thompson, who operates a 500-acre farm near West Branch. The club is going to be represented at the national convention of the Republican Party in Kansas City. They are in earnest.

On the membership cards, which they have signed, there is printed the following declaration of faith:

The whole world knows Herbert Hoover as an engineer, administrator, humanitarian. We greet him as a native son of Cedar County, Iowa. His work in developing and distributing the food resources of the Nation during the war saved millions on the battle fronts. His humanitarian work during and after the war makes his name a household word in millions of homes whose lives and health were preserved. His name is synonymous with honesty, efficiency, and accomplishment.

His genius in organization since he has been Secretary of Commerce has brought great advances to labor and industry.

Agriculture needs the same genius in solving many perplexing problems. When he becomes President he will be the President of all the people.

We need him. We believe he can and will solve the farm problem. We pledge him our support.

As the Representative of the district in which Herbert Hoover was born I think it fitting for me to present for publication in the RECORD of Congress, where his career has many times been the subject of debate, the story that lies back of the organization of the Cedar County Hoover Farm Club.

VETO OF THE M'NARY-HAUGEN BILL

Mr. LOZIER. Mr. Speaker, running true to form, following blindly the false and selfish philosophy of the New England school of political thought, heeding the unwise counsel of Hoover, Jardine, and Mellon, the President has vetoed the McNary-Haugen bill. In so doing he deliberately slammed the door in the faces of the American farmers. He has listened to the selfish advice of the special-privilege classes who have fattened on governmental bounty. He has denied to the agricultural classes the consideration and aid he and his party have so generously granted to other vocational groups.

His veto message is a declaration of war against agriculture; war to the knife, knife to the hilt, hilt to the hand. His veto

message, full of sophistry and special pleading, is a savage assault on the man who turns the furrow and produces the food that satisfies the hunger of mankind. Agriculture is in dire distress, staggering under a crushing legislative and economic handicap that threatens destruction to the greatest of all basic industries.

The principle embodied in the McNary-Haugen bill is not a new one but has been employed times without number by the industrial and commercial groups to stabilize their industries and to increase their profits. The McNary-Haugen bill is not socialistic, bolshevistic, anarchistic, or unreasonable in its provisions. It is a conservative and well-thought-out measure, economically sound, and while no one claims it will entirely solve the farm problem it will nevertheless contribute materially to the rehabilitation of agriculture without injuriously affecting those engaged in other lines of business. But no, the President stubbornly refuses to grant to agriculture equality of opportunity with other vocational groups. The Federal Government has enacted laws to stabilize the business and increase the profits in many other lines of business but from agriculture all relief is withheld.

The President contends that the provision in this bill for an equalization fee is unconstitutional. In answer to this claim I assert that even if the courts should hold this provision unconstitutional we would still have a workable system under this bill, because the act would still contain the marketing, loan, and insurance provisions which even the hard-boiled opponents of this measure admit are valid, and which they concede will afford the farmers substantial relief. But as to whether or not the equalization fee is constitutional can only be authoritatively determined by the Supreme Court of the United States. Your saying that the act is unconstitutional, the President saying the act is unconstitutional, and my saying that it is constitutional will never determine the question. The opinion of the President, of Members of Congress, and members of the Cabinet; the opinion of the Attorney General, the opinion of learned attorneys will not settle the question, because lawyers disagree as to whether or not the provision in question is constitutional.

Many Federal and State laws are now in force, the constitutionality of which was challenged when Congress was considering their passage. Many forward-looking acts of constructive legislation were denounced as unconstitutional by able lawyers, yet when submitted to the Supreme Court that tribunal sustained the validity of these laws. The sensible thing to do was to approve the act, put it into effect, and then those who challenge the constitutionality of the equalization provision will have an opportunity to test its validity in the Supreme Court.

I decline to accept and the American farmers decline to accept the flippant and prejudiced opinion of the enemies of this bill as to its constitutionality. It is an easy matter for these self-styled constitutional dawyers to dismiss this great question with a wave of the hand and by pertly denouncing it as unconstitutional. I remind them that in the past many great lawyers have been wrong, dead wrong, in declaring acts of Congress unconstitutional.

The President should have approved this measure. The great mass of American farmers believes in this legislation. They should have the privilege of putting it into operation, trying it out, testing its merits and demerits, and this would afford an opportunity to have its constitutionality determined by the Supreme Court. And if perchance that tribunal should hold the equalization fee unconstitutional, Congress could then seek another solution of the farm problem. But the American farmer will never abandon the McNary-Haugen plan until it has been enacted, given a fair trial, and its validity determined by the Supreme Court. The longer the President delays the application of the McNary-Haugen formula the stronger will be the demand for this form of farm relief. The plan is stronger now than ever before; its enemies may delay but they can not ultimately defeat this legislation.

PROHIBITION

Mr. GARBER. Mr. Speaker and Members of the House, nine years ago the prohibition amendment was made a part of the Constitution of the United States, thereby initiating the greatest constructive reform of the age, one which by its very idealism was condemned to practical difficulties of administration and discouragement, of which the wet forces of the Nation have been quick to make capital. They have directed against it every possible form of attack, direct and indirect, open and insidious. They have plowed the field with propaganda and built upon the credulity and lethargy of the drifters-with-the-tide to create an attitude of scepticism as to the practical benefits of prohibition and a sense of grievance entirely unjustified in the light of a sane and unprejudiced consideration of the problem. The campaign has been persistent, patient, ruthless, and unscrupulous in its resistance to the law, a continuous battering of defenses, which after nine years has projected the problem clearly into the foreground of public affairs as one of the outstanding issues of the day. All sorts of extravagant allegations have been made by the wet forces and the alarmists; the actual strength of the adversary will be measured by the vote of the people in the election of 1928.

THE AMENDMENT WAS NOT ADOPTED WITHOUT DUE CONSIDERATION

The wet forces contend that the majority of the people are opposed to prohibition, were, in fact, opposed to it at the time of its enactment, and that they are in some way victims of a political "fluke." This illusion is freely indulged by those who attempt to reconcile their insistence on a recommitment of the issue to the people for vote with the principles of majority rule, the basis of our democratic form of Government. In their assertions they are singularly unmindful of the actual facts in the case.

The resolution to amend the Constitution passed the Senate August 1, 1917, by a vote of 65 to 20, and the House on December 17, 1917, by a vote of 282 to 128. It was ratified by 46 of the 48 States, the total vote in the lower houses of the legislatures of the 46 States being 3,782 for and 1,035 against, or 78.5 per cent in favor of the amendment. The total vote in the senates of the respective legislatures was 1,310 affirmative, 237 negative, or 84.6 per cent affirmative. Moreover, 98.2 per cent of the population of the United States resided in the 46 States ratifying the amendment. Having been ratified by the required three-fourths majority of the States, the Secretary of State proclaimed the amendment a part of the Constitution on January 16, 1919, and it became effective one year later.

Prior to the adoption of the amendment 33 States had adopted state-wide prohibition. These States and the date of adoption are as follows:

Alabama	1915	New Hampshire	1917
Arizona	1914	New Mexico	1917
Arkansas	1915	North Carolina	1908
Colorado	1914	North Dakota	1889
Florida	1918	Ohio	1918
Georgia	1907	Oklahoma	1907
Idaho	1915	Oregon	1914
Indiana	1917	South Carolina	1915
Iowa	1915	South Dakota	1916
Kansas	1880	Tennessee	1909
Kentucky	1919	Texas	1918
Maine	1851	Utah	1917
Michigan	1916	Virginia	1914
Mississippi	1908	Washington	1914
Montana	1916	West Virginia	1912
Nebraska	1916	Wyoming	1918
Nevada	1918		

By adding the area of these, you will find that 95.4 per cent of the total area of the United States in which lived 68.3 per cent of the total population was nonlicensed territory at the time the eighteenth amendment became effective.

Such facts and figures are in direct refutation of the assertions that prohibition was "put over" under stress of abnormal war-time conditions; that it was, so to speak, a "dark horse" on which a surprised American public found itself securely saddled under compulsion, in mid-stream. They show the unmistakable, consistent, normal development of public opinion in favor of the reform of which the eighteenth amendment to the Constitution was merely the ultimate inevitable expression.

COST OF ENFORCEMENT

The cost of prohibition enforcement is often cried in argument of a liberalization of the law and the sonorous roll of "millions" under the tongues of wet spellbinders in many instances does have a hypnotic effect. But, actually, what are the facts?

There were expended through the Prohibition Bureau during the past five years the following amounts, or an average annual expenditure of $9,228,539.69:

1923	$8,135,842.44
1924	7,509,146.27
1925	9,203,384.45
1926	9,573,791.64
1927	11,720,533.63

To spend $9,000,000 to enforce prohibition for 110,000,000 people means about 8 cents per head, or 40 cents per family. The fines assessed and collected amount to in excess of $8,000,000, so the enforcement pays a large share of its way.

Moreover, Prof. Irving Fisher, of Yale, who has made an exhaustive study of the subject, estimates that prohibition saves 5 per cent that used to be wasted out of our incomes and adds another 5 per cent into the bargain. This double gain, through the transfer of energy from alcoholic consumption to something possessing true value, and the increase of energy as a result of effective prohibition, amounts to more than $6,000,000,000—and that does not include savings in the cost of jails, alms-

houses, asylums, and so forth, or any economic savings from reducing the death rate. If prohibition enforcement cost many times $9,000,000, it would still be eminently justified as an economic investment alone!

STATE'S RIGHTS

"State's rights" is a catch phrase that is bandied freely by those who seek by any means to secure a modification of the law. They say, "Let us modify the Volstead Act so as to permit each State to make its own definition of intoxicating liquor in conformity with the desires of its people; then let this definition be binding both on the State and the Federal Government." But what would this mean in practical administration? It would be delegating to each of the States the power to interpret and enforce a provision of the Constitution. It would permit all 48 States different interpretations, so that we might have 48 different standards. New York might define intoxicating liquors to be only those containing in excess of 6 per cent per volume of alcohol. Oklahoma might retain the present definition of one-half of 1 per cent, but New York could ship her 6 per cent liquor into the State of Oklahoma and nullify Oklahoma's prohibitory law. The State authorizing the highest volume of alcohol would have a monopoly of supplying liquor to the several States and would reestablish and open saloons throughout the country. Such a law would make Uncle Sam powerless to enforce the Constitution prohibiting the sale of intoxicating liquor for beverage purposes containing one-half of 1 per cent per volume. The Federal authority, now supreme, would be helpless in the face of the open and flagrant violation of the Constitution. Such a law would promote anarchy and restore and reestablish the controversy that the Civil War decided at so great a risk.

ENFORCEMENT DIFFICULTIES NOT INSURMOUNTABLE

The wet forces have exhausted every effort in painting the problem in as dark a hue as possible, loudly proclaiming the impossibility of prohibition from a practical standpoint, citing instances of violation to which their own destructive methods have largely contributed. But our experience, far from demonstrating the truth of their assertions, shows that our enforcement difficulties are rather the results of a process of moral chemicalization, the elimination of unhealthy matter incident to the purifying process, than indicative of an absolute, unmitigated failure.

True, habitual drunkards and moderate users will continue to violate the law and oppose it, but if we can prevent the younger generation from forming such habits, in the course of time there will be no disposition to violate the law. The vital thing is to break the chain by which the habit of drinking is passed on from one generation to another. The open saloon has been an agency for passing on such habit. Its abolishment has broken the chain.

Moreover, when contrasted with previous conditions, it can not be denied that we have made wonderful progress in temperance.

PREPROHIBITION DAYS

Before prohibition there were 177,790 licensed liquor saloons, most of them selling after legal hours and to minors and drunken persons, in addition to which there were 100,000 speakeasies.

The saloon used to be the bank where the laboring man received credit during the week and cashed his check, paying a third of his wages to the saloon keeper for drink, denying his wife and children the money with which to purchase the necessities of life. The saloon keeper exacted the profits of his toil, the happiness of his home, and the opportunities of his children.

The saloon became a rendezvous for criminals, drunkards, gamblers, loafers, drifters, and the irresponsible elements of society which the saloon keeper could control politically together with the laboring element to which he extended credit. This made the saloon a power in politics. Being the dispenser of drinks, it was resorted to for a renewal of friendly relationships, and the drinks were offered as a preliminary request for political support. Not content with its exorbitant profits, its heavy exactions upon the social and economic life, it must rule and dominate the affairs of government. It must elect the members to the legislatures, Members in Congress, and judges on the bench so that all the various branches of the Government were permeated and controlled by the influences emanating from the saloon and brewery interests.

In the old saloon days there were more than 100 Neal institutes for the cure of alcoholism, and at the same time 77 Keeley institutes. In addition, every city of considerable size had several independent institutes devoted to the cure of drunkenness. To-day all the Neal institutes are defunct for lack of business and of the 77 Keeley cures only the parent institution at Dwight, near Chicago, remains. It has shrunk to hardly one-tenth of its former size and patronage.

The Washingtonian Home, the oldest drink cure in the United States, if not in the world, and which is said to be the only remaining cure in the city of Chicago, has less than a third as many men as it had during the three years prior to prohibition, when there were several other drink cures still running in the city. In the women's division there were many times as many patients prior to prohibition as there are now.

CANADA HELD UP AS A MODEL

Confronted with the indisputable evidence of the corruption and unbridled evil which flowed with the liquor in the saloons before prohibition, the wet forces have seized on the idea of "Government control," and have acclaimed it as the solution of the whole problem. Inspired by their own enthusiasm they hold Canada up to us as a model, with her so-called "Government control," urging us to follow in her footsteps. It is the most dangerous attack yet made on the law, a veritable wolf in sheep's clothing, and the "wets" are forcing this issue with all the strength they are able to muster. They realize that it is their "best bet" and that once the barrier is lowered even a little the inpouring of the liquor tide in increasing volume will do the rest.

But those who offer Canada as an illustration of the merit of their plan have failed to make a comparative analysis of the actual demonstration of their theory and the roseate claims they make for it. An examination of the facts shows them in the rather ludicrous position of clinging to a beloved fallacy the while they adduce as illustration of the merit of their plan a case which actually disproves the very theory they would make it support.

CANADA'S FAILURE IN LIQUOR WAR

Canadian experience with the so-called Government control of liquor should be a warning to the United States. In practice this system seems to be Government control by liquor. The evils that are inseparable from the legalized liquor traffic are widespread wherever Canada has surrendered to the liquor element. Drunkenness, prostitution, political corruption, business depression—the whole long list of consequences of licensed liquor—accompany the Government-control system while bootlegging and rum running successfully compete with the Government stores, as the official reports confess. None will deny that the enforcement of prohibition has not been 100 per cent effective, but neither can any serious student of conditions deny that our situation is, socially, far less serious than the tragic failure of the various permissive policies pursued by the Provinces of our sister nation.

Ben Spence, of Toronto, a recognized leader in the prohibition forces and well known throughout Canada and the United States as a student of Canadian conditions, upon which he has written a number of authoritative books, has kindly provided me with a digest of the essential facts in the situation and thus enabled me to present the following analysis of the results of the Canadian system of so-called liquor control.

CANADA AND LIQUOR

There is no method of dealing with the liquor traffic that can properly be called Canadian. Each of the nine Provinces of Canada is practically autonomous in its handling of the question and there are therefore nine different systems.

The reason for this is that, under the division of constitutional authority which obtains in Canada, the Federal Government has jurisdiction over manufacture, importation, exportation, and interprovincial shipment and sale, while the Provinces have jurisdiction over keeping, having, selling, and distributing within the Province. Or, putting it another way, the production and main sources of supply of liquor are under Federal jurisdiction; the possession and distribution, coming under what is termed in the British North American act, "matters of a local and private nature within the Province," are under provincial jurisdiction.

The actual history of the prohibition movement in Canada will make this clearer.

PROVINCIAL PROHIBITION PERIOD

Prior to and during the earlier years of the Great War there was a gradual development in Canada of legislation to limit the evil arising from the liquor traffic. This was expressed in increasingly restrictive license regulations, in local option by-laws and so forth, until eight of the nine Provinces of Canada had prohibited altogether the retail sale of liquor. The dates on which these provincial prohibition laws became effective in the various Provinces are as follows:

Prince Edward Island, June 5, 1901.
Manitoba, May 31, 1916.
Alberta, July 1, 1916.
Nova Scotia, September 15, 1916.

Ontario, September 17, 1916.
Saskatchewan, December 31, 1916.
New Brunswick, May 1, 1917.
British Columbia, October 1, 1917.

TEMPORARY NATIONAL PROHIBITION

In the closing months of 1917 under the stress of war conditions, a coalition Dominion Government was formed by leaders in the two great political parties in order that Canada might show a united front and that all the powers and resources of the Nation could be more completely mobilized.

One of the first acts of this "Union Government" was to pass an order of national war-time prohibition. The announcement was in the following terms:

It is essential, and indeed vital, for the efficient conduct of the war that wasteful or unnecessary expenditure should be prohibited, and that all articles capable of being utilized as food should be conserved. It is beyond question that the use of liquor affects adversely the realization of this purpose.

The subject has been under consideration by the war committee of the cabinet and the following conclusions have been reached:

1. Any liquor or beverage containing more than 2½ per cent alcohol shall be regarded as intoxicating liquor.

2. The importation of intoxicating liquor into Canada is prohibited on and after December 24, 1917. This regulation shall not apply to importations for medicinal, sacramental, manufacturing, or chemical purposes.

3. The transportation of liquor into any part of Canada wherein the sale of intoxicating liquor is illegal will be prohibited on and after April 1, 1918.

4. The manufacture of intoxicating liquor within Canada will be prohibited on and after a date to be determined.

The date finally fixed was April 1, 1918.

This was not a legislative act but simply an order in council by the national cabinet under authority conferred by the war measures act. When the war was over this order was repealed, the repeal becoming effective on December 31, 1920.

POSTPROHIBITION CONDITIONS

As has been stated, before the time of this prohibitory order all but one of the Provinces had prohibited the sale of liquor. When, therefore, by the repeal of the national order in council, the brewers and distillers were again allowed to manufacture, they found themselves in the difficult position of having no selling organization in eight of the nine Provinces through which they could market their liquor. The other Province, Quebec, had a system by which the sale of spirituous liquors was under Government control and only light beer could be sold by the brewers.

In the Province of Ontario, 7 distilleries and 27 breweries resumed operations, although not a drop of the liquor manufactured could be legally sold for beverage purposes within the Province, and the medicinal, industrial, and sacramental sale was controlled by the Government. Rum running and bootlegging was the inevitable result. This nefarious trade reached enormous proportions and the two branches became inextricably interwoven. Much of the liquor presumably exported was short-circuited back into the hands of local bootleggers.

The smuggling and rum-running scandal grew so great as to become a major national political issue resulting in a parliamentary investigation and finally in the appointment of a royal commission.

The following is a partial summing up of the indictment against the brewers and distillers taken from the Toronto Globe of June 4, 1927:

Systematic and organized payments to and corruption of customs officials and agents, railway officials and employees, and police; switching and camouflaging of cars of beer in order to pass them into the United States; theft of United States and Canadian customs seals, and the forgery or unlawful procuring of customs and shipping documents; sales of strong beer in Ontario, in violation of Provincial law; falsification of records so as to conceal these sales; failure to show sales of strong beer on sales-tax returns to the Government—these are among the findings which Hon. N. W. Rowell, K. C., counsel for the Royal Customs Commission, will suggest that the commissioners make in regard to certain Ontario breweries.

A glimpse of the extent to which these illegal practices were carried on is given in another press dispatch on September 13, 1927, as follows:

Arrears of Canadian breweries for sales tax were estimated at more than $2,300,000 before the Royal Customs Commission this afternoon. Estimated arrears of Canadian distilleries are from $1,750,000 to $2,000,000.

BREWERS SEEK LARGER MARKET

But this underworld market was not adequate. The old retail liquor trade had been so discredited throughout Canada that it was hopeless to seek its reestablishment. The liquor manufacturers shrewdly capitalized the bad conditions regarding bootlegging, for which they themselves were primarily responsible, and by skilfully playing upon the term "Government control" succeeded in securing the establishment of selling agencies for their liquors by the governments of six of the eight Provinces that had adopted Provincial prohibition.

Evidence adduced before the royal commission establishes the fact that this was accomplished by the payment of enormous sums by the brewers and distillers, both in direct contributions to organizations, such as the Moderation League, and by newspaper publicity and active campaigning, and also by contributions to the political parties.

GOVERNMENT SALE ESTABLISHED

The six Provinces in which liquor is now sold by the Government and the date when the new laws became operative are as follows:

British Columbia, June 15, 1921.
Manitoba, August 7, 1923.
Alberta, May 10, 1924.
Saskatchewan, April 15, 1925.
Ontario, June 1, 1927.
New Brunswick, September 6, 1927.

HOW GOVERNMENT SALE WORKS

In some of these Provinces the new system has been operating for too short a time to permit the collating of informative statistics. In all of them, the fact that the liquor-selling is done by the Government and is yielding a substantial profit adds to the difficulty of getting reliable information, and the fact that in four of these six Provinces liquor is only sold for consumption in private, still further complicates the situation.

It may be said that, in general, these Government liquor-selling systems are conducted as we might expect any marketing agency would be, and are showing the same results as if conducted under private auspices. "Sale" rather than "control" is the impetus. That they are operated for the profit of the liquor manufacturers is obvious when they are critically examined.

In none of these Provinces does the Government attempt to control production. This is entirely in private hands, and with private profit. The Government therefore does not in any way control the liquor until it has purchased it from private interests and warehoused it in its own establishments. The brewers and distillers make their full profit on all liquor sold to the Government.

Moreover, the Government retains control of the liquor only so long as it remains in the Government shops. Once it is sold to the consumer, it passes from the control of the Government and under the control of the purchaser. Government control, therefore, is only exercised and can only be exercised, for the brief period in which the liquor is harmlessly upon the shop shelves. It only acts as intermediary between the purchaser and the consumer. The Government is selling agent for the brewers and distillers and purveyor to the drinkers.

THE SITUATION IN ONTARIO

Ontario is perhaps the most typically Canadian, as it is the most populous of the Provinces of Canada. At the session of the legislature in 1927, the present liquor control act was passed and an administrating commission set up with Mr. D. B. Hanna as chairman and Steward McClenaghan and R. J. Manion as associates.

The new system came into operation on June 1 with the opening of stores in Toronto and other places. Additional stores have been opened from time to time until now there are about 80 throughout the Province. The commission established and is continuing to establish its stores at strategic points, the locations apparently being chosen as a chain-store enterprise would select them, with a view to selling possibilities. Indeed, in Ontario the whole plan has been most efficiently worked out as a "sale" rather than a "control" proposition.

According to the announced government policy, the commission is selling beer at cost. This, however, the members carefully explained, did not mean at cost to the brewers but just at cost to the government. As Mr. McClenaghan is reported to have naïvely said, "You would not expect the brewers to sell it without a profit."

Control was supposed to be exercised by the provision of the law which compelled every would-be purchaser to take out a permit, upon the back of which all purchases must be recorded. This permit plan was looked upon as a prime essential to the control policy. Indeed, the chairman, Mr. Hanna, has stated that but for the permit plan the law might be called "the liquor act."

In actual working out, however, these permits facilitate rather than hinder the getting of liquor. Anyone 21 years of age, male

or female, rich or poor, black or white, native or foreign, resident or visitor, may obtain a permit.

True, if a permit holder is convicted of drunkenness or an offense against the liquor control act, the permit may be suspended for a stated period or canceled. If the offender is a drunk and his permit is canceled it simply means that another customer is immediately made for the bootlegger; if he is a bootlegger it means that he gets the use of another person's permit. It is a common thing for bootleggers to have permits in the names of a dozen different persons, real or imaginary. A bootlegger arrested on the Niagara border recently had 12 permits in his possession, upon all of which he had been purchasing liquor.

SUPPLY AND DEMAND

The fact is that there is an inexhaustible supply of liquor, easily available, for any and every citizen of the Province of Ontario. The price is exceedingly low, and everyone that wants liquor and has the price makes an effective demand.

Control was also sought by providing that consumption could only take place in a private house. Then the proponents of the measure proceeded to widen the meaning of a private house, making it to include temporary residence, in a motor camp, a tent, a pleasure boat, or a hotel room. Here is a press dispatch that shows how the tent provision works:

LONDON, ONTARIO.—Local police officers report that last night an American tourist calmly spread a robe over the branch of a tree at the side of the road near Lambeth and then drained a bottle of beer which he had purchased legally under permit in a local Government store. The man evidently knew the law, established a domicile, and drank the beer without fear of the police.

The chief abuse, however, is in regard to hotel rooms. A hotel room is, according to the law, a private house. All that is required is that persons shall register and have baggage. Then in the room or suite assigned to them they can keep, have, or give liquor without restriction as to the person or persons to whom it is given or the hour when it is supplied.

Under the system, therefore, every hotel room is a potential saloon and to make this provision still more liberal hotel proprietors, lessees, managers, or employees are allowed to keep, have, and give liquor in the part of the hotel premises which they occupy as a residence.

All standard hotels are allowed to sell 4.4 beer by the bottle or by the glass in beverage rooms, which they buy direct from the brewer and the cases are almost innumerable where the brewers supply stronger liquor.

PROOF OF RESULTS

As to practical results, these so-called "Government control" systems are just what might be expected from any liquor-selling plan.

Economically they are wasteful. The money that goes for liquor can not go for the goods merchants have to sell. Every dollar paid over the counter of the Government stores is 100 cents less to go into the tills of the business men or to the farmers and the laborers to supply their families with the necessities of life.

Furthermore, liquor buyers must pay cash for their liquor. There is therefore manifest a greater disposition to run credit for other goods, while those who do business on credit or on deferred-payment plans, and they are many and increasing, are finding collections increasingly difficult.

Employers are again being bothered by the lack of punctuality and regularity of workers. They are also suffering from lowered efficiency, which is proportionate to the amount of liquor consumed. With this there is an increase in industrial accidents.

LIQUOR AND GASOLINE

In motor accidents particularly there has been a most notable increase. The record is by no means complete for it is only cases of those who are called "drunk" that appear in the courts. For every one of such there are many more who have been rendered less efficient or careful through what they would call moderate or harmless drinking.

Addressing the annual meeting of the Ontario Motor League on February 20, 1928, Hon. G. S. Henry, minister of highways, said:

Reckless-driving convictions increased from 2,300 to 3,200 and driving while drunk from 277 to 480.

Speaking over the radio on October 11 last, as a member of the highway safety committee, J. P. Bickell, registrar of motor vehicles for Ontario, stated that 54 motor-car drivers had their licenses suspended during September for being intoxicated while in charge of a car.

A drunken driver—

Said Mr. Bickell—

is a potential murderer. Just in this connection let me point out that a man need not be hopelessly intoxicated to be convicted of this offense. A strong smell of liquor, combined with an accident, has on more than one occasion resulted in a jail holiday. My advice to all motorists is, don't drive after drinking.

There is a growing recognition of the close connection between motor accidents and drink, that booze and gasoline make a dangerous mixture.

Magistrate Hopewell, of Ottawa, is on record as saying:

The time will come when no man will be given a license to drive an automobile unless he is an abstainer from liquor.

PROHIBITION AND GOVERNMENT CONTROL

Recently the press played up a dispatch from New York as showing the failure of prohibition there. The headlines in the Toronto Globe were: "Twenty-four dead from alcoholism—New York City has fearful holiday drinking toll."

The following day there was a dispatch from Winnipeg, under government control, telling of 11 deaths in that city from Christmas orgies. New York has a population of 6,000,000, Winnipeg of 200,000!

EFFICIENCY IN LIQUOR SELLING

The fact is that there has been set up in these Provinces of Canada smooth-running, highly efficient liquor-selling machines, respectabilized by government auspices.

While many are shouting—and the brewers, distillers, and politicians loudest of all—that the temperance people should carry on an educational temperance campaign and confine themselves to that, the very association of the government with the liquor trade and the status and prestige thus given to it cuts the ground from under the feet of all warnings that temperance reformers may issue and neutralizes to an extent the teaching that they may seek to impart.

Liquor "control" in the Provinces of Canada is a huge success from the standpoint of those who make, and wish to derive a profit from the sale of liquor, and those who buy and wish to derive sensations of intoxication from the consumption of liquor; but, from the standpoint of those who seek to remedy the evils of alcoholism, it is a tragic, ghastly failure.

Writ large in the experience of these Canadian Provinces is the truth, which ought to be self-evident, that the ravages of a plague can not be remedied by arranging for the dissemination of disease germs nor can the evils of alcoholism be prevented by providing facilities by which people may obtain alcoholic beverages.

CANADIAN CONTROL ENCOURAGES CONSUMPTION

We have thus reviewed the law and the results in the Canadian Provinces because Canada is now held up as the example for the people of this country to follow, as a demonstration of the superiority of government control for temperance over the existing law in this country.

We submit the facts as proof of the failure of such control; that instead of being a deterrent to the consumption of liquor, it encourages, increases, and lends respectability to such consumption by legalizing it. No breaking of the chain, no hope of destroying the liquor habit there! It will continue to be handed down from generation to generation as long as the Government says it is lawful.

It is different here. Millions of good, substantial citizens who used to take a drink now and then in the days of the convenient, open saloon as an expression of their sociability and good will no longer do it. They have not the time, neither have they the inclination to enter into a conspiracy with some irresponsible bootlegger to violate the law. They go on about their business. They have found out they can get along as well without it as with it, and thus the chain is broken, the habit disappears. The next generations will not have the appetite; they will be free and unacquainted with the thirst. And as we minimize the temptation in keeping the saloons and drinking places outlawed we minimize the chances of their ever becoming partakers or addicts. In this way, from generation to generation the taste for liquor will be bred out of what otherwise would be the generations of future consumers.

TOO MUCH EXPECTED IN SHORT TIME

The great trouble has been too much has been expected in such a short time. It will take not less than 25 years to give the law a fair trial. Thus far the inefficient administration of the law in the hands of irresponsible, incompetent, crackbrained theorists has created doubt of the advisability of its retention in the minds of thousands of people disposed to support it.

This condition was attempted to be remedied by the enactment of a law during the Sixty-ninth Congress, placing the enforcement personnel under civil service, requiring each ap-

plicant to pass an examination showing his qualifications, but again we are met with the hair-brained theorists in the civil service, putting out frivolous questionnaires to the 30,000 applicants, showing the red tape and impracticability of administration in that department. To create an enforcement organization covering the entire United States is a task of no small magnitude. It alone will require years of experimentation and education to develop a quality of personnel measuring up to the responsibility and requirements of such public service.

LAW HAS DEMONSTRATED ECONOMIC WORTH

But even with all these handicaps, in closing the 177,790 saloons—in outlawing them, in curtailing the amount spent for liquor and increasing the deposits in savings banks $6,000,000,000 annually in diverting the moneys from the saloon till into the homes of the families for the benefit of the women and children in increased necessities of life and opportunities for education, the law has fully demonstrated its economic worth to the people of the country and the sound, sober judgment of the head of the family will hesitate long indeed before voting for repeal or those who stand for repeal, and a return of the open saloon with its gambling dens, to again destroy the youth of the country.

SUGAR-COAT IT AS YOU WILL

For, sugar-coat it as you will with mild phrases, a return to light wines and beers means a return to the open saloon. The light wines and beers would become stronger and stronger and flow down to the consumers in the several States with increasing volume until normal saloon-day consumption would be restored with the disastrous effect of economic waste to the efficiency, earning power, and the savings of the people. In addition to that it would depreciate the quality of self-government by restoring the vicious political influences that insisted upon control in the days of the saloon.

Those engaged in the selling of light wines and beers would have to have a place in which to transact their business. Naturally they would want all the business they could get. They would make their places of business attractive to lure the public. At first they would comply with the law, but as their profits and consumption increased the insatiable greed for more would restore the loafing places and gambling dens with all their evil, habit-forming influences of former days. Instead of breaking chains it would be reforging them. It would reshackle the race!

We live in a new epoch. Where we have 22,000,000 automobiles in the country operated by the young and the old, by the experienced and the inexperienced, and the ever-increasing congestion of traffic upon the paved highways of the country and in the cities, where the turn of a wheel may mean sudden death to many, it raises the question of safety to life and property—whether or not your life should be subjected to the increasing hazard and danger.

The seriousness of this phase of the question was recognized 25 years ago by the executives of the railroads of the country and by the employees as well when they adopted the rule which is rigidly enforced to-day, of refusing employment to those who indulge in intoxicating liquors. That rule has been approved by the public, and even those who are strongest in the demand for a return of wine and beer, when riding in the coaches, demand its enforcement.

THE AMERICAN PEOPLE WILL SEE IT THROUGH

In conclusion, after more than 50 years of agitation and investigation, the people of this country by enormous majorities have undertaken this great moral reformation. They are going to see it through. They are making this great sacrifice for the benefit of the boys and girls of the country, not so much for themselves—and this is the patriotism of civil life—sacrificing for country and generations to follow. Patience, persistence, a consciousness of doing right, with a steadfast loyalty to the Constitution and the laws of our country, will finally demonstrate the economy and wisdom of our position to-day.

Thomas Nelson Page, who has the power at times to clothe truth in the garments of imagination, once said:

> God, with His mighty wind, has shaken his hand over the river, and men are beginning to go dry-shod on the places where once there was no passage.

In this age of the automobile, the airplane, the radio, the television, are concentrated new requirements, new obligations of the new day, of the new epoch. We must conform. We must comply. God has indeed "shaken his hand over the river." He has exhibited new worlds of power to this generation. If we but have the vision to see and the faith to walk, we shall "go dry-shod on the places where once there was no passage."

FOREGN TRADE UNDER PROTECTION

Mr. COLE of Iowa. Mr. Speaker, speaking some days ago on the merchant marine bill, the gentleman from New York [Mr. GRIFFIN] assumed that American ships would be somewhat useless so long as we maintain our present protective tariff. His mind was befogged with the hocus-pocus that we can not expect to sell except to those from whom we buy, nor more than we buy, and that a protective tariff is a barrier in foreign commerce.

Fortunately the records of both imports and exports for more than a hundred years are available. But unfortunately the gentleman from New York did not avail himself of these records. If he had done so, he would have found that our foreign trade, including both exports and imports has prospered most under protection, and prospered least under so-called free trade, or, more properly, tariff for revenue.

The Underwood-Simmons tariff law, avowedly a revenue measure, and of which the authors boasted that there was not an element of protection in it, was enacted in 1913. It was in full effect during all of 1914, and in spite of the fact of the increased demand for our products during the last six months of that year, due to the World War, our foreign trade declined over $400,000,000 as compared with 1913 under the protective tariff.

Our foreign commerce in 1914 under a revenue tariff was less than $4,000,000,000 as compared with over $9,000,000,000 for the year 1927 under protection.

In 1927 under protection our exports alone exceeded by a billion dollars the combined exports and imports of 1914 under a tariff for revenue.

That low tariffs promote foreign trade is only a theory. It is when we are most prosperous in America that we both buy and sell most in foreign trade. And it is under protective tariff that we are invariably most prosperous in America. When we are prosperous we buy liberally not only at home but abroad. Our imports under protection are, however, of a different kind. They consist largely of raw materials to be finished by American labor and of luxuries. Such imports do not produce unemployment.

Secretary Mellon in his answer to the International Bankers a year ago formulated the basic principle of foreign trade when he said:

> It is the consumptive capacity of our people and not tariff rates that control imports.

A STATESMAN JUSTIFIED BY FACT

Vision and statesmanship are close kin. That Alexander Hamilton was a man of almost uncanny vision no one now attempts to deny. Talleyrand declared him to be the greatest living statesman and tells how he justified his theory of tariff protection for America by the confident prediction that ultimately either Philadelphia or New York would be the financial center of the world. Back in the interior he pictured another metropolis, and held the firm belief that we would in time expand to the Pacific: "And, if we built to that size," said Hamilton, "we must foster our industries."

From the teachings of Hamilton, Republicans have learned much, and following his precepts they have fostered every industry and fathered none.

There is scarcely an American industry, except elementary ones—from pearl buttons to locomotives—that does not owe both its origin and its present existence to a protective tariff. I hurl the challenge broadcast and defy anyone between the seas to name a single industry now in successful operation that owes its origin to democratic legislation. No; there is not one, and Republicans have hundreds, and I suppose a thousand to their credit.

The outstanding effect of fostering industries is the American pay roll, vastly larger, and by many believed to be twice as large as that of all the rest of the world. This constant flow of actual cash, dependent only upon the constant flow of production, is no less vital to the farmer and others who supply the needs of labor than to the recipients themselves. The preservation of this pay roll, on which we all directly or indirectly depend, is the one and all absorbing issue of this campaign.

A LUCID ILLUSTRATION

Would you start the erection of a building if you knew a revision of the law of gravitation was contemplated, a former Secretary of the Treasury asked me the other day, especially if a few previous revisions had been attempted and always with disaster?

Will you enlarge your shop, will you increase activities in any direction, will you do anything but sit tight and await the inevitable, and by sitting tight hasten the inevitable, if through the

indifference of voters the Democrats win the forthcoming election with their promise of tariff revision? Especially in the face of the ruin their previous revisions have entailed?

The Democratic Party of 1928 is the Democratic Party of history. While certain members are protectionists the party in practice as in theory favors foreign producers and importers, and it will again, as it always has, give them some slight advantage over Americans in the American markets for purposes of revenue only. Business men know this and will not await even inauguration before setting breaks. They never have. It was not President Wilson's oft quoted threat to "hang higher than Haman" if the captains of industry continued to slacken production in the face of the Underwood tariff, but the war that restored activity. A cyclone cloud need not burst to drive prudent men to their caves. If the Democrats win in November the pay roll will be cut in December.

The gentleman from Arkansas [Mr. OLDFIELD], speaking on the tariff with special reference to proclamations under the so-called flexible clause sometime ago, said that with "the same pen" the President had used to veto the McNary-Haugen bill he had signed a proclamation increasing the duty on pig iron "50 per cent." His evident purpose was to create the impression that the President, and by inference the Republican Party, is more interested in manufacturers than in agriculture. It was more an appeal to prejudice than a statement of fact.

What are the facts? The duty on pig iron had been 75 cents a ton. The increase of 50 per cent therefore was exactly 37½ cents per ton, making the new duty $1.12½ per ton. The gentleman who serves as the Democratic whip in the House used the phrase, "50 per cent," because it sounded bigger than 37½ cents. He sought to convey the idea that a gross favoritism had been shown to a manufacturing industry.

The gentleman forgot to say that the President proclaimed this increase because it had been recommended by the Tariff Commission, a bipartisan body. The Tariff Commission recommended it after years of study. They deemed it necessary to prevent a large number of laborers being thrown out of employment in America. They found that large imports of pig iron were displacing the products of American mines and American wage earners.

The gentleman from Arkansas apparently did not know that 38 per cent of the cost of manufactured products is represented in food actually consumed during the processes of manufacture. If he had reasoned more correctly he would have found that nonemployment affects farmers almost as seriously as it does those who are thrown out of work. The farmer is dependent on the American pay roll, for it is out of the pay rolls that he is paid for his products.

For aught I know, or that the gentleman from Arkansas knows, the President also used "the same pen" to proclaim an increase of "50 per cent" in the duty on butter. The duty on butter was 8 cents a pound, and this 50 per cent increase was therefore 4 cents per pound, making the present duty 12 cents a pound. Four cents a pound on butter means $80 a ton, which is more than an offset for 37½ cents a ton that the president, still with "the same pen," proclaimed on pig iron.

So long as the farmer can receive $80 more a ton for his butter I am sure he is willing to pay 37½ cents more a ton for whatever pig iron he may use, be it in the form of barbed wire or farm machinery, or what else. The farmer's wife can take 9 and a fraction pounds of butter to market, and out of the increase pay for the increase on a whole ton of pig iron.

INLAND WATERWAYS

Mr. O'CONNOR of Louisiana. Mr. Speaker, Members of the House, H. R. 13512, a bill to amend the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress as expressed in sections 201 and 500 of the transportation act, and for other purposes," as it finally went to the President after the adoption of the conference report by the Senate and House is one of the most constructive measures ever passed by any Congress in the history of our country.

There are some expressions that require no elaboration. There are some bills which so cogently, clearly, and legislatively express national hope and purpose that any elaboration would be a supererogation. If I may be permitted the observation, which has become solemnly historic, "and God said let there be light and there was light," needs no ornament in the way of explanatory phraseology. Res ipsa locquitur—the thing speaks for itself. The bill is monumental in its economic and transportation wisdom and patriotic scope. But it would be incomplete, masterpiece though it might be, if it stood alone, without the triumphal cap which has been given to it by the amendment agreed upon in conference, which reads, "The Secretary of War is authorized and directed to cause an investigation and survey to be made of the inland water route from Boston, Mass., to Beaufort, N. C., with a view to determining the amount of actual or potential commerce thereon and the feasibility and advisability of extending the services of the Inland Waterways Corporation to the waterways included in such route or any section thereof, and to report thereon to the Congress as soon as practicable."

The proposed measure which I am sure will become a law by virtue of the President's signature is such a harbinger of hope and performance to the advocates of inland and coastal waterway development that I am going to place it in my address at this point, so that the future might be glimpsed through its words. It is an archway through which gleams that untraveled world, the margin of which though still in the distance gives us knowledge of the wonders that are to come to ourselves and succeeding generations through the renaissance of the revival of water traffic in the United States. The bill and the conference report adopted by the House and Senate make for such a great chapter in the history of transportation in the United States of America that I feel privileged to insert them here in my extension of remarks.

Be it enacted, etc., That section 2 of the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act, and for other purposes," approved June 3, 1924 (par. 152, ch. 5, title 49, U. S. C.; ch. 243, vol. 43, 360 U. S. Stat. L.), be, and the same is hereby, amended to read as follows:

"SEC. 2. The capital stock of the corporation shall be $15,000,000, all of which is hereby subscribed for by the United States. Such subscription shall be paid by the Secretary of the Treasury, within the appropriations therefor, upon call from time to time by the Secretary of War. Upon any such payment a receipt therefor shall be issued by the corporation to the United States, and delivered to the Secretary of the Treasury, and shall be evidence of the stock ownership of the United States. There is hereby authorized to be appropriated the sum of $10,000,000, in addition to the $5,000,000 heretofore authorized, for the purpose of paying such subscription."

SEC. 2. That section 3 of said act be, and the same is hereby, amended to read as follows:

"SEC. 3. (a) Until otherwise directed by Congress, the corporation shall continue the operation of the transportation and terminal facilities now being operated by or under the direction of the Secretary of War under section 201 of the transportation act, 1920, as amended, and shall continue to operate the facilities now being operated or that may hereafter be operated by it under the provisions of this act; and shall, as soon as there is an improved channel sufficient to permit the same, initiate and continue the water carriage heretofore authorized by law upon the Mississippi River above St. Louis.

"(b) When the improvement of any tributary or connecting waterway of the Mississippi River, not including the Ohio River, shall have been completed or advanced to the point where within two years thereafter there will have been substantially completed a sufficient and dependable channel for the safe operation of suitable barges and towboats thereon; and when the Chief of Engineers of the United States Army shall certify that fact to the Secretary of War, the Secretry of War shall thereupon cause a survey of such tributary or connecting waterway to be made for the purpose of ascertaining the amount of traffic, the terminal facilities, and the through routes and joint tariff arrangements with connecting carriers, that are or will, within such years, probably be available on such tributary or connecting waterway. As soon thereafter as such survey shall have been completed and a sufficient and dependable channel for the safe operation of suitable barges and towboats shall have been substantially completed, the Secretary of War may, if he finds from such survey that water transportation can, in the public interest, be successfully operated on such tributary or connecting waterway, extend the service of the Inland Waterways Corporation thereon as soon as the corporation shall have suitable facilities available therefor.

"(c) It is hereby declared to be the policy of Congress to continue the transportation services of the corporation until (1) there shall have been completed in the rivers where the corporation operates, navigable channels, as authorized by Congress, adequate for reasonably dependable and regular transportation service thereon; (2) terminal facilities shall have been provided on such rivers reasonably adequate for joint rail and water service; (3) there shall have been published and filed under the provisions of the interstate commerce act, as amended, such joint tariffs with rail carriers as shall make generally available the privileges of joint rail and water transportation upon terms reasonably fair to both rail and water carriers; and (4) private persons, companies, or corporations engage, or are ready and willing to engage, in common-carrier service on such rivers.

"(d) When the Secretary of War shall find that navigable channels and adequate terminals are substantially available as provided in paragraph (c) of this section, and when the Interstate Commerce Commission

shall report to the Secretary of War that joint tariffs with rail carriers have been published and filed as provided in said paragraph, the Secretary of War is hereby authorized to lease for operation under private management, or to sell to private persons, companies, or corporations, the transportation facilities, or any unit thereof, belonging to the corporation: *Provided*, That the facilities of the corporation shall not be sold or leased (1) to any carrier by rail or to any person or company directly or indirectly connected with any carrier by rail; or (2) to any person, company, or corporation who shall not give satisfactory assurance and agree, as part of the consideration for such sale or lease, that the facilities so sold or leased will be continued in the common-carrier service in a manner substantially similar to the service rendered by the corporation, together with ample security by bond or otherwise to insure the faithful performance of such agreement; or (3) until the same has been appraised and the fair value thereof ascertained and reported to the President by the Interstate Commerce Commission, and the sale or lease thereof has been approved by the President.

"(e) Any person, firm, or corporation, including the Inland Waterways Corporation, engaged or about to engage in conducting a common-carrier service upon the Warrior River or the Mississippi River, or any tributaries thereof, may apply to the Interstate Commerce Commission and obtain a certificate of public convenience and necessity in accordance with the provisions of section 1 of the interstate commerce act, as amended, and the Interstate Commerce Commission shall thereupon, by order, direct all connecting common carriers and their connections to join with such water carrier in through routes and joint rates with reasonable rules, regulations, and practices, as provided in paragraph (3) of section 15 of the interstate commerce act, as amended, and the commission shall, in such order, fix reasonable minimum differentials between all-rail rates and joint rates in connection with said water service to apply until changed by order of the commission. Such joint routes, rates, rules, regulations, and practices may be changed by order of the commission or by agreement of the water carriers and the other participating carriers. The commission shall further require the interested common carriers to enter into negotiations for the purpose of establishing equitable divisions of the aforesaid joint differential rates within 30 days after such joint rates are established, and if the carriers are unable to agree upon equitable divisions within 120 days from date of publication the commission shall, by order, determine and establish reasonable divisions to become effective coincident with the effective date of the joint rates. The commission is hereby given authority upon complaint, at once, and if it so orders without answer or other formal pleading by the interested carrier or carriers, but upon reasonable notice, to enter upon a hearing concerning (1) the reasonableness or lawfulness of any through route or joint rate filed pursuant to such order of the commission, or (2) the reasonableness of any minimum differentials between all-rail rates and joint rates in connection with any water service, or (3) the reasonableness of any division of joint rates ordered by the commission under the provisions of this act; and after full hearings the commission may make such order with reference to any such matters as it may find to be proper and in the public interest. At any such hearing the burden of proof concerning the unreasonableness or unlawfulness of any through route, joint rate, minimum differentials between all-rail rate and joint rate in connection with water service, or division of joint rates shall be upon the carrier or carriers making the complaint; and the commission shall give the hearing and decision of such questions preference over all other questions pending before it, except such questions as are given like preference by law, and decide the same as speedily as possible: *Provided*, That if the Inland Waterways Corporation sells or leases its transportation facilities to any person, firm, or corporation to be operated as a common carrier, such person, firm, or corporation shall be entitled to a certificate of public convenience and necessity upon making application therefor; and all through traffic arrangements and joint tariffs, with rules, regulations, and practices in connection therewith, published by the Inland Waterways Corporation and filed with the Interstate Commerce Commission and participated in by other carriers shall remain in full force and effect between such carriers and the person, firm, or corporation purchasing or leasing such transportation facilities from the Inland Waterways Corporation and operating the same as common carriers until changed by order of the commission, except that such through-traffic arrangements and joint tariffs, with rules, regulations, and practices therewith, may be changed by mutual consent of the water carrier and the other participating carriers. Joint rail and water rates as herein used shall be deemed to include every movement of traffic in which a water line can participate.

"(f) The operation of the transportation and terminal facilities under this act shall be subject to the provisions of the interstate commerce act, as amended, and to the provisions of the shipping act, 1916, as amended, in the same manner and to the same extent as if such facilities were privately owned and operated; and all vessels of the corporation operated and employed solely as merchant vessels shall be subject to all other laws, regulations, and liabilities governing merchant vessels."

SEC. 3. The Secretary of War is authorized and directed to cause an investigation and survey to be made of the inland water route from Boston, Mass., to Beaufort, N. C., with a view to determining the amount of actual or potential commerce thereon and the feasibility and advisability of extending the service of the Inland Waterway Corporation to the waterways included in such route, or any section thereof, and to report thereon to the Congress as soon as practicable. He is authorized to pay the expenses of such a survey from the funds which may hereafter be appropriated for the purchase of stock in the Inland Waterways Corporation.

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13512) to amend the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act, and for other purposes," approved June 3, 1924, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment, and after the word "*Provided,*" in line 25, insert the following related matter: "That for the purpose of this paragraph the facilities of the corporation on the Mississippi River and its tributaries shall be considered one unit, and those on the Warrior River and its tributaries as one unit: *Provided further*"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment, insert the following:

"SEC. 3. The Secretary of War is authorized and directed to cause an investigation and survey to be made of the inland water route from Boston, Mass., to Beaufort, N. C., with a view to determining the amount of actual or potential commerce thereon and the feasibility and advisability of extending the service of the Inland Waterways Corporation to the waterways included in such route, or any section thereof, and to report thereon to the Congress as soon as practicable."

And the Senate agree to the same.

JAMES S. PARKER,
E. E. DENISON,
SAM RAYBURN,
Managers on the part of the House.

CHAS. L. MCNARY,
FREDERIC M. SACKETT,
DUNCAN U. FLETCHER,
MORRIS SHEPPARD,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 13512, submit the following statement in explanation of the effect of the action agreed upon by the conference committee and embodied in the accompanying conference report as to each of such amendments, namely:

On No. 1: The House bill, as it passed the House, provided that under certain conditions stated in the bill the Secretary of War would be authorized to sell or lease the facilities of the Inland Waterways Corporation, or any unit thereof, to private persons, companies, or corporations. The word "unit" was not defined, but it was used in the House bill as meaning the facilities of the corporation operated on the Mississippi River and its tributaries separate from the facilities of the corporation operated on the Warrior River, or vice versa. Senate amendment No. 1 struck out the words "or any unit thereof." The effect of the Senate amendment was to limit the power of the Secretary of War to sell or lease the facilities of the corporation so that he could only sell or lease them as a whole. The agreement reached by the conferees on the part of both Houses is to restore the language of the House bill and insert explanatory words defining the meaning of the word "unit." It was agreed to insert language stating that within the meaning of the act the facilities of the corporation operated on the Mississippi River and its tributaries should be one unit, and the facilities operated on the Warrior River and its tributaries should be another unit. So that the bill as agreed upon provides that under the conditions named therein the Secretary of War is authorized to lease or sell the facilities of the corporation operated on the Mississippi River and its tributaries as one unit, and those operated on the Warrior River as another unit.

On No. 2: Senate amendment No. 2 consisted of a new paragraph which authorized and ordered the Secretary of War to make a survey of the Coastwise Canal from Boston to Beaufort, N. C., to ascertain what traffic and terminals would be available with a view to future authorization for operations of the corporation on the Coastwise Canal. The Senate amendment also provided that the expenses for making such survey should be paid out of the capital stock of the corporation. The conferees on the part of the House receded from its disagreement to

that amendment and agreed to the same with an amendment which strikes out the provision for paying the expenses of the survey out of the capital stock of the corporation. The effect of the action of the conferees on that amendment is to leave it as a mere authorization to the Secretary of War to cause a survey of the Coastwise Canal to be made to ascertain the traffic and terminals that would be available thereof.

Mr. Speaker, there will always be torchbearers in this world. There will always be men and women far in advance of the crowd, lighting the way for those who are inevitably to follow them. Many times the torch is flung from failing hands to other visionaries and seers of things and the great march to success is maintained and secured. T'was ever thus and it will always be so. Dreamers of dreams who in the night of despair foresee the glories of the day that is to come. Wandering by lone sea breakers and sitting by desolate streams these leaders of a dawning civilization pass out and are eventually forgotten, but their work survives until it gives way to a grander and finer thought. For each age is a dream that is dying or one that is coming to birth. As proof of this read this paragraph from the rivers and harbors bill of 1909, which points the way to an inland and intracoastal waterway from Boston, Mass., to the Rio Grande River, through as fine a section as will ever bless this earth.

INTRACOASTAL WATERWAYS

Survey for the construction of a continuous waterway, inland where practicable, from Boston, Mass., to Long Island Sound, including a waterway from the protected waters of Narragansett Bay through the ponds and lagoons lying along the southern coast of Rhode Island to Watch Hill and Fishers Island; thence to New York Bay; thence across the State of New Jersey to a suitable point on Delaware River or Bay; thence to Chesapeake Bay; thence from Norfolk, Va., to the sounds of North Carolina and Beaufort Inlet, N. C., for the purpose of ascertaining the cost of a channel with a maximum depth of 25 feet, or such lesser depths along any section or sections of the said waterway as may be found to be sufficient for commercial, naval, or military purposes. Such survey shall include an examination of all practicable routes, the preparation of plans and estimates of cost along the most available route, and a report upon the desirability of utilizing as a part of such waterway any existing public or private canal, or any part thereof, and the probable cost of acquiring the same.

Survey for the construction of a continuous waterway, inland where practicable, from Beaufort, N. C., to the Cape Fear River, N. C.; thence to Winyah Bay, S. C.; thence to St. Johns River, Fla.; thence to Key West, Fla., for the purpose of ascertaining the cost of a channel with a maximum depth of 12 feet, or such lesser depths along any section or sections of the said waterway as may be found to be sufficient for commercial, naval, or military purposes. Such survey shall include an examination of all practicable routes, the preparation of plans and estimates of cost along the most available route, and a report upon the desirability of utilizing as a part of such waterway any existing public or private canal, or any part thereof, and the probable cost of acquiring the same.

Survey for the construction of a continuous inland waterway across the State of Florida, between suitable points on the eastern and Gulf coasts of said State, for the purpose of ascertaining the cost of a channel with a maximum depth of 12 feet, or such lesser depths along any section or sections of said waterway as may be found sufficient for commercial, naval, and military purposes. Such survey shall include an examination of all practicable routes, the preparation of plans and estimates of cost along the most available route, and a report upon the desirability of utilizing as a part of such waterway any existing public or private canal, or any part thereof, and the probable cost of acquiring the same.

Survey for the construction of a continuous waterway, inland where practicable, along the Gulf of Mexico from St. Georges Sound, Fla., to the Mississippi River at New Orleans, La., by way of St. Andrews Bay, Choctawhatchee Bay, Pensacola Bay, and Perdido Bay, Fla.; Mobile Bay, Ala.; Mississippi Sound, Ala. and Miss.; Lake Borgne and Lake Pontchartrain, La., for the purpose of ascertaining the cost of a channel with a maximum depth of 9 feet, or such lesser depths along any section or sections of the said waterway as may be found to be sufficient for commercial, naval, or military purposes. Such survey shall include an examination of all practicable routes, the preparation of plans and estimates of cost along the most available route, and a report upon the desirability of utilizing as a part of such waterway any existing public or private canal, or any part thereof, and the probable cost of acquiring the same.

Survey for the construction of a continuous inland waterway in the State of California, between suitable points on Humboldt Bay and Eel River, with a view to obtaining a channel of suitable width and a maximum depth of 9 feet, or such lesser depths along any section or sections of said waterway as may be found desirable. Such survey shall include an examination of all practicable routes.

INLAND WATERWAY OF LOUISIANA AND TEXAS

Survey for the construction of a continuous inland waterway from the Mississippi River to Bayou Teche; thence to Mermentau River; thence to Calcasieu River; thence to the Sabine River, La. and Tex.; thence to Galveston, Tex.; thence to Brazos River, Tex.; thence to Pass Cavallo; thence to Aransas Pass; thence to Point Isabel; and thence to the Rio Grande, for the purpose of ascertaining the cost of a channel with a maximum depth of 9 feet, or such lesser depths along any section or sections of the said waterway as may be found to be sufficient for commercial, naval, or military purposes. Such survey shall include an examination of all practicable routes, the preparation of plans and estimates of cost along the most available route, and a report upon the desirability of utilizing as a part of such waterway any existing public or private canal, or any part thereof, and the probable cost of acquiring the same: *Provided*, That whenever, in the making of a survey of any of the preceding waterways, field work shall indicate that the proposed improvement is clearly inadvisable, no detailed survey or plans shall be made.

Within the next 20 years this dream will be a reality. New Orleans, on the banks of the Mississippi River, will be at the crossroads, as it were, of a commerce moving east and west upon this great system of waterways that will carry a merchandise so vast as to be unimaginable. That great and flourishing city now is destined by sheer force of its geographical position to become one of the greatest cities and trade marts of the world. Flood control is assured, and that means a rainbow to the storms of life, the evening beams that will smile the clouds away to the people of that fertile section known as the alluvial valley of the Mississippi. The flood control bill or act will always be regarded as one of the great achievements of the administration of Mr. Coolidge. It is a great, constructive legislative program.

In the magnitude of the operations that will be conducted under and in conformity with this program even the construction of the Panama Canal must take second place. But the people of the Mississippi Valley must not be misled or deluded into the thought that their work in the way of solving the Mississippi problem is at an end. As long as rain and snow fall from above us on the places beneath between the Alleghenies and the Rocky Mountains and from far over the Canadian boundary line shall we have, in the springtime particularly, great volumes of water seeking in accordance with the law that governs them the lowest spots and terrain in the journey to the Gulf of Mexico and out into the Atlantic Ocean. The lowest spot is a great stretch, winding its way tortuously, so that at times it looks like a coil within a coil and sometimes like a great spiral, horizontally moving on to its ultimate destination. That is the Mississippi River and all of the rivers that flow into it from east to west and are called its tributaries. In the House caucus room there was exposed by the Committee on Flood Control during its many notable hearings in a great effort to solve the problem a skeleton of the Father of Waters and its many attendants. It attracted great attention because it focused the mind at once upon the vastness of the territory drained by this wonderful system, and at once the thought sprang into the mind of the beholder, Why is it that these rivers, traversing the heart of the continent, are not so cared for that they would make for the support of the greatest water transportation fleet that the world has ever known? That query will not down. Like Banquo's ghost, it will not down. It will be asked by generation after generation of Americans until the affirmative, satisfying answer is given—a complete, navigable waterway covering this tremendous reach of territory, upon which will float myriads of vessels, barges, rafts, and towboats that will carry to and fro the commerce of the multitude of people that will increase the already large population found upon the farms and in the cities of the valley.

Mr. Speaker, vast as our imports and exports are they are relatively but a small part of our total commerce, foreign and domestic. And while that foreign commerce is greatly to be wished and much to be cared for, still if the necessities of some tremendous requirements demanded it we could live within ourselves and bid defiance to the rest of the world. Should we ever be pushed to it from any threat from beyond the Atlantic or the Pacific we could, with a waterway system properly developed to meet the great demands that would be made upon it, so arrange our lines, without any great economic disturbance, to live among ourselves. Our domestic commerce would maintain the Republic, financially, commercially, and socially until troubled nights of danger were over. For that domestic commerce, great as it is to-day, may be doubled, trebled, and quadrupled within the next 10 years. For, Mr. Speaker, our civilization will not have justified itself until every home in

America, and throughout the world for that matter, is a home in the finest and noblest sense of the word, a home with sufficient rooms to make for that home life which is essential to the life of America. Every home should have a bathroom, be lighted by electricity for heating and cooking purposes. Our waterfalls throughout the country will some day be utilized to make for that power which will transmit electric energy to every household in the Republic. Upon the walls should be pictures that will ennoble the thought of the boy and girls in that home. Every parlor should be ornamented with statuary to stimulate the imagination of children to do noble things. There should be rugs and carpets upon the floor. There should be musical instruments; and upon every table there should be an abundance of foodstuffs so as to make for a great, healthy, vigorous America. It should be a land flowing with milk and honey so that its citizenry, men and women, will be willing to fight for it as a land that they will have an even better cause than now to love for the great blessings that will spring from its life.

The point I wish to make is that our domestic commerce is yet *in its infancy* and that its proper promotion, particularly in the way of encouraging finer homes, will make for a demand upon our factories that will keep their wheels revolving and humming, making sweetest music to the ears of a vast number of employees who will be happy in the good wages they will receive and the fact that they are adding to the pleasures of their countrymen by the generous output from their mills. This will make for enormous commerce, and I make the prediction, Mr. Speaker, that as a result of the operations of the Inland Waterways Corporation that the day is not far distant when railroads as the major factor in our transportation system will as a result of sheer economic necessity go into the operation of great barges, flats, and towboats as a part of their transportation machinery. It would not be surprising if in the course of years our whole transportation system were not so changed as to be almost unthinkable from what it is to-day. Many bold thinkers already envision a future in which railroads will run at right angles to all of our great rivers and in this altered plan the highways will be made to render a service so as to make for the greatest low-cost transportation system obtainable. The Republic will be driven to this by economic law and as a result of a laudable ambition to remain in the vanguard of the civilization of the present time—

> Do well thy work—it shall succeed,
> In thine or in another's day,
> And thou that lack the victor's need,
> Thou shall not want the toiler's pay—

is the stirring thought that has been in the minds of Americans from colonial times, a thought which acted upon has brought us to the wonderful place we have reached. But I say we are still at sunrise. Noon is far away, and we will go on toiling unremittingly so that our children's children will enjoy the fruits of our labors and work for the tremendously brilliant future that lies ahead of them. Yes, Mr. Speaker, the signing of the flood control bill is a great day, but we must not forget that it is an authorization bill, and that under the provisions of another law, that creating the Bureu of the Budget, the Chief of Engineers will submit estimates from year to year for the work that will have to be done and that the Committee on Appropriations will write appropriation bills in accordance with the recommendations of the bureau. We must not forget that this is a world of change, congressionally as well as otherwise, and that there may be attempts made to so amend this great bill as to render its provisions nugatory. We must as watchmen upon the towers be ever upon the alert to not only prevent its emasculation but to improve it so as to make for that waterway system that has been in the minds not of dreamers but of statesmen like Herbert Hoover.

The inland waterway bill does not make for the Government going into business. It is a great experiment, which its proponents know will last as an experiment only for a few years, when it will undergo a change of hands as a result of its successful operation and private enterprise will pay handsomely for its then equipment. Great credit is due to the men who have advocated the operation of this line from the Twin Cities down to New Orleans and thence over to Mobile and Birmingham. They have planted a tree which will bear golden fruit.

The territory pictured by me of the Mississippi Valley comprises two-thirds of the total national area. It domiciles over half of the entire population. Its contributions to the national wealth are 68 per cent of exportable products, 52 per cent of manufactures, and 70 per cent of agricultural products of the Nation.

In this territory is contained the industrial center of the Nation, at the foot of Lake Michigan; the agricultural center, near the confluence of the Mississippi and Illinois Rivers, and the center of population in southwestern Indiana, close to the Illinois line.

For this chief wealth-producing section of the United States and of the world, the natural arteries of transportation are the Great Lakes and the Mississippi-Illinois-Ohio River systems, flowing into the Gulf of Mexico.

The Federal Government has spent nearly $430,000,000 on waterways in the Mississippi Basin. Of this, over $100,000,000 were appropriated to the development of the Mississippi from its mouth to the Ohio, and about one hundred million more to the improvement of the Ohio and its immediate confluence. As a result of this national effort the Mississippi is navigable by barge of 9-foot draught from Cairo to the Gulf, and the Ohio from the industrial centers of western Pennsylvania to its confluence with the Mississippi.

At an expenditure of $60,000,000 the people of the Sanitary District of Chicago have dredged and improved the northern link of the Illinois-Mississippi waterway from Chicago to Joliet. The State of Illinois, at the cost of $20,000,000 more, has partly completed and has under construction the continuing link from Joliet to Utica.

In the heart of this system of waterways—a clot, blocking off the circulation of lake traffic from the rivers to the south and east—is the undredged section of the Illinois-Mississippi Rivers from Utica to Cairo. The opening of this artery involves the expenditure by the National Government of less than $5,000,000, plus an undetermined sum of perhaps $25,000,000 for compensating works to maintain and restore lake levels. The improvement itself consists of deepening to 9 feet the two rivers between Utica and Cairo, removing four locks and dams in the Illinois, and assuring a constant and adequate flow of water from Lake Michigan into the Mississippi.

Adequate navigation of the Mississippi from St. Louis and of the Ohio-Mississippi from Pittsburgh to the Gulf and the Great Lakes is dependent upon the construction of this link.

The Government has appropriated approximately $40,000,000 for deepening the Missouri from Kansas City to St. Louis and the Mississippi from Minneapolis to the latter metropolis. The project will change the present 3½-foot depth to one of 6 feet.

Total Federal appropriations for the improvement of coastwise harbors aggregate more than $500,000,000. The cost of the Panama Canal was nearly $400,000,000. These expenditures were borne by all of the people, yet because of the undeveloped link in the Lakes to Gulf waterway, agriculture and industry in this great central empire are withheld from their full share in the benefits of these improvements, and the shippers of this section are forced to compete disadvantageously with those of the eastern centers.

An illustration of this inequality is in the fact that machinery can be shipped from points in the Middle West by rail to the eastern seaboard, thence by water through the Panama Canal to Pacific ports, more cheaply than it can be sent by rail, direct from the point of manufacture, to its western destination.

About 7,000,000 tons of cargo passed through the Panama Canal in 1919; in 1924 this tonnage had increased to between 27,000,000 and 30,000,000. The Ohio-Monongahela-Allegheny Rivers system carried about 38,000,000 tons in 1923. The Mississippi-Warrior Rivers service, under adverse conditions, in the first years of operation transported 4,000,000 tons of freight. In about this same period one railroad operating between Chicago and the Gulf increased its freight tonnage from 38,000,000 to over 55,000,000.

In the immediate territory traversed by the projected Illinois-Mississippi improvement, 25,000,000 tons of freight a year are immediately available for the waterway, which will have an annual capacity of 60,000,000 tons.

The city of Chicago alone uses annually about 38,000,000 tons of coal, with consumption increasing at the rate of 1,000,000 tons a year. Over half of this coal is mined in southern Illinois, within one day's motor-truck haul of the Illinois River. The construction of the Illinois-Mississippi deep waterway will lower the cost of this coal in the Chicago district by about $1 a ton, with a commensurate reduction in the cost of coal shipped by this 9-foot channel to such lake cities as Milwaukee, Duluth, Superior, and Detroit. As another indicant of the tonnage available for shipment by this waterway, 200,000,000 bushels of grain are raised yearly in Illinois within hauling distance of the river.

Every congressional district in the States of South Dakota, Minnesota, Illinois, Wisconsin, Indiana, Michigan, Iowa, Ne-

braska, Ohio, and Missouri utilized the Mississippi barge line during its first five years of operation. The water rates being 20 per cent lower than corresponding rail rates, this barge line saved for shippers, directly $3,392,000—and indirectly an indeterminate sum through reduction in the rates of competing railroads.

The industrial and agricultural centers of the Allegheny watershed and of the South can be linked by water routes with the Great Lakes only by the construction of the deep waterway between Utica and Cairo.

Over half of the Nation's population can secure the full benefits of the Panama Canal investment only through this construction.

The Federal Government, by the small expenditure involved, can enhance immeasurably the value of the $550,000,000 investment in Mississippi Basin waterways, and can give to all of the people of the United States the most comprehensive system of water transportation in the world.

The matter is in the hands of the National Congress, and Congress will answer patriotically with the vision of statesmen. Millions will silently think, "Well done, thou good and faithful servant."

There remains but one task to be accomplished, and that will soon be finished when the rivers and harbors bill now pending in the House will be enacted into law. For that bill carries in its provisions a proposed survey of the industrial canal which in the lower part of the city of New Orleans connects the Mississippi River and Lake Pontchartrain with a view of determining the advisability of remunerating the local interests for the expenditures made in the construction of that great canal which is a sine qua non to the great waterways system and transportation agency that will build up a commerce so huge as to defy the efforts of the statisticians to approximate it in their prognostications. Only the one that has the faith in him can see the numberless towns and cities yet unborn that are to adorn the banks of this immense waterway—cities and towns that will promote the welfare of our country and bring happiness to millions who will find unending employment in the incalculable commerce that will move over an inland route from Boston to the Rio Grande. Not only will this make for the development of a commerce that will pale into insignificance all of the argosies dreamed of in the past, but will make for a military defense that has been urged by Secretaries of War and Commerce for many years past in every succeeding administration since the Civil War.

Mr. Speaker, when the United States sprang into existence in 1789 as a result of the great Constitutional Convention that gave birth to that wonderful federation, no one believed that in the incredibly short period of 140 years that the United States would be composed of 48 great Commonwealths and would reach from the Canadian line down to the Gulf of Mexico. It was then only 13 States or Colonies straggling along the Atlantic coast.

No dreamer was fantastic enough to look into the future and tell the world that he beheld a dream so dazzling as the imperial civilization that is our boast and our glory of to-day. Stand before a map of our country and look. See it as it rolls under your gaze from the Atlantic to the Pacific. Ponder over the trials and tribulations of the American pioneers as they marched westward, settling around the Great Lakes, and then over the Mississippi and across the Louisiana Purchase, which became their own in 1803, and across the Rockies to the shores of the Pacific Ocean, either through the Oregon Territory, the American title to which was established in 1846, or by way of the empire ceded to us by Mexico in 1848, and you will realize that performance has outgrown any promise that might have been made when the Constitution of our country was adopted. Gaze at that map and see the Lone-Star State, with a territory as great as that of the Republic of Germany. Look down and see Alaska at the bottom of the map, whose mountains and lakes defy the brush of the painter or the tongue of the poet to describe. Glance at the Philippines, queen of the eastern seas, fairest of all Edens, with Samoa, Hawaii, Porto Rico, the Virgin Islands, the Canal Zone, and drink in the thought that Old Glory, the flag of our country, waves under the icy gale and beneath the northern lights as proudly as it floats under the balmy breezes and the soft and glorious radiance of the southern cross.

Mr. Speaker, we who have fought the good fight for inland and coastal waterways are not mere dreamers. We have grown old witnessing many marvelous accomplishments by our country. One great conquest after another has been her proud achievement. We who are looking westward see a greater destiny ahead than the wonderful civilization that blesses us to-day. The sunset of life gives us mystical lore and coming events cast their shadows before. Boston to the Rio Grande, with New Orleans at the crossroads, means for the greater glory of our country in peace times and a means of national defense in times of war, which I hope will never come again to curse the world with its horrors, atrocities, and crucifixions.

FARM RELIEF LEGISLATION

Mr. ABERNETHY. Mr. Speaker, under general leave to extend remarks in the RECORD I insert the following speech I made to the farmers over radio station WTFF from Washington, D. C., January 25, 1928:

The question of substantial farm relief at this session of Congress is largely dependent upon the forces of the South and the West harmonizing and getting together, thereby insuring sufficient votes to override the veto of the President, if necessary, and to place upon the statute books laws which will grant to the farmers equality with industry and with those specially favored by law, insuring to the farmer a reasonable return for his labors and efforts.

For one who has consistently supported the McNary-Haugen bill I desire to appeal to those who each Congress put this legislation to the forefront to call into conference not only the western Members of Congress but also those Members who come from that great agricultural section, the South. Let us come together this session of Congress and so frame this legislation as to enable the southern Members of Congress and the western Members of Congress to join forces and organize and to pass substantial farm relief legislation through Congress, and to have enough votes to override the veto of the President, in the event of his disapproval. The situation of the farmer is too critical for us to play politics with measures designed for his relief. What is needed is legislation, and this we can not secure at this session of Congress unless we iron out the differences and come together on the substantial principles of the McNary-Haugen proposal regardless of how it may affect the fortunes of certain statesmen ambitious to become President.

Those who represent the great farm organizations of the country must realize that the plight of the farmer at this time makes it imperative that those of us who are consistently trying to give relief to him need more votes in Congress than we had at the last session of Congress; and to secure these votes there must be unity among farm leaders and the real friends of the farmer in and out of Congress, and that there must be free, open, and full cooperation and organization to secure genuine farm relief this year. So let us counsel together for the common good.

There are loud proclamations from certain quarters that the country is enjoying an era of prosperity, but no one can seriously contend that the farmer is sharing in this prosperity, if it really exists. Agriculture is beset on every hand. The prices to be paid by the farmer for what he is required to purchase are fixed by others than by himself and the prices which he receives for his labors and the things he produces is also beyond his control. And in this dilemma he finds himself year after year sinking deeper into the mire and the financial slough of despond. He has been told, and rightfully so, that laws now in force in the land are protecting and benefiting industry and others, with no resulting benefit to himself, and naturally he appeals to the Congress and to the powers that be in the Government to grant to him the same rights and privileges or to abolish the special privileges granted to others. It can not be denied that he is right in his demands. How is this to be brought about? The forces who are the recipients of privileges are strong and powerful, united and well organized, and the vantage ground gained by them they will seek to maintain and defend, and the battle is one which can only be won for the farmer by unity in the camp of his friends; hence the great necessity of harmonizing our forces for the conflict.

There are many strong men in the country who have set forth this plan and that plan and there are many bills pending in Congress which have for their purpose the relief of the farmer, but unless we can get away from pride of authorship and can center our forces on one concrete plan it is well known, with the present conditions as they exist, that the outlook for farm relief is not bright. Favorable signs are appearing during the hearings before the House Agricultural Committee that lead us to expect from that great committee this session one legislative plan which will have the backing of the committee instead of having three bills reported from the committee, as was the case at the last session of Congress.

One of the crying needs at this time is for the various States and also the National Government to bring about the reduction in the farmer's taxes. The total amount of taxes paid on farm property increased from about $344,000,000 in 1914 to about $870,000,000 in 1925, and in the years 1926 and 1927 there has been practically no relief given the farmer in his taxes. Land taxation is all out of proportion as compared with other forms of taxation. Prices received for farm products rose from an index of 100 in 1914 to 209 in 1919 and dropped to 136 in 1926 and to about 130 in 1927. The burden of taxation practically wiped out farm earnings during the years of low returns from farm products.

Need for readjustment of freight rates on agricultural products is imperative. The agricultural situation has been and is now being studied by various groups and from various angles.

Members of Congress have been supplied with interesting and voluminous data. The National Industrial Conference Board and the Chamber of Commerce of the United States have just furnished us with a 273-page book prepared by the Business Men's Commission on Agriculture, and more recently there has been sent to our desks a "Report on the agricultural situation by the special committee of the Association of Land-Grant College and Universities," and various other organizations, groups, and individuals have sought to give us light on this perplexing problem.

These various dissertations are helpful in the study of agricultural conditions, but our divided ranks is the most serious problem that confronts us in Congress to-day; and it is my candid opinion, as I said in the outset, what we need most at this critical time is more unity and not so many plans—more votes to effectuate legislative farm relief. Can we secure this harmony? I believe we can. When we do harmonize, there are enough real friends of the farmer in Congress to frame and pass appropriate legislation which will benefit the agricultural masses and give them equal rights and opportunities with others under the laws.

VETO OF FARM RELIEF

Mr. EVANS of Montana. Mr. Speaker, the most serious problem before the country to-day is that of farm relief. Primarily it is the problem of the farmer, but, as a matter of fact, it is nation-wide in its scope and portent and must be considered as a national issue.

Agriculture is the basic industry of America and will ever so remain. Nature has so decreed. The fertility of the soil is the richest resource of this continent. This inheritance must be preserved and the tiller of the soil remain an independent economic factor in our industrial system.

There are 32,000,000 people on the farms and the 20,000,000 more directly dependent upon the farms for their livelihood—52,000,000 people—one-half the continental population of the United States. The American farmer is the greatest market for the products of American industry. His purchasing power can not be seriously impaired without corresponding disastrous results to capital and labor. Industry can not permanently prosper, labor can not be permanently employed, with agriculture prostrate. Agriculture to-day is prostrate. Everybody knows that and everybody recognizes the fact. A year ago, in his veto message of the McNary-Haugen bill, the President said:

> That there is a real and vital agricultural problem is keenly appreciated by all informed men. The evidence is all too convincing that agriculture has not been receiving its fair share of the national income since the war. Farmers and business men directly dependent upon agriculture have suffered and in many cases still suffer from conditions beyond their control. They are entitled to and will have every consideration at the hands of the Government.

Conditions have not changed and neither has the President. For the second time he has vetoed a measure intended to put agriculture on a parity with industry in this country. The President assigns many reasons for his veto, but in my judgment the real reason is the fact the administration is so wedded to the rich and powerful that the judgment of the President is warped and he is wholly out of sympathy with any prostrate industry.

On the same day that he vetoed the McNary-Haugen bill at the last session, President Coolidge signed an order raising the tariff on pig iron.

President Coolidge is ready to do anything for big business, for the railroads, for manufacturers; but the farmers can shift for themselves.

It is all right for the Government to interfere with the law of supply and demand by putting a tariff on aluminum. That benefits only a handful of people, of whom Andrew Mellon is chief. It is all right to put a tariff on farm products so long as that tariff does not work. But the minute farmers come forward with a plan to make an agricultural tariff work and benefit 30,000,000 people President Coolidge swings the veto ax.

It is a cardinal tenet in the political faith of the President that the Government first of all should look after the man at the top. Make the way easy for him, and he will take care of the rest of us. Make him prosperous, and some of his prosperity will seep down to those in the lower economic strata. The President could not approve the McNary-Haugen bill because it would tax a whole community for the benefit of special classes, but he has had no scruples about signing orders raising the tariff duties on nearly a score of important commodities and thus taxing the whole country for the benefit of even smaller classes.

The results of this nurturing of the big industrialists are seen in the census returns of manufactures. In 1925, the last year for which full data are available, the largest manufacturing concerns, those with net incomes of $5,000,000 or more, showed an average gain of 25 per cent in their net income over 1923, while the concerns with incomes below $5,000,000 showed an average loss of 11 per cent as compared with 1923. Now, the concerns showing this loss constituted 99.9 per cent of the total. The improvement, then, was confined to the topmost one-tenth of 1 per cent of the reporting establishments.

It is a time for plain speaking. The farmers of this country have it in their power to get justice at the hands of any administration if they will use their power. Let them cease to vote for an administration that denies them justice and they will get the relief they are entitled to before next March.

Let the farmers of Iowa, Kansas, Nebraska, Dakota, and the great farming States go to the polls in November next and register their disapproval of the administration that denies them justice and they will no longer have to beg and plead and cringe for relief.

The States I mention uniformily cast their votes for the benefit of New England and the manufacturing interests of the country.

A brief review of the votes cast for the Fordney-McCumber tariff bill by men representing these distressed agricultural States might now be illuminating.

The imperial State of Iowa, which probably produces more agricultural products than any other State in the Union, has 11 votes in this House, and she cast 11 votes for the Fordney-McCumber tariff bill.

Kansas, which produces almost twice as much wheat as any other State, has 8 votes to give, and gives all for this tariff bill.

Nebraska gives her total of 6 votes to the cause of special privilege.

Washington, the home of Mr. SUMMERS, who now says he will never again vote for a tariff bill that does not give equal benefits to all classes, casts her 5 votes for the bill.

Every vote cast by Colorado, South Dakota, New Mexico, and Wyoming was cast for the benefit of New England.

When the roll was called Oregon, Montana, Utah, and Idaho found every Representative in his seat, and every man cast his vote for the Fordney-McCumber tariff bill.

North Dakota alone, out of all that empire stretching from the Mississippi River to the Pacific Ocean, cast 1 vote against this tariff bill.

Now, when these 15 stricken States ask the great industrial interests of the country to reciprocate the favor bestowed, that great beehive of industry, New England, gives us 1 vote, and the President finds a hundred reasons for a veto.

Let the farmers exercise the right of veto and see how quickly their problem is solved.

MY ANNUAL REPORT TO THE CITIZENS OF THE FORTY-SECOND CONGRESSIONAL DISTRICT OF NEW YORK

Mr. MEAD. Mr. Speaker, the first session of the Seventieth Congress has just closed, and under the unanimous permission granted to me by my colleagues in the House I have the honor of making this report to the voters of my district of my activities with respect to the important legislation which has been under consideration by the Congress.

As I said in my report two years ago, we must establish contacts. This, my fourth annual report, is distributed in the hope that it will stimulate thought and a deeper sense of the responsibility relative to the work of the National Legislature, as well as to enable you to determine to what degree and what manner I have striven to represent my district and its variegated interests.

The Seventieth Congress convened December 5, 1927, the Members of which were elected in November of 1926. As you doubtless know each Congress has two sessions—a long session and a short session. The one just closed was what is known as the long session and continued from December 5 to May 29.

Because of the multiplicity of important legislative matters that came up for consideration and deliberation, I can deal but briefly in this report with only the outstanding questions that came before us.

TAXATION

The new revenue act which the two Houses finally passed and the President signed will cut taxes $222,000,000. In all the legislation affecting this branch of our economic legislation I have consistently maintained an attitude of opposition to any plan which sought to give a larger reduction to the wealthy than it would to those of low or moderate incomes, thus relieving that part of our public least able to bear the tax.

In the new tax bill the Ways and Means Committee followed three principles. First, that the reductions should not be such as would produce a deficit in the Treasury; second, that the reductions should be distributed where relief appeared more necessary and advisable; and third, that the taxes that had

not been reduced since the World War should be given special attention. The following table will show precisely how each individual class is affected by the new rates:

Decrease in revenue effected under bill reducing tax cuts

The rate changes provided by the new tax reduction bill follow:

REDUCTION IN REVENUE

Corporation rate, reduced 13½ to 12 per cent	$123,000,000
Corporation exemption, increased $2,000 to $3,000	12,000,000
Automobile tax, repealed	66,000,000
Admissions tax, exemption increased from 75 cents to $3	17,000,000
Club dues, exemption raised $10 to $25	1,000,000
Earned income allowance, increased $20,000 to $30,000	4,500,000
Cereal beverages, repealed	185,000
Wine taxes, reduced	1,000,000
Foreign-built yachts, repealed	10,000
Narcotics, druggists' fee reduced from $6 to $3	150,000
Total reductions	225,295,000

INCREASE IN REVENUE

Withholding tax at source	2,000,000
Prize fights admissions, 25 per cent over $5	750,000
Foreign-built yachts, customs	50,000
Total increases	2,800,000
Net reduction	222,495,000

APPROPRIATIONS

One of the most important functions of the Government is the raising of revenue and appropriations. At the opening of each session the President, through the Bureau of the Budget, submits an estimate of the money that will be necessary to carry on the work of the various governmental departments. Upon the basis of these estimates, which embraces approximately 1,000 pages in the bill, the various appropriation committees submit the various supply bills. During the last session of Congress the total amount appropriated was $4,595,448,625.59. The following are the major appropriation bills and the amount carried in each bill:

Agriculture	$139,138,793.88
District of Columbia	37,625,208.00
Executive and independent offices	527,593,111.00
Interior	272,656,039.00
Legislative	17,746,893.26
Navy	362,145,812.00
State, Justice, Commerce, and Labor	89,820,597.64
Treasury and Post Office	1,061,342,060.00
War	398,517,221.50
First deficiency	200,936,668.02
Second deficiency	99,172,485.76
Permanent annual and indefinites	1,388,753,735.53
Grand total	4,595,448,625.59

The term "permanent appropriations" is used to indicate expenditures authorized by previous Congresses.

REVENUES

The following table shows the manner of raising revenues to meet the above-mentioned expenditures:

Customs	$602,000,000.00
Income tax	2,065,000,000.00
Miscellaneous internal revenue	640,545,000.00
Miscellaneous receipts	501,952,314.00
Total	3,809,497,314.00
Gross total receipts	753,000,000.00
Gross total receipts (estimated)	4,562,497,314.00

While the foregoing would indicate a deficit, it is assumed, based on past experience, that actual cash withdrawals will fall sufficiently short of the sum total of the appropriations as actually to leave a surplus.

THE POSTAL EMPLOYEES NIGHT DIFFERENTIAL BILL

After working for several years on a bill that would grant a differential in pay for night workers in the Postal Service, the bill was finally passed by the House and the Senate, but was vetoed by the President. I was very happy to give my hearty support to this meritorious legislation which is favored by all post-office employees and which finally became a law. To my mind, it was a needed recognition of deserved public service in a substantial manner. And may I add that the men and women of the service gladdened my heart by their appreciation, as expressed by countless letters and telegrams.

PASSPORT AND VISA FEES

During the past session of Congress I introduced two bills for the reduction of passport and visa fees. This legislation is heartily indorsed by Americans who travel abroad and it also has the approval of the Secretary of State. It is hoped that these bills will be enacted into law during the short session of Congress which convenes next December.

UNEMPLOYMENT

Next to universal peace the greatest problem of the day in our country as well as in every other country is the great problem of unemployment. Its proper solution will relieve many other perplexing problems. It should also reduce the tax burdens now overwhelming our cities, towns, and villages. It will greatly lessen the work now forced upon social service and charity organizations. It will decrease the number now housed in almshouses and other abiding places throughout the land. It will sharply decrease the temptation that prompts men to crime, with a consequent diminishing number of those that are held in solitary confinement throughout the country. In a word, it will eliminate the misery and grief that accompanies great periods of industrial depression with the contentment and happiness that goes with steady uninterrupted employment.

I introduced a resolution calling for the creation of a joint committee to be appointed by the House and Senate to investigate this question of unemployment. This joint committee, in conjunction with the Labor Department, could initiate an exhaustive study of the question and recommend remedial legislation to Congress. The committee would also authorize the Labor Department to furnish us constantly and regularly with information as to the number of men and women unemployed as well as the nature and the character of their work, so that with this information we could intelligently consider this all-important problem of unemployment.

Senators WAGNER and LA FOLLETTE, as well as Representative JACOBSTEIN, also introduced legislation bearing on this subject.

European countries have studied this question for years, and in England and Germany the workers are insured against unemployment.

MUSCLE SHOALS

A question that has engaged the attention of Congress for several sessions is Muscle Shoals, and considerable discussion took place during the present session in the Senate and in the House upon this subject.

The proponents of the measure advert to the already large governmental investment, the advantage of the plant as a means of producing cheap nitrate and fertilizer as a benefit to our farmers. The discussion developed the proposition that the United States, having so heavy an investment, could not afford at this time to abandon entirely the project, but should utilize the works for the benefit of the public in the production of electric energy that would furnish, in addition to nitrate and fertilizer, light and power as well to a tremendous section of the country. It is hoped that the public will get cheaper light and power because the Government will control the power project.

An amendment was written into the bill which permits of the manufacture of nitrates and the development of electrical energy, but prevents the manufacture of fertilizer except for experimental purposes. I voted for the above amendment and for the bill. Muscle Shoals in operation is a great national asset; while idle it is a white elephant on our hands.

FLOOD CONTROL

The sympathy of the Nation went out to the poor people of the Mississippi Valley when that vast territory was inundated by an avalanche of water 300 miles in length and 100 miles in width, covering, as it did, every city, village, and farm.

I believe it to be a national problem financed and controlled by the Federal Government, and for that reason I supported legislation recommended by the Flood Control Committee, which personally investigated this great question. This measure received the sanction of a large majority of the Members of the House and Senate. I voted in the affirmative.

THE BOULDER CANYON PROJECT

The paramount purpose of this legislation is the protection of human life and property in Imperial Valley, Calif., now under a constant menace of destruction from floods. A further explanation of the bill is found in the report of the present Secretary of the Interior, Dr. Hubert Work, in which he states:

> The general plan and purpose of this measure have my support and I favor its being made a national undertaking to be carried out and administered by the Federal Government.

While Boulder Dam is primarily a flood control and irrigation project it is capable of developing considerable electrical power and will be a source of domestic water supply for southern California. Boulder Dam and Muscle Shoals will add to the wealth of the Nation and provide employment to many thousands of our people. I voted for the Boulder Dam project.

IMMIGRATION

The House of Representatives enacted a bill liberalizing the present immigration laws by permitting, to a limited extent,

the reuniting of families who have been separated by reason of the immigration policy which has been in effect since the enactment of the original quota restrictive immigration act of 1921. It was my pleasure to support this humane legislation, because in my judgment it was a mistaken policy to permit the entry of a husband or father and to exclude for a great number of years the remainder of the family.

This legislation, without interference with the quota assigned to the various nations, merely grants a preference to the families of aliens who are already residents of the United States. It in no way changes our present immigration policy, but it selects, as it were, for future immigration those who are most likely to make America their permanent home. I very gladly supported this legislation permitting the reuniting of separated families.

COAL

Any number of bills and resolutions were presented bearing on this important subject. It is a matter of regret to report that no definite action was taken by those in control of either branch of the Congress to meet the issue and bring about a suitable solution of this very vital problem. Despite the recognized dilemma of the operators who are verging on bankruptcy, that the miners are suffering with their families in untold hardship and misery, and that chaos and confusion obtains in both bituminous and anthracite fields, nothing has been done.

Public opinion must in the end be concentrated upon a situation that calls for constructive remedial legislation.

The coal industry is one of the most disorganized in the United States. The public suffers from constant strikes, and the workers suffer from unemployment and low standards of living.

RADIO

I supported the bill extending the life of the Radio Commission another year, believing it necessary to enable that body to work out the many important and difficult problems which surround the art of the radio. I opposed the amendment which directs the commission to make equal allocation to each of the five zones for the reason that the licensing authority already had sufficient power conferred upon them to deal with this question and because broadcasting should be allocated on the basis not of population but of radio receiving sets. The act of 1927 provided briefly that there shall be an equitable distribution of radio service in the various five zones; this amendment ties the hands of the commission and retards the progress of the radio.

AMENDMENT TO THE CONSTITUTION

The joint resolution proposing an amendment to the Constitution, fixing the commencement of the terms of President, Vice President, Members of Congress, and fixing the time of the assembling of Congress, was defeated in the House.

While this resolution was being considered many amendments were proposed, one of which would extend the terms of Representatives from two to four years, their elections to be held at the same time the President is elected.

While I favor summoning the Congress to meet at an earlier date than is now provided, I voted against the adoption of this resolution, because of the uncertainty of some of its provisions.

Under this proposal the new Congress will have to canvass the electoral vote for President and Vice President, within 20 days after it convenes, and should a deadlock occur serious consequences might result. I hope a perfected resolution will be offered in the next session; and if it is free from faulty provisions, I shall support it. While Democrats and Republicans voted on both sides of this question, all the western New York Members voted against it.

In attempting to amend the Constitution it should not be done hurriedly; deliberate rather than hasty consideration should be the rule. One recent amendment hastily considered has proven disastrous. It has been productive of graft, perjury, and other unlawful acts, including that of murders in its attempted enforcement. The failure of the eighteenth amendment is still fresh in the minds of the people. Therefore let us consider carefully this amendment before submitting it to the States for ratification.

FARM RELIEF

The Haugen bill was introduced again and after passing the House and Senate, it was vetoed by the President, who denounced it as unsound economically, suggesting it would injure rather than benefit the farmer. Many agricultural organizations in our State and particularly in western New York opposed this bill fearing it would do great harm to the industry—I voted against this bill. The relief the farmers are asking for now is a reduction in freight rates on farm products, a reduction in taxes, better roads, and improved marketing facilities. I have supported legislation designed to bring about this needed relief.

PROHIBITION

Many bills were introduced to modify the Volstead Act, one of which I sponsored. They were all referred to the Judiciary Committee, but no action, I regret to say, was taken on them during this session. I also presented a resolution condemning the promiscuous use of firearms by Government agents in the enforcement of prohibition in which I called the attention of my colleagues to the shooting of Jacob Hanson, of Niagara Falls. Since I made my attack in the House of Representatives on the indiscriminate use and abuse of firearms by Coast Guardsmen and prohibition agents, an order has been issued by Commissioner Doran compelling all prohibition agents to wear distinctive uniforms so that private citizens can distinguish them from bandits and hold-up men.

PENSION BILLS

With the exception of a bill increasing the rates of pensions for widows of Civil War veterans no pension bills except omnibus bills were passed in the past session of Congress. Several widows residing in my district in whose cases I was interested were granted pensions and increases in pensions in the omnibus bill which passed the House and Senate and was signed by the President.

The general pension bill increased the rates for Civil War veterans' widows from $30 to $40 per month; also provided for the payment of this larger rate to all widows who had attained the age of 75 but must have been married prior to June 27, 1905.

I was very glad to vote in favor of this bill for the dependent widows of our veterans of the Civil War.

CONVICT LABOR BILL

I voted for the bill which enables the State to prohibit the shipment of prison-made goods as articles of interstate commerce. It was supported by organized labor and many business and civic organizations.

WORLD WAR VETERANS' ADJUSTED COMPENSATION ACT

To care for several thousand ex-service men who have not as yet applied for their adjusted compensation, the Congress enacted legislation amending the World War adjusted compensation law. This amendment comprised three major provisions as follows:

First. It extended for a period of two years the time within which application may be filed for adjusted compensation.

Second. It removed all doubt as to the finality of the determination of the Secretary of War and the Secretary of the Navy concerning the validity of a lost application.

Third. It extended the benefits of the act to dependents of veterans who have been absent from their homes, continuously and without explanation, for a period of seven years.

This bill received the unanimous vote of the membership of the House of Representatives, among which I was glad to be numbered. It was a just and meritorious measure.

AMENDMENT TO WORLD WAR VETERANS' ACT

Other measures of concern to our ex-service men which received my support were the amendment to the World War veterans' act, liberalizing the present war risk insurance requirements, and the Rogers bill providing $15,000,000 to extend the hospitalization facilities of the Veterans' Bureau.

OTHER IMPORTANT BILLS

In addition to the bills which I have thus far touched upon Congress acted upon many other measures of more or less importance. Among them may be included:

The bill to investigate submarine disasters, postal rates revision, alien property bill, coordination of public-health activities, merchant marine bill, good roads, migratory bird refuge bill, public buildings bill, Federal employees' pay bill, customs inspectors' pay bill, immigration inspectors' pay bill, fourth-class postmaster allowances, and aviation. With the exception of several amendments I supported these measures.

THE UNFINISHED BUSINESS

Many important measures, some good, some bad, are not acted upon as the first session of the Seventieth Congress goes into history. These necessarily will be pressed by the proponents when the second session is called to order early in December. Among these I might mention:

The all-American canal (Great Lakes to Hudson), the universal conscription act, reapportionment of Congress, railroad consolidation, resale price bill, regulation of motor busses, the Sunday observance (or blue law), postal employees' Saturday half holiday, Pullman surcharge, coal bill, national education bill, amendment to retirement act, and prohibition modification.

SUMMARY

It is difficult to realize the vast amount of work that comes to the attention of the average Congressman every day in the week.

I mean by this statement not only the legislation which has to be considered in the committees and in the House of Representatives but also the many personal-service requests which arrive in every mail—requests for assitance in pension cases, compensation claims, civil-service examinations, immigration and passport matters, Federal appointments, and innumerable minor matters, all of which enable the Congressman to be of better service to his constituents and arouse a greater and more personal interest on the part of the people in their Government.

During the session I have not been absent from any of the important roll calls, except in case of illness, or when in conference with people of our district who were interested in important legislation. An inspection of the official voting records will show my record of attendance to have been high.

Never in a single instance was there any pursuasion from political boss, leader, or organization to influence me for or against any legislation. I cast my vote on every question according to conviction and having in mind the best interests of the people.

This intelligent and active cooperation between the people and their Representative is in every way essential if we expect to improve the machinery of our Government. To stimulate that interest in my district is the motive which prompts my publishing this annual report of my congressional activities. Although Congress has adjourned until December, my office at Washington will remain open to serve the people of our district. I shall also continue my Buffalo office at 79 Ideal Street, Buffalo, where I can be reached when Congress is not in session. By maintaining these two offices and by keeping them open throughout the year I am enabled to render effective service to the residents of the forty-second congressional district.

Of course, at times Congress is subjected to unnecessary criticism, but regardless of any such criticism I regard it a very great honor to be the Representative of our district in the greatest and most powerful legislative body in the world.

I am, therefore, profoundly grateful to all for the confidence reposed in me during my years of service in the House, and I shall continue to represent my district and its people to the very best of my ability.

THE WORLD WAR VETERANS' CERTIFICATES

Mr. PALMISANO. Mr. Speaker and Members of the House, I wish to call your attention to House bill 13035, which has for its purpose the amendment of section 641 of the act approved May 19, 1924, by which the Government gave to the World War veterans certificates payable 20 years after date, and which certificates after the first two years were negotiable for a loan not to exceed 4 per cent of the face value thereof. The object of this law, as I understand it, was to reimburse somewhat the World War veterans for what they lost while they were in the service of their country. Of course, the certificate itself would not compensate the veterans even though the Government paid it in full in cash. The amendment that I proposed to this law is to make the certificate payable upon the duly sworn application of the veteran that he desires to apply the proceeds to the purchase of a home or to the paying off of an indebtedness on said home.

Living among and associating daily with the people of my district, and through my connection with five building associations, I know that a good many of the veterans do not own their homes, and that the few that do own them own them subject to heavy mortgages. That during the hard times through which we are passing the home of the veteran has been placed in jeopardy by foreclosure. This is true, Mr. Speaker, not only in my district but throughout the United States, for I have received letters from veterans in Tennessee, Wisconsin, and other sections of the country. I can not understand why the Government should have passed this bill in its present form. It makes the certificates payable to the wife, mother, and so forth, of the veteran upon his death, but refuses to pay it to the man who really served the Government until the lapse of 20 years. The certificate is an excellent memorandum for the rich man's son, who can frame it and refer to it in years to come, but the poor veteran, who is compelled to toil day after day to support his parents or family, can not derive any present benefit from the certificate. The Government ought to cash the certificates and relieve the veteran of some of his burdens by way of enabling him to avoid paying rent, or, if he owns his home, by enabling him to pay interest on his mortgage.

The certificate that the Government issued to the veterans reminds me of the man who says to his friend: "When you need me, call on me and you can have anything you want," and when he does call he is met with some alibi. During the war there was nothing too good for the soldier; they were then defending us and ours at home. Now that the war is over, the Government grants a bonus to the veteran with a string tied to it in such a way that it is of little or no value to him. I trust that the Committee on Ways and Means will report this bill in the coming session of Congress in December, so that the veteran may during his lifetime derive some benefit from the certificate that has been given him.

FIRST SESSION REPORT

Mr. SOMERS of New York. Mr. Speaker, the first session of the Seventieth Congress opened on December 5 and has agreed to close on May 29.

During this first session, Congress has appropriated $4,642,293,897.57, a sum in excess by $627,304,761.17 of the current appropriation. About one-third of this latter sum, however, represents the appropriation for the second deficiency bill which failed to pass in the Sixty-ninth Congress, and was carried into this session.

Outstanding among the many measures passed in this session were the measure for flood control, the merchant marine act, the alien property settlement bill, the tax measures, and farm relief. I voted for all of these except the farm relief bill, which the President vetoed. His veto was sustained by the United States Senate. The particular objection the President had to this measure was the equalization fee. If the House had been successful in eliminating the equalization fee, I would have voted in favor of the bill.

The President also vetoed the emergency officers' retirement act and two postal bills. One giving additional pay to the night workers in the Postal Service and the other giving rental and other allowances to fourth-class postmasters. I voted for these three acts and to override the President's vetoes.

During the last Congress $165,000,000 were authorized for public buildings. During this session the sum was increased by $125,000,000. I favored this increase. I voted in favor of extending the life of the Federal Radio Commission, the appropriation of $75,000,000 to assist States in road building, and the Rogers Act authorizing $15,000,000 for new hospital facilities.

I likewise voted for the railroad consolidation legislation and the compromise naval construction act, both of which bills, having failed of passage during this session, will retain their status until the termination of the Seventieth Congress.

I voted to postpone the application of the national origins clause to the emigration law of 1924, believing that this national origins clause would write into legislation a principle founded on prejudice and would unjustly discriminate against certain people and certain nations. I voted for the amendment of the present law which made it easier for families and relatives to be united. Under this amendment, preference is given within the quota limitations to the fathers, mothers, and husbands of American citizens 21 years or more of age, and to families of agricultural laborers. Fifty per cent of the quota is reserved for the above, and the remainder of the quota is to be allotted whenever possible to the unmarried children under 21 years of age and to the wives of unnaturalized emigrants.

Further, it was my privilege to strenuously oppose every dry movement and to consistently vote against every dry measure presented to this Congress.

All told, this Congress has been responsible for approximately 1,000 new laws, most of which were minor measures of interest only to individuals or individual localities. By the importance of its enactments, it is my opinion that this Congress has marked itself as one of the most efficient in the history of the Nation.

SENATOR CHARLES CURTIS

Mr. STRONG of Kansas. Mr. Speaker, a candidate for high office in this the greatest of all nations should be honest, able, learned, broad-minded, safe in judgment, experienced in Government affairs, of unusual executive ability, and without blemish of character.

Such a man is Senator CHARLES CURTIS. Born and reared in the heart of the Nation, he has so lived as to be beloved and trusted by all who have known him in his private and public life.

Educated in the State capital of Kansas, he was a newspaper reporter at 17 and was admitted to the bar when 21 years of age. He was elected county attorney at 24 and reelected because of the efficiency with which he fulfilled the duties of the office. He was elected to the Fifty-third Congress and reelected to the Fifty-fourth, Fifty-fifth, Fifty-sixth, Fifty-seventh, Fifty-eighth, Fifty-ninth, and Sixtieth Congresses.

In 1907 he was elected to the United States Senate; he was President pro tempore of the Senate in 1911. He was selected as Republican whip and served until his selection as assistant floor leader of his party in 1915, and succeeded Senator Lodge as party leader in 1924, which position he now holds. His present term as Senator expires in 1933.

His private, professional, and public life have been clean and without reproach. A loving husband and father; a prosecutor who enforced the law with favoritism to none; a legislator of ability and untiring energy; a successful leader of the majority party in the world's greatest law-making body.

Always a stanch Republican and a loyal supporter of his party's policies, his fairness, his kindness, and his ability won and held the confidence and good will of those who were not of his political faith.

His repeated organization of the Senate in the face of a doubtful majority, keeping his party in control, is evidence of his ability as a leader and the high esteem in which he is held by his colleagues.

He never sacrifices or betrays his principles nor his friends. He is just, yet tolerant; of modest dignity, he is friendly of disposition. He makes friends and keeps them.

His promises are carefully given but never violated. He never loses an opportunity to serve those who are entitled to his aid.

He has no enemies. No section of the Nation or the representatives of any group or industry can find cause to oppose or condemn him. Labor and capital alike trust him. Industry and agriculture have faith in him. The East has confidence in him; the West believes in him. He fulfills the appeal in the poem by J. G. Holland:

God give us men! A time like this demands
Strong minds, great hearts, true faith, and ready hands;
Men whom the lust of office does not kill;
Men whom the spoils of office can not buy;
Men who possess opinions and a will;
Men who have honor—men who will not lie;
Men who can stand before a demagogue,
And damn his treacherous flatteries without winking!
Tall men, sun-crowned, who live above the fog
In public duty and in private thinking.

SHOULD H. R. 7729 PASS?—CAN CONGRESS TRANSFER TO THE STATES ITS CONSTITUTIONAL POWERS AND DUTIES TO REGULATE INTERSTATE COMMERCE?

Mr. SPROUL of Kansas. Mr. Speaker and Members of the House, the bill under consideration, H. R. 7729, is designated to prevent the products of prison labor coming into competition with the products of free labor in such way as to avoid serious detriment to free labor and the industries in which it may be employed.

While thoroughly in sympathy with the purpose of such legislation, I am seriously doubtful that such results are possible. Having been reared upon the farm, where I became practically acquainted with all character of farm labor, and having afterwards been employed in coal mining, lead and zinc mining, in mills, and other industries, my prejudices and my sympathies are all with labor and the industries in which it is employed. It is, therefore, easy for me to give legislation of this character the most favorable consideration; but, Mr. Speaker and Members of the House, I very much doubt the wisdom of passing this bill. To my way of looking at it, the bill is objectionable from three different points of view.

First, I seriously doubt that it is constitutional. Among other powers bestowed by the Constitution upon Congress, section 8 places with Congress the power to regulate commerce among the several States and with the Indian tribes. This power was given to Congress by the thirteen original States because the States had learned from experience under the Articles of Confederation that they could not themselves satisfactorily regulate commerce among themselves; so the States gave over all of their powers concerning interstate commerce to the Federal Government as stated in the Constitution.

It would be my opinion that the Congress can not part with this power and this duty incident to the power. If Congress should seek to give it back to the States, from whence it came, then Congress would act in violation of the original intentions and purposes of the States and in violation of the provisions of the Constitution. In giving away their power to regulate commerce among themselves the States abrogated unto the Federal Government all power they ever did have to regulate interstate commerce. If Congress could part with the power to regulate the interstate commerce of one product, it certainly would have the power to pass away all of its power to regulate the interstate commerce of all subjects of interstate commerce, in which event the constitutional power and incident duty of Congress to regulate interstate commerce would be destroyed and that which the Congress was empowered and authorized to do would have been rescinded and given back to the States. Does the Congress have the power to do that? It surely would seem that it does not have such power.

But it is said that Congress does not by this bill surrender its power to regulate interstate commerce; that even under this bill the free commerce of a particular commodity, even though prison made, may pass from one State into another and is in nowise interfered with by this bill. Possibly that is true in a sense, but indirectly it is not true. Indirectly prison-made goods of one State when passing freely and uninterfered with into another State may upon arrival be denied the free, unrestricted channels of trade when this bill goes into effect. This denial and limitation may result in stopping the commerce of the product in question. Because of intrastate restrictions, the commerce of the product is ended. Suppose, under the law of Kansas, prison-made products may not be used other than by and in State institutions, and suppose that the State manager is the only purchasing agent for those products required by the State institution; then suppose that prison labor-made overalls of Missouri, which have heretofore been transported into Kansas and sold freely in all the markets of the State, should be in the ordinary channels of interstate commerce brought into Kansas, there to be sold; and suppose all markets for such products within the State of Kansas have been destroyed by the laws of the State as authorized by this bill, except to the State for use in State institutions; and suppose the prison-made overalls from Missouri are offered for sale to the Kansas State manager, and he thereupon fails to purchase the prison-made overalls from Missouri, would not interstate commerce be interfered with and prohibited by the legislation of the State? If such legislation should be enacted by the various other States with reference to prison-labor-made goods, would not interstate commerce be unconstitutionally interfered with? And if such can be done with one commodity, then all other commodities may be treated the same way, and thus the power of Congress is passed from the Federal to the State government and the Constitution is nullified. And if such is done, surely the results would be bad instead of good.

It is our contention that the acts of any State in regulating or interfering with the natural activities of interstate commerce are void, even though authorized by the Congress. The Congress, we believe, does not have power even to authorize a State to interfere with interstate commerce.

In support of our theory of the law on this subject we desire to cite the opinion written by Justice Field, of the Supreme Court, in the case of Pittsburgh Coal Co. *v.* Louisiana (156 U. S. Rep. p. 598), which states:

It has been uniformly held that States can not by legislation place burdens upon commerce with foreign nations or among the several States * * * it will be found that the legislation adjudged invalid imposed a tax upon some instrument or subject of commerce, or exacted a license from parties engaged in commercial pursuits, or created an impediment to the free navigation of some public waters, or prescribed conditions in accordance with which commerce in particular articles or between particular places was required to be conducted. In all the cases the legislation condemned operated directly upon commerce, either by way of tax upon its business, license upon its pursuit in particular channels, or conditions for carrying it on. * * * In conferring upon Congress the regulation of commerce it was never intended to cut the States off from legislating on all subjects relating to the health, life, and safety of their citizens, though the legislation might indirectly affect the commerce of the country.

Again, in Minnesota Rate Cases (230 U. S. Rep. p. 398), the court, in an opinion written by Justice Hughes, held as follows:

The general principles governing the exercise of State authority when interstate commerce is affected are well established. The power of Congress to regulate commerce among the several States is supreme and plenary. It is "complete in itself, may be exercised to its utmost extent, and acknowledges no limitations other than are prescribed in the Constitution." (Gibbons *v.* Ogden, 9 Wheat. 1, 196.) The conviction of its necessity sprang from the disastrous experiences under the Confederation when the States vied in discriminatory measures against each other. In order to end these evils the grant in the Constitution conferred upon Congress an authority at all times adequate to secure the freedom of interstate commercial intercourse from State control and to provide effective regulation of that intercourse as the national interest may demand.

The words "among the several States" distinguish between the commerce which concerns more States than one and that commerce which is confined within one State and does not affect other States. "The genius and character of the whole Government," said Chief Justice Marshall, "seems to be that its action is to be applied to all the external concerns of the Nation and to those internal concerns which affect the State generally; but not to those which are completely within a particular State, which do not affect other States, and with which it is not necessary to interfere for the purpose of execut-

ing some of the general powers of the Government. The completely internal commerce of a State, then, may be considered as reserved for the State itself." (Id. p. 195.) This reservation to the States manifestly is only of that authority which is consistent with and not opposed to the grant of Congress. There is no room in our scheme of government for the assertion of State power in hostility to the authorized exercise of Federal power. The authority of Congress extends to every part of interstate commerce and to every instrumentality or agency by which it is carried on; and the full control by Congress of the subjects committed to its regulation is not to be denied or thwarted by the commingling of interstate and intrastate operations. This is not to say that the Nation may deal with the internal concerns of the State as such, but that the execution by Congress of its constitutional power to regulate interstate commerce is not limited by the fact that intrastate transactions may have become so interwoven therewith that the effective government of the former incidentally controls the latter. This conclusion necessarily results from the supremacy of the national power within its appointed sphere. (McCulloch *v.* Maryland, 4 Wheat. 316, 405, 426; the Daniel Ball, 10 Wall. 557, 565; Smith *v.* Alabama, 124 U. S. 465, 473; Baltimore & Ohio R. R. Co. *v.* Interstate Commerce Commission, 221 U. S. 612, 618, 619; Southern Railway Co. *v.* United States, 222, U. S. 20, 26, 27; Mondou *v.* N. Y., N. H. & H. R. R. Co., 223 U. S. 1, 47, 54, 55.)

The grant in the Constitution of its own force—that is, without action by Congress—established the essential immunity of interstate commercial intercourse from the direct control of the States with respect to those subjects embraced within the grant which are of such a nature as to demand that, if regulated at all, their regulation should be prescribed by a single authority. It has repeatedly been declared by this court that as to those subjects which require a general system or uniformity of regulation the power of Congress is exclusive." * * * The principle which determines this classification underlies the doctrine that the States can not under any guise impose direct burdens upon interstate commerce. For this is but to hold that the States are not permitted directly to regulate or restrain that which from its nature should be under the control of the one authority and be free from restriction save as it is governed in the manner that the National Legislature constitutionally ordains.

It would seem, in view of the above authorities, that H. R. 7729 would be clearly unconstitutional. Inasmuch as the conditions and restrictions for the use and sale of prison-made goods of one State would materially differ from the restrictions and conditions prescribed by the legislatures of every other one of the 48 States, there would be substantially the same trouble with interstate commerce which led to the abandonment of the Articles of Confederation and the adoption of the Federal Constitution, which placed in the Congress all power over interstate commerce for the purpose of bringing about uniform interstate commerce regulations.

But if this act should be held to be constitutional, I fail to see how or wherein free labor could gain any material benefits from the operation of the law. Whenever prison labor is used to manufacture any of the requirements of domestic or business life, then in every such instance there is a displacement of whatever amount of labor would be required to produce the same character of products.

If prison labor manufactures a pair of shoes which is used by any person who buys or uses shoes, then free labor is displaced to the extent of the services required to make such pair of shoes, and so it is with every other article produced by prison labor. It displaces so much free labor. It is therefore impossible for me to see how prison labor can be used in producing the necessities of life and yet not come into competition with free labor. In a large per cent of the Federal State prisons labor is used to produce the plainer and more commonly used products, such as plain furniture or plain work clothing such as jumpers, overalls, work shoes, and grain bags.

All these products are generally purchased by the laboring people of the farm, factory, mine, or other industry. And if per chance the goods were purchased a little cheaper than other merchandise, it is difficult to see how any great harm would result.

Besides, the prisons are maintained at the expense of all taxpayers, and when the labor of prisons may be converted into money for the upkeep of the prisons, then and in such case all free labor is benefited by having its tax burdens lightened. So, Mr. Speaker, how the bill H. R. 7729 can possibly bring about any net good I can not see; but, instead, it appears that much harm might result.

RELATIONSHIP OF MUSCLE SHOALS PROJECT TO RESERVOIR SOURCE FLOOD CONTROL

Mr. SEARS of Nebraska. Mr. Speaker, ladies, and gentlemen of the House, the meditated legislation now before the House, that relates to the Muscle Shoals question, is of more vital interest to the welfare of this country than perhaps many of us have realized. It relates to the greatest question that has been before this Congress, the conserving of water. Should this legislation be signed by the President, it will demonstrate the practicability of flood control by the reservoir system. It will not only be of almost limitless value to the sections immediately related to Cove Creek and the Tennessee River, but when the Tennessee Valley is at flood stage it will reduce the height of the Mississippi River at Cairo several feet. It will give real flood control to a great section that has suffered much from flood.

The flood-control question is a very simple one. All great floods are made up of many minor floods from the smaller flood areas. There is not a county in the United States that has more rainfall upon it than it needs that year. There is not a single one of the minor flood areas that has more rainfall in any year than is needed that year. If the minor flood areas are reservoired the country will be without floods. I invite each and all of the engineering fraternity—of Army life, of civil life—to investigate specifically and contradict these propositions if they can. I will go one step further and state that each one of the minor flood areas of the United States has all of the reservoir sites necessary for whatever reservoir control that is desired. I invite the same ones referred to to report on this proposition also. Having made these statements, I go a step further and state that there is no practical control of floods, except it shall be by the reservoir system, where they originate. That all other so-called flood-control plans mean the permanent establishment of floods on the country as a fixed policy. I go a step further and state that the cheapest plan of flood control in money expenditure that has been advocated is by way of reservoirs at flood sources. I go a step further and state that reservoir control may be had of the entire valley, from the Alleghenies to the Rockies, with an initial outlay of not over $600,000,000, of which $400,000,000 will, in all probability, be reimbursive to the Government. I go a step further and state that it is the only plan that will, in any degree, be reimbursive. A step further, any one of the other plans that have been advocated will mean, in all probability, more than $2,000,000,000, on completion, with an upkeep charge of at least $25,000,000 a year, which is interest money on $600,000,000 of added dead capital. I go a step further and say that of the many months of hearings before the Flood Control Committee the only plan that emerged with any degree of esteem, in the minds of those listening to the hearings, that related to flood control was by way of reservoirs. I go a step further and charge that the Army officers of the engineering department in several instances deliberately tried to mislead the committee on material points. I go a step further and say that reservoir control was treated in a most unfair manner by the organization of the committee, but still, from every source, from every standpoint, it emerged as the only ideal plan of control, and one as to which its worst enemies were compelled to admit we must resort as the only real solution. I invite all of those who either secretly or openly oppose reservoir source control of flood waters to ask for a more definite and specific statement as to any of the points hereof. But there are other benefits growing out of reservoir source control, such as is meditated at Muscle Shoals, which will mean so much to the whole Mississippi Valley.

The control of the Tennessee River at the east of the valley will demonstrate what is already known to result to the Platte River and its valley by reason of the Pathfinder Dam.

The Pathfinder Dam impounds a million acre-feet of water, which is applied to the soil surrounding Scotts Bluff, in western Nebraska. The flood flow has been reduced 45 per cent. The low-water period has been increased 47 per cent in flowage. More than 700,000 acre-feet of water have been kept thereby from the Mississippi River. Beneficially Scotts Bluff County has increased in value from $800,000 to $40,000,000. The Platte River now has a stabilized flow, although only partially reservoired. The influence of the Platte is more than a foot at Cairo on the Mississippi.

Should we be so foolish as to close our eyes and our judgment until we have a demonstration, although we know that we do not need a demonstration and we know that it has already been made, we will surely have that demonstration with the completion of the Muscle Shoals, Cove Creek, and Platte River reservoirs.

What are the benefits to be derived from reservoir-source control? One is the doing away with great floods. Another the doing away with great droughts. Another the doing away with soil erosion to a great degree. Another the stabilization of our rivers and the increased yearly capacity of our waterways to carry off excessive flood waters. Another is the furnishing of cheap power in many instances to the people. Cheap

power each day is getting to be more of a daily necessity in our national life.

For 50 years inland navigation has been fought by the railroads. For years power development has been fought by the Insul and other power interests. Think of it, the normal development of this country being not supplied in amplitude, but fought by our great aggregations of wealth and corporate life.

But the cry goes up from more propaganda sources than the world has ever known before that the Government must not engage in reservoir control with all its far-reaching benefits because it will result in the Government, to some extent, engaging in private business and competing in some degree with these great aggregations.

I take it for granted that no one prefers, in the first instance, that the Government shall engage in private enterprises. But I take it for granted that the people of the United States are entitled to all of the benefits stated herein. They are not only entitled to the benefits stated herein but they are entitled to them at reasonable rates for the service. Is anyone denying these propositions? If so, let him raise his hand, for I have offended him. For years, by reason of their peculiar activities, the power people have prevented Muscle Shoals from serving the southeast quarter of the United States. Those peculiar activities would be most startling if placed on public record. For a number of years the power development of Muscle Shoals has been sold by the Government to these power distributors at 2 mills per kilowatt-hour, and disposed of to men and women at 10 cents per kilowatt-hour, and at even higher rates. Such a condition can not be allowed to continue. A normal public arousement should give the death cry to the continuation of such a policy.

The most shocking disclosures have been in the last year of the debauching of candidates, of schools, of colleges, of the press, in order to darken the public minds and to impede the coming of a just and normal policy to our people.

There must be a criterion some place whereby to gauge and judge the question and help in the solution to a correct finality.

Must it not be something akin to this: That the great national resources must be improved and conserved. That where the Government finds the people without a great and necessary service, if it is not to be furnished by a private enterprise very soon, then our country shall reserve the right to furnish that service and minister to the public welfare. Wherever a great and necessary service is being furnished, but at exorbitant rates, then our country reserves the right to furnish the service at reasonable rates. Where any section of our country is being impeded from development according to its best prospective, our country reserves the right to aid in that development according to its best prospective. Wherever there is organized propaganda against the welfare of the people, against the press in its free activity, against our schools, our colleges, the undermining of the fealty of candidates for public office, our country reserves the right to fully stamp out these evils.

To stamp out these evils which have so devitalized our system and worked such wrongs to our country the individual voter must arouse himself and realize that the problem is his. If he wishes the evil to continue and increase, let him continue his sleep. If he refuses to recognize the condition that is now ours, or is in favor of it, let him refuse to assume his great responsibility.

Personally, my own demand is that our great railroad systems and our great power organizations shall discontinue the policy of the past, but they shall right about face and join hands with the producing and consuming classes and work for the common welfare, knowing full well that their ample reward will come to them when they minister to the common welfare at reasonable compensation and that the strength of the foundation is necessary to the strength of the upper structure.

OUTSTANDING FEATURES OF THE FIRST SESSION OF THE SEVENTIETH CONGRESS

Mr. TREADWAY. Mr. Speaker, there are certain outstanding features of the first session of the Seventieth Congress which are thoroughly well known to the Members of the House and in a general way to the citizens of the country, but the session now having ended, it is not out of place to lay special emphasis on these accomplishments.

There are three major measures which have become law and which will add to the interest of the general public and distinguish the session as one of constructive accomplishment. I refer to the revenue act of 1928, the alien property act, and the merchant marine act.

I am glad to record the fact that the first two of these measures are the result of the deliberations of the Ways and Means Committee of the House, the final drafts having been agreed upon by a conference committee composed of five members of that committee and an equal number of members of the Senate Finance Committee.

REVENUE ACT OF 1928

The revenue act was the subject of sharp debate in the House, in which the gentleman from Texas [Mr GARNER] was an efficient if not a wise leader on his side of the Chamber. In my opinion it is fortunate that he was unable to carry through in conference his preliminary victories in the House. During the course of Mr. GARNER'S speech on the conference report he emphasized the fact that the final draft of the bill was nonpartisan. While this statement was true, I think it was misleading and should have been amplified or qualified. Mr. GARNER carefully refrained from saying that the original attitude of the Democrats was in support of a taxation reduction of at least $325,000,000, more than a hundred million of dollars more than the amount of reduction finally enacted.

Mr. GARNER also failed to state that at every opportunity, and in every place, suitable or otherwise, he and his colleagues unhesitatingly attacked the policies of the administration and of Secretary Mellon, probably in large measure because Mr. Mellon is such a thorough student of finances and of governmental policies. At times it almost seemed as though the gentleman from Texas was obsessed with a jealous dislike of our able, dignified, and efficient Secretary of the Treasury.

However, the taxpayers are not as much interested in the personalities connected with legislation as in the actual accomplishment. The revenue law of 1928 will reduce the burden of those who pay taxes to the Federal Government by $222,495,000. The analysis of this reduction shows that the largest single item is the one beneficial to corporations and their stockholders. Previous tax-reduction measures have left the corporation taxes high in comparison with individuals and partnerships. The tax rate on corporations was reduced from 13½ to 12 per cent, resulting in a tax reduction of $123,000,000. In the case of small corporations with net income of $25,000 or less the exemption was increased from $2,000 to $3,000, resulting in an additional saving of $12,000,000, or a total corporation-tax reduction of $135,000,000. It is estimated that there are not less than 3,000,000 individual owners of corporate stock in the United States, indicating that the benefit of this reduction will be widespread.

The next largest reduction in taxes will benefit the purchasers of automobiles. The present tax on the sale of cars, amounting to between $66,000,000 and $67,000,000, has been entirely eliminated.

One amendment which was inserted in the Senate was strenuously opposed by the House conferees and was finally eliminated. This was the so-called publicity amendment, which would have restored the provision repealed in the revenue act of 1926, permitting general examination of income-tax returns. The experience of the Treasury proved this law to be very detrimental to the best interests of the Government and of the taxpayers. It is not likely that another effort will be made to revive this section when another revision is undertaken.

The House conferees also prevented the adoption of a change in the tax on individual incomes ranging from $20,000 to $80,000. It was felt that when a person's income reached these higher figures he was not unreasonably burdened by the retention of the present brackets. We did, however, accept the amendment aiming to increase the exemption on earned income up to $30,000.

After the automobile item, the next largest item of reduction is in admissions and dues. The exemption from tax of such charges was raised from 75 cents to $3, making a total reduction in the admission tax of $17,000,000.

The tax assessed against druggists and other dealers in narcotics was changed from $6 to $3 a year. The purpose of this tax is not to make money, but to secure an accurate registration of every person in the United States who dispenses or who is dealing in narcotics.

The exemption on club dues was raised from $10 to $25, making a total reduction in that tax of $1,000,000. Members of clubs whose annual dues are $25 a year or less will pay no tax. This takes care of the smaller clubs, the country clubs, teachers' clubs, and various similar organizations.

Particular attention is invited to the rearrangement of many parts of the law in the act of 1928. This is the result of the authority contained in the revenue act of 1926, creating the Joint Congressional Committee on Internal Revenue Taxation. The rearrangement materially simplifies the law by grouping the various related sections, and after it is put into general use the change will be found of great benefit to the student of taxation, the attorney, and the individual taxpayer.

Under the supervision of the joint congressional committee further work is in progress along this line, and it is hoped that before Congress again convenes a codification of the tax law will have been completed.

In my judgment one serious omission in the new revenue act was the failure to repeal the Federal inheritance tax. An attempt to repeal this provision was defeated in the Ways and Means Committee and later on the floor of the Senate. While we gracefully bow to the will of the majority, it remains a fact that, as a matter of principle, this system of taxation has no place in a Federal law.

ALIEN PROPERTY ACT

The alien property act provides for the settlement of claims of American nationals against Germany, and of German nationals against the United States, and for the ultimate return of all property of German nationals held by the United States.

During the World War an immense amount of property belonging to the citizens of Germany was seized by the Alien Property Custodian representing the United States Government. A large portion of this property was sold and the proceeds held by the custodian. Some of it was retained and is still held by him. In addition, we took over German ships which were in our harbors at the time war was declared, likewise a radio station and a large number of patents belonging to Germans. It was understood that the damage caused by our taking over this property would eventually be made good.

After the war was over many American citizens presented claims against Germany for losses sustained during the war period. It would have been unfair to return the seized property to Germany without giving consideration to the claims of Americans. The alien property act provides a method of settlement of the claims of both sides, and its enactment is proof of this country's good faith that it did not intend to confiscate the property of our late enemies in the World War. While the amount of property belonging to German nationals and the German Government is enormous, under this law a system has been established which will eventually mean its entire return and an accounting of the stewardship of this country, while the property was in its hands.

MERCHANT MARINE ACT

The merchant marine act, known as the Jones-White law, having been prepared jointly by Senator JONES, of Washington, and Representative WHITE of Maine, represents an effort on the part of this Government to further the development of a private merchant marine rather than a continuation of the shipping business under Government management. It provides a fund of $125,000,000 for this purpose, which may be loaned for the construction of private vessels, and in addition establishes favorable mail contracts. It certainly is a long step forward in constructive legislation for the purpose indicated. Those charged with drafting the measure state that it gives to the American merchant marine greater aids than have been provided by any legislation within three-quarters of a century. It is further stated that the law means the building of new ships of greater speed than any now flying the American flag; that it will revive the shipbuilding industry; that it will stimulate an increased use of American ships for American cargoes; that it will give us a larger measure of industrial and commercial independence; that it will provide us with naval auxiliaries for the day of stress; and that it will carry to all the world notice of our settled purpose to retain upon the seas that which we now have and of our determination in due process of time to build and maintain a merchant marine of a size and efficiency commensurate with our national interests and national dignity.

APPROPRIATIONS

An outstanding feature of the first session of the Seventieth Congress is the large amount of funds appropriated, totaling $4,642,293,897.57, exceeding the appropriations for the current year by $627,304,961.17. While the figure is very large, it can not be criticized as extravagant or excessive when analysis is made of the purposes for which the funds were provided. In the first place, $200,000,000 represents a hangover from the last session of the Sixty-ninth Congress, due to the failure of passage of the second deficiency bill by reason of a filibuster in the Senate during the closing days of that Congress. The benefits of these increased appropriations will be widespread. The amount of $15,000,000 was provided for the construction of two additional Veterans' Bureau hospitals. Increased pensions were authorized in certain cases. Another large item is the adoption of a building program which will tend to beautify our Capital City and provide suitable buildings for various departments of the Government. Under this program many Federal buildings will be constructed throughout the country, thus relieving to some extent the present serious congestion in certain field establishments of the Government and at the same time providing employment for many workmen.

A very large increase has also been provided in the aggregate amount paid in salaries to Government employees. This is in accord with the tendency of the times toward better salaries to meet increased living expenses.

Further details concerning the appropriations authorized will be found in the analyses submitted by the Committee on Appropriations.

ACTIVITIES OF MEMBER

I realize that a Representative is expected to give something of an accounting of his activities and his position on leading questions to the voters in his own district. As a member of so active and busy an organization as the Ways and Means Committee of the House, time does not permit as general participation in debates in the House as one sometimes desires. I frequently feel that altogether too much time is taken up in desultory discussion when, as a matter of fact, every Member has decided in his own mind how he expects to vote on a pending measure.

MUSCLE SHOALS

There are two outstanding bills which have been the source of a great deal of debate in Congress for a considerable length of time. Chief among this group is the so-called Muscle Shoals bill. The term "Muscle Shoals" commonly refers to a stretch in the Tennessee River extending about 35 miles upstream from the town of Sheffield, Ala. The shoals section of the river has been before Congress intermittently for a hundred years. In 1915 the subject was revived in an effort to obtain a large governmental appropriation for the development of the shoals for navigation purposes. Later on the element of a power project was included, as well as the manufacture of nitrates for use in explosives and fertilizer. In the period since 1915 so much has been written and said about the matter and so many schemes have been devised for the acquisition and operation of Muscle Shoals by the Government that it is needless for me to go into detail about it here. The first attempts to have the Government take over the project were unsuccessful, but during the war the proponents of the plan, aided by President Wilson, finally achieved their purpose. So far the Government has spent $125,000,000 on Muscle Shoals and now its advocates are seeking the organization of a Federal corporation for the production of power and nitrates, ostensibly for the benefit of the farmer. This effort is, of course, largely political in its character. The assistance proposed to be rendered is not such as appeals to the farmers of western Massachusetts. It is the expressed opinion of leading representatives of the farming industry in that section that the Muscle Shoals bill is not sound from a business standpoint and that they do not want that kind of help. The bill has passed the two Houses of Congress, but the session ended without the President having affixed his signature to the measure.

FARM RELIEF

My attitude on the McNary-Haugen so-called farm relief bill is too well known to my constituents to need other than a brief reference here. The veto messages of President Coolidge, both in the Sixty-ninth and Seventieth Congresses, are so clear and convincing that I commend their perusal to the general public.

As part of the unfinished business which will be taken up at the next session of Congress there will be two measures in which I am particularly interested, being the author of each of them.

AUTOMOBILE INSURANCE

The first of these provides a system of compulsory automobile liability insurance for the District of Columbia, the object being to assure security for personal injuries and death caused by the operation of motor vehicles within the District. For several years I had been strongly impressed with the great number of careless and irresponsible drivers of motor cars in Washington and the need for some such legislation as now obtains in Massachusetts. After careful consideration and much encouragement from persons and organizations in Washington I introduced the pending bill on January 19, 1928. It is practically the same as the present Massachusetts statute, modified only to meet local conditions. The bill has been very well received by leading citizens and civic organizations, and has been strongly supported from the beginning by the leading afternoon paper. In fact, the press generally has favored the proposition. Hearings have been held before the Subcommittee on Insurance of the House Committee on the District of Columbia. The only opposition has come from those who are interested in the sale of second-hand cars. Owing to the limited time available for consideration of the measure during the last session, it has been agreed that the matter should go over until Congress recon-

venes in the fall, at which time I shall press the matter actively and do my utmost to have this much-needed legislation enacted into law.

PREFERENCE FOR AMERICAN PRODUCTS IN GOVERNMENT PURCHASES

The other bill which I have introduced will be of much interest to business concerns and manufacturers throughout the country, including those in the first congressional district of Massachusetts. It is designed to give a 10 per cent preferential to American products over foreign products in purchases by the Government. While the present laws are intended to give preference to American goods, they often fail in this purpose. It is not proposed that foreign products shall be excluded from competition in Government purchases, but I feel that in spending the American taxpayers' money preference should be shown toward home products.

There are two matters of special interest to the first congressional district.

ADDITION TO PITTSFIELD POST OFFICE

One of these is an appropriation of $195,000 for an extension to the post office in Pittsfield. While a matter of this kind rests upon the amount of business transacted by the office concerned, and to a certain extent upon the recommendations of the Postmaster General and the Secretary of the Treasury, I am nevertheless glad to report that I have been able to keep informed as to the progress of this appropriation and to see that the interests of the county seat of Berkshire were properly looked after.

CONNECTICUT RIVER NAVIGATION

The other matter of local interest is a revival of the effort to secure a channel 12 feet in depth and 100 feet wide in the Connecticut River between Hartford and Holyoke. Soon after it became known that a license to develop additional power at Windsor Locks had been granted the Northern Connecticut Power Co., and after consultation with the Congressman from the second district, Mr. BOWLES introduced a bill to authorize a cooperative method of constructing the improvements for which the above-mentioned license was granted. It seems to us that the present is an opportune time to carry out the recommendations of the Chief of Engineers as contained in a report made to Congress in 1915. A very satisfactory hearing was held before the House Committee on Rivers and Harbors. A resolution was adopted calling on the Chief of Engineers for an up-to-date report on the Connecticut River project. It is hoped that when this report is received a further item can be inserted in the river and harbor bill covering the purposes of the measure which I introduced.

POSTAL RATES

The new postal rates law, recently signed by the President, is of interest and benefit to the people of the first district as well as to the country in general. It contains a number of reductions in present rates. On second-class matter there are some reductions in the zone rates. The transit rate, or the rate charged individuals as distinguished from publishers and other concerns mailing large quantitites of second-class matter, is cut in half. The third-class rates remain the same as in existing law with the exception of some slight modifications in the bulk rates. On fourth-class matter there is some reduction in the service charge. On post cards and private mailing cards the rate is reduced from 2 cents to 1 cent.

GOVERNMENT IN BUSINESS

I wish at this point to again call attention to one feature of the present-day type of legislation. We are drifting directly contrary to the slogan of the late President Harding regarding less government in business, although we are living up to the other part of the slogan about more business in government. The Muscle Shoals, farm relief, Boulder Dam, and Mississippi barge bills are all typical examples of attempts to put the Government into business when it is perfectly apparent that private corporations would be unsuccessful. In some instances such legislation would place the Government in direct competition with private companies engaged in similar business. This tendency must be checked, as the next step in this direction necessarily means the adoption of socialistic doctrines.

POST-OFFICE EMPLOYEES

It was a source of regret that I felt obliged, out of respect to my own opinion and my conscientious duty, to vote against two veto messages submitted by President Coolidge. My own experience both with post-office employees and with fourth-class post offices led me to believe that an increase in compensation, whether in the form of additional salary or in the way of increased allowances, was thoroughly justified. Other than on these two matters I believe my record is clear in acting in harmony with the President.

REQUESTS FROM CONSTITUENTS

Throughout my congressional service I have regarded as an important part of my official duties attention to individual requests from constituents. It is a source of gratification to me that the volume of these requests has increased from year to year, indicating that those I have the honor to represent feel more and more free to entrust me with their affairs, whether of minor or major importance. The variety of these requests is infinite, indicating the increasing interest of the citizen in matters pertaining to the Government. It is a pleasure to be able satisfactorily to execute these missions, and I highly prize the hundreds of letters of appreciation which I have on file. It has always seemed to me that this type of service means more to the average citizen than the attitude of the Congressman toward legislation with which the citizen is not familiar and in which he has no special interest.

LENGTH OF SERVICE

The gradual increase of responsibility and prestige that comes with advanced years of service is perhaps more apparent to the Member himself or to visitors to Washington than to those who do not come into actual contact with public affairs. A short time ago one of the Members from Colorado [Mr. HARDY] published in the CONGRESSIONAL RECORD an article along this line entitled "Unseen forces that help to control legislation in the United States Congress." It will be a pleasure to send a copy of Congressman HARDY'S statement to anyone in my district who may be interested in the subject.

Although this session has been adjourned sine die, the work in a Congressman's office continues unabated during the recess. My services are just as available during this period as they are when the House is in action.

RECORD OF PARTY

The country is on the threshold of a presidential election. During the next month both of the great parties will hold their conventions for the purpose of nominating candidates and adopting party platforms. Much reference will be made during the campaign to the records of the parties. As the first session of the Seventieth Congress constitutes the latest public record of Senators and Representatives, as well as of the administration, I, as one of the majority, feel especially gratified that so much has been accomplished in the interests of the people and of the country. It is not my purpose at this time to indulge in partisan debate but to call attention in these brief remarks to a few of the leading items which go to make up the record upon which the people in a few months will pass judgment. At the last election the Republican Party was charged with the responsibility. It has kept faith with the people and can rightly ask for their indorsement and continuance in power on the record of the President, the officials under him, and the action of Congress under his leadership.

A REPORT TO MY CONSTITUENTS

Mr. PRALL. Mr. Speaker, the first session of the Seventieth Congress is about closing, and under the unanimous permission granted by my colleagues in the House I have the honor of making this report to the voters of my district concerning my activities with respect to the more important matters which have come before Congress during this session for its consideration.

On several occasions in public addresses I have referred to what I term the nonvoting evil. President Coolidge has also called the attention of the country to the significant fact that "since 1880 there has been a marked increase in the tendency to remain away from the polls on the part of those entitled to vote."

I have been informed that in the presidential election of 1920 but 49 per cent of the qualified voters availed themselves of their right to vote for the election of a President. In the following presidential election scarcely more than one-half of the duly qualified voters presented themselves on election day. In this respect we are trailing all the republics of the world, notwithstanding it was our forefathers who bled and died to free this Nation from the yoke of British tyranny, to make of this a Government of, for, and by the people.

I believe one way to counteract this widespread apathy and indifference is to stimulate in each individual citizen a keener interest in our Government.

I can think of no better use to which the CONGRESSIONAL RECORD may be put than to employ it as a means of acquainting the stockholders of this great corporation, the United States Government, with the attitude of their Representatives in Congress on important questions and what the condition of the corporation is.

The expense incident to this reprint and the addressing of the envelopes is not a charge upon the taxpayers; it is a personal charge.

I am pleased to present to the citizens of the eleventh congressional district a condensed report of my activities and my personal voting record with respect to every important measure, believing it will stimulate the citizen's interest in his Government and especially in my work in Congress, and better enable the people to determine to what degree and in what manner I have represented them in Washington. My time during this and all previous sessions to which I have been elected has been spent here in Washington, establishing contacts with the business of the Congress that would prove valuable to the district I represent particularly and to the Nation generally.

Few people realize the tremendous amount of work that passes through a Congressman's office. I refer not only to the legislative work but also to the personal service work rendered to constituents in taking up matters with the departments of the Government in Washington. Every mail brings many requests relating to such matters as veterans' compensation claims, pension claims, immigration difficulties, passport requests, civil-service examinations, employment requests, appointments to the Military Academy at West Point and the Naval Academy at Annapolis, innumerable requests for information, and for public documents of every description.

I have been pleased by the number and variety of requests that have come to me for assistance in these matters, and I wish to thank the citizens of my district for advising me on many important and complicated legislative problems which have come up for action. Even though we may not always agree, it is a wholesome situation when the Congressman and his constituents can cooperate in a helpful way, and it gives the citizen a deeper interest in his Government.

During the first session of the Seventieth Congress there were 19,770 proposed laws introduced, of which but 923 were enacted into law. Of the total number introduced only 1,323 were reported and recommended for passage by the House committees to which they had been referred.

The total membership of the House is 435, so the average number of bills enacted into law was two and a slight fraction for each Member of the House; a small number really, when one considers the large number of bills introduced and the long period given over to their consideration.

One of the most important functions of our Government is the raising of revenue and appropriations to meet the expenses of conducting the affairs of the Nation.

At the beginning of each Congress the President, through the Bureau of the Budget, submits an estimate of the amount necessary to meet the requirements of the various departments.

On the basis of these estimates which cover approximately 1,000 pages, the various committees prepare the supply bills. These are finally approved by the Committee on Appropriations and presented to the House for its approval. By amendment, any item in the bill may be increased, decreased, or eliminated entirely.

During the session just closed the following appropriations were approved:

Agriculture	$139,138,793.88
District of Columbia	37,625,208.00
Executive and independent offices	527,593,111.00
Interior	272,656,039.00
Legislative	17,746,893.26
Navy	362,145,812.00
State, Justice, Commerce, and Labor	89,820,597.64
Treasury and Post Office	1,061,342,060.00
War	398,517,221.50
First deficiency	200,936,668.02
Second deficiency	99,172,485.76
Permanent annual and indefinite	1,388,753,735.53
Grand total	4,595,448,625.59

The term "permanent annual" is used to indicate expenditures authorized by a previous Congress.

REVENUES

The following table shows the manner of raising revenues to meet the above-mentioned expenditures:

Customs	$602,000,000
Income tax	2,065,000,000
Miscellaneous internal revenue	640,545,000
Miscellaneous receipts	501,952,314
Total	3,809,497,314

Revenue figures are exclusive of postal receipts estimated at $753,000,000. These appropriations are for the year beginning on July 1, 1928, and if not absolutely accurate, are approximately so.

FEDERAL BUILDING FOR STATEN ISLAND

In the last Congress an appropriation was authorized by the House for the purchase of sites and the erection of public buildings. A filibuster in the Senate prevented the passage of this bill by that body, but in the early days of this session both House and Senate made this authorization legal. It provides for the expenditure of many millions of dollars within a period of five years.

Staten Island is included in this building program, and while the year for its erection has not been definitely agreed upon, Staten Island citizens are assured of a new Federal building.

UNEMPLOYMENT

Next to universal peace the biggest problem of our day in this country, as well as in every other country, is the great problem of unemployment. Its proper solution will relieve many other perplexing problems. It will also reduce the tax burdens now overwhelming our cities, towns, and villages. It will greatly lessen the work now forced upon social service and charity organizations. It will decrease the number now housed in almshouses and other abiding places throughout the land. It should eliminate the temptation that prompts men to crime. In a word, it will supplant the misery and grief that accompanies great periods of industrial depression with the contentment and happiness that goes with steady uninterrupted employment.

I favored the introduction of a resolution calling for the creation of a joint committee to be appointed by the House and Senate to investigate this question of unemployment. This joint committee, in conjunction with the Labor Department, could initiate a study of the question and recommend remedial legislation to Congress. It could authorize the Labor Department to furnish us constantly and regularly with information as to the number of men unemployed as well as the nature and character of their work. With this information we could the more intelligently consider this all-important problem.

PENSION BILLS

With the exception of a bill increasing the rates of pensions for widows of Civil War veterans, no pension bills except omnibus bills were enacted during the past session of Congress. Several widows residing in my district were granted pensions and increases in pensions in the omnibus bill which passed the House and Senate and was signed by the President.

The general pension bill, which increased the rates for Civil War veterans' widows from $30 to $40 per month, also provided for the payment of this larger rate to all widows who had attained the age of 75 years, irrespective of the date of marriage.

I was glad to vote in favor of this bill for the dependent widows of our veterans of the Civil War.

THE POSTAL EMPLOYEES NIGHT DIFFERENTIAL BILL

After working for several years on a bill that would grant a differential in pay for night workers in the Postal Service, the bill was finally passed by the House and the Senate and sent to the President. I was very happy to give my hearty support to this meritorious legislation, which is favored by all post-office employees. To my mind, it was a needed recognition of deserved public service in a substantial manner. And may I add that the men and women of the service gladdened my heart by their appreciatiton, as expressed by countless letters and telegrams.

MUSCLE SHOALS

A question that has engaged the attention of Congress for several sessions is Muscle Shoals, and considerable discussion took place during the present session in the Senate and in the House upon this subject.

The proponents of the measure advert to the already large governmental investment, the advantage of the plant as a means of producing cheap nitrate and fertilizer as a benefit to our farmers. It has developed that the United States, having so heavy an investment, could not afford at this time to entirely abandon the project but should utilize the works for the benefit of the public in the production of nitrate and fertilizer.

The opponents of the bill contend that the adoption of this legislation would put the Government into the business of manufacturing chemical fertilizer for sale to farmers without cost and without profit in opposition to the manufacturers, despite the fact that the United States has spent $140,000,000 up to the present date on the plant.

Much has been said upon both sides of this subject. By amendment the House removed from the bill the production of fertilizer and inserted nitrogen, and in that form it passed the House and Senate.

FLOOD CONTROL

The sympathy of the Nation went out to the poor people of the Mississippi Valley when that vast territory was inundated by an avalanche of water 300 miles in length and 100 miles in width, covering as it did every city, village, and farm. Devastation, destruction, disaster, and death followed in its wake. The total loss ran into many hundreds of millions of dollars.

I believe it to be a national problem, and for that reason I supported legislation recommended by the Flood Control Com-

mittee. This measure received the sanction of a large majority of the Members of the House and Senate and received the signature of the President.

THE BOULDER CANYON PROJECT

The paramount purpose of this legislation is the protection of human life and property in Imperial Valley, Calif., now under a constant menace of destruction from floods. A further explanation of the bill is found in the report of the present Secretary of the Interior, Dr. Hubert Work, in which he states:

> The general plan and purpose of this measure have my support, and I favor its being made a national undertaking to be carried out and administered by the Federal Government.

While Boulder Dam is primarily a flood control and irrigation project it is capable of developing consideration electrical power, and will be a source of domestic water supply for southern California. I voted for this project.

TAXATION

The new revenue act which the two Houses finally passed and the President signed will cut taxes $222,495,000. In all the legislation affecting this branch of our economic legislation I have consistently maintained an attitude of opposition to any plan which sought to give a larger reduction to the wealthy than it would to those of low or moderate incomes, thus relieving that part of our public least able to bear the tax.

In the new tax bill the Ways and Means Committee followed three principles: First, that the reductions should not be such as would produce a deficit in the Treasury; second, that the reductions should be distributed where relief appeared more necessary and advisable; and third, that the taxes that had not been reduced since the World War should be given special attention.

TAX REDUCTION

Among the major cuts contained in the measure is the 12 per cent flat corporation tax as against 13½; repeal of the 3 per cent automobile tax; increase from $20,000 to $30,000 on income recognized as earned on which a 25 per cent credit is allowed; increase of exemptions on amusement admissions from 75 cents to $3; exemption of tax on club dues up to $25. I voted for this bill.

FARM RELIEF

The Haugen bill was introduced again, and after passing the House and Senate it was vetoed by the President, who denounced it as unsound economically, suggesting it would injure rather than benefit the farmer. The relief the farmers are asking for now is a reduction in freight rates on farm products, a reduction in taxes, better roads, and improved marketing facilities.

I voted against this bill, considering it unsound and unwise. It provided for price fixing on commodities such as wheat, corn, hogs, and so forth, and in my opinion would have materially increased the price of bread and other necessities to the great consuming public. In my judgment it was an attempt to help the farming interests at the expense of the consumers.

COAL

Any number of bills and resolutions were presented bearing on this important subject. It is a matter of regret to report that no definite action was taken by those in control of either branch of the Congress to meet the issue and bring about a suitable solution of this very vital problem. Despite the recognized dilemma of the operators, who are verging on bankruptcy, that the miners are suffering, with their families, in untold hardship and misery, and that chaos and confusion obtains in the bituminous and anthracite fields, nothing has been done.

Public opinion must in the end be concentrated upon a situation that calls for constructive remedial legislation.

PROHIBITION

Many bills were introduced to modify the Volstead Act and were all referred to the Judiciary Committee, but no action, I regret to say, was taken on them during this session.

RADIO

I supported the bill extending the life of the Radio Commission another year, believing it necessary to enable that body to work out the many important and difficult problems which surround the art of the radio. I opposed the amendment which directs the commission to make equal allocation to each of the five zones for the reason that the licensing authority already had sufficient power conferred upon them to deal with this question. The act of 1927 provided, briefly, that there shall be an equitable distribution of radio service in the various five zones; this amendment ties the hands of the commission and, in my opinion, retards the progress of the radio.

AMENDMENT TO THE CONSTITUTION

The joint resolution proposing an amendment to the Constitution fixing the commencement of the terms of President, Vice President, Members of Congress, and fixing the time of the assembling of Congress was defeated in the House.

While this resolution was being considered many amendments were proposed, one of which would extend the terms of Representatives from two to four years, their elections to be held at the same time the President is elected. I voted against this amendment.

While I favor summoning the Congress to meet at an earlier date than is now provided, I voted against the adoption of this resolution because of the uncertainty of some of its provisions.

Under this proposal the new Congress will have to canvass the electoral vote for President and Vice President, within 20 days after it convenes, and should a deadlock occur, serious consequences might result. I hope a perfected resolution will be offered in the next session; and if it is free from faulty provisions I shall support it.

In attempting to amend the Constitution it should not be done hurriedly; deliberate rather than hasty consideration should be the rule. One recent amendment hastily considered has proven disastrous. It has been productive of graft, perjury, and other unlawful acts, including that of murder in its attempted enforcement. The failure of the eighteenth amendment is still fresh in the minds of the people. Therefore, let us consider carefully not only this but any proposed amendment before submitting it to the States for ratification.

IMMIGRATION

The House of Representatives passed a bill liberalizing our present immigration laws by permitting to a very limited extent the reuniting of families who have been separated by reason of the immigration policy in effect since the enactment of the original quota restrictive immigration act of 1921. It was my pleasure to support this humane legislation, because in my judgment it was a mistaken policy to permit the entry of a husband or father and to exclude for a great number of years the remainder of the family.

This legislation, without interference with the quota assigned to the various nations, merely grants a preference to the families of aliens who are already residents of the United States. It in no way breaks down our present immigration policy but it selects, as it were, for future immigration those who are most likely to make America their permanent home. I voted for this legislation.

WORLD WAR VETERANS' ADJUSTED COMPENSATION ACT

To care for several thousand ex-service men who have not as yet applied for their adjusted compensation, the Congress enacted legislation amending the World War adjusted compensation law. This amendment comprised three major provisions, as follows:

First. It extended for a period of two years the time within which application may be filed for adjusted compensation.

Second. It removed all doubt as to the finality of the determination of the Secretary of War and the Secretary of the Navy concerning the validity of a lost application.

Third. It extended the benefits of the act to dependents of veterans who have been absent from their homes, continuously and without explanation, for a period of seven years.

This bill received the unanimous vote of the membership of the House of Representatives, among which I was glad to be numbered. It was a just and meritorious measure.

AMENDMENT TO WORLD WAR VETERANS' ACT

Another measure of concern to our ex-service men which received my support was the amendment to the World War veterans' act liberalizing the present war-risk insurance requirements.

OTHER IMPORTANT BILLS

In addition to the bills which I have thus far touched upon Congress acted upon many other measures of more or less importance. Among them may be included: The bill to investigate submarine disasters; postal rates; alien property bill; coordination of public-health activities; merchant marine bill; good roads; migratory bird refuge bill.

THE UNFINISHED BUSINESS

Many important measures—some good, some bad—were not acted upon as the first session of the Seventieth Congress goes into history. These necessarily will be pressed by the proponents when the second session is called to order early in December. Among these I might mention: The all-American canal (Great Lakes to Hudson); the universal conscription act; reapportionment; railroad consolidation; resale price bill; regulation of motor busses; the Sunday observance (or blue law); postal employees' Saturday half holiday; Pullman surcharge; coal; Reed education; modification of prohibition.

I introduced several bills. Included among them was a bill for the relief of the depositors of the Mariners Harbor National

Bank. As I have already stated in this report, 19,770 bills were introduced and but 1,323 reported out by the committees to which they were referred. I am hopeful of having these bills reported out in the second session of this Congress, which convenes early in December.

VETO OF WESTERN ROAD BILL

Mr. EVANS of Montana. Mr. Speaker, the President has vetoed the western road bill, commonly called the Colton bill, designed to aid in the construction of roads through Indian reservations and other Government-owned land, including the national forests. I am sure the President has been poorly advised or does not understand the situation in the western country. I feel this veto is based upon a misunderstanding of the facts and circumstances surrounding this legislation and I am going to ask your indulgence for just a few minutes while I explain its provisions. The veto is based mainly upon two provisions: First, that there is already an appropriation to take care of the forest roads. Out of the $7,500,000 that is being carried in the general road authorization bill there is used annually nearly $3,000,000 for fire protection and for the development of the forests, so we do not have merely all of the amount appropriated for the forest roads. At the present rate of road building with forest funds for main roads in the forests it will take the Federal Government 45 years to complete these roads through Arizona, 95 years in California, 90 years in Colorado, 24 years in Idaho, 33 years in Montana, 28 years in Utah, 8 years in Washington, 55 years in Nevada, 30 years in New Mexico, 30 years in Oregon, and 31 years in Wyoming. So that even the appropriations for main roads through the forests are woefully deficient. We are therefore from 8 to 90 years behind the Federal-aid building program in our forests and on our Indian lands.

This bill is only for the purpose of speeding up the building program on these public lands during the next three years. The lands are owned exclusively by the United States, and in the main these roads will be used as connecting links in the Federal road system. There is no fund available for construction of roads across Indian reservations and public lands, and in many cases vast areas are in such reservations exclusively owned by the United States, exempt from taxation, and the only way that roads can be built to connect up important highways through Federal-owned reservations is through passage of such a bill as is now before us.

Among other reasons assigned by the President in his veto he says:

> Having in mind the increasing ability of the States to finance road construction due to the general adoption of the gasoline tax and the increase in revenue from this source which would accrue to States from roads constructed through public and Indian lands therein, I see no reason why the States should be relieved from their contribution toward the construction of these roads as required by existing law. I am constrained, therefore, to return this bill without my approval.

The Western States are not asking to be relieved of their just burden of road building, they are only asking that the Government of the United States does not throw on us the burden of building roads through lands owned wholly by the Government. In this instance, it is the Government that is shirking its duty and obligations, not the States. The fact of the matter is that only 23 to 57 per cent of the money which the States are putting on the roads now is derived from this tax. We are putting on our roads more money from other sources than we raise by the gasoline tax. Our public lands furnish the greatest example of absentee landlordism in the world. In Nevada, for instance, the Government owns 87½ per cent of the land. In Utah it owns about 74 per cent of the land, and in some of the States 50 per cent, in Montana 25 per cent, and we have not the means by which we can carry on this program.

We are asking for this money to connect existing Federal-aid systems. We need this extra help and need it badly. I am sure the President has been somewhere badly advised. There are men, particularly in the Bureau of the Budget, whose western horizon is bounded by the Mississippi River. It would do them a world of good to see some of the West. It can not be seen from a Pullman car. Roads are needed to protect our forests. Often connecting links which at the present rate will not be built for years will, when built, be the means of protecting great forests. We have no means now to build across many of the Indian reservations. Moreover, there are needed connecting links on the public domain where the population is so sparse and the taxable property so small it will be years before main roads can be built. I do not want to be critical in my comment on this matter, but the conviction is growing in the minds of the people of the Western States that we live too far from New England.

ALASKAN LEGISLATION, FIRST SESSION SEVENTIETH CONGRESS

Mr. SUTHERLAND. Mr. Speaker, under the privilege of extending remarks, I herewith enumerate the measures pertaining to Alaska that have passed Congress or have been advanced to the calendars during the first session of the Seventieth Congress. All bills where authorship is not given, were introduced by the Delegate from Alaska:

BILLS APPROVED AND NOW LAW

H. R. 11279 (Public Law 328): An act to establish a uniform system of registry of mail and to increase indemnity limit to $1,000.

This act increases the amount of valuables that may be carried in one package of registered mail from the present amount of $100 to $1,000. Shippers of furs or gold dust in Alaska may now mail in one package what they were formerly, under the law, required to place in 10 packages. This is a general act applicable to the United States, but it will be particularly convenient to Alaska.

H. R. 328 (Public Law 263): An act to relieve the Territory of Alaska from the necessity of filing bonds in court proceedings.

H. R. 343 (Public Law 264): An act to permit review of interlocutory orders of district courts.

H. R. 7367 (Public Law 201): To permit issuance of school bonds by the town of Seward.

H. R. 340 (Public Law 202): To permit issuance of school bonds by the town of Anchorage.

H. R. 8126 (Public Law 452) by Mr. CURRY: An act to remove limitations on appropriations for Mount McKinley Park.

This bill was amended on the floor of the House by Mr. CRAMTON, of Michigan, to forbid the killing of game in the park. The right to prospect for minerals within the park boundaries remains in effect as before.

H. R. 9031 (Public Law 190) by Mr. SINNOTT: An act to provide for disposal of abandoned military reservations in Alaska.

PRIVATE BILLS

H. R. 2145 (Private Law 7): For the relief of Albert J. Zyvolski. Compensated for loss by fire of household goods and personal property on the Alaska Railroad.

H. R. 2138 (Private Law 6): For the relief of the schooner *Sentinel*. A Coast Guard cutter collided with this vessel and Congress authorized payment for damages.

H. R. 332 (Private Law 147): For the relief of Englehard Sperstad, who settled on land within the school grant and could not obtain title to his homestead except by this act of Congress.

H. R. 333 (Private Law 67): An act to authorize the sale of lands to Jesse Lee Home at Seward.

A FISH LABORATORY FOR ALASKA

H. R. 13383 (by Mr. WHITE): This act authorizes an appropriation of $50,000 for the establishment of a fisheries laboratory in Alaska. This institution is for experimentation in preparation of all varieties of fish in Alaskan waters. The principal purpose is the processing of fish to suit market requirements.

ROAD APPROPRIATION

The amount of money appropriated for the Alaska Road Commission this year was $825,000. This is $175,000 less than last year.

H. J. Res. 100 (Public Resolution 52): This resolution authorizes the Secretary of War to expend not to exceed $125,000 for the regulation of Lowell Creek, provided that $25,000 of the above amount shall be contributed and paid in by the town of Seward or other local interests to be benefited by the proposed improvement before the said work is commenced.

AUTHORIZATIONS FOR HARBOR IMPROVEMENT

The rivers and harbors bill for this session, now reported on the House calendar, carries the following items for Alaska:

For dredging and improving Ketchikan Harbor (Thomas Basin)	$272,000
For a breakwater at Seward on Resurrection Bay	85,000
To improve the entrance to Port Alexander	17,000

HARBOR SURVEYS AUTHORIZED

The rivers and harbors bill carries the following items for new surveys in Alaska:

Egegik River.

Stikine River.

Tanana River, at or near its confluence with the Yukon River.

Kake Harbor.

Kodiak Harbor.

Petersburg Harbor.

Wrangell Harbor.

Kekhu Straits.

Isthmus south of Wedge Cape, Nagai Island, with a view to dredging a channel from East Nagai Strait to West Nagai Strait.

BILLS THAT HAVE PASSED THE HOUSE AND ARE NOW IN THE SENATE

H. R. 10157: An act making an additional grant of land for the support of the Alaska Agricultural College and School of Mines.

This bill authorizes a grant of 100,000 acres of land, to be sold for not less than $5 per acre at public auction. This land may also be leased, and all returns to be for the benefit of the college.

H. R. 13882 (by Mr. VESTAL): An act to extend the benefits of the Hatch Act and the Smith-Lever Acts to the Alaska Agricultural College and School of Mines.

H. R. 7200 (by Mr. HOUSTON): An act to amend the Penal Code so that boxing matches may be permitted in the Territories of Alaska and Hawaii.

H. R. 2137: For the relief of Ed. Snyder, William Paddock, Ed. Strike, and A. A. Heydick.

This bill would authorize the return of bonds forfeited by the court at Juneau. The individual under bond to appear before the grand jury committed suicide before the grand jury convened.

H. J. Res. 135 (by Mr. CURRY): For the relief of special disbursing agents of the Alaska Railroad.

H. R. 10624: An act for the relief of William J. Casey.

This bill would authorize the payment to William J. Casey of $1,440 in full for all claims against the United States for disability caused by injuries received while employed in the Quartermaster's Department of the United States Army at Fort Gibbon, Alaska.

FARM RELIEF

Mr. DICKINSON of Iowa. Mr. Speaker, in compliance with the authority given each Member of the House, I hereby extend my remarks by inserting the following statement on farm relief.

When the farmer goes to vote in November he will be able to identify his friends. The platform of the Republican Party of 1924 is unfulfilled. To commend the record of the past four years, so far as agriculture is concerned, is to indorse and applaud the nullification of the promises in the 1924 platform. Such promises made and unfulfilled should eliminate those who held places of responsibility for the past four years.

Criticism of those asking for farm relief on the theory that they refused the administration recommendations is easily answered, for in none of the recommendations was there any relief. The farmer was without help when his program was defeated, and also without help if the administration program was accepted. The contention that the administration is not responsible is answered by the fact that the administration has presented no program. Suggested recommendations by those in authority have never taken upon themselves proper legislative form. Loans to cooperative associations can not stabilize agriculture. This has been previously demonstrated in the case of tobacco and other large cooperatives handling a large per cent of the commodity produced. What is needed is a device by which nonmembers may be compelled to pay their share of the cost of stabilization, and that is the underlying principle of farm relief legislation.

Stabilization corporations as suggested are not effective for the reason that it relies upon the fluctuating of prices for the profits under which it can continue in operation. Under stable prices the plan would break down because the income of such corporations would depend upon profit, and they would be compelled to buy the farmer's product at a low price if a safe margin on the purchase was maintained.

The suggestion that the equalization fee is the only provision of the bill objected to in the presidential veto is not carried out for the reason that the marketing agreement provided in the bill is the phase of the bill to which real objection is made. Under the marketing agreement we have the bargaining power that is now enjoyed by the combination of processors and by the various combinations in practically every line of trade. In an amendment to the Aswell bill defeated on the floor of the House wherein an effort was made to strike out the marketing agreement section was commented upon as follows:

This provision is regarded by FORT as the fundamentally objectionable feature of the bill inasmuch as he believes this would be the machinery whereby prices would be fixed. The equalization fee, in his opinion, is merely incidental to this and devised to provide funds to put the plan into execution.

Abolition of the equalization fee without the repeal of the section to which he objects would make the bill even worse, the New Jersey Congressman said, because the expenses contingent to the execution of the McNary-Haugen principle would have to be directly financed by the Federal Treasury without any opportunity for at least partial returns from equalization-fee collections.

In the comment made upon the veto message by the members of the agricultural council, which is hereto attached at their request, indicates that the real objection to the bill is the fact that it is an effort to make the protective tariff effective, and even though the equalization fee was not included, the marketing agreement, which is the real crux of the bill, is likewise objected to by reason of its bargaining power. Under existing conditions farmers are at least in a position to say that they have lost nothing by not accepting any proposals that have been made as substitutes for the farm-relief legislation.

The veto message presents no new arguments. In fact, the whole tenor of the message is intemperate, cynical, and vindictive. To recede now from our western demands would brand us as cowards. The only conclusion that can be drawn therefrom is that eastern business thinks it has strength enough to run the country without the help of agriculture. For 60 years the Republican Party was represented by them. The failure to meet the present disagreement is a failure in leadership. Many believe it is the failure of the leaders to comprehend the differences and adjust the same. Self-centered leadership with industrial leanings seem determined to concede nothing to the agricultural demands.

Take the legislative line-up for the past session of Congress on flood control, Muscle Shoals, river and harbors, tax revision, farm relief, and other major projects, and it indicates a growing alliance forced on account of economic conditions between the southern agricultural interests and the western agricultural interests. If this is permitted to continue, with revision of the tariff approaching, it is only fair to assume that the tariff schedule of the next tariff bill will be written by this same group of interests in the Congresses that are to come.

Foremost in the minds of Republicans should be the desire to win. Developments in the State of New York for the past eight years indicate the loss of Republican strength. Whether this can be attributed to the strength of Governor Smith or not is immaterial, because the sentiment is there. This sentiment threatens Republican success in several neighboring States and may put them in the doubtful column. With the uncertainty of Republican strength it would be no less than deliberate political suicide to nominate a candidate unsatisfactory to the Corn Belt States. Success of the Republican Party in the Middle West is essential to a Republican victory. The election of a Republican is in doubt with two uncertain areas in the equation. The only chance to make Republican victory certain is to nominate a man certain of the electoral vote of the Corn Belt States and the border States. Why put two question marks in the campaign when victory can be assured with such an outstanding citizen as Frank O. Lowden, available as a candidate, whose election Democrats are practically willing to concede. In every State where the friends of Governor Lowden have used his name delegates favorable to his candidacy have been secured. In not a single, solitary State can he be listed as a losing candidate.

Attached hereto with letter of submittal is an analysis of the veto as prepared by chairman of the executive committee of 22 for insertion as part of my remarks:

NORTH CENTRAL STATES AGRICULTURAL CONFERENCE,
EXECUTIVE COMMITTEE OF TWENTY-TWO,
Washington, D. C., May 28, 1928.

Hon. L. J. DICKINSON, M. C.,
Washington, D. C.

DEAR MR. DICKINSON: Complying with your request for an analysis of the President's message accompanying the McNary-Haugen bill, which he returned to the Senate without his approval, I am submitting herein a general analysis of the major objections to the McNary-Haugen bill raised by President Coolidge, together with comment which expresses the viewpoint of farm groups which cooperated in sponsoring and supporting the McNary-Haugen bill in the session of Congress just closed. This analysis has been prepared by Agricultural Service for farm and cooperative organizations. You are at liberty to use it in any way you see fit.

Very truly yours,

GEORGE N. PEEK,
Chairman Executive Committee of Twenty-two,
North Central States Agricultural Conference.

THE MCNARY-HAUGEN BILL SECOND VETO MESSAGE

(An analysis and reply, written by Agricultural Service, for farm and cooperative marketing associations, May 28, 1928)

THE VETO OF THE M'NARY-HAUGEN BILL

Part I.—The veto message in general

Informed Members of Congress, who discussed the McNary-Haugen bill with President Coolidge after it passed Congress and before it was returned without his approval, reported that the President knew but little about the bill and what it contained. His veto message proves that this is still the case. It is a lengthy document, and an examination of the veto messages of former Presidents from the day of the first use of the veto power by George Washington down to the present moment discloses no message that is equal to this one in intemperance and ill humor of its phrasing.

Many of the assertions in the veto message can only be answered by a blunt statement that they are not true, either as economic fact or as interpretation of the bill. On the other hand, many assertions in the message seem to merit detailed replies.

The message is in parts as intemperate as a fishwife's tirade; but we are not concerned with its style. The use of epithets and the calling of names are not argument; they can only be answered in kind, and it is best that such passages be ignored, even though that means ignoring much of the last message, which, compared with the veto message of February, 1927, adds many new adjectives but no new ideas to the discussion.

The present analysis of the veto message takes up first a few of its fundamental revelations and logical defects, and, second, presents in detail a discussion of some of the important objections which the President expresses. In general, the veto message shows (1) that the real Coolidge objection is not against the equalization fee, as has been frequently stated, but is against making the protective tariff operate to enhance the price of farm crops, of which we produce a domestic surplus; (2) that his interest in cooperative-marketing development is pretended, not real; (3) that in order to support his criticism of the measure the President is forced to assume that the board, which he alone would appoint, would be foolish or criminal in its administration of the act; (4) that he has no constructive proposal for an agricultural policy, except the dangerous one that American farm production must be reduced to meet domestic demands, which is economically unsound and nationally unwise; and (5) that he is unwilling to permit the Supreme Court to pass upon the constitutional questions involved.

1. OPPOSES MAKING FARM TARIFFS EFFECTIVE

The veto message exposes clearly the real grounds for the Coolidge objections to the McNary-Haugen bill. For months it has been stated on his behalf that his real objection was to the equalization-fee provisions of the measure. His second message reveals that such is not the case. Talk about the equalization fee is only camouflage. The veto serves notice upon the farmers that they will be permitted to secure no benefit from protective tariffs on the surplus crops except over the politically dead bodies of Coolidge, Hoover, and Mellon. The fundamental objection which underlies his entire message stands against any device intended to make protective tariffs effective on our major farm crops. It would apply equally against the debenture plan, or, indeed, against agricultural tariffs themselves if in any way they were to be made really effective to raise the farm prices of foodstuffs and raw materials.

The very crux of the Coolidge objection is stated in the opening sentence of the second paragraph of the veto message:

"In its essentials the objectionable plan proposed here is the stimulation of the price of agricultural commodities and products thereof by artificially controlling the surpluses so that there will be an apparent scarcity on the market."

Here is the heart of the whole matter. President Coolidge objects to surplus control if the object of such control is the "stimulation of prices of agricultural crops and products thereof." Therefore he objects to the debenture plan. He would object to the result even if cooperative associations acting for themselves without Government assistance could accomplish it. It is true the President implies that he would not object to price stimulation if it were secured in the way he proposes—that is, the reduction of production to the needs of the domestic market—but let no one be deluded by such an inference from the President's statements on agriculture; he would object to such artificial "limitation of production," even though he has so naïvely (to use the pet word of the veto message) proposed it as his remedy for the ills of agriculture, if by that means a scarcity on the domestic market resulted and prices rose accordingly. The President probably feels safe in taking the position that price enhancement for the farmers is all right if they secure it by cutting down their production; but if by some means production could be adjusted, as he suggests, so that tariffs would operate to raise food and raw-material prices in the United States, then according to the Coolidge logic such tariffs would have to go; they would tend to raise the price of raw commodities used by American manufacturers in competition with foreign producers, a result which when applied to farmers' products is repugnant to the whole Coolidge philosophy, although he sees no harm in exactly that same handicap which is now being imposed on agricultural producers through the protective laws and devices by which the Government has supported centralized industries.

It should be noted that his statement on the "essentials" of the "objectionable plan" does not refer at all to the equalization fee. The objection is to price enhancement through surplus control. This is the essence of the Coolidge veto. The message would have been fairly complete if it had contained nothing more than this one sentence.

In the same paragraph the message, unintentionally perhaps, misrepresents the provisions of the bill when it refers to surpluses "accumulated by the board" and "to be sold by export and otherwise directly" by the board. There is no provision in the bill whereby the board buys or sells for its own account, or otherwise accumulates or owns any portion of the agricultural surplus. On the contrary, the whole theory of the bill is that the board by means of the commodity funds at its disposal would enable the cooperative associations or other agencies dealing in the commodity to handle the surplus effectively.

2. HAS NO REAL INTEREST IN COOPERATIVE DEVELOPMENT

The veto message exposes President Coolidge's pretended interest in cooperative-marketing development as a sham. In defense against the first surplus-control bills, supporters of the administration raised the cry that whatever was done in the direction of surplus control must be done through cooperative organizations of farmers themselves. Leaders of the farm organizations accepted the President at his word. They completely changed the form and nature of the surplus-control legislation which they advocated. The only bills aimed to assist in the control of agricultural surpluses which have been sent to the President by Congress have been based on the principle that agricultural surpluses could and should be handled by cooperative organizations. They embodied the principles which practical experience of the cooperative associations handling the major cash crops has demonstrated are necessary to enable them to handle surpluses in an effective and intelligent manner. Here was President Coolidge's opportunity to demonstrate his good faith. The bill as presented to him would build cooperative associations. Testimony of men experienced in the cooperative marketing of cotton, tobacco, wheat, rice, and livestock establishes that beyond a shadow of a doubt. The same testimony would convince any open-minded man that the cooperative associations, aided by the provisions of the McNary-Haugen bill, would be able to meet the surplus problem in the interest of agricultural stability and adequate protection. But Mr. Coolidge has turned his back upon that bill, with its carefully worked-out provisions to do the job he admits need to be done, and through the very agencies which he himself has suggested for the task.

3. ASSUMES HIS OWN BOARD WOULD BE STUPID OR CRIMINAL

The veto message is based from beginning to end on the President's assumption that the bill would not be intelligently administered. In fact, at every point in his message where the practical operations of the measure are considered the President assumes that the official acts of the board, which he alone and without restriction was authorized to appoint, would be foolish or criminal, or both. It would be possible by employing that line of reasoning to condemn any major legislation which has ever been enacted into law in the United States in advance of its enactment. It would not be surprising to see such tactical logic employed in the argument of a high-school debating society. A veto message built upon such a basis is unworthy of the office of the President of the United States.

4. SHOWS BARRENNESS OF CONSTRUCTIVE THOUGHT

The veto message contains no constructive proposal for agriculture, although it recognizes that "the severity of the agricultural depression in the United States must not be underestimated." The message does refer to the last annual message of the President, which in its reference to agriculture was so vague and general as to be almost meaningless. The only specific suggestion in the message of last December aimed to show how agricultural prices might be enhanced was the proposal that our agricultural acreage and agricultural production should be reduced to the needs of the domestic market.

This suggestion brings out into the open the plan of some industrialists, for whom the President is spokesman, to seize if possible all of our export markets for the manufactured products of industry, ignoring the fact that the normal farm market is incalculably more important to business generally than the export market.

The proposal to eliminate entirely the agricultural surplus is as unsound from the standpoint of America's economic interests as any proposal could well be. Only a little thought is required to make that perfectly clear. For example, the world wheat market draws annually about 200,000,000 bushels of its supply from the United States. If the farmers of the United States cease to produce that additional 200,000,000 bushels, they would be produced elsewhere, employing the land, the capital, and the labor of non-American farmers to this additional degree. From the standpoint of world wheat prices it makes little difference whether this 200,000,000 bushels is produced in the United States or elsewhere, but from the standpoint of the economic welfare

of the United States it makes a great deal of difference. The main economic question involved here is whether the United States will not be better off to continue producing this 200,000,000 bushels of wheat in addition to our domestic requirements, while supplying the domestic market at a price which the American Congress and the President have declared to be fair from the standpoint of the difference between production costs in this country and in foreign competitive lands, that price being the amount of tariff above the price prevailing outside the United States, rather than to starve out the farmers now engaged in producing that 200,000,000 bushels and forcing them into the cities to add to the vast number of unemployed.

5. UNWILLING TO PERMIT SUPREME COURT TO DECIDE

Appended to the message is the report of the Attorney General on the constitutional questions raised by the bill.

"The bill still is unconstitutional," the President states with all the finality of a Supreme Court. "This position is supported by the opinion of the Attorney General which is hereto attached."

The Attorney General sums up his conclusions as follows:

"The act in question, if approved, would violate the Constitution of the United States, in that legislation having for its main purpose the control of the price of food in the interest of the producer is not authorized by the Constitution; in that if Congress possessed the power to do the things attempted by this act it could not delegate it, as it is legislative in character; in that it vests in those not officers or agents of the United States the power and duty of participating in appointment to fill places in the service of the United States; in that it contravenes the provisions of the Constitution against the taking of property without due process of law."

Every one of these points was fully discussed in the legal opinion carried in the House and Senate committee report on the bill. Every objection is there answered fully. The Attorney General does not contend that the provisions of the bill in important particulars are prohibited by the Constitution but that they are not specifically authorized by it. The sponsors of this legislation admit that there are constitutional questions involved which can only be finally settled by the Supreme Court of the United States, and the committee reports referred to set forth the reasons for the faith that the Supreme Court would uphold the validity of the act. But if the Supreme Court should decide that those portions of the bill which the Attorney General attacks are invalid, so that the provisions for marketing agreements, advisory councils, and equalization fee should thereby become inoperative, the rest of the bill would still stand as a workable whole, embodying as nearly as can be deduced from his vague and general phrases, the provisions for farm relief toward which President Coolidge has expressed himself as favorable.

PART II.—*The veto message in detail*

Following a preliminary statement on the bill, the veto message summarizes the six "major weaknesses and perils" which the President professes to see in the measure. Most of them are founded either on misconception of the provisions of the bill or on the assumption that the administrative body charged with the responsibility of carrying out its provisions would deliberately seek to find some foolish or criminal way to execute each duty or agreement which arose in the course of business. These six points are discussed in the veto message under the following headings:

First. Its "attempted price-fixing fallacy."

Second. The "tax characteristics of the equalization fee."

Third. The "widespread bureaucracy which it would set up."

Fourth. Its "encouragement to profiteering and wasteful distribution by middlemen."

Fifth. Its "stimulation of overproduction."

Sixth. Its "aid to our foreign agricultural competitors."

1. ITS "ATTEMPTED PRICE-FIXING FALLACY"

The message says "this measure is * * * cruelly deceptive in its disguise as Government price-fixing legislation." As a matter of fact the measure is not "disguised as governmental price-fixing legislation." Neither is it price-fixing legislation at all in the sense which the President charges. The forces that govern and otherwise "fix prices" are now in existence. This measure proposes to utilize such forces so that their effect may be more favorable to the producers than at present. For example, competition from abroad, as modified by existing tariffs, would "fix" the upper price limit that could be maintained under the McNary-Haugen bill or under any other plan for the farmers of this country. There was no need to write this provision into the bill. Tariff schedules are already on our statute books. The President either fails to recognize or else deliberately ignores the fact that, in tariff-protected commodities, it is the tariff which fixes the upper limit to which prices might be raised in this country above prices outside the United States, and that this is the same upper limit that would obtain if Mr. Hoover's theory as to how tariffs might be made of benefit to American producers, through reduction of our production to the bare domestic needs, were carried out.

Mr. Coolidge criticizes the bill as "naïvely implying that the law of supply and demand can thus be legislatively distorted in his (the farmer's) favor." Since the message was made public it has been repeatedly pointed out that it is the Coolidge statement that is "naïve." As President he has signed a great number of bills and orders which "legislatively distort the law of supply and demand" in somebody's favor. Every tariff schedule attempts to do so; that is the main purpose of changes in the tariff. The ship subsidy bill, which went to the President in the same envelope as the McNary-Haugen bill and which the President approved, was a "legislative distortion of supply and demand" and competition in the field of ocean transportation.

The message complains:

"The board would be compelled to arrive in some way at the premium on the domestic price which would be demanded from the consumer, and this figure would have to be fixed in the contracts which it would make."

In the opinion of students who are more familiar than Mr. Coolidge with the provisions of this bill, his interpretation is incorrect. Prices would not have to be "fixed" by the board arbitrarily or otherwise. This statement is one of the many economic misunderstandings of the provisions and working of the bill. The board's concern would be to enable the cooperative associations to get control of the surplus supplies which they would withhold from the market until the market required them. Prices would respond until imports threatened to check the rise in price, which would be just as truly a controlling upper price limit as it would be in the case of Mr. Coolidge's proposal to cut down domestic production.

The message states:

"In previous bills definite yardsticks have been determined by which prices were to be established by the Government. They are omitted from this bill, which thereby leaves almost no restraint whatever upon the discretion of the board in this respect. The present measure, therefore, has even less merit than its predecessors in this regard, since it carries no limitation as to the extent of price inflation which it can undertake."

This is an inaccurate statement. In the surplus control bill which the President vetoed last year there was no definite price yardstick, but, on the contrary, the provisions of last year's bill and of this year's bill on this point were absolutely identical.

In addition to the definite price limitation fixed by the duties on imports there is another factor for which Mr. Coolidge makes no allowance whatever. That is the business judgment of the Federal farm board, the commodity advisory councils, and the cooperative associations. Mr. Coolidge himself has pointed out as one of his six "major weaknesses and perils" in the bill one factor which would safeguard the consuming public from unreasonable price enhancement on these major agricultural products; that is, the fact that if an unreasonable advance in the price of any one of the important farm commodities took place, the advance would be checked and balance restored by an increase in the volume of the production of that commodity. It is only by keeping a fair balance in the price relationships of the important acreage crops through proper surplus control that the serious overproduction which has been one of the main causes of agricultural distress in the past could be avoided.

The criticism that the bill carried "no limitation as to the extent of price inflation which it can undertake" might have been applied to the Federal reserve act; it might be used to-day as an indictment of the powers of the Federal Reserve Board and the Federal reserve banks and system. The President seems to feel reasonably secure against the abuse of banking powers by these official agencies, and the farmers of the Nation have the right to demand from him the same mental attitude in regard to the powers of the Federal farm board.

2. THE "TAX CHARACTERISTICS OF THE EQUALIZATION FEE"

The veto message asserts that the equalization fee "is a sales tax upon the entire community." The first two paragraphs of the Coolidge discussion of the equalization fee proceeds on the assumption that the fee is a tax. The President has, quite conveniently, appended the Attorney General's opinion, which is as clear a refutation of this assertion of the President's as anyone could wish, because the Attorney General makes it perfectly clear in his opinion that the equalization fee is not a tax, but is a charge to be collected as a regulation of commerce.

The President complains that the equalization fee "can be assessed on the commodity in transit to the consumer and its burdens can often unmistakably be passed on to him." Who pays the freight on wheat or corn or cotton or hogs or cattle which the farmers send to market? The farmer has no illusions on that score. He knows it is deducted from the price he receives. The equalization fee would fall exactly as the freight charge does. There is no need for an extended discussion on that point.

This section of the Coolidge veto message produces one of its most paradoxical paragraphs—a passage which is intended as a climax to the Coolidge denunciation of the equalization fee, yet nearly every word of which can be applied with equal truthfulness and accuracy to the protective tariff.

The President said:

"Incidentally this taxation or fee would not be for purposes of revenue in the accepted sense, but would simply yield a subsidy for the

special benefit of particular groups of processors and exporters. It would be a consumption or sales tax on the vital necessities of life, regulated not by the ability of the people to pay but only by the requirements and export losses of various trading intermediaries. It would be difficult indeed to conceive of a more flagrant case of the employment of all of the coercive powers of the Government for the profit of a small number of specially privileged groups."

The Senator from Mississippi, Mr. HARRISON, nailed this inconsistency when on May 25 he read the paragraph quoted and said:

"That is the high language of the President. Yet his party has proclaimed, and he has proclaimed from the housetops, that he favors a high tariff, that he favors subsidies, that a certain class or special group in this country must be protected. Yes; lay the taxes for a special group who do not need it, a privileged class. Yes; keeping the cost of living high to the amount of $4,000,000,000 on the American consumer through the retention of the present tariff rates. The President knows his party has done that, and with his advice, consent, and connivance, and yet he inveighs in this message against the very principle that he otherwise invokes."

From beginning to the end the message is filled with such inconsistencies as this in which a high-tariff, special-privilege man condemns what he conceives to be special privilege for agriculture. In addition the message contains many statements which directly contradict each other. It will be noted that the President charges that the subsidy is "for a special benefit of particular groups of processors and exporters." It is strange then to find him in the next paragraph asserting that "no board would be able to resist the pressure of political forces which could be mustered in behalf of each staple commodity." In other words, in one breath the President charges that the producers would not benefit from a law which would "yield a subsidy to processors and exporters," while in the next breath he warns that the board would not be permitted to hold the equalization fee for use as a last resort, because of the demand of the producers that it be invoked immediately in their behalf.

3. THE "WIDESPREAD BUREAUCRACY WHICH IT WOULD SET UP"

In his discussion under this head the writer of the message becomes almost hysterical. His reference by number to the processors, millers, and packers serves no purpose other than to confuse and mislead. This is evidently the intention when the message points out that had the bill been in operation in 1925 it would have involved collections upon an aggregate of 16,000,000,000 units of wheat, corn, and cotton.

This is exactly as if the President were to criticize the automobile tax by painting a picture of hordes of inspectors, sleuths, and auditors chasing the 20,000,000 automobile owners of the United States about the country in an effort to collect from them, one at a time, the automobile sales tax. One illustration is about as reasonable as the other. It would be fully as reasonable to depict a Government inspector, himself checked by an auditor, at every little motion-picture house in the country, stationed there to collect the Government tax on the hundreds of millions of admission fees paid on which the Government levies a tax. The type of argument which is embodied in this portion of the veto message could be applied with equal justification in an indictment of any Government board or bureau or department. For example, an opponent of the income tax when Congress had it under consideration might have employed the following paragraph in his harangue with only slight changes:

"Such autocratic domination over our major industry, its dependent trades, and the everyday activities of hundreds of thousands of our citizens would indeed be profoundly repugnant to every instinct of our institutions. It would undermine individual initiative, place a premium upon evasion and dishonesty, and poison the very wellsprings of our national spirit of providing abundant rewards for thrift and for open competitive effort."

Or the paragraph next following might, with few changes in wording but no change in the sense, be employed to-day in attack upon the Federal Reserve Board and the officers of the Federal reserve banks in their exercise of powers and duties of tremendous importance to each citizen of the land:

"The arbitrary powers in the hands of the 12 members of the board are almost incredible. * * * These men could throw the entire machinery of the Government into an attempt to raise or lower domestic prices at will. Even though such efforts would ultimately be doomed to certain failure, these men would meanwhile, during the course of costly experiment, hold in their hands the fate of vast industries using farm products, employing millions of persons, and of great cooperatives with thousands of farmer members. They could disrupt the settled channels of trade and commerce; they could alter at will the cost of living, influence wage levels in all lines of industry, and affect conditions of business in every part of the country. The mere enumeration of such powers is the complete answer to the proposal that they be granted."

4. ITS "ENCOURAGEMENT TO PROFITEERING AND WASTEFUL DISTRIBUTION OF MIDDLEMEN"

The President's message here simply repeats one of the standard misrepresentations of the McNary-Haugen bill which has been used until it is threadbare by the professional opponents of this legislation, and which has been exploded every time it has been used.

The message says:

"As was pointed out in the veto last year, it seems almost incredible that the farmers of this country are being offered this scheme of legislative relief in which the only persons who are guaranteed to benefit are the exporters, packers, millers, canners, spinners, and other processors. Their profits are definitely assured. They have, in other words, no particular incentive toward careful operation, since each of them holding a contract, no matter how unscrupulous, wasteful, or inefficient his operations may have been, would be fully reimbursed for all of his losses."

The argument that packers and millers would have their profits guaranteed under the operations of this bill is sheer demagoguery. There has been more misrepresentation on this than any other provision in the bill. There are certain commodities with which, if any surplus operations are undertaken at all, the export business should be in processed, not in raw form. This is true of wheat; it is true of pork. No one wants to put the board or the farm cooperatives into the milling business. No one wants to put them in the packing business. Operations, therefore, would necessitate contracts to allow for the processing and the exportation of these commodities in finished form. But these contracts only cover the physical handling and exporting of definite portions of the crop—definite surpluses for export. Such contracts would have nothing whatever to do with the entire operations of a mill or a packing plant. They would have nothing to do with guaranteeing a final profit or with preventing a final loss by a mill or packing plant on its year's operations. Such contracts would be let on a competitive basis. Since there is an excess capacity both of flour mills and packing plants in the United States, it is certain that there would be keen competition for these contracts. It is certain, furthermore, that commodities like wheat and pork could be handled at greater economic advantage and at less cost in this than in any other way.

Sydney Anderson, president of the Millers' National Federation, and one of the most uncompromising opponents of the McNary-Haugen bill in his testimony before the House committee, completely destroys the argument of the President.

The hearings by the House committee contain the following passage (Serial E, pt. 7, p. 554):

"Mr. ANDERSON. The probabilities are that there would be competition among mills for these contracts, and that that competition would probably prevent the realization, or might prevent the realization, of either the entire recoupment of losses and probably would result in no recoupment of profits in those transactions, so far as that goes.

"Mr. JONES. At least it would keep you from dictating terms to the board, would it not?

"Mr. ANDERSON. I think so, very definitely."

What is true of milling interests is true of packers. In no sense would there be any guaranty of the profits of any of them; neither would the contracts need to be made with any large number of agencies. Another point which the President overlooks is that the board would be responsible for these contracts. The board would be the custodian of the producers' funds, and it is nonsense to argue that the board would deliberately enter into contracts that would be unfair to the producers, particularly in view of the fact that the competition for these contracts among processors would be so great that the board would be enabled within reasonable bounds to dictate the contract terms. Yet here as elsewhere throughout the message the President assumes that the board in making the contracts would deliberately choose to follow a foolish or criminal course.

5. ITS "STIMULATION OF OVERPRODUCTION"

"An economic law as well settled as the law of gravitation," says the President, "is that increased prices decrease consumption; they also increase production." But the "law" to which the President refers is no "law" at all as applied to the sale and consumption of basic farm commodities. The demand for the staple foodstuffs and raw materials is not elastic; people buy and consume about the same quantities of them regardless of the price to the farmer, except in the cases where they can turn to cheaper substitutes. The consumption of wheat and meat does not follow the same "law" that applies to automobiles, radios, and articles of comfort and luxury. According to the President's theory, the consumption of wheat since the war should have increased compared with pre-war, since its relative price has been low, yet the Department of Agriculture advises that the per capita consumption of wheat has fallen off about 25 per cent since before the war.

Neither is it a dependable rule that increased prices increase production unless the price increase applies only to one of several competitive commodities, in which case there is a shift of acreage from one to another. This was well illustrated in the case of cotton acreage from 1922 to 1926. During the early part of that period the price of cotton was very high relative to prices for wheat, corn, and livestock. The records show that approximately 17,000,000 acres were withdrawn from the production of livestock and grain and devoted to cotton. Had the

prices for these important farm crops been steady with relation to each other this shift would not have occurred.

One factor which the President's message entirely overlooks is fundamental in the attitude of a farmer to his year's operations. The farmer has an expensive plant with fixed charges for interest, taxes, and certain operating items which must be met. He can not stop these expenses by curtailing his operations when supply exceeds demand and prices are low. The only way in which he can meet these charges is to keep on producing, and if possible to produce more when prices are low than when they are high. A smaller amount of production is required to meet these fixed charges during a period of satisfactory prices than when prices are below production costs, and there is abundant reason for belief that if surpluses were held in control in the interest of fair and stable prices the farmers would adjust their production accordingly and enter into an era of more satisfactory country life. Hours of labor on the farm would be shortened, there would be less child and women labor in the fields. The standard of living in the country would be raised and maintained on a higher plane, which ought to be the object of any national policy toward agriculture in this country.

6. ITS "AID TO OUR FOREIGN AGRICULTURAL COMPETITORS"

In this section the President's message presents one of its most amazing paradoxes. The discussion starts out with the assertion that the operation of this measure would "encourage the foreign peasant"; while in the next paragraph it asserts that operation of the measure would threaten the foreign peasant with dire disaster; that the United States would come into "direct conflict with the dumping and similar trade laws of many foreign lands which are interested in the maintenance of his own agricultural industries."

Obviously, both of these assertions can not be true. The President should have selected one, but he can not use both of them as the basis of his argument.

The operations of the cooperative associations assisted by the board under the McNary-Haugen bill would be the exact reverse of dumping, notwithstanding the contention of the veto message. The sensible aim of all operations would certainly be to sell in the world market at the best obtainable prices. The important thing is that these agencies would have the greatest power possible back of their bargaining efforts. Operating under contract with the board they would have the power and financial backing to hold the surplus of a commodity until an advantageous sale could be realized. There would be no necessity for dumping, as the message argues.

It is a grotesque misconception of the provisions of the bill to assume that a commodity surplus would have to be disposed of as soon as purchased by the agency which undertook with the cooperation of the board to withdraw and handle it in an orderly manner.

Moreover, the foreign countries in which we market our foodstuffs are themselves deficient in food production, and they are vitally interested in the maintenance of an abundant supply of the necessities of life. The suggestion of the President's messages that our course should be to starve out acreage in order to force the farmers of the United States to curtail their production so that they would withdraw from the export market entirely is infinitely more threatening to the countries of Europe which purchase and use our excess farm products than is any provision of the McNary-Haugen bill.

As for the argument that the McNary-Haugen bill proposes to "dump" corn and other feedstuffs abroad so that foreign livestock consumers would be enabled to compete with the American livestock industry on a more advantageous basis, that also is based upon a misconception of the operations of the measure. Corn is the only important feed crop to which the President refers. The authors of the McNary-Haugen bill clearly recognized that with corn the problem is rather to overcome the effect of excessive production one year and scant supplies the next than to dispose of a large exportable surplus abroad. There is no reason to believe it impossible or unwise to secure the price benefit of the small corn tariff, both through an intelligent carry-over program and export sales. Mill feed presumably is classed in the President's mind with corn, notwithstanding that a policy of exporting wheat as flour would retail mill feed in this country and thus cheapen its home price.

The same misconception is apparent in the references in the veto message to cotton. "Under this bill," the message states, "it would be quite conceivable that foreign mills could obtain American cotton for prices substantially less than those paid by domestic mills."

There is no tariff on cotton. American exports constitute about two-thirds of the world's international trade in cotton. The President accuses the board, which he himself would appoint, and the cooperative associations in which he has expressed such confidence, of almost unbelievable folly when he assumes that they would overlook the fact that by withholding surpluses from the world's markets and by permitting the American cotton to move in an orderly stream, they could secure all of the price benefits that are economically obtainable.

There would be no thought, and in fact no real possibility, of maintaining a domestic price for cotton above the price obtaining throughout the world. Yet, assuming for the moment that this would be possible and wise, what would be unjust and unfair to the American cotton manufacturers in such a system? The protective tariff gives cotton-textile interests an enormous advantage in our domestic market over their foreign competitors, but this advantage is not reflected to the cotton grower by as much as a fraction of a cent. The American cotton grower's prices is the same whether he sells his cotton to a New England or a North Carolina spinner, or disposes of it in England. The American cotton manufacturer, instead of complaining against the cotton growers for their advocacy of the McNary-Haugen bill, ought to be grateful to them for their forbearance. Organized cotton growers have been asking for no part of the tariff benefit which the textile interests derive. They merely want power to control their surplus, so that the purchaser, whether he lives in America or in Europe, can secure his cotton at a fair price and on exactly the same basis as others are supplied—and this is just what the McNary-Haugen bill provides in the case of cotton.

THE MESSAGE'S CONCLUSION

The veto message complains that the provision for insurance of cooperative associations against a decline in the average open-market price for their commodity during a marketing season is an objectionable feature not found in last year's bill. Again the President is mistaken; the insurance provision was present in last year's bill, even though the President has forgotten it.

The objections to the insurance plan which are raised in the message are not based on a correct understanding of the method of operation of the cooperative associations which might be expected to make use of the insurance proposal, nor are its conclusions justified by the terms of the insurance provision itself.

The final paragraph of the President's message brings out another contradiction, this time with his veto message to the former McNary-Haugen bill. It will be recalled that one of the grounds for the President's disapproval was that the former bill provided a way in which an equalization fee might be collected on the importation of an agricultural commodity in its original form, but failed to provide for the collection of equivalent equalization fees on the manufactured products of such commodity. This, the President complained last year, would result in a serious handicap upon our domestic manufacturers. This year's McNary-Haugen bill contained a provision supplying exactly what the President complained was missing from last year's bill, yet the veto message now under consideration attacks the new provision and criticizes it severely.

One of the grounds of his objection to this provision which, as stated, was inserted upon the suggestion of the President himself, is his claim that it would "nullify the provision of the tariff act that tariff rates shall be based on differences in cost of production here and abroad, so far as that provision relates to agricultural products."

Nothing could be further from the truth. The bill assumes that our tariff rates represent the judgment of Congress upon the difference between the cost of production of a commodity in this country and the cost in the principal competing country. Standing on that assumption the bill proposes to make it possible for agricultural producers to secure that advantage which Congress clearly intended they should have when it enacted the last tariff law.

The message asserts that the loan provisions which the McNary-Haugen bill proposes as an alternative method of assisting cooperative associations to deal with surplus production is, in fact, no alternative at all, for the reason that the three conditions precedent to action which the board is required to find, will always prevail. The section referred to (section 8) requires the board to make a formal investigation of the supply and demand condition in a commodity before it can commence a marketing period for the commodity. The board does not have to undertake such an investigation unless the producers through their cooperative associations, or through their advisory council, demand it. The whole context of the bill makes it clear that such an investigation which is necessarily precedent to the establishment of any marketing period would not be undertaken except at a time when a surplus condition threatened to develop of such a serious nature that it would substantially interfere with the objectives set forth in section 1, where the policy of Congress in this bill is declared.

The veto message violently denies that the President has ever advocated any plan for farm relief which would enable farmers to employ their surpluses in such a way as to maintain domestic prices back of the tariff wall. It is well that at last he has made it perfectly clear that as long as he, and the interests which he so well represents, remain in control of the Government, no measure aiming to make the protective tariff operative for the American producers of surplus farm crops will be permitted to become law. Here again the President exposes the real grounds for his objection to this measure. He objects because, he says, "the real objective of the plan in this bill is to raise domestic prices to artificially high levels by Government price fixing and dump the surplus abroad." This is obviously an unfair and prejudiced statement of the provisions of the bill, yet as a matter of fact what he objects to for agriculture is precisely the present practice of a well-organized industry. For example, the United States Steel Corporation openly states that it markets its surplus in exactly the

manner which the McNary-Haugen bill proposes for agriculture. Up to date there is no record that the President has ever voiced any objection to that.

The President's concluding proposal for what he calls "the only sound basis for further Federal Government action in behalf of agriculture" is vague and general. For further details he refers Congress to his last annual message, but a perusal of that message yields the farmers only cold comfort. The only plan for increased farm prices which the President suggests is that farmers should curtail their acreage and production to a domestic basis. That means further reduction in the number of farmers, it means a continuing deflation of agriculture, it means crowding more workers into the cities, it means spreading the distress of this basic industry which already has progressed too far. It means to do all these things in the face of the fact that our agricultural production per capita of population is steadily falling behind our domestic production.

The object of this is not to save agriculture, since it could only be realized by further impairment of the farming industry. The object is to carry out the well-known Hoover theory of forcing agriculture to withdraw from the export market in order that American industrial manufacturers may enjoy a monopoly in that field.

This is a proposal so "cruelly deceptive" (to employ the President's language) and so hopeless as far as agriculture is concerned, that it draws the line sharply between those who favor a real and permanent agricultural foundation in this country and those who favor proceeding with the industrialization of America at the expense of agriculture at the most rapid rate possible.

PERSONAL LEGISLATIVE RECORD

Mr. WILLIAMSON. Mr. Speaker, it is now seven years since I commenced my services in this House. During that time I have never attempted to summarize my services here for the information of my constituents, though many have requested that I do so. No man has actively served in this body and escaped criticism. Our motives are frequently misunderstood, our sincerity sometimes challenged, and our political opponents do not hesitate to misrepresent our records. If we show independence we are denounced for not supporting the administration, and if we are regular we are hooted at for following the dictates of the "bosses." For my part, I have assumed that I have as much right to form my own opinions as anybody else, and I have never hesitated to exercise my own best judgment in advocating or opposing legislation. While seeking every proper advantage for my district, I have sought to do my part as a Member of Congress in shaping general policies and working out the larger problems that affect the general welfare of all. In doing this I have not infrequently come into conflict with both the House leadership and the administration, but have stood my ground for what I considered right. That my constituents—the people back home—may be better able to judge the merits of my services, I avail myself of this opportunity to briefly summarize my record as it appears in the archives of this body.

EX-SERVICE MEN

The World War left innumerable problems to be disposed of, one of the most important of which was the care of the disabled veterans. I have supported every piece of legislation for their relief and care and have given personal attention to hundreds of cases of needy ex-service men who have appealed to me for aid. With the balance of the South Dakota delegation I did my part to secure the new veterans' hospital at Hot Springs and have consistently supported the movement to draft wealth as well as men in time of war.

FOREIGN DEBTS

Some $10,000,000,000 were loaned by the United States to foreign countries during and immediately following the World War. From the start I insisted on full payment, and this has been the basis of all adjustments so far made. The Italian settlement has been criticized and the claim made that we settled for 20 cents on the dollar. Of course, nothing of the sort was done. The settlement appears in full in the CONGRESSIONAL RECORD of January 15, 1926. An inspection of this shows that we loaned Italy, all told, $1,648,034,050.90. This, together with interest at 4¼ per cent to December 15, 1922, amounted to $1,899,880,705.69. With this as a new principal, interest was computed at 3 per cent to June 15, 1925. The final principal, after allowing for certain cash payments by Italy, amounted, on that date, to $2,042,000,000, for which amount Italy issued her bonds to the United States. The only concession given to Italy was a low rate of interest upon the installments during the 62-year repayment period. The period for repayment is the same as for all other countries.

SQUARE DEAL FOR AGRICULTURE

Throughout my entire career in Congress I have fought with those seeking a square deal for agriculture. In the Sixty-seventh Congress we organized the farm bloc, which was largely responsible for the farmers' agricultural tariff, without which agriculture could not have survived, and for the free schedules covering the most important items that the farmer is required to buy for his operations. At that Congress I supported and helped put through the following important bills: Bill reviving the War Finance Corporation, bill placing dirt farmer on Federal Reserve Board as a protection against another deflation, packers and stockyards act, futures trading act, filled milk bill, good roads bill, farmers' cooperative marketing bill, seed grain, and other relief bills. We then went to work on what became known as the McNary-Haugen bill. Twice we failed to pass it, but in 1927 and again in 1928 finally mustered sufficient support to put it through Congress, only to meet with presidential vetoes. The fight for a square deal for agriculture will finally be won if those who are making it here continue to have the support of their several constituencies. The South Dakota delegation to-day has three chairmanships—mine being that on expenditures—and wields more influence than it ever did on important bills.

FEDERAL TAXATION

I have consistently fought the sales tax, which would put the burden of taxes upon those least able to pay, and resisted the attempted repeal of the surtax and excess-profits tax until the burden was lifted from the small incomes, and have helped retain the Federal inheritance tax on the descent of large estates. At this session I supported the conference report repealing the automobile tax, reducing the tax on small corporations, and abolishing the last of the so-called nuisance taxes. The Federal income taxes have been reduced to a point where they are a negligible factor in South Dakota. This has been brought about by writing our own tax bills in defiance of the recommendations of Secretary Mellon.

MUSCLE SHOALS

Since coming here I have resisted with every resource at my command the consistent and tremendous effort made in and out of Congress to turn over Muscle Shoals to Henry Ford and the Power Trust. This hydroelectric plant has been paid for by the people and should be retained and operated for their benefit. A bill providing for its operation by a Government corporation has passed both Houses of Congress at this session and awaits the action of the President. This accomplishment was a great achievement for the people and was put across in spite of a very active Power Trust lobby.

CONGRESSIONAL SALARY

I opposed the increase of congressional salaries, taking the position at the time that the proposed increase was not justified in view of the conditions then prevailing in the agricultural industry. It seemed to me that if there were to be an increase it might well await the return of prosperity to our most important producers.

FEDERAL RESERVE PENSION BILL

In the last Congress I fought the proposed scheme to pension the highly paid employees of the Federal reserve system and wrote a minority report on the bill which effectively put it to sleep. At this session it was again reported out by the committee in charge but was killed in the House.

BELLE FOURCHE PROJECT

As the Members of this body are well aware, I made a last-ditch fight to save the Belle Fourche irrigation project when the powerful Committee on Appropriations sought to put it out of business. In the end we got an appropriation and secured a charge off of $1,200,000 on construction and back operation and maintenance charges. By the splendid aid of W. D. Buchholz, secretary of the irrigation district, we obtained a most favorable contract, under which the settlers are bringing the project to a high state of prosperity.

FORT MEADE

Since coming to Congress I have been active in the efforts made to regarrison Fort Meade, near the city of Sturgis. The fort is now filled to capacity, to the great advantage of the whole Hills section.

WIND CAVE AND THE PRESIDENT

This year, through the active cooperation of Senator NORBECK and myself, we have secured an appropriation of $40,000 for road improvement in the Wind Cave National Park, and last year I took an active hand in the efforts which finally brought President Coolidge to South Dakota for his summer sojourn.

LEGISLATIVE RECORD

In sponsoring and helping put through legislation affecting my district, the following bills which have become a part of the laws of the land are worth noting: Three Norbeck-Williamson bills relating to the Custer State Park, introduced in successive Congresses, extending boundaries, providing for patenting certain lands to the State, and donating outright

1,600 acres of Government lands within the park for park purposes; bill adjusting boundary of the Black Hills National Forest; three separate extension acts, giving additional time for settlers to make payments upon their homesteads; three reorganization of Government departments bills, one of which has been signed by the President. The other two are pending in the Senate. When enacted these will make a considerable annual saving and will add to the efficiency of the service. The McMaster-Williamson Rushmore memorial bill, creating a national memorial commission and authorizing an appropriation of $250,000 as Federal aid toward the cost of construction of the $500,000 project, has passed both Houses and is ready for the conferees. Time will not permit mention of a score of other bills introduced by me that have become laws.

INDIAN BILLS

Shortly after my arrival here I sponsored the distribution to the Rosebud Sioux of the "million-dollar" fund, a $30 per capita payment to the Cheyenne River Indians, and have introduced and secured the passage of the following bills: $5,000 monument bill for the Rosebud Sioux; bill creating a loan fund for the Rosebud Sioux; bill appropriating $50,000 for reconstruction at Rapid City Indian School; bills adjusting and making payment to Cheyenne River Indians for some 500 head of horses killed in 1895, 1896, and 1897 by the unauthorized act of Government agents; general bill authorizing per capita payments to Cheyenne River Indians; individual claims bill; Sioux benefits bill; Norbeck-Williamson Rosebud Sioux per capita payment bill; and McMaster-Williamson Pine Ridge per capita payment bill.

LAME-DUCK SESSIONS

I believe that the so-called "lame-duck sessions" should be abolished and have consistently supported and voted for the Norris resolution providing for the inauguration of the President and the convening of Congress shortly after election.

WORLD PEACE

The maintenance of world peace should be a primary object of governments. My influence has always been exerted toward working out a program for the settlement of international disputes without a resort to force. I believe that binding treaties should be entered into with the leading powers of the earth with a view to outlawing war and bringing about permanent peace among the nations.

TRANSPORTATION AND RATES

We in the Middle West are isolated by reason of the long haul and high freight rate. We have constantly been discriminated against in favor of both the East and the West so as to prevent the development of industries in our section. Our fight for lower freight rates has had meager results. I have been a consistent booster for the Government barge line on the Mississippi River and believe that it should be extended up the Missouri. This competition will force the railways to cut their rates in order to save their heavy traffic. The completion of the Great Lakes and St. Lawrence deep waterway would mean an additional income for the mid-western farmers of $75,000,000 to $100,000,000 a year by lowering freight rates to foreign ports, which would be reflected back in enhanced prices for all products of which we produce an exportable surplus.

No one thing can bring prosperity to our section. There must be adjustments along a multitude of lines, and it should be our constant effort to bring these about. A lot of noise, bluster, and promises will not do it, but hard and untiring effort in the right direction will bring results.

THE BOULDER DAM PROJECT

Mr. SWING. Mr. Speaker, the objections that have been urged on the floor of this House against the Boulder Dam project are not new. They have been urged over and over again and as often have been thoroughly and completely met and answered, both in the engineering investigations and reports and in the hearings before the House and Senate committees.

The trouble with the opponents of this bill is that they dare not disclose their true position. Arizona and Utah have fought this project from the beginning, not because of constitutional objections, not because they are being deprived of anything they now possess, not because their citizens are to be denied water or power from the project on equal terms with citizens of other States—they are making this fight because they seek to compel the Government to grant them special concessions and special privileges in the way of royalties and taxes to which they are not entitled.

These two States are being aided and abetted in their opposition by the power corporations who are determined to balk the plan of the Government to protect the lives and property of its citizens and develop its own property, unless they are first assured of handsome profits out of the undertaking.

All the doubts and fears that have been expressed here about the engineering feasibility and economic practicability of the proposal will fade away as the project begins to take form and come into being. These same fears and doubts have always been urged by some one against every big and worthwhile proposition. Jefferson was thought a fool by some of the people of his time for the Louisiana Purchase, buying land so vast in extent that they said there would never be any need or use for it. The admission of Texas into the Union was bitterly denounced as throwing a heavy burden on the Public Treasury, many declaring that the new State should be spelt T-a-x-e-s instead of T-e-x-a-s. The admission of far-away California was opposed as a move that would bankrupt the Government to pay the mileage of the Congressman of the Pacific coast. The purchase of Alaska was at the time commonly referred to as "Seward's Folly." Even the digging of the Panama Canal in our own day was decried, first, as engineeringly unfeasible; and, secondly, as economically impracticable. The country was told that there would never be enough ships passing through the canal to pay its operating expenses. Looking back on those former days, how foolish the opposition to those great projects now seems.

So likewise in this case, the future will justify every assertion that has been made in behalf of the Boulder Dam project, and on a roll of honor will be spread the names of those men who had the vision and the courage to make its construction possible. Time will dispel all the doubts and fears which the opposition have sought to throw around it and leave it standing, in magnificent grandeur, clear cut against the sky, the greatest accomplishment of our generation in this or any other country in the world.

COOPERATIVE EXTENSION WORK A GREAT EDUCATIONAL MOVEMENT

Mr. HOPE. Mr. Speaker, no list of the important legislation passed at the first session of the Seventieth Congress would be complete without giving a prominent place to H. R. 9495. This measure, known as the Capper-Ketcham bill, authorizes the appropriation of additional funds for carrying on agricultural extension work by the Department of Agriculture in cooperation with the agricultural colleges in the various States. This work, which has been carried on since 1914 under the provisions of the so-called Smith-Lever Act, has become a great educational movement. Under the terms of the Smith-Lever Act, increased appropriations were made for this work by the Federal Government annually until 1923, when the act matured. Consequently each year witnessed an increase in the scope of the work. Since 1923, however, there has been no increase in Federal funds, and no extensions of the work have been made, except where there was an increase in State and county funds available for the purpose. The present act does not in any way affect the appropriations authorized under the Smith-Lever bill, but authorizes an additional appropriation of $960,000 for the next and each succeeding year, to be divided on the basis of $20,000 for each State, and $500,000 additional the following year and each year thereafter, to be allotted to the States on the basis of rural population, and on condition that the State or subdivisions thereof furnish an equal amount. It is hoped that in succeeding years further increased authorizations may be had, so that the work may continue to progress and develop.

This extension work is a matter of tremendous importance to the great industry of agriculture. I can perhaps best illustrate its scope by telling what is being done in my own State, and in the district which I have the honor to represent. I may be pardoned perhaps for calling attention to the fact that the Seventh Kansas district is one of the greatest agricultural districts of the United States and has the distinction of producing more wheat than any similar political unit in the country. In 1926 this district produced over 82,000,000 bushels of wheat, which was considerably more than half of that produced by the State of Kansas, was approximately one-tenth of the production of the entire country, and more than was produced by any other entire State, North Dakota, with 77,000,000 bushels, being next to Kansas for that year. While the production every year is not as large as that, yet predictions are now being made, based upon the present condition of the crop, that the total yield for this year will be almost if not as great as in 1926. Furthermore, there is no recent year in which this district has not produced more wheat than any other congressional district. It should be remembered also that all of this is the best grade of hard winter wheat, running high in protein content. But wheat is the only one of the many crops produced in this district. It is one of the three or four greatest districts in the country in the production of grain sorghums. It is a great broomcorn country. It produces a great deal of corn, alfalfa, and sugar beets. Poultry raising and dairying are rapidly grow-

ing industries, and the abundance of feed and the mild climate make it an ideal country for all varieties of livestock.

The State of Kansas has always taken great interest in agricultural extension work, as is shown by the fact that its State, county, and local contributions for this purpose for the present year are $424,555.15, or more than three times the amount required to match the Federal appropriation. My district has been a leader in the development of this work, and no part of the State can show more splendid results from the work done. It is a matter of particular pleasure to note the wonderful success which has been made in boys' and girls' club work.

Last December, at the Sixth Annual Boys and Girls' Club Conference in Chicago, Marie Antrim, a fine, wholesome Kansas girl from Kingman County, one of the best agricultural counties in the seventh district, was acclaimed the 4-H girls' health champion of the United States. At the same time Miss Lola Adams, from Ford County, which is also one of the great agricultural counties of the district, won third place in the 4-H national baking contest, after having won first place in the Kansas contest, and showed her good sense after returning by saying that while she had a fine time on her trip she would much rather be a Kansas farmer's wife than to live in Chicago.

Agricultural extension work as contemplated under the Smith-Lever and Capper-Ketcham Acts is divided into three parts: The practical agricultural work dealing with improved methods of tillage, crop production, and farm management as carried on under the direction of the county agent; the home demonstration work as carried out by the women on the farms under the direction of the home demonstration agent; and the 4-H Club work among the boys and girls under the direction of the club leaders.

The work in Kansas has been organized long enough that it is possible to show its value by comparing farm production and farm conditions in adjoining counties, where one is and the other is not carrying on this work. The director of extension work in Kansas, Dean Umberger, of the State agricultural college at Manhattan, has furnished me with comparative figures from a number of counties which give a graphic illustration of the value of the extension work in farm management and production. The results are the same in every case, showing a large increase in productive efficiency in the counties having county agents; but I shall take time now to cite only one or two specific cases. Jewell and Mitchell are adjoining counties in the north central part of Kansas, in the district represented by my colleague Hon. HAYS B. WHITE. Jewell County has had a farm bureau for 12 years; Mitchell County has never had one.

The counties are similar in every way and a comparison between them ought to offer some idea of the value of county extension work. With this thought in mind a comparison was made by Mr. Umberger, between the two counties on the basis of crop yields, poultry produced, total value of crops, alfalfa acreage, sweet clover acreage, and hog losses. The figures used were for the seven years prior to the organization of the farm bureau in Jewell County and the seven years following its organization. Between the two periods, Jewell County increased the area farmed one-half of 1 per cent, while the Mitchell increase was 2½ per cent. The total increase in the production of farm crops in Jewell County was 43 per cent, while in Mitchell County it was only 12 per cent, or a difference in favor of Jewell County of 31 per cent. Jewell County increased corn yields 10 per cent, while Mitchell County had a 3½ per cent increase, or a margin in favor of Jewell County of 6½ per cent. On the average planting of 144,000 acres this would give Jewell County an advantage of 176,000 bushels per year, or 1,232,000 bushels for the seven years. Jewell County gained 25 per cent in alfalfa, while Mitchell lost 5 per cent, or a difference of 30 per cent in favor of Jewell. Jewell increased poultry production 56 per cent while Mitchell increased 35 per cent, or a difference in favor of Jewell of 21 per cent. On its average poultry production of $440,663 this would mean an advantage of $92,539 per year, or $647,773 for the seven-year period. It is universally admitted that sweet clover is the most valuable soil improvement crop grown, the increased average in this crop in the counties therefore indicates the interest which the farmers in the two counties are taking in soil improvement. During the first seven years in which it had a farm bureau, Jewell County has had a total of 11,293 acres in sweet clover, while during the same period Mitchell has had a total acreage of 92 acres.

Two adjoining counties in my own district, one of which has and the other which has not a farm bureau, show that in the first six years after the organization of the farm bureau the county maintaining it showed a 72 per cent gain in the value of field crops over the average of the eight years preceding the organization of the farm bureau, while, on the other hand, the county which did not have a farm bureau showed only a 22 per cent gain for a similar period. On the basis of the average value of field crops per acre, the farm bureau county showed an increase of 80 per cent, while the other county showed an increase of 42 per cent. On the value of products other than field crops, the farm bureau county showed a gain of 77 per cent and the other county a gain of 42 per cent.

One might go on by showing a large number of such instances, but suffice to say the results of the comparisons made have been the same in every instance, and no doubt every State in which agricultural extension work has been carried on can furnish just as striking illustrations.

The home demonstration work as carried out under the Smith-Lever Act has been no less successful than the work in practical farming. Owing, however, to the lack of funds, it has not been as widely extended. The Capper-Ketcham bill recognizes this, and those interested in home demonstration work will be glad to learn, I am sure, of the provision in the measure which specifically states that the funds authorized to be appropriated—

shall be so expended that the extension agents appointed under its provisions shall be men and women in fair and just proportions.

This provision was inserted in the bill by the Committee on Agriculture at the urgent suggestion of Mrs. John Dickinson Sherman, president of the National Federation of Women's Clubs. This specific language will necessarily mean that in the future more attention will be paid to home-demonstration work and to club work among the girls.

Home-demonstration work has touched every point in rural life. It has meant health, wholesome recreation, and higher standards of home and community life. It has been of great practical benefit and has resulted in the farm family being better fed, better clothed, and better housed. In recent years, when farm incomes have in many cases been low and expenses high, the farm woman, as a result of home-demonstration work, has been able to add materially to the family income. That home-demonstration work is welcomed by farm women is best illustrated by the fact that last year 126,709 farm women volunteered to assist the demonstration agents without pay, giving an average of 12 days' time each.

But great as has been the value of extension work along practical farming and home-demonstration lines, in my opinion the most important and inspiring results have been obtained from the boys' and girls' club work. Last year there were 619,000 boys and girls enrolled in 4-H clubs throughout the Nation and the number is increasing each year.

For years and years we have been making a great mistake in our rural education. We have been taxing ourselves to build up a fine educational system in our rural communities, so that to-day in most of our States the boy or girl on the farm has, as he should have, the same opportunity to obtain a high-school education as the boy or girl in our larger cities.

The farmers of my State and district have stinted themselves and made splendid sacrifices to inaugurate and maintain a wonderful rural-school system, but the result of it has been to a large extent to educate boys and girls away from the farm because the subjects taught were such as to interest them in other lines of endeavor. As a consequence, the farms of America have been furnishing the leaders for every other occupation. Some way must be found to stop this constant drain on rural life.

The 4-H club work is education along the right line because it teaches boys and girls the possibilities of farm life; it gives them practical instruction along the line of becoming efficient farmers and home makers and shows how to make of themselves useful citizens and leaders in rural affairs.

It has always been recognized that an independent, stable, and prosperous rural population is the soundest basis for a nation's economic and political well-being. We know that the fall of great nations in the past has been preceded by the decadence of agriculture. America has become the great Nation that it is because of the splendid character of its rural population. The boys and girls in the 4-H club of to-day are the best assurance we have that the future of our Nation is secure.

COST AND GAINS FROM PROHIBITION ENFORCEMENT

Mr. HUDSON. Mr. Speaker, during the debate on the recent appropriation bill the question of the cost of prohibition was discussed on the floor. I desire under the privilege granted to-day to extend further the discussion of the cost incident to the enforcement of the eighteenth amendment.

The enforcement of the eighteenth amendment has laid no additional financial burdens upon the people of this Nation,

but, rather, has relieved them of burdens which were onerous and unnecessary. The enemies of this policy of government vainly endeavor to arouse a feeling of alarm among the people by pointing to the fact that this House recently passed an appropriation bill setting aside the sum of $12,729,140 for the enforcement of prohibition for the year 1929. To this sum they add the amount of $15,064,930, which we appropriated for the maintenance of the Coast Guard, and $787,000 for the border patrol. This makes a total of $28,581,070 for these three branches of the public service. This total sum they charge up to the cost of the enforcement of prohibition and then suggest that instead of this large outlay of money the Government might receive in revenue the sums whose magnitude is only limited by the fertility of their imaginations, if we violated our oaths of office, permitted the sale of intoxicating beverages, and imposed upon them a revenue tax.

The Coast Guard has many duties which have nothing whatever to do with the enforcement of the national prohibition laws. It would still require an appropriation substantially the same as that which it now receives even if the task of fighting rum running were not a part of its duties. It is manifestly unfair for anyone to suggest that this item be counted as wholly chargeable to the enforcement bill of the Nation. This is equally true of the appropriations for the border patrol. An intoxicant is not the only thing smuggled into America. Drugs, jewels, and aliens are also brought in via violation of law. The men who smuggle intoxicants are often part of the same crowd that smuggle drugs and that bring over aliens who could not be admitted through the ordinary immigration channels.

The actual fact is that the enforcement of prohibition has not added to but rather subtracted from the costs of government. While it was never intended as a revenue-producing measure, it has, nevertheless, brought back into the General Treasury, through the fines and penalties collected, nearly as much as was expended from that same Treasury, while if we included the sums that flowed into the treasuries of the various States from the fast-emptying purses of the liquor criminals, we would find the net gain surprisingly large. The total amount of fines and penalties collected—not merely imposed—during the eight years of prohibition and the amount of expenditures in those same years is as follows:

Year	Total fines and penalties collected	Expenditures
1920	$1,148,512.04	$2,059,774.32
1921	4,570,505.00	6,300,581.25
1922	4,355,892.14	6,543,994.30
1923	5,095,300.23	8,135,842.44
1924	6,538,115.24	7,509,146.27
1925	5,769,091.16	9,203,384.45
1926	5,647,328.53	9,573,791.64
1927	5,162,009.73	12,801,013.41

This covers the work done by the Federal Prohibition Unit during this period. Even in 1927, when expenditures were higher than in preceding years, the receipts were not far from one-half of the total expenditures.

These receipts from fines and penalties collected under the Federal prohibition law do not cover all such items. Because Federal officers frequently find it easier to work under the State law, and because there is less congestion of cases on the docket of the State courts, many of the liquor criminals captured by the Federal agents are not tried before the Federal courts. The fact that in many States the laws are more strict, penalties more severe, and the legal technicalities less difficult encourages this practice. In Ohio, for instance, the comparison between the expenditures for the enforcement of prohibition and the receipts from fines imposed upon liquor criminals shows that the State receives about $10 for every $1 it expends. In the three last fiscal years the total fines collected were:

For 1925	$2,202,764.64
For 1926	1,838,246.10
For 1927	1,560,606.48

One-half of these fines were paid into the State treasury. Until the middle of 1927 the other half went to the township, municipality, or county whose magistrate or judge tried the case, giving the State a revenue of $1,101,382.32 for 1925, $919,123.05 for 1926, and $780,303.24 for 1927.

The total cost to the State for the enforcement of prohibition in these same years was $105,702.02 for 1925, $137,320.64 for 1926, and $146,778 for 1927.

Besides this, not a few municipalities in Ohio, including some of the larger cities, have prohibition ordinances, and cases arising in those municipalities were brought under the ordinances, and then all the fines collected went to the municipality. None of such fines, therefore, appear in the total fines above given.

Wyoming also has a department of law enforcement where they keep track of the amount of their expenditures and the receipts from fines imposed upon violators of the law.

This department made 329 arrests in 1927, of which 211 were for violations of liquor laws. The total expenditures of the department were $20,482.76. The fines collected amounted to $28,206.10. In two years' activities the department assessed in abatement cases and in fines $83,070.

During the fiscal years 1920 to January 1, 1926, the State of Wisconsin collected, under the Mulberger law and the Severson Act, a total of $2,347,361.33 and expended $302,856.74, leaving a balance of $2,044,504.59, which represents the amounts collected in excess of the actual expenditures:

Appropriations

For fiscal year of—	
1920	$15,000.00
1921	15,000.00
1922	60,000.00
1923	60,000.00
1924	60,000.00
1925	60,000.00
From July 1, 1925, to January 1, 1926	30,000.00
Total	300,000.00

SUMMARY

Total appropriations	$300,000.00
Fees appropriated	16,041.11
Total	316,041.11
Unexpended balance, returned to general fund	13,184.37
Total	302,856.74
Fines collected for calendar year	2,048,563.00
Receipts	298,798.33
Total	2,347,361.33
Total disbursements	302,856.74
Balance (amounts collected in excess)	2,044,504.59

Illinois in 43 counties spent $47,560 and collected $300,811.

As one studies the record of the penalties paid by liquor law violators one realizes the sardonic truth in the utterance of one of our judges who said, "I have never seen or heard of a rich bootlegger. This lawlessness does not pay any more than other forms of crime."

The suggestion that we might find a source of revenue instead of a source of expenditure in our attitude toward the liquor traffic is dangerous. A sound taxation policy taxes business and not commercialized vice. To make a wholesale profit from the retail vices of the people is one of the most shortsighted proposals. Our present prosperity and the existing surplus in the Treasury are the product of prohibition. Because of the 20 per cent increase in our industrial efficiency, the greatly increased production, unprecedented savings, and widely distributed prosperity we have been enabled to plan cuts in taxation while steadily reducing our national debt. All this is the more remarkable in that we are to-day passing through a readjustment due to the continuous mechanization of industry, which has temporarily thrown out of employment a very considerable group of our workers. Had such a dislocation in our industrial world occurred under the license era, we would have had soup kitchens opened and bread lines established in all our larger cities. Because of prohibition, however, we are making this readjustment without difficulty and without shock. The buying level of the Nation continues high and our standard of living has not been lowered. It is interesting to note that when the Nation passed through a somewhat similar period of readjustment a few years ago, while the amount of wages paid decreased, the amount of savings deposited in our savings banks increased. Nothing of that sort could have occurred had the saloons been open to drain away the money of the workers of the Nation. Legitimate business and not destructive vice pays the taxes of the Nation.

No less an authority than Irving Fisher, professor of economics at the Yale University, whose reputation as one of the greatest authorities on economic questions is international, has said:

> But we do hear it said that prohibition is costly to administer, and that it deprives us of a source of revenue for taxes. This also is "economic nonsense," since the real source of taxation is income. Not only income taxes but all taxes are paid out of income. Prohibition has added $6,000,000,000 a year to this stream of income, the source of all taxes. It is therefore penny-wise and pound-foolish to argue that prohibition destroys revenue. It simply requires a transfer of taxes from alcoholic beverages to nonalcoholic beverages and to the other products to which our energies have been transferred.

To return to the old-time method whereby a city, State, or the Nation granted to a group of men the privilege of debauching their fellows with impunity on payment of a small license tax would be folly. It would be just as sensible, just as moral, and just as profitable for us to copy the old-time Japan which licensed a Yoshiswara district, that made the Government a panderer or Monte Carlo, or other places that capitalize the gambling impulse.

The receipts from taxation upon any form of the legalized liquor traffic were fictitious. They were never net receipts. For every dollar we thus received we were forced to spend more dollars in caring for the vice, crime, pauperism, and insanity that were the by-products of the liquor traffic. Furthermore, the liquor interest, as was shown by the investigation made by the Senate of the United States, robbed the Federal Government of much of the money due in taxes, expended millions of dollars yearly to corrupt elections, degraded our patrons, slowed up production in industry, added to production costs, caused industrial accidents, diverted from retail trade billions of dollars each year, and placed upon charity enormous burdens for the care of those made destitute by intemperance.

VERMONT AND REPUBLICAN PARTY

Mr. GIBSON. Mr. Speaker, under the general leave to extend remarks I desire to submit the following address delivered as chairman of the Republican State convention at Burlington, Vt., May 18, 1928:

The militant party that has led Vermont for nearly three-quarters of a century to cast her electoral vote for Republican candidates is to be congratulated upon presenting a united front for the campaign of 1928.

At the opening of this convention I present to you the greetings of your senior Senator, who has been so gallantly fighting his way back to health, FRANK L. GREENE, a better man than whom never served a constituency; that of your junior Senator, who is taking high rank as a legislator for the people, PORTER H. DALE, whose presence here indicates his deep interest in party success; and that of my hard-working, conscientious, able colleague in the House, ELBERT S. BRIGHAM. They are all striving to serve the people of the State honestly and faithfully. They regret that the press of public business incident to adjournment prevents them all from joining with you to-day.

I pay my respects, too, to another Vermonter who, while he resides outside of the State, yet takes as intense an interest in her welfare as any citizen within her borders, one of the greatest Presidents of the Republic, that true and loyal son of Vermont, Calvin Coolidge.

THE TEST

In order to merit the confidence of the American people to the extent of being intrusted with executive and legislative power, any party must render honest and efficient service. It must be able to give a satisfactory account of its stewardship. This is the test applied by the voter. It is well, then, to inquire if the Republican Party has met that test. If it is found that it has, then it is entitled to continue to guide the affairs of the State and the Nation.

Historically the Republican Party is a great party. Under its control of more than a half a century there has been written into the law of the land more progressive and humanitarian legislation than has otherwise become the rule of mankind since the birth of Christ. Under its guidance the United States has become the most powerful nation of the world and a leader in thought and action. A nation struggling to maintain an existence when the party first came into power has, through able party leadership, passed into an era of remarkable commercial development and attained a commanding position in the affairs of nations. Our people enjoy more of the luxuries of life than those of any other nation now or ever in existence. The wonderful opportunities of life here and the stability of our orderly liberty have attracted the peoples of every land, so that now literally millions are waiting at the gateways to enter and share with us the blessing of freedom in this, our America.

STATE ADMINISTRATION

Vermont is a small State when measured by area and population. When measured by the standard of her men and women, by the standard of its progressive laws, by the standard of service, she stands at the head of the sisterhood. In the efficient conduct of her own affairs she has no superior. The decisions of her courts have become the precedents of the common-law world. The sterling integrity of her citizens is now a model for the entire Nation.

Last autumn, when we were successfully waging a fight for a better Vermont, we suffered the greatest disaster that ever overtook a State. We do not at the present time fully visualize its far-reaching effect. Property equal in amount to one-tenth of all assessed for taxes was swept away overnight. Our road and bridge damage, falling on 352,000 people, was in excess of the road and bridge damage falling on 19,000,000 people in the seven States of the Mississippi Valley by reason of that great flood. The road damage per person for Vermont was $21. The highest damage per person in the Mississippi Valley States was 72 cents in Arkansas. The damage to highways and bridges per mile of road in Vermont was $495, while the highest in the other States was only $17.64. The entire per capita flood damage for Vermont was $86. The nearest approach to it was the per capita damage of $25.65 in Mississippi.

It was a disaster that tried the souls of citizens. It came unawares. It called for acts of heroism. It called for wise leadership, for statesmanship of the highest order. In the face of this emergency there was no faltering, no hesitation. Our people from the lowest to the highest met the emergency with heroism, with the true Vermont spirit. They exhibited a resourcefulness and a self-reliance without a parallel. They swept away in a day any doubt as to the quality of citizenship of the Vermont of this day and generation. The State administration, under the leadership of that able Christian gentleman, John E. Weeks, our governor, facing problems such as no other executive ever faced in the administration of our home affairs, has led us safely through the darkness of the night and into the full light of a new day filled with renewed hope of lasting prosperity.

The agencies of rehabilitation were marshalled. The Red Cross, like a ministering Angel of Mercy, came to our stricken valleys. Financial agencies were set into motion. Our troops guarded and helped in the dark hours. The legislature was called into session and performed its task with ability and dispatch.

To be sure, party lines were not drawn. Everywhere in the State everybody joined in the work. Partisan differences were not thought of. Leaders of the Democratic Party rendered assistance as great as any. It is not a time in Vermont, and it is not my purpose to criticize the portion of our people who have been loyal to the principles of the Democratic Party. But the burden of leadership rested on the party in power. The only question with which we are concerned is: Did it meet the test?

The present State administration has given us a permanent hard-surface road policy; has provided for the Champlain Bridge; initiated a new era of development along all lines; the advantages of the State have been set forth; and among the hills and along the valleys there has been a quickening faith in Vermont. We have met the test and kept the faith.

Highway and bridge damage has brought us the problem of how best to help the smaller units of government, our towns, in their work of rehabilitation. It will be necessary to advance much money from the State treasury for that purpose. The situation has been so handled thus far as to reflect much credit on the people of the State. The expenditure of these funds must be carefully watched and held within proper bonds. The essential elements of honesty and common sense will guide us safely in working out this new policy lest it have a tendency to take away the independence of our towns in the conduct of their own affairs. I am sure we will all unite and follow that course of action that is for the common good of all our people.

THE STATE DELEGATION

In dealing with the interrelated affairs of the State and the Nation the people send Senators and Representatives to the Congress of the United States. It is only just and fair to the members of our delegation that attention be called to some of the things accomplished during the past two years that directly affect Vermont. We have worked in harmony in all matters in order that we could render the best service to our constitutents.

We have secured an appropriation for the purchase of land for an artillery range, thus insuring the continued use of Fort Ethan Allen as an Army post.

We have helped in the successful fight to preserve our representation in the House. While mindful of the provisions of the Constitution, we were also mindful of the injustice that would have resulted from a reapportionment under the census of 1920.

We have, under the new public-building policy, secured the allocation of new public buildings at Bellows Falls and Springfield. We expect to add Rutland and White River Junction to the list in the immediate future.

We have helped initiate a new policy of the Government, that of buildings customs and immigrations stations on the border, at the smaller ports of entry. A survey of the needs of the country has been made, and out of 47 buildings recommended, 11 will go to Vermont. Three of these have already been placed in the Budget estimates.

We have caused a study to be made by the Bureau of Fisheries of all of the streams of the State, to determine what further aid the Federal Government may extend in the restocking of our streams.

Our manufacturers have been put into touch with the Department of Commerce, with a view to encouraging their export trade.

We have helped to pass legislation to secure increased appropriation for agricultural extension work. The survey of our needs in that field of rehabilitation is now under way.

An item has been placed in the War Department appropriation bill which will take care of the survey of our streams by Army engineers for the purpose of recommending means of flood control.

We have secured an appropriation of $2,654,000 from the Federal Treasury for the rehabilitation of our highways and bridges. This sum is immediately available and available until expended.

THE ISSUE OF CLEAN GOVERNMENT

Some of our Democratic friends are proclaiming that the paramount issue in the coming campaign will be that of clean government.

The recent scandals are not confined to one party. It can not be denied, however, that they constitute a challenge to representative government. But the Republican Party does not, in the present instance, and never has, tolerated corruption in public office, and it matters not whether it concerns oil leases in the West, or sewer graft, street-cleaning graft, or milk graft in Tammany-ridden New York. Its position was well set forth in the speech of President Coolidge, delivered in New York:

"Lately there have been most startling revelations concerning the leasing of Government oil lands. It is my duty to extend to every individual the constitutional right to the presumption of innocence until proven guilty. But I have another duty equally constitutional, and even more important, of securing the enforcement of the law. In that duty I do not intend to fail.

"Character is the only secure foundation of the State. We know well that all plans for improving the machinery of government and all measures for social betterment fail and the hopes of progress wither when corruption touches administration. At the revelation of greed making its subtle approaches to public officers, of the prostitution of high place to private profit, we are filled with scorn and with indignation. We have a deep sense of humiliation at such gross betrayal of trust, and we lament the undermining of public confidence in official integrity. But we can not rest with righteous wrath; still less can we permit ourselves to give way to cynicism. The heart of the American people is sound. Their officers with rare exception are faithful and high minded. For us, we propose to follow the clear open path of justice. There will be immediate, adequate, unshrinking prosecution, criminal and civil, to punish the guilty and to protect every national interest. In this effort there will be no politics and no partisanship. It will be speedy; it will be just. I am a Republican, but I can not on that account shield anyone because he is a Republican. I am a Republican, but I can not on that account prosecute anyone because he is a Democrat."

Steadfastly and resolutely the administration has proceeded to bring everyone guilty of dishonesty in the discharge of a public trust to the bar of justice. Civil suits have been successfully prosecuted, returning to the control of the Government all of the property sought to have been acquired under the oil leases.

Dishonesty in governmental matters will creep in through human weakness, but when discovered it must be promptly eliminated. The administration has met the test. There need be no hesitancy in boldly defending its record.

CARE OF VETERANS

The record of the Republican Party is its strongest appeal for public approval. The strong nation, the one resting upon a lasting foundation, is the one that in time of peace generously cares for its defenders in times of peril. No country has ever shown a more generous disposition in the care of its veterans.

From the first declaration in its party platform in 1868 to that of 1924 the Republican Party has steadfastly adhered to one policy, that of liberally and completely providing for the defenders of the United States. Its party platforms have always meant performance.

A total of $12,000,000,000 has been expended in that connection since 1868.

The party secured the establishment of the Veterans' Bureau, that is now disbursing more than a million dollars each day of the year. It backed the establishment of an insurance system that carries obligations of more than $3,000,000,000. It helped to provide the most complete, up-to-date, scientific hospital service in existence. We are maintaining 95 hospitals, with nearly 30,000 available beds. Since 1919, 600,000 veterans have been cared for in these Government institutions. Nothing like this humanitarian work has ever been recorded.

The bonus act is being carried forward to successful administration, 3,383,530 adjusted compensation certificates having been issued. Already more than $100,000,000 has been expended. This law, one of justice to the service man, is now regarded as a measure making for practical economy.

Over 170,000 ex-service men have received the benefits of vocational training.

Over a billion dollars has already been expended for disability compensation. Continuance of the Republican Party in power means a continuance of care for the disabled veteran.

FOREIGN AFFAIRS

The objective of the administration in foreign affairs is the attainment of universal peace. We initiated the disarmament conference, sought by every honorable means further limitation through the Geneva conference, and are now moving straight toward the goal of the abolition of future war through mutual and binding agreements. We are the enemies of no nation. We are afraid of no nation. Our diplomacy is founded on the basis of mutual good will and fair dealing.

We have defended the Monroe doctrine and protected the Latin American Republics from European interference and have helped them in the establishment of orderly governments.

Some of our friends of the Democratic Party have complained of our policy in respect to Nicaragua. But they forget that it was the patriotic Democratic President, Grover Cleveland, who first used the marines to maintain peace south of the Rio Grande and in the Caribbean Islands; that it was another Democrat, William Jennings Bryan, who as Secretary of State negotiated the treaty which gave us the right to construct a canal across Nicaragua, secured our rights in Fonseca Bay, and negotiated the loan with New York bankers and obligated us to duties we can not shirk.

We are in Nicaragua only after the demands of more than 30 American concerns for protection and upon the insistent demand of Great Britain, France, and Italy that we discharge our duty and protect their nationals. If we had hesitated, their warships would have patrolled the waters of the Caribbean and we would have been face to face with a grave problem.

We are in Nicaragua to protect rights secured by treaty, to carry out our solemn agreement to superintend and guarantee a fair election, and to establish an orderly government. We are there to place a people struggling to master the rudiments of government in a position which they may enjoy freedom and attain prosperity.

Shall we under those conditions haul down the flag of freedom and say to the world that this great Nation, that believes in peace, will do nothing to help a people who are begging us to put them on their feet and help them, as we have helped Cuba, Haiti, and San Domingo? No! We will remain until we have done our whole duty to those people and to the world.

FOREIGN LOANS

During the World War we issued Liberty bonds and used the proceeds to help foreign nations, relying on their promise to repay us.

We created the Foreign Debt Commission to deal with the situation thereby created. Agreements have been reached with 11 different nations, by the terms of which we are to receive back $22,000,000,000 for the $9,850,860,799 loaned. These governments are now making payments at the rate of about $175,000,000 per year.

BUSINESS ADMINISTRATION

The Republican Party stands for economy in the expenditure of public moneys and for efficiency in the administration of the Nation's affairs.

The campaign for economy began in 1919 with the advent of a Republican Congress. In the time between that and 1921 the Republican Congress had cut over $3,000,000,000 from the estimates of the Democratic Executive.

But even with that showing when the party came into full power in 1921 an emergency existed. Extravagance, lack of morale, and unregulated expenses had laid a paralyzing hand upon business and the industry of the Nation. In spite of the situatiton our finances were so well handled that soon we were able to pass a tax-reduction measure, increasing exemptions and reducing taxes directly affecting the people. Immediate business improvement followed.

In 1924 another sweeping reduction affecting the average citizen was made. The measure provided a blanket reduction on all incomes.

Again in 1925 another reduction was effected. Altogether from 1921 to 1925 the Republican Party lifted a tax burden of $1,800,000,000 annually from the people of this country. Before the present session of Congress adjourns a further reduction of $200,000,000 will be made.

But this enormous reduction in taxes did not retard reduction in the public debt. March 1, 1921, this debt was more than $24,000,000,000. On May 1, 1928, the debt had been reduced to nearly $17,000,000,000, a reduction of $7,000,000,000, or more than a billion dollars a year.

When the Republican Party came into power the interest on the public debt was more than a billion dollars annually, a sum greater than all governmental expenditures in 1915. The program of refunding, reduction, and readjustment has served to reduce our interest charges $269,000,000 annually.

Business methods have been introduced in Government routine with the result that expenses have been reduced $2,279,000,000 annually. In 1921 the annual cost of the maintenance of the Government was $5,538,000,000. This was reduced in 1927 to $3,259,000,000. The net result of Republican control has been a reduction of the public debt of nearly $7,000,000,000; a reduction of $269,000,000 in fixed charges; a reduction of $2,300,000,000 in routine expenses; and a reduction of $2,000,000,000 in taxes.

What Government, anywhere, at any time can match that record? It constitutes a party achievement that challenges the admiration of the financial experts of the world. While foreign nations are increasing taxes in a struggle for balanced budgets we are reducing taxes, reducing our debt, and having an annual surplus.

LABOR

The last Congress in the interest of labor extended the workmen's compensation benefits to maritime workers. It corrected some injustices in the employees' compensation act and extended and liberalized the original law. The United States Board of Mediation was created to supplant the useless labor board. This new board disposes of all disputes between railroads and their employees. The new agency insures peace in the transportation world for a decade to come.

A retirement system has been provided for Government employees which was liberalized by the last Congress. We are about to increase the pay of Government employees by $18,000,000 per annum. The Civil Service Committees are working constantly on legislation to improve the conditions of the Government employees, in order that more efficient service may be rendered. It is a matter of record in the eight years before the Republican Party came into power not a single meeting of the House committee was held.

BUILDING UP VERMONT

We have many grave problems before us. None is of more importance than that of building up agriculture and industry in our own State. During the years of the past we have been sending our money into the West and the Southwest, where it has been used to develop and build up those sections. With our money we have helped the farmer of the West to compete with our own, with the natural result that the number of our farms has steadily decreased and the lot of our farmer has not improved. We should adopt a new policy. Put Vermont money to work for Vermont. Out of such a policy will come a greater measure of prosperity than we have ever known before.

Let us all unite with a common purpose to work for the maintenance of rural communities, for the encouragement of industry, for the betterment of agricultural conditions, for the highest standard of education, and the good of all classes of our people. Then Vermont will emerge from the crisis through which we are passing—a greater State, a better State.

We have come together to select delegates to the national convention for the nomination of the next President and Vice President of the Nation. These delegates will interpret the will of the sturdy Republicans of the State. There are many able men from which to make choice. It may be the choice will fall upon that able Senate leader, Senator CHARLES CURTIS, of Kansas, or upon that distinguished ex-Governor of Illinois, Frank O. Lowden, or upon a gifted Senator who has won the support of the Hoosier State, JAMES E. WATSON, or upon the dynamic personality who presides over the United States Senate, our Vice President, or upon that splendid administrator, the Secretary of Commerce, Herbert Hoover. It may be that the call from the voters of the country will be so insistent that the Kansas City convention will draft that great son of Vermont to again become the standard bearer.

But whoever is selected to lead, Vermont will be found marching in the front rank proudly carrying the banner of Republicanism, emblazoned with the slogan, "We have never failed the Grand Old Party."

FLOOD CONTROL ON THE MISSISSIPPI RIVER

Mr. DRIVER. Mr. Speaker, when the President affixed his signature on May 15, 1928, to the act "for the control of floods on the Mississippi River and its tributaries," there was launched the greatest engineering project undertaken in the history of nations. This action of the Congress is the culmination of intermittent investigations and fitful and disconnected efforts to control the floods of the Mississippi River, running through a period of 211 years and beginning in the year 1717 with the first levee construction under direction of De La Tour, the French engineer, for the protection of the city of New Orleans.

HISTORY OF FLOOD CONTROL

The manifestation by the Congress of a determined effort to curb the floods of the river and afford ease and facility to navigation thereon had its beginning with the creation of the Mississippi River Commission on June 28, 1879, which agency, while charged with the duty of providing necessary flood protection, was limited in its operation by the funds provided, and therefore, in effect, compelled to direct its operation to the demands of navigation, relying upon the local landowners to conform their levee construction to the uncertain and indefinite flood-control plan of such agency. This condition continued for the period of 37 years, when it became apparent to the Congress that, notwithstanding the change from individual effort to the organization of local levee districts, the local interests could not provide the necessary flood-control structures. The act of March 1, 1917, was passed, which provided for national participation, under the principle of local contribution and fixed the ratio of cost on the basis of 50-50, with the Government providing two-thirds of the cost of levee construction and the local interests one-third, all necessary rights of way, levee adjustment, and maintenance. The provision for a definite annual expenditure was thus provided, to be made under the supervision of the Mississippi River Commission, which agency was thus given the means of bringing about a connected and consistent construction, and to fix grades and section for strength and security to the levees. This law speeded up the work, which was further accelerated through the act of March 2, 1923, increasing the annual appropriations for flood-control works and hurrying the improvement to the tentative grade and section to what was believed to be a complete protection.

FLOOD OF 1927

The flood of 1927 demonstrated that the grade and section of levees as fixed by the Mississippi River Commission as the requisite strength for complete security was insufficient, as many of the levee lines had reached the maximum. The levees were breached in 52 places, inundating 12,000,000 acres of the 17,500,000 acres embraced within the organized levee districts and destroying 246 lives and more than $350,000,000 of the property within such areas, which stupendous losses, combined with the knowledge that the maximum flood heights in the Mississippi River and its tributaries had not been reached, awakened the Nation to a realization anew of the duty and responsibility for the control of the flood waters and the protection of the lives and properties of the inhabitants of the alluvial region. The necessity for auxiliary methods to the levee system was impressed upon the engineering forces by the flood of 1927.

With the recession of the flood waters the Chief of Engineers of the United States Army and the Mississippi River Commission commenced a thorough and comprehensive study of the conditions resulting from the unusual flood and prepared comprehensive plans for the treatment of floods, not only of the volume of the 1927 flood but to flood heights 25 per cent in excess of that attained in that year.

LEGISLATIVE ACTION

Responding to the situation, Hon. FRANK R. REID, chairman of the Flood Control Committee of the House of Representatives, called the committee into informal session on the 7th day of November, 1927, thus initiating the work of preparing legislation for the preservation of the alluvial valley. The hearings continued for 92 days, during which time more than 300 witnesses, including the most eminent engineers of the Nation, were heard, and a record comprising 5,248 pages was written, constituting one of the most exhaustive investigations made in congressional history. To this hearing was added a thorough investigation by the Commerce Committee of the United States Senate, and resulted in the preparation and the reporting out to the respective Houses bills adopting the plan recommended by the Chief of Engineers of the United States Army as a basis, with directions to a board created for the purpose of reconciling the differences in such plan and the plans offered by the Mississippi River Commission for the complete flood protection of the valley as a national responsibility at national expense, and for investigations and determination of projects on the tributary streams.

The report of the Chief of Engineers of the United States Army was submitted to the Congress on the 8th day of December, 1927, and immediately referred to the Flood Control Committee of the House and the Commerce Committee of the Senate, and thereafter the report of the Mississippi River Commission was brought before the Flood Control Committee and made a public document at its instance.

Following the customary and usual parliamentary procedure, Senate bill No. 3740, as amended by the Flood Control Committee of the House and on the floor of the respective bodies, was enacted into law.

ACT OF MAY 15, 1928

Section 1 declares the purpose of the act and provides for the control of floods on the Mississippi River from the Head of the Passes at the Mouth of the Mississippi River in Louisiana to Cape Girardeau, in Missouri, head of the alluvial plane, and adopts the engineering plan of the Chief of Engineers of the United States Army as a basis. A flood-control board, to consist of the Chief of Engineers of the United States Army, the president of the Mississippi River Commission, and a civilian engineer, is created, with directions to consider the engineering differences between the plan of the Chief of Engineers and the plans recommended by the Mississippi River Commission in its special report dated November 28, 1927, with authority to make further surveys and investigations and to reconcile the engineering differences between said plans and make its report thereon to the President.

CHIEF OF ENGINEERS' PLAN

The plan recommended by the Chief of Engineers provides for the enlargement of existing levees on the main stem of the Mississippi River from Cape Girardeau, Mo., to the mouth of the Mississippi River in Louisiana, with a factor of safety against a flood 25 per cent greater than the flood of 1927 if the waters of such flood had been confined.

The estimated gauges at the three pivotal points on the Mississippi River in the flood of 1927 if confined are: Cairo, Ill., 58.5 feet; Arkansas City, Ark., 69 feet; and the mouth of Old River in Louisiana, 61.5 feet. Therefore, the maximum flood gauges to be provided for would amount to 65.4 feet at Cairo, Ill.; 74.5 feet at Arkansas City, Ark.; and 64.5 feet at the mouth of Old River in Louisiana, the equivalent of 2,250,000 second-feet of flow at Cairo, 2,850,000 second-feet at Arkansas City, Ark., and 2,650,000 second-feet at the mouth of Old River in Louisiana.

Realizing the extreme danger of reliance upon levees alone for the control of a flood of the magnitude estimated, recommendation was made for diversions to be provided at four points, to wit:

A flood way 5 miles in width, for the protection of the city of Cairo, Ill., beginning at Birds Point, in Missouri, and extending to New Madrid, in said State, through which it is estimated the gauge at Cairo would be reduced practically 5 feet, with the flood waters so diverted, returning to the main channel and following the same to the mouth of the Arkansas River, where the second diversion is recommended, beginning at Cypress Creek and carrying 900,000 second-feet through the Boeuf River Basin into Old River at the head of the Atchafalaya Basin. A diversion is proposed through the Atchafalaya Basin of 1,500,000 feet per second, and for the protection of the city of New Orleans, a spillway at Bonnet Carre, about 40 miles above that city and on the east side of the river, carrying 250,000 second-feet into Lake Pontchartrain, in order to reduce the flow passing New Orleans to not exceed 1,400,000 second-feet.

The plan also provides side levees to the flood ways and spillways and for a levee on the south side of the Arkansas River from Pine Bluff, Ark., to the intersection of the Mississippi River Levee for the protection of the Tensas Basin against the flood waters of that river.

At the points of diversion into flood ways the plan of the Chief of Engineers recommended what is termed "fuse-plug" levees, which is in fact a line of levee 3 feet lower than the general grade of levees and which is designed to overtop when flood heights reach the 1927 maximum, thus crevassing and permitting the excess to pass through the diversion channels. This plan was estimated to cost $296,000,000, including $110,000,000 to be applied to revetment work, leaving for flood-control purposes the sum of $186,000,000, and did not embrace an estimate of the value of flowage rights over the flood-way lands or rights of way for the levee foundations along the diversions.

MISSISSIPPI RIVER COMMISSION PLANS

The Mississippi River Commission offered what is designated as the comprehensive plan, which consists of levee enlargement along the main river from Cape Girardeau, Mo., to the Head of the Passes at the mouth of the Mississippi in Louisiana, to protect against the maximum flood of 25 per cent in excess of the 1927 crest, if confined, with a free board of 5 feet, including enlargement of the tributary levees within the limit of the backwater areas therein from the Mississippi River, with four proposed controlled diversions, to wit:

One at Cypress Creek through the Boeuf River Basin, with a capacity of 600,000 second-feet, and another through the Atchafalaya Basin with a capacity of 900,000 second-feet. It also provided a spillway at Bonnet Carre, with a capacity of 250,000 second-feet and one at Caernarvon, 15 miles south of New Orleans, where an artificial crevasse was made in 1927 for the relief of said city, with a diversion of 250,000 second-feet.

The plan also provided for the enlargement of the levees now existing from Cape Girardeau, Mo., to Rock Island, Ill. The estimated cost was $775,000,000, which includes an estimate of $165,000,000 for revetment, leaving the estimated cost of the flood-control works $610,000,000. This estimate embraces the value of flowage rights and rights of way for diversion levees. But the Mississippi River Commission recommended that the comprehensive plan be not adopted until further investigations were made, and especially the question of the reservoir effect on the waters of the Arkansas and White Rivers in Arkansas. The reservoir board appointed by the Chief of Engineers made an investigation touching the effect of reservoir control of tributary floods and estimated the cost of reducing the flood heights to a factor of safety in the main channel of the Mississippi River at $1,300,000,000, but estimated that at an expense of $240,000,000 eleven reservoirs on the Arkansas and White Rivers would reduce the flood gauge at Arkansas City, near the mouth of the Arkansas River, practically 8 feet, which influence would be exerted on the gauge heights at the mouth of Old River and down the main channel by New Orleans, as well as the amount of water passing through the Atchafalaya Basin, and it was this feature of the report of the reservoir board which caused the recommendation to be made by the Mississippi River Commission for further study. Pending such investigations, the Mississippi River Commission recommended the adoption of what is termed the interim plan, which included levee enlargement, bank revetment, Atchafalaya and Boeuf River flood ways, and the Bonnet Carre spillway, at an estimated cost of $407,500,000, including $75,000,000 for bank revetment, or an estimated cost for flood-control structures of $332,500,000.

DIFFERENCE IN PLANS

The essential differences between the plan offered by the Chief of Engineers and the plans of the Mississippi River Commission will be found—

First, in the matter of levee enlargement.

The Chief of Engineers' plan provides a reasonable factor of safety.

The Mississippi River Commission plans provide a freeboard of 5 feet.

Second. The plan of the Chief of Engineers recommends "fuse-plug" levees at the head of the diversion channels, which are expected to crevasse when the water overtops such levee, and thus in the opinion of many engineers, render an uncertain amount of diversion to be measured only by the extent to which the inflow will be permitted through the widening of the crevasse or crevasses. Such opinion extends to the uncertainty of a sufficient amount of water finding its way through such flood ways to relieve the main channel of the flood waters in excess of the amount intended to be relieved against.

The Mississippi River Commission plans provide for a controlled flood way at the head of such diversions, thus providing against the crevassing of the levees and regulating the quantity of diversion.

Third. The plan of the Chief of Engineers provides for a diversion of 900,000 second-feet through the Beouf River Basin.

The plans of the Mississippi River Commission limit such diversion to 600,000 second-feet, which, in the opinion of engineers familiar with the topography therein, will restrict the area of such flood way at least one-half, thus reducing to such extent the amount of land required for flowage easement.

Fourth. The Chief of Engineers' plan provides for a diversion of 1,500,000 second-feet through the Atchafalaya Basin, which necessitates two distinct flood ways, one on each side of the Atchafalaya River.

The Mississippi River Commission plans provide for a diversion of 900,000 second-feet to be carried through the Atchafalaya River, by enlarging its channel capacity through levee setbacks and enlargements along the same.

Fifth. The plan of the Chief of Engineers provides for one controlled spillway located at Bonnet Carre.

The Mississippi River Commission plans provide for two controlled spillways—one at Bonnet Carre and one at Caernarvon.

Sixth. The Chief of Engineers' plan provides a flood way from Birds Point to New Madrid in Missouri.

The Mississippi River Commission plans provide for increased levee heights at Cairo, and do not recommend the Birds Point diversion.

Seventh. The plans of the Mississippi River Commission provide for enlarged levees from Cape Girardeau, Mo., to Rock Island, Ill.

The plan of the Chief of Engineers makes no such provision.

All plans provide for bank revetment, the difference being only in the amount. The plan of the Chief of Engineers proposes to use $110,000,000 for such work, while the comprehensive plan of the Mississippi River Commission proposes an expenditure of $175,000,000 and the interim plan $75,000,000.

BOARD OF FLOOD CONTROL

The duty of the board will be confined to a determination of the plan to be executed by reconciling the differences between the three plans as outlined. A clean engineering problem, with no great amount of latitude within which discretion may be exercised. When such duty is performed the flood control board passes out of the picture.

MISSISSIPPI RIVER COMMISSION

The execution of the plan is delegated to the Mississippi River Commission, whose personnel is in no manner changed by the present law, but the individual members thereof, instead of

meeting with the President and Secretary at stated intervals, will now be required to devote their entire time to the duties and responsibilities of the office, with directions to make personal inspection trips over the affected territory at intervals throughout the year, and hold hearings to afford an opportunity to the people concerned to be heard. Such commission is now empowered to employ all necessary engineering personnel and to provide the needed equipment and make contracts with respect to the work committed to it, thereby obviating the conditions heretofore existing making necessary the use of the engineering talent provided by other agencies.

COST

An authorization of $325,000,000 is provided for the work, of which the sum of $15,000,000 was appropriated by the present Congress and contained in the second and last deficiency act, and in addition thereto the unexpended balance of the annual appropriation of $10,000,000 carried in the appropriation for nonmilitary activities of the War Department of the present session is turned into the fund available for the prosecution of the work of the next fiscal year. As provision was made in the first deficiency act of this session for the repayment of the money expended in the effort to protect against the flood of 1927, but a small part, if any, of the $10,000,000 appropriation has been spent, and, therefore, $24,000,000 is made available for the prosecution of the actual flood control and revetment work during the fiscal year, and $1,000,000 is available for emergency work on the tributary streams beyond the backwater areas thereof.

The law provides that the work provided for under the reconciled plan shall be made as a national duty and at the expense of the United States, except it is made the duty of the local interests along the main stem of the river, including that portion from Cape Girardeau, Mo., to Rock Island, Ill., and on the tributaries within the backwater areas, to provide rights of way, and maintain the work, not including, however, repairs and replacements.

In the language of the law the duty of the United States is to "provide flowage rights for additional destructive flood waters that will pass by reason of diversions from the main channel of the Mississippi River." This particular language is employed to differentiate the natural reservoirs and streams which are now charged with the burden of natural drainage—that is, such rivers, bayous, and depressions through which usually pass the waters falling and are drained through the same, as distinguished from the areas which will be charged with waters not accustomed to flow over the land through natural drainage.

The duty is placed on the United States to provide flowage rights over the lands within the flood ways and spillways, and to provide rights of way for the protection levees along such flood ways and spillways, and to maintain the same. The law also provides that in the event the local interests on any section of the river shall be unable to maintain the levees on direction of the Secretary of War the same shall be maintained out of the public funds.

TRIBUTARIES

The law provides for the earliest practical surveys and investigations of the main tributaries of the Mississippi River and their tributaries, which include the Illinois, St. Francis, White, Arkansas, Yazoo, and Red Rivers, with directions for reports on flood-control projects thereon to Congress, and carries an authorization of $5,000,000 for such surveys. Pending the working out of projects on such streams, provision is made for an expenditure of not exceeding $10,000,000 on levee enlargement and construction between the intersection of such rivers with the Mississippi and the limit of the backwater thereon. This provision is but the enactment of the existing law with respect to such areas, and carries with it the duty of the local interests to provide necessary rights of way and maintenance and to pay one-third of the cost of such enlargement and construction.

EMERGENCY FUND

The law authorizes an emergency fund of $5,000,000 for flood protection on the tributary streams beyond the backwater areas, to be expended under directions of the Secretary of War, acting through the Chief of Engineers of the United States Army, and it is expressly provided that such monies may be applied to repairing and rebuilding structures within such limits as were damaged or destroyed by the flood waters of 1927. As stated, $1,000,000 of such amount is appropriated, and is available for the purposes mentioned.

DIRECT DAMAGE

The law also provides that where, through the construction of necessary flood-control works on one side of the river, a direct damage is inflicted on the lands on the opposite side of the river, or the damages done by previous works are enhanced, the amount thereof shall be ascertained and reported to the Congress for appropriate action and an express declaration of liability is made therefor. This provision arises out of the national duty assumed to protect lives and property in the alluvial area, and is especially applicable to the unprotected basins along the river in west Tennessee and south of Natchez in Mississippi. The duty is first to afford protection to such areas, but if an investigation discloses that such protection is not feasible or is uneconomical to the extent that the works now provided for shall enhance the damage or cause to be overflowed lands which are not now subject to inundation, an ad-measurement of damages will be made and reported to the Congress.

Much divergence of opinion exists among engineers on the ultimate cost of flood control for the Mississippi Valley. Necessarily it is largely a matter of speculation. On the main river the project will eventually call for an expenditure of approximately $450,000,000. The data collected and information available is not sufficient to afford a basis for computation as to the cost of tributary control. Every Member of the two bodies of Congress realizes that the duty to provide adequate protection to the lives and property of the people along the tributary streams in all respects is equal to the responsibility assumed on the main river.

The provision for tributary investigations and surveys is made for the purpose of securing speedy action in the working out of flood-control projects thereon, that the Congress may act with the utmost expedition in discharging the obligation assumed to the lives and property interests involved in such areas.

REPUBLICAN LEGISLATION FOR AGRICULTURE

Mr. STRONG of Kansas. Mr. Speaker, the veto of a single bill, the McNary-Haugen bill, which was opposed and supported by members of both political parties, is being used in an attempt to make the friends of agriculture believe that their trust in the Republican Party has not been justified.

I wish, therefore, to recite the facts. The election of a Democratic administration in 1912 was the result of a split in the Republican Party and not the result of a lack of national prosperity.

The first legislation of importance enacted under the Wilson administration was the "Underwood tariff law," which substituted for the protection of American industry and American agriculture, "a tariff for revenue only," that opened American markets to the manufacturer, the farmer, and the laboring man of other nations. Immediately industry began to lag and labor to be without employment. Wheat fell to 65 cents per bushel and other agricultural products in proportion.

National disaster to agriculture was averted by the world conflict which brought war prices, but with the restoration of peace our markets were again flooded with merchandise and food products that came in either duty free or because of inadequate tariff protection.

Five million men were soon out of work and agriculture in distress. The price of wheat was reduced to 70 cents a bushel; corn to 27 cents, and the Nation's bonds were soon selling far below par.

In their distress the people elected a Republican Congress in 1918, which served during the last two years of the Democratic administration and began the restoration of our national prosperity. I shall recount only the legislation the Republican Party has since passed in the interest of agriculture.

It repealed the so-called daylight saving law, over President Wilson's veto.

It passed the uniform cold storage bill.

It passed over the veto of President Wilson the act reviving the War Finance Corporation, to finance the marketing and exportation of agricultural products.

It liberalized the Federal reserve act and the farm loan act in the interest of the farmers.

It passed the farmers' emergency tariff act only to have it vetoed by President Wilson in keeping with the fundamental free-trade policy of the Democratic Party.

In 1921 the Republican Party came into complete control of the Government. Within a little more than a month after the convening of Congress, in special session on April 11, 1921, the Republican Congress had passed and a Republican President had approved the farmers' emergency tariff act, which stopped the importations of wheat, milk, and cheese from Canada, corn and beef from Argentina, wool and mutton from Australia, eggs from China, and butter from Norway, Denmark, and Sweden, with which the markets of this country had been flooded under the free-trade provisions of the Underwood Democratic tariff.

Let me set forth the deadly parallel between the Republican and Democratic tariff on agricultural products:

Comparison of protection afforded farm products under Republican tariff act of 1922 and Democratic act of 1913

	Republican tariff 1922	Democratic tariff 1913
Wheat, originally 30 cents per bushel	42 cents per bushel [1]	Free.
Corn	15 cents per bushel	Do.
Rye	do	Do.
Oats	do	6 cents per bushel.
Butter, originally 8 cents per pound	12 cents per pound [1]	2½ cents per pound.
Eggs	8 cents per dozen	Free.
Poultry, live	3 cents per pound	1 cent per pound.
Milk	2½ cents per gallon	Free.
Cream	20 cents per gallon	Do.
Honey	3 cents per pound	10 cents per gallon.
Alfalfa seed	4 cents per pound	Free.
Clovers (seed)	1 to 4 cents per pound	Do.
Millet seed	1 cent per pound	Do.
Timothy seed	2 cents per pound	Do.
Beef and veal, fresh	3 cents per pound	Do.
Cattle	1½ to 2 cents per pound.	Do.
Meats prepared or preserved	20 per cent	Do.
Lamb, fresh	4 cents per pound	Do.
Mutton, fresh	2½ cents per pound	Do.
Sheep	$2 per head	Do.
Swine	½ cent per pound	Do.
Ham and bacon	2 cents per pound	Do.
Lard	1 cent per pound	Do.
Lard compounds	4 cents per pound	Do.
Hay	$4 per ton	$2 per ton.
Potatoes	50 cents per 100 pounds.	Free.
Onions	57 cents per bushel	20 cents per bushel.
Wool, scoured	31 cents per pound	Free.

[1] Rates of duty increased by President Coolidge under flexible provisions of the tariff act.

Under the Republican tariff law of 1922 the following were placed upon the free list:

Agricultural implements, including picks, tooth and disk harrows, harvesters, reapers, agricultural drills and planters, mowers (except lawn mowers), horse rakes, cultivators, threshing machines, cotton gins, wagons, and carts.

Livestock imported for breeding purposes, antitoxins, vaccines, serums, and bacterines.

Binding twine; barbed wire, either plain or galvanized; fertilizers.

Oil cake and oil-cake meals.

Building material, including shingles, pickets, palings, wood, logs, timber, cement.

Leather goods, including harness, boots and shoes, gloves, etc.

Coal.

In the same Congress the Federal farm loan act was liberalized to give improved service to farm borrowers and the sale and marketing of the farm-bank bonds facilitated so as to secure lower rates on farm loans with the result that up to April 30 of this year 467,403 farm loans had been made, totaling the immense sum of $1,487,450,000.

The agriculture credit act was passed establishing the intermediate credit banks in connection with the Federal farm-loan banks, thus establishing a financial system for the marketing of agricultural products which now cooperates with the United States warehousing act by making loans on United States warehouse receipts. Up to April 30 of this year loans so made, including rediscounts and renewals, had amounted to $665,000,000.

The cooperative marketing act was passed authorizing and legalizing the formation of cooperative marketing associations to sell farm products and to buy farm supplies.

The war finance corporation act was amended so that loans might be made to agricultural interests, and a billion-dollar revolving fund was provided for that purpose.

The Federal reserve act was amended so as to add a member to the board who should represent the interest of agriculture.

In fact, so much legislation in the interest of agriculture was enacted that the legislative representative of the American Farm Bureau Federation, in his report to the executive committee, under date of April 6, 1923, said:

> It is not too much to say that the 26 laws passed by that (the Sixty-seventh Congress), which were initiated or supported by us, are of far more importance to American agriculture than all the legislation relating to agriculture passed since the adoption of the Constitution.

A Republican Congress, backed by a Republican administration, has continued to pass legislation in the interest of agriculture, as follows:

Revised United States warehousing act, complementing the agricultural credit act, increasing the number of agricultural products which could be put in bonded warehouses in return for which receipts could be issued upon which money could be borrowed under the intermediate or agricultural credits act.

Butter standard act.

Filled milk act, prohibiting the shipment of filled milk in interstate or foreign commerce.

Act creating a dairy bureau in the Department of Agriculture.

Packers and stockyards act.

Act to regulate all grain exchanges and dealings in "futures."

Revised Federal highways act.

Two seed loan acts to relieve emergencies in the drought-stricken districts of the Northwest and Southwest.

A series of acts giving leeway on payments due from those agricultural producers on irrigated or reclamation projects, those who had purchased Indian lands, and those who were using Government lands for grazing purposes—relief acts made necessary because of crop failures and the agricultural crisis which had brought the producers face to face with bankruptcy.

Appropriation of $10,000,000 for purchases of American food products to be sent to Russia.

Fordney-McCumber Tariff Act, continuing farmers' protective schedules enacted in the emergency tariff act.

Hoch-Smith joint resolution, providing for an adjustment of freight rates by the Interstate Commerce Commission with the least practicable delay, so as to insure to agricultural products, including livestock, the lowest possible rates compatible with the maintenance of adequate transportation service.

Act establishing in the Department of Agriculture a bureau to assist farmers in cooperative marketing.

Amendment to the agricultural credits act to permit intermediate credit banks—previously restricted to the making of loans on crops harvested and stored for market—to make loans on growing crops, thus further assisting in the financing of agriculture.

MISSISSIPPI FLOOD CONTROL ACT

Legislation providing for the canalization of the Mississippi, Missouri, and Illinois Rivers, which will be completed by 1930.

Legislation providing for the extension and operation of Government barge-line service on such rivers as soon as the channels authorized shall be completed, with a provision directing the establishment of joint rail and water rates.

The last two pieces of legislation are the most important in the interest of the Central West that have passed the Congress, for it insures cheap water transportation for the great territory covered by the Mississippi River system.

Coincident with the Republican legislative program, administrative changes of far-reaching importance have been made to expand the usefulness of the Government to agriculture. The activities of the Department of Agriculture have been reorganized to include a Bureau of Agricultural Economics and a new livestock reporting service. There has been a reorganization and expansion of the extension service and an organization of the Bureau of Home Economics. In fact, the Department of Agriculture has to-day the largest and most capable force of experts working along many lines of research under one department of Government known to the world.

Other departments of the Government have also been helpful to agriculture, including the Department of Commerce, in which, early in the Republican administration, was established a foodstuff division, the principal function of which has been to find increased outlets for American farm products.

In the face of this record of legislation, that has resulted in increased prices of agricultural products, is it possible that any farmer or person interested in agriculture can be misled into believing that the Republican Party has not been the friend of the great group of its citizens who produce the Nation's food?

HON. LESLIE M. SHAW ON PRESIDENT COOLIDGE'S M'NARY-HAUGEN VETO

Mr. ACKERMAN. Mr. Speaker and Members of the House, with the exception of the President, probably no other person in the United States—either in or out of Congress—has more closely studied the provisions of the McNary-Haugen bill than Hon. Leslie M. Shaw, who was Secretary of the Treasury for five years during the Roosevelt administration.

In his consideration of the bill Secretary Shaw brought to bear not only his experience as a former head of the Government's financial system but his experience as an Iowa farmer, lawyer, banker, and former governor of that great Corn Belt State.

Having had the privilege of hearing the former Secretary discuss the measure both prior to and subsequent to the publication of President Coolidge's veto message, his observations impressed me as being well worthy of consideration by every American citizen either as an advocate of the measure or as opposed to it. Accordingly, I asked him to write me his views.

Under the permission granted me by the House, I am attaching herewith the ex-Secretary's letter for the RECORD, and would commend its perusal to everyone who is regretful over the failure of the bill to become law, as well as to those who believe that President Coolidge enunciated the soundest of principles when he declined to sign the measure:

WASHINGTON, D. C., *May 28, 1928.*

Hon. ERNEST R. ACKERMAN,
Washington, D. C.

DEAR MR. CONGRESSMAN: Agreeable to your suggestion, I put in concrete form the substance of what I said to you the other evening at the hotel, with reference to the President's recent veto message. You are at liberty to make such use of it as you deem appropriate and wise.

Our discussion, you will recall, was based upon this thesis: "If the Republican Party remains true to its principles it will have abundant capital with which to resume business, though it lose all the offices; but if it abandons sound economic principles it will have no capital on which to continue business, though it retain all the offices." The Republican party is a party of principles, and if it shall ever exchange economic soundness for expediency it should and will become a recollection.

Children are not alone in sometimes wanting what is not good for them. Seventy-five per cent of the American people favored an unlimited issue of irredeemable paper currency, commonly called greenbacks, in the seventies and were saved from themselves by President Grant when he vetoed, in 1874, a preliminary measure, then known as the inflation bill.

A yet larger per cent demanded free silver in the nineties, and to please their constituents one branch of Congress passed such a bill. Again the wisdom and courage of a President saved the people from themselves. President Cleveland let it be known that he would veto any such legislation if he ever got the chance, and the other branch, by a small margin, saved the necessity. To-day there are not 10 men between the seas who will admit ever having favored either of those fantastic propositions.

A much larger proportion of western farmers demanded free silver 32 years ago than favored the McNary-Haugen bill to-day. Not only did debased currency appeal to the fearfully oppressed farmers of that period but even the delegation from my State, Iowa, contained but one gold-standard man. Both Senators and 10 of the 11 Congressmen were committed to free silver. It evidenced consummate courage for the Republican convention of 1896 to pledge the maintenance of the gold standard in the face of the sentiment of every State west of the Mississippi River and risk educating the people between then and election day. But Americans usually sense truth when properly presented, and in that instance five months proved sufficient.

I consider the McNary-Haugen bill quite as bad in principle, and if it shall ever become a law it will prove quite as ruinous in operation as greenbackism or free silver would have been, either of which could have been operated, and both were constitutional. The sole objection to those measures was their economic unsoundness. The President shows to a demonstration that the McNary-Haugen bill is unsound economically, that it is so cumbersome and involved that it can not be made to function; and the Attorney General declares it unconstitutional. For the third time in our history the courage of a President saves the country from economic hara-kiri.

President Coolidge has been many years in public life and thus far no one claims to have discovered from his lip or his pen an insincere word, an unsupported statement, or a promise that he does not think he can and does not intend to redeem. Like all men of prominence, he is not loved by everyone, but, unlike most men whom I have known, no one accuses him of duplicity or insincerity. I therefore feel free to quote, without supporting argument, a few of the concrete statements contained in his message, though with all of them you are already familiar.

He says: "It embodies a formidable array of perils for agriculture * * * a maze of ponderous, futile bureaucratic paraphernalia * * * unworkable price regulation * * * a régime of delusive experiments in price fixing * * * a nation-wide system of regulatory policing, intolerable espionage. * * * These provisions would disappoint the farmer by implying that the law of supply and demand can be thus legislatively distorted in his favor. Fiat prices match the folly of fiat money. * * * A bureaucratic tyranny of unprecedented proportions would be let down on the backs of the farm industry * * * thousands of contracts with the 4,400 millers, the 1,200 meat-packing plants, the 3,000 or more cotton and woolen mills, and the 2,700 canners. If this bill had been in operation in 1925 it would have involved collections upon an aggregate of over 16,000,000,000 units of wheat, corn, and cotton. This is bureaucracy gone mad. * * * If there be any conclusion we can announce as final * * * after the bitter and excessively costly war-time experiences, it is that we can not maintain a bureaucracy of such vast proportions without constant danger of corruption, mismanagement, and prodigious tax burden. * * * Swarms of inspectors, auditors, disbursers, accountants, and regulatory officers would be let loose. * * * The plague of petty officialdom would set up an intolerable tyranny over the daily lives of farmers and every individual and firm engaged in distributing farm products."

I think the inevitably ruinous effect of the dumping provisions of the bill upon our foreign commerce, as discussed by the President, gives ample justification for the veto independent of all other considerations.

The Dingley tariff law contained a provision the operation of which, without Executive order, compelled Russia during McKinley's administration to abandon her practice of aiding her beet-sugar industry in its policy of dumping its product on the American market, and under our present law the President is clothed with power and is expected to protect against any country imposing upon our industries as the McNary-Haugen bill directs that we impose upon the agricultural interests of others.

While Secretary of the Treasury I had, of course, extensive experience in the administration of custom laws, and I noted their effect upon international relations. Governments are often unable to protect against dumping by the nationals of other countries acting on their own initiative, but no country will tolerate dumping by direct authority of Congress, as provided in this bill, without retaliating in such manner as will seriously affect agriculture as well as every other industry.

To illustrate, in 1927 we exported practically $1,500,000,000 worth of factory products during the various stages of the production, of which there was consumed, according to the estimate of the Department of Commerce, more than $500,000,000 in food. Of course this was not farm values, and yet if those exportations of factory products are shut off our surpluses of foods will be much larger than at present. The farmers' best market is the laborer's table which he supplies, and every time we export $1,000 factory value of factory products it is the equivalent of sending 38 per cent thereof—$380 of food at American prices.

At the rate we are now progressing, 10 years of adequate protection for every product of the American farm, both in the raw and processed, and all other competitive merchandise will convert the United States into an extensive importer of foods. Of course, everything should be done and must be done to aid agriculture at the present time, but nothing must be permitted that will dim the ever-brightening prospects of our agricultural future.

Yours very truly,

LESLIE M. SHAW.

WORLD WAR VETERANS' LEGISLATION

Mrs. ROGERS. Mr. Speaker, on May 19, 1924, "An act to provide adjusted compensation for veterans of the World War, and for other purposes," was passed by Congress. This law provided for the payment of adjusted compensation to veterans who performed active service in the military or naval forces during the World War in the following manner:

First. The issuance of a certificate to the veteran, if alive, of a face value equal to the amount in dollars of a 20-year endowment insurance that the amount of his adjusted-service credit increased by 25 per cent would purchase at his age on the birthday nearest the date of the certificate, if applied as a net single premium.

Second. To the dependents of the veteran if the veteran had died before making an application, the amount of his adjusted-service credit in 10 equal quarterly installments.

Third. Cash to the veteran or dependent if the amount of the adjusted-service credit was not in excess of $50.

The amount of adjusted-service credit was, under the provisions of this act, to be computed at the rate of $1 per day for each day of home service in excess of 60 days after April 5, 1917, and before July 1, 1919, and $1.25 for each day of oversea service during this period. The maximum amount of adjusted-service credit authorized for home service was $500 and the maximum amount for oversea service was $625.

The order of preference of dependents was as follows:

First. To the widow or widower, if unmarried.

Second. If no unmarried widow or widower, then to the children share and share alike.

Third. If no unmarried widow or widower or children, then to the mother.

Fourth. If no unmarried widow or widower, children, or mother, then to the father.

The benefits payable under this act were exempted from taxation, assignment, and attachment or levy under any legal or equitable proceeds.

A penalty clause was incorporated in the act, making it illegal for any person to charge any fee or other compensation for assisting a veteran or his dependent in obtaining the benefits of this act.

The veteran was permitted to designate any person as beneficiary for the adjusted-service certificate and the face value of the certificate was made payable at the end of 20 years to the veteran, if alive, or if he died before the expiration of the 20 years the face value was payable to the designated beneficiary in a lump sum.

Provision was made whereby any bank or trust company incorporated under the laws of any State, Territory, possession, or the District of Columbia might loan to the veteran, after the expiration of two years from the date of his adjusted-service certificate, an amount not in excess of the loan value thereof.

This act also contained provisions for the administration thereof.

On June 5, 1924, the President approved S. 3181, "An act to authorize an appropriation to enable the Director of the United States Veterans' Bureau to provide additional hospital facilities," which authorized an appropriation of $6,850,000 for the construction of additional hospital and out-patient dispensary facilities for patients of the United States Veterans' Bureau.

On March 3, 1925, the President approved H. R. 11633, "An act to authorize an appropriation to provide additional hospital and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924," which authorized an appropriation of $10,000,000 for the construction of additional hospital and out-patient dispensary facilities for the United States Veterans' Bureau.

On May 23, 1928, the President approved the Rogers bill (H. R. 12281), "An act to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, as amended, and for other purposes," which authorized an appropriation of $15,000,000 for the construction of additional hospital and out-patient dispensary facilities for the United States Veterans' Bureau.

The World War veterans' act, 1924, approved June 7, 1924, was the result of a desire on the part of the officials of the United States Veterans' Bureau, representatives of veterans' organizations, and of the Congress itself, to remove the flaws and inadequacies that appeared in the preceding acts of Congress, codify the laws affecting veterans of the World War, and to enlarge upon the relief functions of the bureau. In this codification were incorporated all the pertinent provisions of the war risk insurance act, as amended, the vocational rehabilitation act, as amended, and the act approved August 9, 1921, establishing the United States Veterans' Bureau; and those acts were thereupon repealed, all rights accrued thereunder, however, being expressly saved. In the repeal of these old statutes and the codification of the provisions which the Congress desired to retain on the statute books, many important changes were made in the legislation, the most important of which may be summarized as follows:

Tuberculosis which developed to a degree of 10 per cent or more prior to January 1, 1925, was conclusively presumed to be of service origin, while neuropsychiatric diseases, paralysis agitans, encephalitis lethargica, and amœbic dysentery, developing to a degree of 10 per cent or more of disability before January 1, 1925, were given the benefit of a rebuttable presumption of service connection. This provision alone brought within the purview of the legislation thousands of veterans who theretofore had been unable to connect their disabilities with the service, so as to be eligible for compensation and hospital treatment.

Veterans of any war, occupation, or expedition since 1897 who were not dishonorably discharged from the service were accorded the benefits of hospitalization without regard to the nature or origin of their disabilities, in so far as existing Government facilities would permit, preference to be given to those veterans who were financially unable to pay for hospitalization and necessary traveling expenses.

Provision was made for the establishment of regional offices and subregional offices, thus decentralizing the administration of benefits.

National guardsmen disabled after being called into the Federal service were brought within the provisions of the law in the same manner as inducted men.

The "line of duty" requirement was repealed, the misconduct provision, however, being continued. The time during which the disability or disease must have been contracted was limited to the period from April 6, 1917, to July 2, 1921.

Compensation for widows and children was increased as follows:

If there is a widow but no child, from $25 to $30 a month.

If there is a widow and one child, from $35 to $40 a month, with $6 a month for each additional child. This is an increase of $1 a month per child, with no limitation on the number.

If there is no widow, but three children, $40 a month, with $5 for each additional child.

The burial provision was liberalized to provide for payment of expenses of burial and transportation of the body in all cases, without regard to indigency, where the veteran dies while receiving compensation or vocational training, or away from home at a place to which he was ordered by the bureau for treatment or training, or while traveling under orders of the bureau.

Provision was made for a temporary total rating for a period of six months for veterans who, after a period of one year's hospitalization for tuberculosis, have reached a condition of complete arrest. Veterans hospitalized for tuberculosis for a period of one year and who, in the judgment of the director, will not reach a condition of arrest by further hospitalization, and whose discharge from the hospital will not be prejudicial to themselves or their families, were accorded the privilege of discharge from the hospital with a temporary total rating for three years.

The principles of ratings were changed so as to make the degree of disability dependent upon the average impairment of earning capacity resulting from injuries in civil occupations similar to the occupation of the injured man at the time of enlistment and not upon the impairment in each individual case, as formerly.

The allowance for an attendant was increased from $20 to $50.

Provision was made for reimbursement for treatment obtained in emergencies from private sources.

Provision was made that, except in case of fraud, no reduction in compensation should be retroactive and no reduction or discontinuance should be effective until the first day of the third calendar month next succeeding that in which such reduction or discontinuance was determined.

The time for filing claims was extended one year longer, in the discretion of the director.

Provision was made for payment of compensation for injuries incurred as result of treatment or training.

The final date for reinstatement and conversion of term insurance was fixed as July 2, 1926.

The provision relative to prevention of lapse of insurance where at time of lapse the insured had uncollected compensation and such compensation was still uncollected at time of permanent total disability or death in an amount sufficient to have covered the premium due was changed to provide that in such a case the amount of insurance prevented from lapse should be the amount the uncollected compensation would purchase if applied as premiums. Under the previous law it was necessary to have uncollected compensation sufficient to cover premiums on the whole amount of insurance covered by the contract.

On March 4, 1925, the President approved the bill amending the World War veterans' act, 1924, more commonly known as the Reed-Johnson Act. This amendatory act greatly liberalizes the provisions of the laws providing relief for ex-service men who served in the World War and also for veterans of any war, military occupation, or expedition since 1897.

One of the most outstanding features of this amendment is the provision which makes compensation payable to all those veterans of the World War who are suffering with paralysis, paresis, or blindness, or who are helpless or bedridden as a result of any disability, without regard to whether such disability is the result of willful misconduct, and irrespective of whether the veteran is actually hospitalized. Prior to this amendment willful misconduct barred all right to compensation except where the veteran was suffering with paralysis, paresis, blindness, or constitutional lues as a result of a disease requiring hospitalization, and it was necessary that such veterans be hospitalized in Veterans' Bureau hospitals before any compensation could be paid.

Another important provision in the new legislation is the consolidation of the former provisions of the World War veterans' act relating to forfeitures of compensation. Under the amendment each period of service stands alone and a dishonorable discharge from one enlistment will have no effect on the payment of compensation for disabilities incurred during an enlistment from which the man was honorably discharged. It is also provided that the forfeiture provisions shall apply to conscientious objectors only where they refused to perform military duty or to wear the uniform, and further that aliens, allied or neutral, shall not be affected by the forfeiture provisions if their service was honest and faithful and they were not discharged prior to November 11, 1918, on their own solicitation because of alienage. All insurance is removed from the operation of these forfeiture provisions except where death was inflicted as a lawful punishment for crime or military offense. Under the law as it formerly stood a dishonorable discharge from the service on the ground that the man was guilty of any offense involving moral turpitude or willful and persistent misconduct would bar his right to insurance as well as compensation and training. The amendment, as stated above, takes

insurance out of the operation of this provision unless death was inflicted as a lawful punishment for crime or military offense. It is further provided that the discharge of a person for having concealed the fact that he was a minor at time of enlistment will not bar the benefits provided that service was otherwise honorable. These amendments are all retroactive to April 6, 1917.

The provision for burial expenses has been extended to include "funeral expenses" as well as "burial expenses." Congress has also left it to the judgment of the director as to whether the deceased leaves assets sufficient to meet the expense of his funeral and the transportation of his body, eliminating the language formerly in the statute requiring an administrative finding as to whether or not such expenses were otherwise provided for. The director is also authorized to provide by regulation what items shall be included as expenses of burial and funeral, and to what persons payment shall be made. The restriction as to the payment of transportation expenses within the continental limits of the United States has been removed and it is now possible for the bureau to pay the expenses of transportation of the body of a deceased veteran to the place of burial in the United States or its territories or possessions.

The provisions of the statute which prohibited the concurrent payment of compensation and pension to child, widow, or parent, other than a mother, have been removed. Under the amendment a person who is entitled to receive a pension on account of some one other than the person on whose account the compensation is payable will be permitted to receive both.

The director is also given authority to furnish at the expense of the Government special clothing made necessary by the wearing of prosthetic appliances furnished by the bureau to correct disabilities of service origin.

A provision is also included in the amendment by virtue of which the director is authorized to apportion disability compensation of insane inmates of institutions to the wife, children, and dependent parents of such inmates under regulations to be prescribed by the bureau.

The section of the law under which veterans of any war, expedition, or occupation since 1897 are hospitalized in Government hospitals, irrespective of the nature or origin of their disabilities, has been amended to permit the bureau to furnish such hospitalization in other than Government hospitals in the insular possessions, where at the present time there are no Government hospitals which will receive tubercular and neuropsychiatric patients.

A new section has been enacted whereby the director is authorized to designate persons at hospitals who shall have the authority to make arrests for crimes or offenses against the United States committed on the hospital reservation. This authority will be a potent factor in the maintenance of order and the enforcement of laws, especially the liquor and narcotic laws, on hospital reservations.

The amendment also brings within the compensation provisions of the law disabilities incurred while pursuing courses of vocational training under the Federal Board for Vocational Education and disabilities suffered as a result of examination ordered by the bureau in connection with claims for compensation or medical treatment. Before this amendment, disabilities incurred during training under the Federal board were not compensable and neither were injuries suffered during examination in connection with claims and treatment. The time in which application may be made for this compensation is extended to two years from the date of the passage of the amendment on March 4, 1925, or to two years after the injury occurs, whichever is the later. Where an injury compensable under this provision occurs under circumstances which place the liability on some one other than the Government to pay damages, the Government is subrogated to the rights of the claimant.

There are also many insurance features covered by the amendment, among which are the following: (1) The restoration of the essential policy provisions formerly contained in the war risk insurance act, which were repealed by the World War veterans' act, 1924, such as the unqualified right to change a beneficiary within the permitted class without the consent of the designated beneficiary, and the provision which provides that where a beneficiary at the time of designation is within the permitted class and is the designated beneficiary at the time of maturity because of the death of the insured, such beneficiary shall be deemed to be within the permitted class even though the status of such beneficiary shall have been changed, and so forth; (2) the provision permitting reinstatement of insurance within three months after lapse, provided that insured is at time of reinstatement in as good health as at time of lapse; (3) the elimination of the necessity for actual proof of service origin where the disability has been connected with the service for compensation purposes; (4) the provision for payment of insurance in one sum to the estate where no beneficiary is named or the designated beneficiary dies before receiving all the installments of insurance. This provision will preclude the necessity of distributing payments over a period of perhaps 20 years and thus permit the expeditious closing of estates.

Authority is also given to the director to make regulations under which trainees who have completed their courses may be allowed to retain books and equipment which they have used during training and which may be useful to them when entering employment in line with their training.

The amount allowed as a fee to attorneys who bring suits against the bureau is increased from 5 per cent to 10 per cent of the amount recovered. The duty of deducting this amount is placed upon the bureau and such deduction is to be made before the judgment is paid. A penalty of $500 or imprisonment at hard labor for two years, or both, is provided for those attorneys who charge fees in excess of the amount allowed.

The general penal provisions of the statute are amended to provide a penalty of fine and imprisonment for persons who receive maintenance and support allowance, as well as compensation, insurance, or any other money or check, without being entitled thereto with intent to defraud the United States or any beneficiary of the bureau, and also to provide a penalty of fine and imprisonment for any person who shall make a fraudulent claim for maintenance and support allowance. Claims for maintenance and support allowance were not included in the penal provisions heretofore.

A new section is added to provide for fine and imprisonment of guardians, curators, committees, or persons otherwise legally vested with the responsibility or care of a claimant or his estate who embezzle or fraudulently convert to their own use money paid to them in a fiduciary capacity under any law administered by the Veterans' Bureau.

On June 2, 1926, Public, 325, Sixty-ninth Congress, was approved by the President, and extended the time for reinstatement and conversion of yearly renewable term insurance one year—to July 2, 1927—with a further provision that this time might be extended by regulation where reinstatement and conversion was impracticable or impossible due to the mental condition or disappearance of the insured. This act also provided that where the amount of an individual monthly payment was less than $5 such amount might be allowed to accumulate without interest and be disbursed annually.

ACT OF JULY 2, 1926

Section 4: The director's salary is increased from $10,000 to $12,000.

Section 10: Authority is granted for the hospitalization of women veterans in other than Government hospitals.

Authority is granted for the alteration, extension, and improvement of existing hospital and out-patient dispensary facilities without the approval of the President, providing that such alteration, extension, or improvement does not materially increase the bed capacity.

Section 21: Authority is granted to the director to refuse to make further payments to any guardian, curator, conservator, or other fiduciary in the District of Columbia who, in the opinion of the director, is acting as fiduciary in such a number of cases as to make it impracticable to properly conserve the estates or supervise the persons of the wards. In any case where a fiduciary is not properly executing the duties of his trust or is collecting inequitable fees or commissions, the director is authorized to appear in court and make presentation of such matters. Suspension of payments may be made in any case where the fiduciary neglects or refuses to render an account showing proper application of payments for the benefit of the ward. Authority is granted for payment of court or other expenses incident to investigation or court proceeding relative to appointment or removal of fiduciaries.

Section 26: Where the accrued amount due at the time of the death of the beneficiary is $1,000 or less, payment may be made direct to the person who would take under the laws of intestacy without necessity of letters of administration.

Section 28: Provision is made for the reimbursement of the Government life-insurance fund from the military and naval insurance fund in any case where recovery is waived of an overpayment under a converted policy.

Section 31: Provision is made for reimbursement of beneficiaries who sustain loss of personal effects through fire in bureau hospitals. This provision is retroactive.

Section 33: Authority is granted for the provision of courses of instruction for the professional personnel of the bureau.

Authority is also granted for the detailing of not more than 2 per cent of the professional personnel to attend professional courses offered through nongovernmental agencies, employees so detailed to be entitled to payment of their expenses in addition to their compensation.

Section 200: Women citizens of the United States who were taken from the United States by the Government and who served in base hospitals overseas, are included within the provisions of the World War veterans' act as amended.

Spinal meningitis is included among those diseases conclusively held to be of service origin when developing to a degree of 10 per cent or more prior to January 1, 1925.

Section 201: The allowance for burial expenses is made available for women who served as Army nurses under contracts between April 21, 1898, and February 2, 1901.

The director is authorized to decide when a veteran leaves assets which should be applied to burial and funeral expenses, his decision to be binding for all purposes.

Section 202: Organic loss of speech is included among those conditions classed as permanent and total disability.

Provision is made for the reimbursement of State hospitals for hospitalization furnished the disabled ex-service man prior to the time he was taken over by the bureau. It is also provided that if the disabled person or his estate has borne the expenses of such hospitalization, reimbursement shall be made to such person or his estate.

Section 202 (7): This section is amended by substituting the phrase "Government of the United States" for the word "bureau," so that the subdivision will apply where the veteran is hospitalized in any Government institution. Provision is made for the payment of such additional sum as would equal the total sum by which compensation is reduced through this subdivision in the event the disabled person recovers his reason and is discharged.

Provision is made for the payment of not less than $50 per month for life in arrested tuberculosis cases. This provision is effective as of the date of the passage of the act and is specifically made not retroactive.

Women who served as Army nurses between April 21, 1897, and February 2, 1921, are brought within the provisions of section 202 (10).

Authority is granted for the furnishing of clothing and prosthetic appliances (and repairs thereto) to veterans entitled to the benefits of this subdivision who are financially unable to supply themselves with same. Pensions of veterans entitled to the benefits of this section are specifically removed from the purview of the now existing statutes which provide for deductions for board and maintenance while they are maintained in Government hospitals. The director is authorized to use other than Government hospitals in the Territories as well as insular possessions of the United States.

Section 203: Provision is made for a straight per diem allowance of $2.65 per day in lieu of loss of wages incurred while submitting to examination in connection with applications for treatment or compensation.

Section 206: The time for filing evidence of service origin of a disability is extended three years from the passage of the World War veterans' act, that is, until June 7, 1927.

Section 209: The director is authorized to extend the time for filing claim not to exceed five years for good cause shown.

Section 212. This section is amended to make the provision therein, which states that compensation shall not be paid while a person is in receipt of active service or retirement pay, effective as of April 6, 1917. This removes the present bar against payment of compensation while the veteran was receiving reserve pay.

Provision is also made that the schedule of ratings provided by the World War veterans' act shall hereafter be applicable to disabilities compensable only under the war risk insurance act as amended, that is, disabilities incurred between April 6, 1917, and July 2, 1921, and which heretofore have been governed by the rating table adopted under the war risk insurance act.

Section 300: Applications for insurance heretofore made by reserve officers on active duty at training camp or station are validated.

Members of the Coast Guard are included within those entitled to apply for insurance.

Section 304: The time for reinstatement of insurance by ex-service men suffering with disabilities of service origin is extended one year from the passage of this act. The unpaid premiums may be carried as an interest-bearing indebtedness against the policy to be deducted from any settlement made thereunder in a case where all the other requirements of reinstatement are complied with, but the veteran is unable to pay the premiums in arrears with interest. The time for reinstating yearly renewable term insurance generally is extended to July 2, 1927.

Section 305: This section is amended to apply to canceled or reduced insurance as well as lapsed insurance, and a new proviso is added limiting the payment of insurance revived under this section to the insured, his widow, child or children, or dependent parents, and in the order named unless otherwise designated by the insured during his lifetime or by his last will and testament.

Section 308: This is a new section to provide that where the insurance lapsed and the insured forwards not later than the seventh day of the month following the grace period an amount sufficient to reinstate the insurance, reinstatement may be made whenever it is shown that the insured was in the required state of health at time of remittance.

Section 309: This is a new section to provide that where any person allowed his insurance to lapse and died after February 24, 1919, prior to collecting the $60 bonus, the insurance shall not be considered to have lapsed during such period as the uncollected bonus would, if applied in payment of premiums when due, equal, or exceed the same. The payment of insurance revived under this section is payable only to the classes mentioned in the proviso added to section 305.

Section 406: This section is amended to extend the time for those veterans in placement training on June 30, 1926, to January 1, 1927, and to those in institutional training two years from the date this legislation is enacted.

Language is also included in this section which will permit the payment of the two months' allowance provided by section 404 to all trainees whenever rehabilitation is determined. Under the old law, by reason of the language in section 406 providing that no training allowance should be paid after June 30, 1926, those men who were rehabilitated after May 1, 1926, were discriminated against in respect to the two months' allowance.

Section 506: This is a new section extending the penal provisions of the statute to the Philippine Islands.

RÉSUMÉ OF PROVISIONS OF ACT OF JULY 3, 1926

(Public 472, 69th Cong.)

On July 3, 1926, the President approved H. R. 10277, "An act to amend the World War adjusted compensation act," which contains the following important provisions:

First. A provision to validate payments where the veteran died while his application for adjusted compensation was in the mail.

Second. A provision whereby application is valid if the Secretary of War or the Secretary of the Navy finds that it bears the signature of the applicant and discloses an intention to claim the benefits of the act, regardless of whether the veteran is alive at the time of the filing of the application, provided application is filed by January 1, 1928.

Third. A provision whereby an adjusted service certificate may be issued to the widow of a veteran who died between May 19, 1924, and July 1, 1924, without making application, provided the application is filed by the widow on or before January 1, 1928.

Fourth. A provision whereby no deductions shall be made from the adjusted service credit or amounts due under the act on account of any indebtedness of the veteran to the United States.

Fifth. A provision whereby a widow or widower who remarries before receiving the 10 quarterly installments from a deceased veteran's adjusted service credit shall not forfeit their rights by such remarriage.

Sixth. A provision whereby the mother or father of a veteran who was 60 years of age before January 2, 1928, or if the mother was unmarried before that date they shall be presumed to be dependent. In addition the date of dependency was changed from the time of the death of the veteran to "at any time thereafter and before January 2, 1928."

Seventh. A provision whereby the sum of $60 is authorized to be paid in a lump sum to the dependents of the veteran who died while in the service and before July 1, 1919, if an adjusted-service credit has been or is, after this action taken, certified to the director.

On March 3, 1927, the President approved H. R. 16886, "An act to authorize the Director of the United States Veterans' Bureau to make loans to veterans upon security of adjusted service certificate," which provides authority to the director to make loans to veterans upon their adjusted-service certificate upon the same terms and conditions as are applicable in cases of loans made by a bank. The director was authorized to make such loans through the regional offices, suboffices, and hospitals of the bureau.

On March 3, 1927, paragraph 7 of section 202 of the World War veterans' act, as amended, which provided for the reduction of compensation of all veterans in hospitals who had no dependents to $40 a month as of June 30, 1927, was repealed.

The Senate and House of Representatives passed a bill (S. 777) "An act making eligible for retirement under certain conditions officers and former officers of the Army, Navy, or Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in service of the United States during the World War." This bill provides for the retirement of ex-emergency officers of the Army, Navy, and Marine Corps who were disabled in line of duty during the World War and who have or may hereafter within one year be rated by the bureau at not less than 30 per cent permanent for a disability directly resulting from war service with pay at the rate of 75 per cent of that to which they were entitled at the time of discharge from their commissioned service, except pay under act of May 18, 1920. They are also entitled to the same privileges as members of the Regular Army, Navy, or Marine Corps retired for disability, and also to hospitalization and medical treatment under the World War veterans' act, as amended.

This act also provides for a register of all disabled emergency officers of the World War, and provides that such officers who have or may hereafter be rated less than 30 per cent and more than 10 per cent permanently disabled for disability directly resulting from war service shall be entitled to the privileges of retired officers, excepting pay.

On May 29, 1928, the President affixed his signature to H. R. 13039, "A bill to amend the World War veterans' act, as amended," which contains many important provisions, the most important of which are as follows:

First. A statute of limitations on insurance suits providing that suits on contracts of insurance must be brought within six years after the claim accrues or one year after the passage of the act, whichever is the later. At the present time, under the conformity act, the statutes of limitation of the different States apply.

Second. Provision for payment of original expenses of appointment of guardians.

Third. Provision for the payment of death compensation to a child after the age of 18 and until the completion of education or training (but not after such child reaches the age of 21 years).

Fourth. A provision that the payment of compensation to dependent parents shall be made during the period of dependency and that such compensation shall be payable whether the dependency arises before or after the death of the veteran.

Fifth. Provision for the payment of burial expenses in the amount of $107 in all cases in which the director, in his discretion and with due regard to the circumstances of each case, may decide that this sum may be allowed.

Sixth. A provision whereby widows and children of veterans who are now being paid compensation by virtue of an accrued right under the war risk insurance act, as amended, which was repealed by the World War veterans' act of June 7, 1924, are placed on a parity with widows and children of veterans who are receiving compensation under the World War veterans' act.

Seventh. A provision to authorize the director, in his discretion, to apportion compensation in the case of a disabled person who is a patient in a hospital or is living separate and apart from his wife and/or children. This provision was made to overcome the difficulties now existing which makes mandatory the apportionment of compensation to persons who are undeserving or in behalf of persons who have been separated from their families for many years or can not be located.

Eighth. A provision to extend the time for filing evidence to establish service connection to April 6, 1930.

Ninth. A provision which authorizes the director, in his discretion, to extend the time for filing claim for benefits under this act to April 6, 1930.

Tenth. A provision which permits the use of uncollected compensation not payable because of the provisions of section 310 of the war risk insurance act and section 210 of the World War veterans' act, as amended, for the purpose of reviving insurance under section 305 of the World War veterans' act, as amended. This provision places the legislative stamp of approval on the interpretation of section 305 of the World War veterans' act, as amended, heretofore made by the bureau but which has recently been overruled by the Comptroller General.

Eleventh. A provision whereby reconversion of insurance to a lower premium rate may be made upon proof of good health, satisfactory to the director.

Twelfth. A provision which removes the restriction on the designation of beneficiaries for United States Government life (converted) insurance.

Thirteenth. A provision whereby application for United States Government life (converted) insurance may be made by any person who has heretofore applied or been eligible to apply for yearly renewable term insurance or United States Government life insurance, provided that such person is in good health and furnishes evidence satisfactory to the director to that effect.

Fourteenth. A provision whereby persons now holding United States Government life insurance and who are in good health may apply for the insertion in their contract of a disability clause providing for the payment of disability benefits where total disability has existed for 12 months. The director, under this amendment, is required to fix a rate of premium for this added feature to the insured to cover the necessary cost of the same.

On May 29, 1928, the President approved H. R. 10487, a bill to amend the World War adjusted compensation act, as amended, which contains the following important provisions:

First. A provision to extend the time for filing applications for the benefits of the World War adjusted compensation act to January 2, 1930.

Second. A provision to permit the Secretary of the Navy and the Secretary of War to certify to the Veterans' Bureau the adjusted service credit of a veteran where an application had been made by the veteran but was lost after having been received by one of the departments.

Third. A provision to authorize the presumption of death of an individual where he has been absent from his home and family for a period of seven years, during which period no information of his existence has been received.

Fourth. A provision to authorize a veteran to designate more than one beneficiary under his adjusted-compensation certificate.

MY STEWARDSHIP REVIEWED—SOME THINGS I HAVE TRIED TO DO

Mr. McSWAIN. Mr. Speaker, during my service on the Committee on Military Affairs I have taken a great interest in trying to procure a satisfactory solution of the much vexed problem of Muscle Shoals. Our Government has many millions of dollars invested there originally as a war proposition in order to insure for us an ample domestic supply of nitrogen for the making of powder and other explosives in time of war. Fortunately, the very element, to wit, nitrogen, which is essential for powder is also essential as a fertilizer, and it looked like a very fine combination to be able to use this plant for the benefit of agriculture in peace and for the defense of the Nation in war. Consequently, I have tried hard to work out that combination, and the various bills that have been before the committee have been earnestly and studiously considered by me with that end in view. I took a particular interest in trying to reform and amend the bill known as the Madden bill, which really contained the offer of the American Cyanimid Co., and offered a great many amendments, most of which were accepted by the company. However, we were unable to agree upon three fundamental and highly important amendments and for that reason the committee never could report that bill favorably.

THE FARMER AND MUSCLE SHOALS

Finally, what is known as the "Norris bill" was passed by the Senate by an overwhelming vote and came to the House and was referred to our committee. There were various features of that bill which I could not approve, especially one that undertook to confer upon the Federal Power Commission the right to fix the rates at which any utility company buying power generated at Muscle Shoals should retail said power to the public. I considered that an unconstitutional infringement of the reserved rights of the States, and still so regard it. I furthermore considered the framework of the Norris bill as unsound, in that it undertook to confer the operation of the plant upon both the Secretary of War and the Secretary of Agriculture, and I felt satisfied that the operation under such conditions would finally rest in the hands of some irresponsible subordinate officer, and the failure of the project under such circumstances would almost be certain. Furthermore, the Secretary of Agriculture and his advisers had plainly confessed that they could see no hope for agriculture to obtain cheap fertilizer at Muscle Shoals. Therefore, I worked hard and finally offered a bill in the form of a substitute for the Norris bill. This was referred by the full committee to a subcommittee of five, of which I was a member and was taken as the framework around which the subcommittee finally formulated a bill which was recommended to the full committee for its consideration. When the full committee approved of it, it was then introduced by the chairman, the Hon. JOHN M. MORIN, of Pennsylvania, and henceforth became known as his bill. I worked hard in assisting to prepare the report from the committee on this bill in order that the Members of the House might better understand it. When the House cut out the fertilizer feature I could still

see that there was hope for the farmer in the right of the corporation to manufacture and sell fixed nitrogen. Therefore I urged my friends to stand by the bill and to send it to conference, where the bill was so shaped up as to commend itself to the favorable consideration of both Houses and is now in the hands of the President.

I hope the President will approve the bill. He has vetoed the McNary-Haugen bill, which most of the farmers and most of their friends have strongly indorsed. The President has said that there are other means of aiding and encouraging the farmer than by the employment of the agencies contemplated by the McNary-Haugen bill. I hope the President can see that the program contemplated by the Muscle Shoals corporation is consistent with his ideas of public welfare. I hope that he can see that it is essential to an adequate policy of national defense. I hope that he can see that it will be a great blessing to the farmers to be able to buy plant food in the form of nitrogen for not exceeding one-half of what the farmers now pay for Chilean nitrates. However, if the President should veto the bill, that is his responsibility and not mine. I am assuming that the President would have approved the Madden bill, which was introduced by the late Hon. Martin B. Madden, chairman of the Committee on Appropriations, one of the President's staunchest and most loyal friends. The Madden bill contemplated the building of the dam at Cove Creek and also contemplated the building of Dam No. 3, all at a total expenditure of over $60,000,000. I think that the Morin bill more nearly safeguards the national defense and more nearly protects our property at Muscle Shoals, and more wisely proposes to serve agriculture than the Madden bill. If, therefore, the President would have approved the Madden bill, he surely can afford to approve the Morin bill. However, it is impossible at this time to forecast what the President will do, and we can only say that if the President should veto the Morin bill, then the Muscle Shoals problem will be before us at the next session of Congress and will remain eternally before us until some bill is passed by Congress and signed by the President.

The bill now before the President is the only one that Congress has been able to pass relating to a policy at Muscle Shoals. If it takes another eight years for the Congress to be able to pass another bill, and if we continue to lose $8,000 a day at Muscle Shoals from the sale of power alone, and continue to lose 40,000 tons of nitrogen a year for the next eight years, then the loss in money and in plant food, and by reason thereof the loss to the farmers, will be enormous.

The responsibility for such loss will not be on my head. I have tried for five years to get the committee to agree upon something. Having agreed upon the Morin bill, I tried hard to get the House to approve it. The House did approve it after substantial amendments. I then tried hard to reconcile the differences between the House and the Senate, and that was finally done. However, I am now at the end of my rope. I do not claim to have any influence with the President. I have no way of approaching him. I presume that he would not care for my opinion on this subject. If he does, it has been abundantly expressed in the CONGRESSIONAL RECORD. If the President realizes the serious and perilous predicament of agriculture at this time, he will help to bring relief by signing the Morin-Norris Muscle Shoals bill.

PROGRESS OF AVIATION

Mr. Speaker, the marvelous change that has come about in the development of aviation in America within the last three or four years is such as to arrest attention and call for an explanation. Just three or four years ago the critics of our backwardness in aviation were numerous. It was charged that our progress in aviation was being retarded by jealous and narrow-minded bureaucrats in both the Army and the Navy. Furthermore, the manufacturers of aircraft generally were complaining of lack of orders, were threatening bankruptcy, and saying that they must go out of business unless a change should be brought about. The Army and the Navy conducted in all about 25 different investigations. Finally the President appointed what was known as the President's Aircraft Board, and popularly called the Morrow Board, headed by Dwight W. Morrow, now our minister to Mexico. Into the ears of this commission were poured all the complaints of the discontented and especially those of the manufacturers themselves. It did appear that America was about to bring up the rear in the matter of navigating the air.

But, Mr. Speaker, public sentiment was aroused and the Congress responded, as it always does, to the demands of popular opinion. Therefore both the Committees on Naval Affairs and Military Affairs brought in bills inaugurating five-year programs for the Army and Navy, respectively. These programs authorized the authorities to set up a program of development and enlargement and expansion that the manufacturers could count on. Furthermore, a subcommittee from each of these two legislative committees worked out a bill looking to the development of designs in aircraft by the enlistment of the inventive genius of our people. This same bill, while retaining all the benefits of publicity from advertisement and competition, permits the War Department and the Navy Department to recognize merit and the ability to perform on the part of aircraft as factors in fixing the purchase price thereof in connection with letting bids for the construction of aircraft. This particular feature was contrary to the recommendations of the Morrow Board, but was worked out in such a way as to finally commend itself to the good judgment of the conservative men in both the Army and the Navy. The result has been highly satisfactory. The five-year program has permitted the training of a large personnel, and the new purchasing law has encouraged the manufacturers of aircraft to build a superior type. These two forces have combined to produce a degree of progress in aviation that is startling.

So, Mr. Speaker, we no longer hear complaints about our backwardness in aviation. Nothing but praise is found on the tongues of all. The newspaper reports are to the effect that the manufacturers of aircraft are working to the limit of their capacity on orders. The stock sales of holdings in aircraft manufactures show that they are regarded as fine investments. American aviators have led the world. They have circled the globe, they have hopped the Atlantic and the Pacific, and our popular hero, Col. Charles A. Lindbergh, on May 21, 1927, startled the work by a nonstop flight of a little more than 34 hours from New York to Paris. I believe, Mr. Speaker, that this wonderful change in the sentiment of our people and change in the condition of the aircraft industry and these wonderful achievements of our aviators are certainly due in a large measure at least to the legislation inaugurated by Congress.

AGRICULTURAL DECLINE

Mr. Speaker, I recognize the fact that agriculture is on the decline in this Nation, and that in our part of the country it is in a desperate condition. I am deeply interested in the subject by necessity and by choice. I recognize that the prosperity of the Nation depends upon its agricultural resources in the last analysis. I recognize that agriculture is the only really creative industry. All other industries take created wealth, such as raw cotton or lumber or iron, and convert this material into other forms for the use and convenience of the people, but agriculture takes the God-given soil and sunshine and rain and human labor and from this combination brings into existence new things. It gives life for the first time to the grains of corn and wheat to produce the bread of mankind. It gives form and texture for the first time to cotton and wool, from which man produces clothing and covering for his comfort and pleasure. Agriculture takes the grass and grain of the field and by feeding them to the livestock and by breeding the livestock produces milk and butter and meat to supply strength to human bodies.

ECONOMIC TREND FAVORS INDUSTRY AGAINST AGRICULTURE

But the whole economic trend of the time is toward more industrialism. Within a generation the population has so shifted that now practically two-thirds of all the people live in cities and towns and are engaged in commercial, financial, and industrial occupations. It is true that improved methods of agriculture and wonderful agricultural implements make it possible for one-third of the people to produce more than that third and the other two thirds can consume. Hence we are compelled to find foreign markets for our overproduction of cotton, of wheat, and of meat, and yet, in spite of a world market and a huge city demand, agriculture languishes.

Intelligent and honorable men by the tens of thousands have devoted their best energies for a lifetime to their farms and find themselves still in debt and barely able to have a few of the conveniences of life and with meager educational opportunities for their children. Why should the basic industry of the Nation be the least remunerative of all? Without the farm producing these raw materials, and especially the meat and bread for the industrial population gathered in town and city, life in our great cities and centers of population would be impossible. Those who transport by rail and truck the things from the farm for the city folks to eat are reasonably well paid, and railroad stocks for the first time in history are now paying dividends. Those that labor as distributing agencies are reasonably well paid when compared with the farmer. Those who finance the transactions of commerce and industry are well paid, and the interest rate of money continues high. During the last two years stocks and securities in the financial centers of New York and Boston and Chicago have soared higher than ever before in history.

HOW ONE ITEM OF $281,440 WAS SAVED AT FORT BLISS, TEX.

I call attention briefly to the fact that by an amendment to a pending bill and by some remarks made in connection therewith there was saved to the Treasury in one transaction $281,440. This was in connection with the purchase of additional land for use at Fort Bliss, Tex.

The Chief of Staff of the Army and the commanding general at Fort Bliss came before the committee urging the report of a bill to buy 3,600 acres of land for about $360,000. The particular tract of land was described, and left no discretion with the War Department as to either the exact land or the price.

I realize that an average of $100 per acre for land in the vicinity of El Paso, Tex., is too high. I therefore insisted that the bill be amended so as to authorize an appropriation of such sum of money as might be necessary, not exceeding $360,000, for the purchase of any land situated near Fort Bliss and suitable for use in connection with Fort Bliss, so that the various and numerous landowners in that vicinity might come in and offer their several tracts of land and thus be put to bidding one against the other for the sale of their land to the Government. The result was that the War Department, after such bidding—in that case the bidding taking the form of the lowest price offered for suitable land—bought 4,500 acres at a saving of $281,440. After the result of this was published and came to the attention of the Hon. John C. McKenzie, formerly chairman of the Committee on Military Affairs, and now in private life and living at his home in Illinois, he wrote me the following letter, which I greatly appreciate and have great pride in calling to the attention of the country. Here is the letter:

Hon. J. J. McSWAIN,
Washington, D. C.

DEAR FRIEND MAC: It is impossible for me to forget my associations with members of the Committee on Military Affairs, and naturally I am interested in following the work of the committee, notwithstanding I am far away. I am especially pleased to note that through your efforts to guard the interest of the Government in the motion you made in connection with the Fort Bliss land bill in the last session has resulted in saving the people of our Government the snug sum of $281,440 and in the acquiring of 4,532 acres, thus giving us 900 acres more than was proposed in the bill submitted to us. Such an achievement is surely worth while and only demonstrates the necessity of the members of that great committee being ever diligent in protecting the Government's interests. You can feel that in being alert and submitting the proper motion at the time you saved enough to warrant the retaining you in Congress the remainder of your life. I often think of you and all the boys, and I wish you all well and hope that you all will be on guard to head off not only land exploiters but personal exploiters, of which there are many.

With kind personal regards, I am,
Your friend,

JOHN C. McKENZIE.

EFFECT OF RECENT FLOOD BILL ON THE TRIBUTARIES

Mr. RAGON. Mr. Speaker, there has come to me so many requests for information in regard to the provisions of the recent flood bill, particularly with reference to its effect on the tributaries, that I feel a few observations upon the bill may be of some service.

For the first time in the history of the country a policy of flood control on the tributaries has been announced and a program to develop this policy has been put into action.

I have always felt a proper control of the lower Mississippi River floods could only be effected through a control of the tributaries. I have only given study to flood control on the Arkansas, White, and Red Rivers; but the annual flood damages on these three rivers constitute an economic wastage running into millions of dollars. These conditions are due to the fact that the Government, which holds supreme power and control over these streams, has for the last 25 years completely neglected them.

When Congress met last December they found surveys and suggestions prepared by Army engineers for the control of flood waters on the Mississippi from Cairo to the Gulf, but there were no surveys nor were there any suggestions of a program to be followed on any of the tributaries. The result was any action taken by Congress for flood control on the tributaries, if effective in the prevention of future floods, would be merely a leap into the dark. Therefore the friends of tributary flood control found that their first task was to adopt a policy and get a survey which would show us what could be done and an estimate of the cost involved. I am glad to say this was done, but not without a very determined fight being urged by Members of Congress living on the tributaries.

I shall not enlarge upon any part of the bill except that which relates to the tributaries and for the sake of brevity shall only quote those sections which deal directly with the problems of the Arkansas, White, and Red Rivers.

Section 10 of the flood bill provides:

That it is the sense of Congress that the surveys of the Mississippi River and its tributaries, authorized pursuant to the act of January 21, 1927, and the House Document No. 308, Sixty-ninth Congress, first session, be prosecuted as speedily as practicable, and the Secretary of War, through the Corps of Engineers, United States Army, is directed to prepare and submit to Congress at the earliest practicable date projects for flood control on all tributary streams of the Mississippi River system subject to destructive floods, which projects shall include: The Red River and tributaries, the Yazoo River and tributaries, the White River and tributaries, the St. Francis River and tributaries, the Arkansas River and tributaries, the Ohio River and tributaries, the Missouri River and tributaries, and the Illinois River and tributaries; and the reports thereon, in addition to the surveys provided by said House Document No. 308, Sixty-ninth Congress, first session, shall include the effect on the subject of further flood control of the lower Mississippi River to be attained through the control of the flood waters in the drainage basins of the tributaries by the establishment of a reservoir system; the benefits that will accrue to navigation and agriculture from the prevention of erosion and siltage entering the stream; a determination of the capacity of the soils of the district to receive and hold waters from such reservoirs; that prospective income from the disposal of reservoired waters; the extent to which reservoired waters may be made available for public and private uses; and inquiry as to the return flow of waters placed in the soils from reservoirs, and as to their stabilizing effect on stream flow as a means of preventing erosion, siltage, and improving navigation: *Provided*, That before transmitting such reports to Congress the same shall be presented to the Mississippi River Commission, and its conclusions and recommendations thereon shall be transmitted to Congress by the Secretary of War with his report.

The sum of $5,000,000 is hereby authorized to be used out of the appropriation herein authorized in section 1 of this act, in addition to amounts authorized in the river and harbor act of January 21, 1927, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers for the preparation of the flood-control projects authorized to be submitted to Congress under this section: *Provided further*, That the flood surveys herein provided for shall be made simultaneously with the flood-control work on the Mississippi River provided for in this act: *And provided further*, That the President shall proceed to ascertain through the Secretary of Agriculture and such other agencies as he may deem proper, the extent to and manner in which the floods in the Mississippi Valley may be controlled by proper forestry practice.

It will be noticed that the first part of section 10 refers to House Document 308, of the Sixty-ninth Congress. The purport of the legislation incorporated in this document is to direct the Secretary of War, through the Chief of Engineers, to make surveys of certain rivers to determine the feasibility of power development, irrigation, flood control, and so forth. It will be noted that this section after reference to the House Document 308 directs the Secretary of War and the Chief of Engineers to prepare and submit to Congress at the earliest practicable date project for flood control on the tributaries of the Mississippi subject to destructive floods. The Red, White, and Arkansas Rivers and their tributaries are specifically mentioned in this section. The Arkansas and the Petit Jean, the latter a tributary of the Arkansas, were incorporated in the House document. However, it will be seen from a close reading of the section that the purpose set forth in section 10 is to cull out of the information procured from the surveys provided in the House document a program for flood control on these tributaries. These flood-control projects will be submitted to Congress by the Secretary of War. It will be noted that $5,000,000 is authorized for the purpose of preparing flood-control projects. There has already been an allocation made of approximately $65,000 for use on the Arkansas and Petit Jean in the preparation of surveys under the provisions of House Document 308.

It will be noted that flood surveys shall be made simultaneously with flood control on the Mississippi River. The purpose of this provision is to speed up the flood-control projects on the Arkansas and other tributaries. This provision will also enable the Flood Commission within a short time to arrive at the proper determination of the effect the tributary flood waters have on the lower Mississippi River and I believe will eventuate in treating of the lower Mississippi and the tributaries as one project. I have always maintained the proper control of the flood in the Mississippi River Valley should be handled as one project.

Section 7 of the bill provides:

That the sum of $5,000,000 is authorized to be appropriated as an emergency fund to be allotted by the Secretary of War, on the recom-

mendation of the Chief of Engineers, in rescue work or in the repair or maintenance of any flood-control work on any tributaries of the Mississippi River threatened or destroyed by flood, including the flood of 1927.

I was successful in having this section amended on the floor so as to reach back and cover the flood damages of 1927. The effect of this provision depends much upon the construction given it by the Chief of Engineers and his associates. The chairman of the committee, when asked on the floor of the House the purposes this section was to serve, replied it was to take care of districts in the condition of the one represented by Mr. RAGON, of Arkansas. Therefore the legislative intention back of this section was to do emergency work where levees were destroyed or crevasses made by floods of 1927 and subsequent floods. I am sure the legislative intent was to assist in the reconstruction of flood-control works where their destruction imperiled any considerable amount of land. However, as stated before, this section, and particularly the word "emergency" included therein, has not yet been construed, and the extent to which this fund will be available to those in the Arkansas Valley remains to be determined.

In addition to this $10,000,000 which is given outright to tributary work, we were able to procure $10,000,000 additional to apply to work on the tributaries where they were affected by backwaters of the Mississippi. This $10,000,000 can be spent only where there is a contribution of one-third part by the landowners of the affected area. In other words, in the area affected by backwaters of the Mississippi, the Government gives $2 and local interests give $1 for flood-control purposes. Hence it will be seen that the recent flood control bill carries $20,000,000 for the purpose of flood-control work on the tributaries.

It is understood that this bill is not in its entirety what the Members in the flooded districts wanted. The Members on the lower Mississippi and tributary streams were dissatisfied with some of the features. The opposition to the bill was so obstinate it was necessary to compromise if we were to meet the perils of another flood which might break loose on us at any time. However, as a whole the bill is a good start in the right direction and future sessions of Congress can iron out the mistakes or failures, if any, in the present bill. Congress has given a great skeleton for those interested in flood control to work upon in the future. A comprehensive flood-control project is not a job to be accomplished in a year, but will require the work of years.

The people in the Arkansas River Valley from Pueblo, Colo., to the Mississippi River have for the first time in history a start toward the control of the devastating waters of the Arkansas River. I would remind those interested that the work of no individual Congressman or Senator, nor the work of all the Congressmen and Senators in the affected area, can accomplish this purpose. They can be effective, but to accomplish the full purpose of flood control in the Arkansas River Valley they must have the support of every force in the valley. Chambers of commerce, civic organizations, men of influence in the financial and professional world must get in behind the project. Their work must not be confined to the influence they may have over some individual Congressman or Senator, but their influence must be wielded over engineers and those in the executive positions of this Government.

I believe the people in the valley are aroused as never before to the terrific effect of the wastage of $60,000,000 which the flood of 1927 caused in the Arkansas River Valley. I received many letters manifesting interest from individuals and organizations as far west as Oklahoma City and Wichita, Kans. I hope that every chamber of commerce along the Arkansas River in Arkansas, Oklahoma, Kansas, Texas, New Mexico, and Colorado will feel their individual responsibility and awaken to the great opportunity which lies before us in the procurement of a comprehensive flood-control plan for the Arkansas River. I feel that Congress has discharged well its duty toward our stricken people, and it shall be my purpose during this vacation to acquaint the people of my State, and particularly the district which I have the honor to serve, with conditions as they are and assist them in mobilizing their forces for a long and continued struggle.

NEW MEXICO LEGISLATION PASSED IN THE SEVENTIETH CONGRESS

Mr. MORROW. Mr. Speaker, in order that my constituents may know the legislation passed by me in the House, bills affecting New Mexico, during the Seventieth Congress, first session, I insert herein a short history of each measure which is now a law or has passed the House. The list includes only the legislation passed and is not a record of the departmental work involved in a congressional office.

Public Law 169: Authorizing an appropriation of $100,000 to the Middle Rio Grande conservancy district, New Mexico, for reclamation, flood control, and irrigation of Indian lands which intersperse white lands in the district.

Public Resolution 7: To amend the constitution of New Mexico in order to submit to the voters of the State the proposed amendment passed by the eighth State legislature dealing with contracts for the development and protection of minerals on State lands.

Fish hatchery bill: For the establishment of a fish-cultural station in New Mexico; included in the omnibus fish hatchery bill [H. R. 13383], which passed both the House and Senate. Now before the President for signature.

H. R. 4215: For the relief of Frank L. Merrifield, Raton, N. Mex. Passed the House May 25, 1928. Change record of discharge in War Department to read "Honorable discharge."

Public Law 194: Approved March 27, 1928. For the protection of the watershed within the Caron National Forest, from which water is obtained for the Taos Pueblo, N. Mex.

Private Law 240: For the relief of Omer D. Lewis, for injuries received while aiding Federal officers engaged in suppressing the sale of liquor to Indians.

Public Law 553: Granting 250,000 acres of land to the counties of Santa Fe, Grant, Luna, and Hidalgo, and the town of Silver City, N. Mex., to reimburse them for bonds issued in the aid of railroads. Approved May 28, 1928.

Private Law 255: For the relief of Harry C. Bradley, bringing Mr. Bradley under the employees' compensation act for tuberculosis contracted in the service of the United States.

Public Law 296: Providing for acquisition of right of way through the lands of the Pueblo Indians of New Mexico. Approved April 21, 1928.

Public Law 279: Extending the provision of the act of Congress approved March 20, 1922, entitled "An act to consolidate national forest land." Act is made applicable to lands within former Spanish or Mexican land grants which lie within or contiguous to the boundaries of the Carson, Manzano, or Santa Fe National Forests, New Mexico. Approved April 16, 1928.

Increase of pension for Mrs. Lottie A. Rice, Lincoln, N. Mex., to $50 per month; Civil War widow.

H. R. 6496, 6497, 6498, and 6499: Bills providing for compacts between New Mexico and adjoining States on rivers in which States are jointly interested. Rivers: Rio Grande, Pecos, Canadian or Red, San Juan, Las Animas, Gila, San Francisco, and Cimarron. States: New Mexico, Oklahoma, Texas, Colorado, Arizona.

The four bills favorably reported by Committee on Irrigation and Reclamation of the House. On Consent Calendar for passage at opening of second session Seventieth Congress, in December, 1928.

Public Law 508: To provide for investigation and survey of methods for utilization of Gila River, N. Mex. and Ariz. Approved May 25, 1928.

Public Law 556: Introduced by Congressman HUDSPETH, of Texas. For extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas. Reported favorably by Mr. MORROW, from Committee on Irrigation and Reclamation. Due to illness of Mr. HUDSPETH, Mr. MORROW, in conjunction with Texas delegation, worked for passage of the bill. Approved May 28, 1928.

Private Law No. 53: Granting issuance of patent to Bureau of Catholic Indian Missions for a tract of church land on the Mescalero Indian Reservation, N. Mex.

Public Law No. 481: Reserving 14,000 acres of land to the Acoma Indians, New Mexico, for grazing purposes. Approved May 23, 1928.

H. R. 12113: Providing for the acquirement by the United States of privately owned lands situated within certain townships in the Lincoln National Forest, in the State of New Mexico, by exchanging therefor lands on the public domain also within such State. Passed House May 21, 1928. On Senate Calendar for attention second session, Seventieth Congress.

Public Law 114: An act to grant extension of time under coal permits. Introduced by Senator BRATTON in the Senate. Favorably reported by Mr. MORROW from the House Committee on the Public Lands. Approved March 9, 1928.

Appropriations included in the second deficiency appropriation bill, approved May 29, 1928, which are of vital importance to the State of New Mexico:

First. One hundred thousand dollars for the middle Rio Grande conservancy district, N. Mex., for reclamation, flood control, and irrigation of Indian lands in the district.

Second. Two hundred and fifty thousand dollars for raising Avalon Dam, Carlsbad irrigation project, N. Mex.

Third. Seven thousand five hundred dollars for construction of Jemez Bridge, Sia Pueblo, N. Mex.

Fourth. Seventy thousand dollars to pay the Hatch flood damages, New Mexico.

I feel that all the legislation quoted is constructive and beneficial for the future development of New Mexico.

THE LATE REPRESENTATIVE A. E. B. STEPHENS

Mr. LONGWORTH. Mr. Speaker, while I can add nothing to the eloquent and heartfelt tributes which have been rendered by my colleagues to Colonel STEPHENS, I can not let this occasion pass without bearing my testimony to his worth as a citizen, statesman, and friend. It has been my privilege to know him intimately for many years, and I hoped against hope in the busy days which attended the closing of the last Congress that his life would be spared and that we would continue to benefit here from his wise counsel and untiring zeal in the discharge of the duties of his high office.

But in the wisdom of Providence it was not to be. We who knew him well realize the greatness of our loss, and with pride in his achievements and affection for the man do honor to his memory.

For many years Colonel STEPHENS served his city faithfully and well. As a citizen he never shirked a call to duty, and in response to that call he came here to Congress at a time when the opportunity for service was never greater. The World War had just ended, and he at once devoted himself unsparingly to the perplexing problems and the heavy burden of responsibility which confronted Congress in that trying time.

His statesmanship was not of the showy type which gains for itself headlines in the newspapers. He never sought for such publicity, but it would be well for us if we had more men willing, as he was, to submit to the drudgery of hard work necessary to a thorough understanding of the legislative proposals upon which a Member of this body must constantly pass judgment. And I think it was in his devotion to the work of his committee—for it is in the committees of the House that the more laborious work of the Congress is accomplished; there the facts are gathered and the evidence weighed—that he achieved his greatest success, and there his work came to full fruition and has left its permanent impress upon the record of the last four Congresses. No committee of the House is charged with heavier responsibilities than the great Committee on Naval Affairs. Colonel STEPHENS's colleagues on that committee have testified to the great value of his work there, but it has come to me also to have some knowledge of it, and I know that it entitles him to a well-earned place among the constructive statesmen of the last decade.

And yet, Mr. Speaker, it is not as a citizen or statesman that he will be best remembered, but as a friend. I doubt if any man I have ever known had more real friends. Quiet and unassuming, with a keen wit and a rare capacity for sympathy, always ready to give the best that was in him, BUZZ STEPHENS endeared himself to a host of friends who will ever hold him in affectionate remembrance.

STONE MOUNTAIN EXERCISES

Mr. FAUST. Mr. Speaker, on April 9, at Stone Mountain, near Atlanta, Ga., appropriate dedicatory exercises were held by the Stone Mountain Memorial Association.

The monumental undertaking was far from completion but had reached the stage where the unveiling ceremonies might fittingly be held. The Congress by joint resolution provided for a commission of Senators and Representatives to be present at the dedicatory service. It was my good fortune to be designated as one of the House members of the commission.

Representative THOMAS M. BELL, of the ninth Georgia district, adjacent to Atlanta, who had been a director of the undertaking for many years, was also appointed on the commission, and to his unfailing thoughtfulness his colleagues were much indebted for many pleasant courtesies. Among them was an impromptu reception at the railroad station of his home city, where citizens had gathered to greet and welcome their Congressman and those in his party. It was a splendid expression of the esteem and affection in which Congressman BELL is held by his constituents.

The program at Atlanta, both of entertainment and dedication, left nothing to be desired. On the afternoon of the appointed day a large assemblage gathered at the base of Stone Mountain. The president of the association, Mr. Hollis M. Randolph, had charge of the program. The exercises were held at the foot of this giant rock. Stone Mountain itself is sufficient to excite wonder and comment. Its base is nearly 10 miles in circumference. It rises abruptly to a height of 700 feet. The side upon which the sculptor is working out the details of his conception is almost perpendicular. The substance of the mountain is a particularly hard granite. Geologists say that the wear of time and elements upon the figures wrought will be almost imperceptible. Great masses of the outer material have been removed from the place where the likenesses are being carved, so that the figures that are chiseled therein are on the virgin stone, unmarred by wind or weather.

When the work so far completed was disclosed by the dropping of the curtain, the magnitude of the entire undertaking became apparent. There was a rough hewn but plainly discernible outline of the faithful horse Traveller, and the figure of General Lee mounted was almost complete in every detail. About twenty times life size, it is up to now the most ambitious undertaking of any sculptor. Other figures will join the silent leader as the work progresses.

The exercises attendant upon the unveiling were notable. The chief address of presentation was delivered in masterly form by Judge Marcus A. Beck, a justice of the Supreme Court of Georgia. He traced in interesting and eloquent detail the life, activities, and character of General Lee. This address, as well as the response and other proceedings, are available, and would be found entertaining and valuable.

The response and acceptance for the Nation was fittingly and happily made by Mayor Walker, of New York City. An interesting part of the exercises was the signal for the unveiling, which was given by the release of carrier pigeons, the door being opened by Robert E. Lee, 4th, the sturdy and handsome 3-year-old great-grandson of the general.

Of course, in such an atmosphere and at such an event the memories and traditions of the southland were a part. The personality and character of their chieftain will always be revered. The visual imagery upon Stone Mountain is but an added expression of the memories and sentiments they cherish. More than two generations after the conflict in which he played an important part, it seems most appropriate that the exercises should be joined by those from all sections of the country and official cognizance taken by the Congress. All could sincerely join in the feeling that here indeed was an occasion that emphasized again the reunion of North and South, which happily has for years been accomplished.

MY ANNUAL REPORT TO THE CITIZENS OF THE NINTH CONGRESSIONAL DISTRICT OF NEW YORK

Mr. O'CONNELL. Mr. Speaker, the first session of the Seventieth Congress has just closed, and under the unanimous permission granted to me by my colleagues in the House I have the honor of making this report to the voters of my district of my activities with respect to the important legislation which has been under consideration by the Congress.

As I said in my report two years ago, we must establish contacts. This, my fourth annual report, is distributed in the hope that it will stimulate thought and a deeper sense of the responsibility relative to the work of the National Legislature, as well as to enable you to determine to what degree and in what manner I have striven to represent my district and its variegated interests.

The Seventieth Congress convened December 5, 1927, the Members of which were elected in November of 1926. As you doubtless know each Congress has two sessions—a long session and a short session. The one just closed was what is known as the long session and continued from December 5 to May 29.

Because of the multiplicity of important legislative matters that came up for consideration and deliberation, I can deal but briefly in this report with only the outstanding questions that came before us.

TAXATION

The new revenue act which the two Houses finally passed and the President signed will cut taxes $222,000,000. In all the legislation affecting this branch of our economic legislation I have consistently maintained an attitude of opposition to any plan which sought to give a larger reduction to the wealthy than it would to those of low or moderate incomes, thus relieving that part of our public least able to bear the tax.

In the new tax bill the Ways and Means Committee followed three principles. First, that the reductions should not be such as would produce a deficit in the Treasury; second, that the reductions should be distributed where relief appeared more necessary and advisable; and third, that the taxes that had not been reduced since the World War should be given special attention. The following table will show precisely how each individual class is affected by the new rates:

Decrease in revenue effected under bill reducing tax cuts

The rate changes provided by the new tax reduction bill follow:

REDUCTION IN REVENUE

Corporation rate, reduced 13½ to 12 per cent	$123,000,000
Corporation exemption, increased $2,000 to $3,000	12,000,000
Automobile tax, repealed	66,000,000
Admissions tax, exemption increased from 75 cents to $3	17,000,000
Club dues, exemption raised $10 to $25	1,000,000
Earned income allowance, increased $20,000 to $30,000	4,500,000
Cereal beverages, repealed	185,000
Wine taxes, reduced	1,000,000
Foreign-built yachts, repealed	10,000
Narcotics, druggists' fee reduced from $6 to $3	150,000
Total reductions	225,295,000

INCREASE IN REVENUE

Withholding tax at source	2,000,000
Prize fights admissions, 25 per cent over $5	750,000
Foreign-built yachts, customs	50,000
Total increases	2,800,000
Net reduction	222,495,000

APPROPRIATIONS

One of the most important functions of the Government is the raising of revenue and appropriations. At the opening of each session the President, through the Bureau of the Budget, submits an estimate of the money that will be necessary to carry on the work of the various governmental departments. Upon the basis of these estimates, which embraces approximately 1,000 pages in the bill, the various appropriation committees submit the various supply bills. During the last session of Congress the total amount appropriated was $4,595,448,625.59. The following are the major appropriation bills and the amount carried in each bill:

Agriculture	$139,138,793.88
District of Columbia	37,625,208.00
Executive and independent offices	527,593,111.00
Interior	272,656,039.00
Legislative	17,746,893.26
Navy	362,145,812.00
State, Justice, Commerce, and Labor	89,820,597.64
Treasury and Post Office	1,061,342,060.00
War	398,517,221.50
First deficiency	200,936,668.02
Second deficiency	99,172,485.76
Permanent annual and indefinites	1,388,753,735.53
Grand total	4,595,448,625.59

The term "permanent appropriations" is used to indicate expenditures authorized by previous Congresses.

REVENUES

The following table shows the manner of raising revenues to meet the above-mentioned expenditures:

Customs	$602,000,000.00
Income tax	2,065,000,000.00
Miscellaneous internal revenue	640,545,000.00
Miscellaneous receipts	501,952,314.00
Total	3,809,497,314.00
Gross total receipts	753,000,000.00
Gross total receipts (estimated)	4,562,497,314.00

While the foregoing would indicate a deficit, it is assumed, based on past experience, that actual cash withdrawals will fall sufficiently short of the sum total of the appropriations as actually to leave a surplus.

THE POSTAL EMPLOYEES NIGHT DIFFERENTIAL BILL

After working for several years on a bill that would grant a differential in pay for night workers in the Postal Service, the bill was finally passed by the House and the Senate, but was vetoed by the President. I was very happy to give my hearty support to this meritorious legislation which is favored by all post-office employees and which finally became a law. To my mind, it was a needed recognition of deserved public service in a substantial manner. And may I add that the men and women of the service gladdened my heart by their appreciation, as expressed by countless letters and telegrams.

UNEMPLOYMENT

Next to universal peace the greatest problem of the day in our country, as well as in every other country, is the great problem of unemployment. Its proper solution will relieve many other perplexing problems. It should also reduce the tax burdens now overwhelming our cities, towns, and villages. It will greatly lessen the work now forced upon social service and charity organizations. It will decrease the number now housed in almshouses and other abiding places throughout the land. It will sharply decrease the temptation that prompts men to crime, with a consequent diminishing number of those that are held in solitary confinement throughout the country. In a word, it will eliminate the misery and grief that accompanies great periods of industrial depression with the contentment and happiness that goes with steady uninterrupted employment.

MUSCLE SHOALS

A question that has engaged the attention of Congress for several sessions is Muscle Shoals, and considerable discussion took place during the present session in the Senate and in the House upon this subject.

The proponents of the measure advert to the already large governmental investment, the advantage of the plant as a means of producing cheap nitrate and fertilizer as a benefit to our farmers. The discussion developed the proposition that the United States, having so heavy an investment, could not afford at this time to entirely abandon the project, but should utilize the works for the benefit of the public in the production of electric energy that would furnish, in addition to nitrate and fertilizer, light and power as well to a tremendous section of the country. It is hoped that the public will get cheaper light and power, because the Government will control the power project.

An amendment was written into the bill which permits of the manufacture of nitrates and the development of electrical energy, but prevents the manufacture of fertilizer except for experimental purposes. I voted for the above amendment and for the bill. Muscle Shoals in operation is a great national asset; while idle it is a white elephant on our hands.

FLOOD CONTROL

The sympathy of the Nation went out to the poor people of the Mississippi Valley when that vast territory was inundated by an avalanche of water 300 miles in length and 100 miles in width, covering, as it did, every city, village, and farm.

I believe it to be a national problem financed and controlled by the Federal Government, and for that reason I supported legislation recommended by the Flood Control Committee, which personally investigated this great question. This measure received the sanction of a large majority of the Members of the House and Senate. I voted in the affirmative.

THE BOULDER CANYON PROJECT

The paramount purpose of this legislation is the protection of human life and property in Imperial Valley, Calif., now under a constant menace of destruction from floods. A further explanation of the bill is found in the report of the present Secretary of the Interior, Dr. Hubert Work, in which he states:

> The general plan and purpose of this measure have my support and I favor its being made a national undertaking to be carried out and administered by the Federal Government.

While Boulder Dam is primarily a flood-control and irrigation project, it is capable of developing considerable electrical power and will be a source of domestic water supply for southern California. Boulder Dam and Muscle Shoals will add to the wealth of the Nation and provide employment to many thousands of our people. I voted for the Boulder Dam project.

IMMIGRATION

The House of Representatives enacted a bill liberalizing the present immigration laws by permitting, to a limited extent, the reuniting of families who have been separated by reason of the immigration policy which has been in effect since the enactment of the original quota restrictive immigration act of 1921. It was my pleasure to support this human legislation, because in my judgment it was a mistaken policy to permit the entry of a husband or father and to exclude for a great number of years the remainder of the family.

This legislation, without interference with the quota assigned to the various nations, merely grants a preference to the families of aliens who are already residents of the United States. It in no way changes our present immigration policy, but it selects, as it were, for future immigration those who are most likely to make America their permanent home. I very gladly supported this legislation permitting the reuniting of separated families.

COAL

Any number of bills and resolutions were presented bearing on this important subject. It is a matter of regret to report that no definite action was taken by those in control of either branch of the Congress to meet the issue and bring about a suitable solution of this very vital problem. Despite the recognized dilemma of the operators who are verging on bankruptcy, that the miners are suffering with their families in untold hardship and misery, and that chaos and confusion obtains in both bituminous and anthracite fields, nothing has been done.

Public opinion must in the end be concentrated upon a situation that calls for constructive remedial legislation.

The coal industry is one of the most disorganized in the United States. The public suffers from constant strikes, and the workers suffer from unemployment and low standards of living.

RADIO

I supported the bill extending the life of the Radio Commission another year, believing it necessary to enable that body to work out the many important and difficult problems which surround the art of the radio. I opposed the amendment which directs the commission to make equal allocation to each of the five zones for the reason that the licensing authority already had sufficient power conferred upon them to deal with this question and because broadcasting should be allocated on the basis not of population but of radio receiving sets. The act of 1927 provided briefly that there shall be an equitable distribution of radio service in the various five zones; this amendment ties the hands of the commission and retards the progress of the radio.

AMENDMENT TO THE CONSTITUTION

The joint resolution proposing an amendment to the Constitution fixing the commencement of the terms of President, Vice President, Members of Congress, and fixing the time of the assembling of Congress, was defeated in the House.

While this resolution was being considered many amendments were proposed, one of which would extend the terms of Representatives from two to four years, their elections to be held at the same time the President is elected.

While I favor summoning the Congress to meet at an earlier date than is now provided, I voted against the adoption of this resolution because of the uncertainty of some of its provisions.

Under this proposal the new Congress will have to canvass the electoral vote for President and Vice President within 20 days after it convenes, and should a deadlock occur serious consequences might result. I hope a perfected resolution will be offered in the next session, and if it is free from faulty provisions, I shall support it.

In attempting to amend the Constitution it should not be done hurriedly; deliberate rather than hasty consideration should be the rule. One recent amendment hastily considered has proven disastrous. It has been productive of graft, perjury, and other unlawful acts, including that of murders, in its attempted enforcement. The failure of the eighteenth amendment is still fresh in the minds of the people. Therefore let us consider carefully this amendment before submitting it to the States for ratification.

FARM RELIEF

The Haugen bill was introduced again, and after passing the House and Senate it was vetoed by the President, who denounced it as unsound economically, suggesting it would injure rather than benefit the farmer. Many agricultural organizations in our State opposed this bill, fearing it would do great harm to the industry—I voted against this bill. The relief the farmers are asking for now is a reduction in freight rates on farm products, a reduction in taxes, better roads, and improved marketing facilities. I have supported legislation designed to bring about this needed relief.

PROHIBITION

Many bills were introduced to modify the Volstead Act. They were all referred to the Judiciary Committee, but no action, I regret to say, was taken on them during this session.

PENSION BILLS

With the exception of a bill increasing the rates of pensions for widows of Civil War veterans no pension bills except omnibus bills were passed in the past session of Congress. Several widows residing in my district in whose cases I was interested were granted pensions and increases in pensions in the omnibus bill which passed the House and Senate and was signed by the President.

The general pension bill increased the rates for Civil War veterans' widows from $30 to $40 per month; also provided for the payment of this larger rate to all widows who had attained the age of 75 but must have been married prior to June 27, 1905.

I was very glad to vote in favor of this bill for the dependent widows of our veterans of the Civil War.

CONVICT LABOR BILL

I voted for the bill which enables the State to prohibit the shipment of prison-made goods as articles of interstate commerce. It was supported by organized labor and many business and civic organizations.

WORLD WAR VETERANS' ADJUSTED COMPENSATION ACT

To care for several thousand ex-service men who have not as yet applied for their adjusted compensation, the Congress enacted legislation amending the World War adjusted compensation law. This amendment comprised three major provisions as follows:

First. It extended for a period of two years the time within which application may be filed for adjusted compensation.

Second. It removed all doubt as to the finality of the determination of the Secretary of War and the Secretary of the Navy concerning the validity of a lost application.

Third. It extended the benefits of the act to dependents of veterans who have been absent from their homes, continuously and without explanation, for a period of seven years.

This bill received the unanimous vote of the membership of the House of Representatives, among which I was glad to be numbered. It was a just and meritorious measure.

AMENDMENTS TO WORLD WAR VETERANS' ACT

Other measures of concern to our ex-service men which received my support were the amendment to the World War veterans' act, liberalizing the present war risk insurance requirements, and the Rogers bill providing $15,000,000 to extend the hospitalization facilities of the Veterans' Bureau.

OTHER IMPORTANT BILLS

In addition to the bills which I have thus far touched upon Congress acted upon many other measures of more or less importance. Among them may be included:

The bill to investigate submarine disasters, postal rates revision, alien property bill, coordination of public-health activities, merchant marine bill, good roads, migratory bird refuge bill, public buildings bill, Federal employees' pay bill, customs inspectors' pay bill, immigration inspectors' pay bill, fourth-class postmaster allowances, and aviation. With the exception of several amendments, I supported these measures.

THE UNFINISHED BUSINESS

Many important measures, some good, some bad, are not acted upon as the first session of the Seventieth Congress goes into history. These necessarily will be pressed by the proponents when the second session is called to order early in December. Among these I might mention:

The all-American canal (Great Lakes to Hudson), the universal conscription act, reapportionment of Congress, railroad consolidation, resale price bill, regulation of motor busses, the Sunday observance (or blue law), postal employees' Saturday half holiday, Pullman surcharge, coal bill, national education bill, amendment to retirement act, and prohibition modification.

SUMMARY

It is difficult to realize the vast amount of work that comes to the attention of the average Congressman every day in the week. I mean by this statement not only the legislation which has to be considered in the committees and in the House of Representatives but also the many personal-service requests which arrive in every mail—requests for assistance in pension cases, compensation claims, civil-service examinations, immigration and passport matters, Federal appointments, and innumerable minor matters, all of which enable the Congressman to be of better service to his constituents and arouse a greater and more personal interest on the part of the people in their Government.

During the session I have not been absent from any of the important roll calls, except in case of illness or when in conference with people of our district who were interested in important legislation. An inspection of the official voting records will show my record of attendance to have been high.

Never in a single instance was there any persuasion from political boss, leader, or organization to influence me for or against any legislation. I cast my vote on every question according to conviction and having in mind the best interests of the people.

This intelligent and active cooperation between the people and their Representative is in every way essential if we expect to improve the machinery of our Government. To stimulate that interest in my district is the motive which prompts my publishing this annual report of my congressional activities. Although Congress has adjourned until December, my office at Washington will remain open to serve the people of our district. I shall also continue my Brooklyn office, where I can be reached when Congress is not in session. By maintaining these two offices and by keeping them open throughout the year I am enabled to render effective service to the residents of the ninth congressional district.

Of course, at times Congress is subjected to unnecessary criticism, but regardless of any such criticism I regard it a very great honor to be the Representative of our district in the greatest and most powerful legislative body in the world.

I am therefore profoundly grateful to all for the confidence reposed in me during my years of service in the House, and I shall continue to represent my district and its people to the very best of my ability.

DECAYING SHRINES AND TEMPLES OF CHINA

Mr. COLLINS. Mr. Speaker, on a recent visit to China, I was appalled to see the state of dilapidation and ruin into which most of the temples and shrines of that unknown country has fallen. Old buildings and monuments whose lovely beauty has enthralled dignitaries and scholarly travelers are going fast into decay and if left alone these manifestations of Chinese civilization will follow into dust those of the Aztec and Incas.

Beautiful shrines and temples on the approach to the Ming Tombs are nearly naked. Others at the Summer Palace and Yellow Temple and at all the sacred spots in that untouched country are already defaced. The orange red and blue walls and the three-tiered roofs of superb yellow tiles that characterize so many of the historic places in China are falling apart and will soon be gone. Many of these buildings are of frame construction, except their tiled roofs, and they will go more rapidly than the others.

Money is needed to restore them all. The Chinese are without the means to do it. Poverty is almost the rule with them. Their spending capacity is almost nil, and added to this, political chaos exists throughout their land. If these monuments and temples are to be saved, the time to do it is now and delay will mean their ruin and loss. Forward-looking citizens of our own country, I trust, will rise to the opportunity and save these beautiful buildings that speak so fully of the artistic struggles of by-gone orientals.

It is only fair to those that come after us for us to preserve intact for them not only our own art and architecture but as well the art and architecture of the ancients. We do not do our full duty merely by passing on to them our own works. It is our equal duty to pass on to them the art of the ancients and other expressions of their creative genius.

THE TARIFF AND THE FARMER

Mr. LEAVITT. Mr. Speaker, from Chester C. Davis, formerly commissioner of agriculture for my State of Montana, I have just received a very warm letter of appreciation of what I have done in Congress in connection with legislative matters having a bearing on the welfare of the farmers of my State and district, as well as of the Nation. Mr. Davis, who is now connected with the Agricultural Service in Washington, an office which conducts research, information, and representation work for various agricultural organizations, including the Farmers' Union and the American Farm Bureau Federation, states that it was at the suggestion of the farm groups that the letter was written.

I deeply appreciate this communication from the farm organizations. I appreciate it especially because Mr. Davis states therein that I have always been active in this regard, and very graciously adds that he recalls the day when I made the first address delivered in the House of Representatives for the farm bill of 1924, during my first session in Congress.

My hope is that this evidence of work already done and of interest shown will assure me a patient hearing here and among the people it is my honor to represent as I call attention to what I know to be a very dangerous proposal advanced in a seductive manner to the farmers of this country. I refer to the false and misleading doctrine that agriculture will be helped by downing the tariff.

Several speeches have been made here covering in a broad way the beneficial effects to agriculture of a protective tariff. I shall refer only to wheat, sheep and wool, cattle, poultry, dairy products, and sugar. I select these because they are basic commodities in my State.

The history is written in both laws and experience to prove the value and necessity of tariffs on these articles. This history is that under the tariff law of 1913, when the Democratic theory of the tariff on agricultural products was put into effect, all of these basic Montana products except sugar were put on the free list without any tariff protection whatever, and that sugar had a much lower rate than it has now under a Republican tariff. As soon as the war was over and the trade of the world began to flow normally again, the farmers of America paid for that fundamental error with the ruin of their industry. At once the stored-up food and animal products of South America, Australia, and all the low-cost sections of the earth appeared at our ports in tremendous cargoes. With no adequate tariff wall to hurdle they came in, cheap and free. Thus American farmers paid the price of a shortsighted policy by direct and disastrous competition with countries of low living standards, ill-paid labor, and cheap transportation by water.

In the midst of that tragedy a Republican Congress was elected and it wrote at once an emergency tariff bill. But there was a Democratic President then who held the traditional theory of free trade or low duties on agriculture, and he vetoed the bill. That is bitter history, and history repeats itself.

In 1921 there was a Republican President, as well as a Republican majority in Congress, and the first concern was again for agriculture. An emergency bill was passed and signed, putting protective rates to guard our own farm products and save the American market for our own producers. In 1922 the present tariff law was enacted, and on each and every one of these Montana products a protective tariff was placed or materially increased. None was left on the free list, and every farmer who produces these things benefited greatly thereby.

I am aware, of course, that the opposition questions the value to the farmer of a tariff on some of these products. They select, for example, dates when the tariff on wheat has not by itself held the Minneapolis prices on comparative grades above those at Winnipeg. But that is like saying that the Battle of Bull Run proves that the Union lost the Civil War. It is true that a large surplus here and a shortage in Canada will reduce or overcome the benefit of our tariff. Our surplus sold abroad is continually dragging down the domestic price by competition at Liverpool. But the established fact is—and it can not be controverted—that under the existing tariff wheat prices do tend to be higher in the United States than in Canada. And this in spite of the fact that Canadian wheat averages higher in intrinsic quality, considering our entire country. It is only Montana which meets and competes successfully with Canada in quality.

The food research institute of Stanford University says, basing its conclusions on Government reports and individual investigations, and comparing the Minneapolis and Winnipeg markets through the crop years of 1923–24, 1924–25, and 1925–26, that under the present tariff on wheat, in the ordinary crop year, the price margin in favor of American spring wheat averages about 26 cents a bushel. The margin varies and it is sometimes wiped out or even reversed, but altogether there is no question that with a substantial tariff duty on wheat imported into the United States for domestic consumption wheat prices tend to stand higher in the United States than in Canada. We do not get the full benefit of the 42 cents tariff rate because we export a surplus. The control of that surplus until our population increases to consume it is the most acute of our problems. I am also quite convinced that there would be benefits to the producers of Montana high-grade wheat from the repeal of the drawback or milling in bond provision of the tariff. I shall press for a consideration of that point when the revision of the tariff confronts the next Congress. There are also other economic forces which reduce and at times reverse the margin. But there is some real benefit, and certainly no one who understands the facts will say that because the tariff on wheat is not fully 100 per cent effective, the remedy is to rob the farmers of what benefit they do receive. Surely no one can suggest that except he whose ingrained political theories and traditions set his prejudices above his judgment.

Montana has also become a sugar-producing State. In 1926 Montana and the contiguous fields of Wyoming produced 130,000 tons of sugar beets. In that same year imports into the United States of cane and beet sugar amounted to $244,000,000, a value of two and one-half times the farm value of our national domestic production. The average quantity of sugar obtained that year from a ton of beets was about 254 pounds. The minimum guaranteed price as a whole was $7 a ton, so that the grower received a minimum of 2.76 cents a pound for sugar in the beet. The Cuban grower got 1 cent a pound for his in the cane. The difference is 1.76 cents, which is the tariff rate per pound. The American beet grower got the benefit. But the tariff rate under the democratic law of 1913 was only 1.005 cents, and I have personally in debate wrung from two Democratic members of the Committee on Ways and Means, men who would help write the new tariff law should their party come back into power, the statement that they would again reduce the tariff on sugar. Reduction to the rate of the 1913 law would cost the beet grower about $1.90 on every ton of beets he grew. No; it must be neither reduced nor eliminated, but instead it must be made more permanently effective by limiting the importation of free sugar from the Philippines.

Now as to wool. The Democratic tariff law of 1913 put wool on the free list, and there is high Democratic authority in both the Senate and the House that they would also do that again if they could. The Republican law of 1922 put a duty on wool of from 12 cents to 31 cents a pound. Montana produces about 24,000,000 pounds of wool. The effect of the tariff therefore interests us materially. In January, 1914, while the Democratic tariff law of 1913 was in effect and before war prices prevailed, the Boston price of wool was actually below that of London, and in 1921 it was only 15.1 cents above. Then came the emergency act of 1921 and the act of 1922 establishing the present wool duty. In 1922 the Boston price went 31.5

cents above the London price, and it has exceeded it by from 21 cents to 33 cents ever since. And it was not wool alone which was on the free list under the Democratic law. Sheep, mutton, and lamb likewise came in free. All are protected by tariff duties to-day.

The raisers of cattle are likewise greatly benefited by the tariff as it is now written. Instead of any reduction the inclusion of hides is advisable. The Democratic tariff law of 1913 put fresh beef, veal, and live cattle on the free list and thus in open competition with the Argentine and all the world. We still import a part of our beef supply and the tariff is therefore effective in protecting our domestic price. This is likewise true of butter and poultry. Both have been given advanced rates which must be maintained and increased, for any reduction would be well-nigh fatal to these industries.

The growers of all these Montana products are keenly alive to the value of the present tariff to themselves. That is evidenced by the fact that I have heard from representatives of them all asking me to help maintain and in some instances to secure increases in the existing schedules. I now have before the Tariff Commission a case of the poultry producers for increases. The Montana Stockgrowers' Association has asked for an advance in the tariff on beef products and for a duty on hides. The beet-sugar growers have asked defense of the integrity of their schedules and protection from the advancing competition of free sugar from the Philippines. The wheat growers and the wool men are of like mind, and I am in accord with them all. The protective tariff is a necessity to maintain our own farm industry against cheap foreign products.

But what, you ask, has this to do with the dangerous fallacy that downward Democratic revision of the tariff will elevate the farmer? Just this: The history of Democratic tariff writing is that while they are reducing the tariff schedules on industry, and thus lessening the power of labor and industry to buy the farmer's products, they have always even more greatly reduced or eliminated entirely the tariff on products of the farm.

That, however, is not the only reason for caution in accepting such a doctrine. While it is important to take into account immediate price problems in considering the tariff, we must not fail also to look well and clearly into the future. In indulging the hope to increase the benefits of the tariff to agriculture we must recognize some important facts. And one outstanding fact is that our agriculture is becoming less dependent on the foreign market while industry is becoming more dependent on it. Agricultural exports are now a diminishing part not only of our total exports but also are becoming a smaller percentage of the total domestic production in agriculture. On the other hand, exported industrial products are rapidly becoming a greater per cent of our total exports, and also a gradually increasing percentage of the fast-mounting output of our industries.

A few figures will illustrate these fundamental and interesting tendencies. In 1900 our agricultural exports were 62 per cent of the total value of all our national exports. In 1910 our agricultural exports had fallen to 51 per cent, in 1914 to 49 per cent, and in 1926 to only 41 per cent of our total exports. In the four-year period 1899 to 1903 we exported approximately 23.9 per cent of the total value of all our animal products and of our farm crops not fed. The per cent had fallen to 14.4 by 1909–1913. In 1914–1918 the percentage increased to 18.5 on account of exceptional conditions occasioned by the war, but it had declined again to 14.7 in 1926.

Now let us see what has happened regarding manufactured exports in relation to the domestic production of industry for the same period. In 1899 we exported 9.8 per cent of the value added by manufacturers in this country, compared with 13.1 per cent in 1913, 12.6 per cent in 1921, 8.8 per cent in 1923, and 10.4 per cent in 1925. Thus the proportion which manufactured exports bear to the total value added by manufactures in this country has more than held its own since the beginning of the century, notwithstanding the phenomenal increase of 546 per cent in the total value added by domestic manufactures. In approximately the same period—1900–1904 to 1922–1926—the value of agricultural exports increased only 122 per cent, while that of all other exports advanced 338 per cent.

In view of this fact that agriculture is becoming continually less and industry steadily more dependent on the foreign market, it would be dangerous for the friends of the farmer to urge a drastic downward revision of the tariff. As industry becomes more dependent on world markets and as our foreign investments grow—that is to say, as we become more and more a creditor nation—the sentiment for lower tariffs or for free trade will grow stronger and stronger among the nonagricultural population and the cities' interest in cheap food will aid in bringing about this change of sentiment. Then when protectionism and free trade shall have traded supporters and the farmers shall be even more clear than they are now as to the need to themselves of protection they may not be strong enough in numbers to maintain the protective system which some of their mistaken friends are now so willing in their ignorance to destroy.

At that time we may find in this country too late a repetition of the history of England in the first half of the nineteenth century. Then the farmers of England became too weak in Parliament, through the growth of the cities, to maintain tariff protection and their markets were thrown open to foreign competition, with resulting ruin and disaster. It is certainly in the interest of all our farmers, especially of those of Montana and of all other States similarly situated, to maintain and strengthen—not destroy—that protective system from which they are now in a position to derive ever-increasing benefits.

It is not only a study of such facts and figures which convinces me of this danger. I have in my files the propaganda of textile manufacturers of New England for a reduction of the tariff on wool. I have the propaganda of the international bankers, who have great investments abroad, for tariff reductions to open wide our markets to the products of the world. I have the evidence of city populations along the eastern coast and elsewhere demanding the cheap food which can so easily reach them by sea. Many of them know as relatives the producers in foreign lands better than they yet know the people and the needs of the great farm areas of the interior of America. To them the vision of building and maintaining a mighty America through the development of all its own resources may not always be as clear as the vision of cheaper meat and sugar and bread and butter and poultry and clothes, and in that regard I regret to say that they see eye to eye with those who hold the free-trade and low-tariff tradition of the Democrats.

Thus join together the free traders and the international bankers in a league for a transparent effort to make of the farmers a catspaw to begin the tearing down of that protective tariff system which at once guards agriculture from ruinous competition in what it sells and helps to keep prosperous and possessed of high purchasing power domestic industry and labor, which furnish it the best home market in the world. In that home market our farmers sell nearly 90 per cent of what they produce. The words "Down with the tariff" in the mouth of a farmer are the words of suicide.

There will be revisions in the tariff law, but they must be made by a Republican Congress, which will again protect agriculture along with labor and industry, and not under the Democratic theory, which will repeat history by not only opening the gate but throwing down the fence.

STATUS OF BILLS REFERRED TO THE COMMITTEE ON INDIAN AFFAIRS AT CLOSE OF FIRST SESSION SEVENTIETH CONGRESS

Mr. LEAVITT. Mr. Speaker, I am inserting in the RECORD the usual report of the Committee on Indian Affairs covering the bills considered during the first session of the Seventieth Congress. It is my intention to complete this report at the end of the Congress, including a more detailed discussion of the status and need of legislation having to do with the welfare of the American Indians. Since the statement at the close of the last Congress there has been received the report of the Institute for Government Research covering the problem of Indian administration. It has been too recently received, however, for discussion at this time or for application to the deliberations of the committee in the session just closed. It is, however, in the hands of the members of the committee.

During the session 89 bills were given final consideration and reported to the House. Of these, 58 have already become law and 1 was removed from the calendar because its provisions were included in the second deficiency bill. There are 14 measures which have passed the House and are pending in the Senate. Eight bills which have passed the Senate are now pending before the House committee. The status of all bills which have been reported is shown in the following tabulation. The bills are arranged numerically, an asterisk (*) being used to indicate those which have become law. Since 992 bills have become law during the entire session, these 58 comprise 5.74 per cent of the total for the session:

*H. R. 70: Authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex. (H. Rept. 380. S. 700 substituted. Public Law 169.)

H. R. 167: To amend the act of February 12, 1925 (Public, No. 402, 68th Cong.), so as to permit the Cowlitz Tribe of Indians to file suit in the Court of Claims under said act. (H.

Rept. 1029. Passed House May 7, 1928. Passed Senate May 10, 1928. May 18, 1928, returned with veto message. May 19, 1928, referred to committee.)

*H. R. 173: To provide funds for the upkeep of the Puyallup Indian Cemetery at Tacoma, Wash. (H. Rept. 547. Public Law 204.)

*H. R. 308: Authorizing an appropriation for the survey and investigation of the placing of water on the Michaud division and other lands on the Fort Hall Indian Reservation. (H. Rept. 485. Public Law 203.)

*H. R. 356: To amend section 2 of the act of March 3, 1905, entitled "An act to ratify and amend an agreement with the Indians residing on the Shoshone or Wind River Indian Reservation, in the State of Wyoming, and to make appropriations to carry the same into effect." (H. Rept. 549. Public Law 192.)

*H. R. 431: To authorize the payment of certain taxes to Okanogan County, in the State of Washington, and for other purposes. (H. Rept. 736. Public Law 301.)

*H. R. 441: To authorize an appropriation to pay half the cost of a bridge and road on the Hoopa Valley Reservation, Calif. (H. Rept. 480. Public Law 402.)

*H. R. 462: Providing for a per capita payment of $100 to each enrolled member of the Chippewa Tribe of Minnesota from the funds standing to their credit in the Treasury of the United States. (H. Rept. 589. Amended to provide payment of $25. Public Law 172.)

*H. R. 491: Authorizing the attorney general of the State of California to bring suit in the Court of Claims on behalf of the Indians of California. (H. Rept. 951. Public Law 423.)

*H. R. 3539: For the relief of Frank Murray. (H. Rept. 1390. Private Law 279.)

H. R. 5479. To provide for the purchase of land, livestock, and agricultural equipment for the Alabama and Coushatta Indians in Polk County, Tex., and for other purposes. (H. Rept. 824. Included in the second deficiency bill, H. R. 13873, in slightly different form. The latter bill became public law.)

H. R. 5574. Authorizing the Lower Spokane and the Lower Pend d'Oreille or Lower Kalispell Tribes or Bands of Indians of the State of Washington, or any of them, to present their claims to the Court of Claims. (H. Rept. 958. S. 1480, which is listed below, substituted and passed by House on May 7, 1928.)

*H. R. 6862. Authorizing and directing the Secretary of the Interior to investigate, hear, and determine the claims of individual members of the Sioux Tribe of Indians against tribal funds or against the United States. (H. Rept. 940. Public Law 347.)

H. R. 7204. To authorize the creation of Indian trust estates, and for other purposes. (H. Rept. 1358.)

H. R. 7207. To appropriate treaty funds due the Wisconsin Pottawatomie Indians. (H. Rept. 553. S. 1759, listed below, substituted and passed.)

H. R. 7346: Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment thereon in claims which the Winnebago Tribe of Indians may have against the United States, and for other purposes. (H. Rept. 1389. Passed House in amended form on May 21, 1928.)

*H. R. 7463: Amending an act entitled "An act authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims. (H. Rept. 948. Public Law 267.)

H. R. 8280: Conferring jurisdiction upon the Court of Claims to hear, adjudicate, and render judgment in claims which the northwestern bands of Shoshone Indians may have against the United States. (H. Rept. 1030. S. 710, listed below, substituted and passed House in amended form on April 16, 1928.)

*H. R. 8281: To provide for the withdrawal of certain described lands in the State of Nevada for the use and benefit of the Indians of the Walker River Reservation. (H. Rept. 176. Public Law 88.)

*H. R. 8282: To provide for the permanent withdrawal of certain lands bordering on and adjacent to Summit Lake, Nev., for the Paiute, Shoshone, and other Indians. (H. Rept. 177. Public Law 89.)

*H. R. 8291: To amend section 1 of the act of June 25, 1910 (36 Stat. L. 855), "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes." (H. Rept. 465. Public Law 90.)

*H. R. 8292: To reserve 120 acres on the public domain for the use and benefit of the Koosharem Band of Indians residing in the vicinity of Koosharem, Utah. (H. Rept. 178. Public Law 91.)

*H. R. 8293: To amend an act entitled "An act for the relief of Indians occupying railroad lands in Arizona, New Mexico, or California," approved March 4, 1913. (H. Rept. 464. Public Law 151.)

*H. R. 8326: To authorize the construction of a dormitory at Riverside Indian School at Anadarko, Okla. (H. Rept. 632. Public Law 233.)

*H. R. 8542: To provide for the construction of a hospital at the Fort Bidwell Indian School, Calif. (H. Rept. 554. Public Law 199.)

*H. R. 8543: To provide for the construction of a school building at the Fort Bidwell Indian School, Calif. (H. Rept. 555. Public Law 200.)

H. R. 8731: To authorize an appropriation for the construction of a road on the Lummi Indian Reservation, Wash. (H. Rept. 616. S. 1478 (listed below) substituted and passed by House.)

*H. R. 8824: To provide for the protection of the watershed within the Carson National Forest from which water is obtained for the Taos Pueblo, N. Mex. (H. Rept. 483. Public Law 194.)

H. R. 8831: To provide for the collection of fees from royalties on production of minerals from leased Indian lands. (H. Rept. 463. Passed House February 20, 1928. Passed Senate April 9, 1928, amended.)

H. R. 8898: To provide for the restoration to the public domain of certain lands in the State of California which are now reserved for Indian allotment purposes. (H. Rept. 556. Passed House February 20, 1928.)

H. R. 8901: To amend and further extend the benefits of the act approved March 3, 1925, entitled "An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any and all claims, of whatever nature, which the Kansas or Kaw Tribe of Indians may have or claim to have against the United States, and for other purposes." (H. Rept. 1387.)

H. R. 9033: To amend section 1 of the act of Congress of March 3, 1921 (41 Stat. L. 1249), entitled "An act to amend section 3 of the act of Congress of June 28, 1906, entitled 'An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes.'" (H. Rept. 633. Rereferred to the committee on March 2, 1928. See H. R. 13407.)

*H. R. 9037: To provide for the permanent withdrawal of certain lands in Inyo County, Calif., for Indian use. (H. Rept. 557. Public Law 92.)

*H. R. 9046: To amend section 17 of the act of March 2, 1899, entitled "An act to divide a portion of the reservation of the Sioux Nation of Indians into separate reservations and to secure the relinquishment of the Indian title to the remainder, and for other purposes," as amended by the act of June 10, 1896. (H. Rept. 1154. Public Law 460.)

*H. R. 9483: To provide for the acquisition of rights of way through the lands of the Pueblo Indians of New Mexico. (H. Rept. 816. Public Law 296.)

*H. R. 9994: To reimburse certain Indians of the Fort Belknap Reservation, Mont., for part or full value of an allotment of land to which they were individually entitled. (H. Rept. 462. Private Law 26.)

H. R. 10042: To provide for the addition of the names of certain persons to the final roll of the Indians of the Flathead Indian Reservation, Mont., and for other purposes. (H. Rept. 957. Passed House April 20, 1928.)

H. R. 10327: For the relief of Charles J. Hunt. (H. Rept. 864. Passed House March 30, 1928.)

*H. R. 10360: To confer additional jurisdiction upon the Court of Claims under an act entitled "An act authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims," approved May 14, 1926. (H. Rept. 746. Public Law 422.)

H. R. 10372: Regulating Indian allotments disposed of by will. (H. Rept. 1781. Passed House May 28, 1928.)

H. R. 10475: To authorize the Secretary of the Interior to issue a patent to the Bureau of Catholic Indian Missions for a certain tract of land on the Mescalero Reservation, N. Mex. (H. Rept. 818. S. 3007 (listed below) substituted and passed on May 24, 1928, by the House.)

H. R. 11064: For the relief of F. Stanley Millichamp. (H. Rept. 1522. Passed House May 25, 1928.)

*H. R. 11276: To authorize an appropriation from tribal funds to pay part of the cost of the construction of a road on the Crow Indian Reservation, Mont. (H. Rept. 1044. S. 3435 substituted and passed by House on April 14, 1928. Public Law 275.)

H. R. 11359: For the relief of the Arapahoe and Cheyenne Indians and for other purposes. (H. Rept. 954. S. 3343 (listed below) substituted and passed.)

*H. R. 11365: To authorize a per capita payment to the Shoshone and Arapahoe Indians of Wyoming from funds held in

trust for them by the United States. (H. Rept. 1238. S. 3366 substituted and passed by House on April 21, 1928. Public Law 324.)

*H. R. 11468. Authorizing the Secretary of the Interior to execute an agreement or agreements with drainage district or districts providing for drainage and reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of such district or districts that may be benefited by the drainage and reclamation work, and for other purposes. (H. Rept. 1506. Approved May 29, 1928. Public Law 564.)

*H. R. 11478: To amend an act to allot lands to children on the Crow Reservation, Mont. (H. Rept. 950. Public Law 342.)

*H. R. 11479: To reserve certain lands on the public domain in Valencia County, N. Mex., for the use and benefit of the Acoma Pueblo Indians. (H. Rept. 945. Public Law 481.)

H. R. 11484: Authorizing a per capita payment to the Rosebud Sioux Indians, S. Dak. (H. Rept. 1145; S. 3438 (listed below) substituted by House and passed.)

H. R. 11580: To authorize the leasing or sale of land reserved for administrative purposes on the Fort Peck Indian Reservation, Mont. (H. Rept. 1250. Passed House May 8, 1928. See S. 3593.)

H. R. 11582: To authorize the cancellation of the balance due on a reimbursable agreement for the sale of cattle to certain Rosebud Indians. (H. Rept. 955. House substitutes and passes S. 3355 (listed below) on March 24, 1928.)

*H. R. 11629: To amend the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service. (H. Rept. 956. Public Law 355.)

H. R. 11983: To provide for issuance of perpetual easement to the department of fish and game, State of Idaho, to certain lands situated within the original boundaries of the Nez Perce Indian Reservation, State of Idaho. (H. Rept. 1246. Passed House May 12, 1928.)

*H. R. 12000: To extend the period of restrictions on lands of certain members of the Five Civilized Tribes, and for other purposes. (H. Rept. 1193. House substitutes and passes S. 3594 on May 10, 1928. Public Law 360. See H. R. 13711 amending this.)

*H. R. 12067: To set aside certain lands for the Chippewa Indians in the State of Minnesota. (H. Rept. 1239. Public Law 461.)

H. R. 12312: For the relief of James Hunts Along. (H. Rept. 1724. Passed House May 28, 1928.)

H. R. 12414: Authorizing the classification of the Chippewa Indians of Minnesota, and for other purposes. (H. Rept. 1851.)

*H. R. 12446. To approve a deed of conveyance of certain land in the Seneca Oil Spring Reservation, N. Y. (H. Rept. 1251. Private Law 162.)

*H. R. 12574. To extend certain existing leases upon the coal and asphalt deposits in the Choctaw and Chickasaw Nations to September 25, 1932, and permit extension of time to complete payments on coal purchases. (H. Rept. 1421. S. 3867 substituted and passed by House on May 21, 1928. Public Law 507.)

H. R. 12604: Authorizing an advancement of certain funds standing to the credit of the Creek Nation in the Treasury of the United States to be paid to one of the attorneys for the Creek Nation, and for other purposes. (H. Rept. 1586. S. 3868, listed below, substituted and passed by the House.)

*H. R. 13342: To authorize a per capita payment to the Pine Ridge Sioux Indians of South Dakota. (H. Rept. 1424. Approved May 29, 1928. Public Law 517.)

H. R. 13407: Relating to the tribal and individual affairs of the Osage Indians of Oklahoma. (H. Rept. 1458.)

H. R. 13506: Fixing the salary of the Commissioner of Indian Affairs and the Assistant Commissioner of Indian Affairs. (H. Rept. 1653.)

H. R. 13606. For the relief of Russell White Bear. (H. Rept. 1726. May 28, 1928, passed House.)

*H. R. 13711: To amend section 4 of an act entitled "An act to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes." (See H. R. 12000.) (H. Rept. 1654. House substitutes S. 4448, with amendment, on May 19, 1928. Public Law 504.)

H. R. 13753: Authorizing an expenditure of certain funds standing to the credit of the Cherokee Nation in the Treasury of the United States to be paid to one of the attorneys for the Cherokee Nation, and for other purposes. (H. Rept. 1730. Passed House May 28, 1928. Passed Senate May 29, 1928.)

HOUSE JOINT RESOLUTIONS

H. J. Res. 76: For the relief of Leah Frank, Creek Indian, new born, roll No. 294. (H. Rept. 1254. Passed House May 25, 1928.)

H. J. Res. 260: For the relief of Eloise Childers, Creek Indian, minor, roll No. 354. (H. Rept. 1587. Passed House May 25, 1928.)

H. J. Res. 261: For the relief of Effa Cowe, Creek Indian, new born, roll No. 78. (H. Rept. 1493. Passed House May 25, 1926.)

SENATE BILLS

S. 710: Conferring jurisdiction upon the Court of Claims to hear, adjudicate, and render judgment in claims which the northwestern bands of Shoshone Indians may have against the United States. Substituted for H. R. 8280 on April 16, 1928, and passed by House with amendments. May 10, 1928, House accepts conference report.

* S. 1145: To authorize an appropriation for roads on Indian reservations. (H. Rept. 1247. Public Law 520.)

* S. 1191: To amend an act of March 3, 1885, entitled "An act providing for allotment of lands in severalty to the Indians residing upon the Umatilla Reservation, in the State of Oregon, and granting patents therefor, and for other purposes. (H. Rept. 1639. Approved May 29, 1928. Public Law 622.)

* S. 1456. To authorize an appropriation for a road on the Zuni Indian Reservation, N. Mex. (H. Rept. 1142.)

S. 1480: Authorizing certain Indian tribes and bands, or any of them, residing in the State of Washington, to present their claims to the Court of Claims. (H. Rept. 1490. Vetoed May 18, 1928.)

* S. 1662: To change the boundaries of the Tule River Indian Reservation, Calif. (H. Rept. 1252. Public Law 421.)

* S. 1759: To appropriate treaty funds due the Wisconsin Pottawatomie Indians. (February 20, 1928, passed as substitute for H. R. 7207. Public Law 85.)

* S. 2076: Authorizing the allotment of Carl J. Reid Dussome as a Kiowa Indian, and directing issuance of trust patent to him to certain lands of the Kiowa Indian Reservation, Okla. (H. Rept. 1655. Approved May 29, 1928. Private Law 268.)

* S. 2084: For the purchase of land in the vicinity of Winnemucca, Nev., for an Indian colony, and for other purposes. (H. Rept. 1240. Public Law 444.)

* S. 2279: Authorizing the Secretary of the Interior to purchase certain lands in the city of Bismarck, Burleigh County, N. Dak., for Indian school purposes. (H. Rept. 862. Public Law 186.)

* S. 2306: For the relief of William E. Thackrey. (H. Rept. 1253. Approved May 28, 1928. Public Law 236.)

S. 2360: To amend section of the act of Congress of March 3, 1921 (41 Stat. L. 1249), entitled "An act to amend section 3 of the act of Congress of June 28, 1906, entitled 'An act for the division of the lands and funds of the Osage Indians in Oklahoma and for other purposes.'" (H. Rept. 1901.)

*S. 2738: For the relief of C. R. Olberg (H. Rept. 1656. Approved May 29, 1928. Private Law 295.)

S. 2792: Reinvesting title to certain lands in the Yankton Sioux Tribe of Indians. (H. Rept. 1852.)

*S. 3007: To authorize the Secretary of the Interior to issue a patent to the Bureau of Catholic Indian Missions for a certain tract of land on the Mescalero Reservation, N. Mex. (Substituted for H. R. 10475 and passed on March 24, 1928. Private Law 53.)

*S. 3026: Authorizing the construction of a fence along the east boundary of the Papago Indian Reservation, Ariz. (H. Rept. 1248. Public Law 443.)

*S. 3343: For the relief of the Arapahoe and Cheyenne Indians, and for other purposes. (Substituted for H. R. 11359 and passed by House on March 23, 1928. Public Law 208.)

*S. 3355: To authorize the cancellation of the balance due on a reimbursable agreement for the sale of cattle to certain Rosebud Indians. (Substituted for H. R. 11582 and passed by House on March 24, 1928. Public Law 209.)

*S. 3365: To authorize allotments to unallotted Indians on the Shoshone or Wind River Reservation, Wyo. (H. Rept. 1249. Public Law 442.)

*S. 3438: Authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota. (Substituted for H. R. 11484 and passed by House on May 4, 1928. Public Law 362.)

*S. 3593: To authorize the leasing or sale of lands reserved for agency, schools, and other purposes, on the Fort Peck Indian Reservation, Mont. (H. Rept. 1723. Approved May 26, 1928. Public Law 552.)

S. 3779: To authorize the construction of a telephone line from Flagstaff to Kayenta on the Western Navajo Indian Reservation, Ariz. (H. Rept. 1640.)

*S. 3794: For the relief of R. E. Hansen. (H. Rept. 1729. Approved May 29, 1928. Private Law 288.)

*S. 3868: Authorizing an advancement of certain funds standing to the credit of the Creek Nation in the Treasury of the

United States to be paid to the attorney for the Creek Nation, and for other purposes. (Substituted for H. R. 12604 and passed by House on May 25, 1928. Approved May 29, 1928. Public Law 567.)

*S. 4321: Authorizing the Secretary of the Interior to dispose of two bridges on the San Carlos Indian Reservation, in Arizona, and for other purposes. (H. Rept. 1728. Approved May 29, 1928. Public Law 590.)

*S. 4346: To authorize an appropriation for the purchase of certain privately owned lands within the Fort Apache Indian Reservation, Ariz. (H. Rept. 1853. Approved May 29, 1928. Public Law 583.)

DISTRICT OF COLUMBIA

Mr. GIBSON. Mr. Speaker, the subcommittee of the House Committee of the District of Columbia making a study of the government of the District and its different agencies has presented to the full committee its report for the first session of the Seventieth Congress. This report deals only with matters of a constructive nature.

The subcommittee has acted in complete harmony with the Committee on Appropriations, and to that committee is due in a large measure the actual accomplishments of the subcommitee of the District Committee.

At the conclusion of the study of any department of the District government recommendations have been submitted to the Committee on Appropriations for action if the object to be attained could be covered in an appropriation bill. In other cases involving purely administrative matters the recommendations have been submitted to the Commissioners of the District. The members of the subcommittee felt that their duty did not end with simply recommending changes, and so have taken every means possible to have them actually carried into effect.

Changes already adopted as a result of the survey mean an annual saving of $186,470 in perpetuity. Two bills are now pending which, if enacted into law, will raise the annual saving to $308,470. Other suggestions now pending will, if adopted, result in further saving of $870,400.

Recommendations adopted

Discontinuing the printing of the District of Columbia general schedule of supplies	$3,500
Purchase of supplies, other than food supplies, under the definite-quantity purchase plan	8,000
Purchase of miscellaneous items through the general supply schedule instead of through contracts made by the commissioners solely for District of Columbia needs	10,000
Purchase of food supplies in bulk in definite quantities	10,000
Production of carbon-copy record of purchase orders to replace press-copy record	1,020
Inspection of hay and payment for the quality of hay actually received	7,500
Purchase of printed matter from the Government Printing Office instead of from private contractors	20,000
Taking of discounts on purchases, which has been made possible by the adoption of approved methods	10,000
Printing by addressograph equipment the names and addresses of real property taxpayers, and the location, area, etc., of each tract on tax bills, field books, and other records	6,500
Manufacture of additional brick at reformatory	36,000
Production of lime at reformatory from surplus oyster shells	3,600
Manufacture of automobile license tags at the reformatory	5,250
Manufacture of castings at reformatory foundry	14,000
Issue of motor-vehicle registration tags by improved methods	1,100
Installation of additional traffic signal lights in congested area resulting in relief of 6 full-time police officers	12,000
Transfer of auto repair work for police department to District auto repair shop	18,000
Use of printed forms in copying deeds for record in office of recorder of deeds	5,000
Total annual savings of	186,470

Recommendations pending action

Payment of one-half of personal tax due when returns are filed	48,500
Payment of personal-property tax on automobiles as a condition precedent to the issue of license tags	73,400
Preparation of personal-tax ledgers from original documents instead of from memorandum cards now especially prepared for this purpose	1,000
Preparation of paint by paint-grinding machine	4,500
Reduction of premium rates charged by stock fire insurance companies to place them on a parity with the average for the whole United States	600,000
Adoption of photostat process by office of recorder of deeds for making copies of documents	17,000
Reduction of garbage and utilization of by-products by improved methods	126,000
Total annual savings of	870,400

SUMMARY

Annual savings from recommendations adopted	186,470
Annual savings from recommendations pending action	870,400
Total	1,056,870

Through the activities of the subcommittee surplus Federal property was secured without cost to the District of Columbia, which resulted in a single saving amounting to approximately $75,000. As a result of the investigation of traffic-signal contracts the District of Columbia also saved $11,238.60. Finally, the charging of cement against special assessment jobs at actual cost has resulted in an annual saving to certain District of Columbia taxpayers amounting to $6,250.

The subcommittee has followed a definite policy of constructive endeavor with a single view to improving the administration affairs in the District of Columbia. Many of the most valuable results of the investigation can not be measured in dollars and cents, but they are already apparent in a better morale among District employees and in the improved service which is being rendered to the public. Furthermore, the labors of the subcommittee will furnish to future District and Appropriations Committees the foundation for the development of the District of Columbia, which should make it a model of municipal government for the United States.

SHALL WE CONTINUE TO HAVE GOVERNMENT BY "LAME DUCKS"?

Mr. FLETCHER. Mr. Speaker, monarchies function on the assumption that the masses of the people are incapable of self-government.

Democracy functions on the assumption that the masses of the people are capable of governing themselves.

From the beginning of our experiment in government under democracy there has been in this country a large number of the cynical minded who have sneered at the idea of self-government.

To reinforce their arguments they point to the fact that half of the people are not sufficiently interested in their Government to bother voting even in a presidential election.

PREFER DICTATOR

There are increasing numbers in America who frankly approve the adventure of Mussolini in Italy and quite a number who with equal frankness insist that it would be better for this country if it were ruled by a dictator.

The aristocratic few whose theory of government is personified in Alexander Hamilton, Mussolini, and other extreme individualists always have done everything possible to separate the people from their government by the barb-wire entanglements of technical legislative obstruction.

But if we interpret history correctly it is evident that the fathers of our Republic had no intention of legalizing a precedent that would eventually establish government by what, in popular political parlance, is known as "lame ducks." A lame duck is a politician who is politically dead but not buried, an unwanted officeholder who still remains in office after being defeated at the polls.

AN INDEFENSIBLE CUSTOM

Contemptuous thwarting of the efforts of the people to rule themselves is the indefensible custom of political parties. Even Presidents appoint to high office politicians who have been put in the lame-duck class by the voters.

One of the most responsible positions in the President's Cabinet to-day is occupied by a lame-duck politician who was overwhelmingly defeated at election by the people of his own State.

By presidential lame-duck appointment this man who was refused permission to serve his own State now serves all the States, in spite of the people.

Is it any wonder half the voters stay away from the polls? Many have come to the conclusion that more and more we are tending toward government of politicians, for politicians, and by politicians.

ANOTHER EXAMPLE OF WHY WE HAVE "MISREPRESENTATIVE" GOVERNMENT

Defeated Congressmen and Senators remain in office 13 months after they have been defeated and their successors chosen.

In any well-organized business an employee that proved unsatisfactory to the voting stockholders would, upon official request to resign, comply with that request and make room for his successor.

As a matter of practical common sense this would seem the obvious and the only thing to do. But when it comes to using this same common-sense principle in government the will of the voting stockholder is blocked by constitutional provision, with the result that after being elected a Congressman has to wait for 13 months before he is permitted to assume the responsibilities of his office, and during the 13 months the man whom

the people have indicated by their votes that they do not want nevertheless continues to serve them.

Thus, instead of having representative government, we have a condition approved by the Constitution where "misrepresentative" government is possible.

SUPPOSE THE ISSUE WERE PEACE OR WAR?

Not only is it possible for these lame ducks to ram legislation down the people's throats to which they are bitterly opposed, but far more serious than that is the possibility of a lame-duck Congress selecting the man who is to be President.

If no presidential candidate receives the majority of the electorial vote the selection of a president goes to the old Congress. The Congress that is to make this momentous decision may be one that has been overwhelmingly repudiated by the people.

Suppose the issue in a presidential campaign were the vital one affecting the American people such as the issue involving peace or war. In that event how serious would it be for a repudiated Congress to have the responsibility of deciding the issue of peace or war or deciding a presidential election in the circumstance such a decision were put up to Congress?

THE CIVIL WAR MIGHT NOT HAVE BEEN

In their appeal favoring legislation to remedy this condition the members of the conservative American Bar Association have gone so far as to express the belief that if President Lincoln had been inaugurated in January instead of March the Civil War might have been avoided.

Article 1, section 4, of the Federal Constitution provides: Congress shall assemble at least once each year and such meetings shall be on the first Monday in December unless they shall by law designate a different day.

A new Congress comes into existence on March 4 following the biennial congressional election. To assemble in advance of March 4 it is necessary to amend our organic law. Proposed amendment to the Constitution of the United States fixing the commencement of the terms of President, Vice President, and the Members of Congress and fixing the time of the assembling of Congress has been repeatedly approved by the Senate but always blocked in the House.

SOME ARGUMENTS OF THE OPPOSITION

Those responsible for defeating the measure have included among their reasons such conclusions as the Government has survived 150 years under the present system, the people need 13 months to cool off after a heated campaign, and so forth, and they express a feeling that there is too great a tendency in these modern times to trifle with the Constitution.

In one session, the sixty-seventh, I believe, 71 constitutional amendments were presented. All together there have been proposed over 2,000 amendments to the Constitution.

These are samples of impressive arguments offered by those who favor letting alone the obsolete processes of misrepresentative government, by which lame ducks vote their will in defiance of the people, while their successors are kept out of office for a period of 13 months after being elected.

MAKE IT A CAMPAIGN ISSUE

Nothing is stated here that is news. This is merely a presentation of what everybody knows and what everybody thinks, with the exception of a powerful few in Congress who so far have been successful in thwarting the apparent wishes of the people.

These reactionaries probably will continue in their successful efforts to block this needed constitutional change unless the people make it an issue in the campaign and send to Congress men pledged to vote for an amendment to the Constitution that will eliminate government of the people by representatives who no longer are authorized to represent.

STATISTICS OF REVENUE, 1918–1928

Mr. HAWLEY. Mr. Speaker, the Division of Investigation of the Joint Committee on Internal Revenue Taxation has prepared, at my suggestion, certain statistics relating to the ordinary receipts and expenditures of the Government for the period 1918 to 1928, inclusive, including certain tabulations as to the rates of tax which were in effect over the same period.

Inasmuch as such statistics have been, and undoubtedly will be, continually referred to by Members of Congress and others interested in taxation, I believe it is important to have this data published where it can be referred to as a whole, because at present it is necessary to search for these figures through various reports of the Secretary of the Treasury and the Commissioner of Internal Revenue.

Accordingly I am offering for the RECORD a report by Mr. Parker, Chief of the Division of Investigation, containing the statistics above referred to:

CONGRESS OF THE UNITED STATES,
JOINT COMMITTEE ON INTERNAL REVENUE TAXATION,
Washington, May 29, 1928.

Hon. WILLIS C. HAWLEY,
Chairman Joint Committee on Internal Revenue Taxation,
House of Representatives, Washington, D. C.

MY DEAR CHAIRMAN: There is submitted herewith, as per your instructions, certain statistics in regard to Treasury receipts and expenditures for the period 1918 to 1928, inclusive, including a tabulation of the more important rates of tax effective during the same period. These statistics are classified under the following schedules:

"Schedule No. 1: Summary of all ordinary receipts and expenditures for fiscal years 1918 to 1928, inclusive. Also, reduction in revenue estimated at time of passage of new acts.

"Schedule No. 2: Receipts from internal revenue and other Treasury receipts, fiscal years 1918 to 1928, inclusive. (With supporting statistics.)

"Schedule No. 3: Comparison of rates of taxation, 1918 to 1928, inclusive."

The above figures are compiled almost entirely from the reports of the Secretary of the Treasury and the reports of the Commissioner of Internal Revenue. Some of the estimated figures for 1928 are from estimates by the Treasury Department and a few have been made by this division on the latest information available. Estimates of reduction to be expected from new revenue acts, as signed, are from the statements of the chairman of the Finance Committee of the Senate or the chairman of the Ways and Means Committee of the House.

Attention is drawn to the fact that the receipts of the Government are published on four different bases, and if an apparent discrepancy exists on comparison of the submitted figures with other published statements, reference should be made to pages 421 and 422 of the "Annual Report of the Secretary of the Treasury on the State of the Finances for Fiscal Year ended June 30, 1927," in order that such apparent discrepancy may be reconciled.

Respectfully submitted.

L. H. PARKER,
Chief Division of Investigation.

SCHEDULE 1

Summary of all ordinary receipts and expenditures for fiscal years 1918 to 1928, inclusive, also reduction in revenue estimated at time of passage of new acts

Year	Revenues [1]	Expenditures [2]	Surplus	Reduction proposed by act (as signed)	Date of enactment of act
1918	$4,180,425,156	$13,791,907,895	[3] $9,611,482,739		Feb. 24, 1919
1919	4,654,380,899	18,952,141,180	[3] 14,297,760,281		
1920	6,694,565,389	6,482,077,241	212,488,148		
1921	5,624,932,961	5,538,040,689	86,892,272	$835,200,000	Nov. 23, 1921
1922	4,109,104,151	3,795,302,500	313,801,651		
1923	4,007,135,481	3,697,478,020	309,657,461		
1924	4,012,044,702	3,506,677,715	505,366,987	490,000,000	June 2, 1924
1925	3,780,148,684	3,529,643,446	250,505,238		
1926	3,962,755,690	3,584,987,873	377,767,817	387,811,000	Feb. 26, 1926
1927	4,129,394,441	3,493,584,519	635,809,922		
1928 [4]	4,041,325,280	3,668,003,279	373,322,001	222,495,000	May 29, 1928

[1] Ordinary receipts. [2] Expenditures chargeable against ordinary receipts. [3] Deficit. [4] Estimated.

SCHEDULE 2

Summary—Receipts from internal revenue and other Treasury receipts, fiscal years 1918 to 1928, inclusive

[NOTE.—The receipts shown in the column for the year 1918 are for the fiscal year ending June 30, 1918; for the year 1919, are for the year ending June 30, 1919, and so on. It should be noted that the figures for the fiscal year 1928 are estimated on the latest figures available]

	1918	1919	1920	1921	1922	1923	1924	1925	1926	1927	1928[1]
A. Income and profits taxes	$2,852,324,866	$2,600,783,903	$3,956,936,004	$3,228,137,674	$2,086,918,465	$1,691,089,535	$1,841,759,317	$1,761,659,049	$1,974,104,141	$2,219,952,444	$2,164,000,000
B. Estates and gifts	47,452,880	82,029,983	103,635,563	154,043,260	139,418,846	126,705,207	102,966,762	108,939,895	119,216,375	100,339,852	59,500,000

[1] Estimated.
[2] Estimated on 10 months' figures.

NOTE.—The figures for "Other Treasury receipts" are from the annual reports of the Secretary of the Treasury, and are on the basis of daily Treasury statements. It should be noted that there is a slight difference between the collections of internal revenue which are reported by the commissioner and the figures of the Treasury Department based on daily Treasury statements; this requires the use of a "Reconciliation between Treasury receipts and internal-revenue collections" as shown.

2. Gift Tax											
Gift-tax rates							(5)	(5)			

[1] 1917 act effective.
[2] 1918 act effective.
[3] Rates shown are after retroactive amendment.
[4] Rates same as estate tax for 1919.

NOTE.—Estate tax: The revenue act of 1917 was effective in the case of decedents whose date of death occurred in 1918; the revenue act of 1918 was effective in the case of decedents whose date of death occurred after Feb. 24, 1919; the revenue act of 1926 was effective in the case of decedents whose date of death occurred after Feb. 26, 1926. Gift tax: The gift tax was effective for the calendar years 1924 and 1925 only.

C. DISTILLED SPIRITS—RATES OF TAX

NOTE.—A classification of the various rates of tax on these products appears unnecessary, as the changes in rates have been relatively small. The important factor in this connection is the eighteenth amendment to the Constitution. The revenue from this source has fallen from $365,000,000 for the fiscal year 1919 to about $15,000,000 in the current fiscal year and is due almost entirely to the amendment above noted.

D. FERMENTED LIQUORS—RATES OF TAX

NOTE.—The same remarks apply as under C above. The revenue has fallen from $126,000,000 for the fiscal year 1918 to $100 for the fiscal year 1928.

E. TOBACCO—RATES OF TAX

Classification	Revenue act of 1918	Revenue act of 1921	Revenue act of 1924	Revenue act of 1926	Revenue act of 1928
Cigars (large):					
Retail price not more than 5 cents	$4 per thousand	$4 per thousand	$4 per thousand	$2 per thousand	$2 per thousand.
Retail price more than 5 and not more than 8 cents.	$6 per thousand	$6 per thousand	$6 per thousand	$3 per thousand	$3 per thousand.
Retail price more than 8 and not more than 15 cents.	$9 per thousand	$9 per thousand	$9 per thousand	$5 per thousand	$5 per thousand.

E. TOBACCO—RATES OF TAX—continued

Classification	Revenue act of 1918	Revenue act of 1921	Revenue act of 1924	Revenue act of 1926	Revenue act of 1928
Cigars (large)—Continued.					
Retail price more than 15 and not more than 20 cents.	$12 per thousand	$12 per thousand	$12 per thousand	$10.50 per thousand	$10.50 per thousand.
Retail price more than 20 cents	$15 per thousand	$15 per thousand	$15 per thousand	$13.50 per thousand	$13.50 per thousand.
Cigars (small)	$1.50 per thousand	$1.50 per thousand	$1.50 per thousand	$0.75 per thousand	$0.75 per thousand.
Cigarettes (large)	$3 per thousand	No change	No change	No change	No change.
Cigarettes (small)	$7.20 per thousand	do	do	do	Do.
Tobacco, smoking and chewing, etc	18 cents per pound	do	do	do	Do.
Snuff	18 cents per pound	do	do	do	Do.
Cigarette papers	1 cent per hundred	do	do	do	Do.

NOTE.—The above are the most important taxes. Special taxes on the manufacturers of tobacco were largely removed by the 1926 act.

F. CURRENT REVENUE ACTS

1. Documentary stamps—Rates of tax					
Bonds and capital-stock issues	5 cents per $100	5 cents per $100	5 cents per $100	5 cents per $100	5 cents per $100.
Capital-stock transfers	2 cents per $100	2 cents per $100	2 cents per $100	2 cents per $100	2 cents per $100.
Produce sales (futures)	2 cents per $100	2 cents per $100	1 cent per $100	1 cent per $100	1 cent per $100.
Playing cards	8 cents	8 cents	10 cents	10 cents	10 cents.

NOTE.—The above appear to be the most important stamp taxes, other stamp taxes are omitted for the sake of brevity.

2. Transportation

Inasmuch as the taxes on freight, express, persons and other forms of transportation have now all been removed, it appears unnecessary to list these rates in detail.

3. Insurance

Special taxes on insurance companies have now all been removed.

4. Manufacturers' excise—Rates of tax					
Automobile trucks	3 per cent	3 per cent	3 per cent (over $1,000)		
Automobiles	5 per cent	5 per cent	5 per cent	3 per cent	
Automobile accessories	do	do	2½ per cent		
Pianos and organs	do				
Tennis rackets and sporting goods	10 per cent				
Chewing gum	3 per cent				
Cameras and lenses	10 per cent	10 per cent	10 per cent		
Photographic films	5 per cent	5 per cent	5 per cent		
Candy	do	3 per cent			
Pistols and revolvers	10 per cent	10 per cent	10 per cent	10 per cent	10 per cent.
Other firearms	do	do	do		
Hunting and bowie knives	do	do			
Dirk knives and daggers	100 per cent	100 per cent			
Portable electric fans	5 per cent				
Thermos bottles	do				
Cigar holders, pipes, etc	10 per cent	10 per cent	10 per cent		
Automatic slot machines	5 and 10 per cent	5 and 10 per cent	5 per cent		
Liveries, livery boots, etc	10 per cent	10 per cent			
Hunting garments	do	do			
Articles made of fur	do				
Yachts, motor boats, etc	do	10 per cent			
Toilet soaps and powders	3 per cent				
Mah-jongg			10 per cent		
5. Child labor—Rates of tax					
Employers of child labor [1]	10 per cent of net profits.	10 per cent of net profits.			
6. Dealers' excise—Rates of tax					
Sculpture, paintings, statuary, etc	10 per cent	5 per cent	5 per cent		
Carpets, trunks, wearing apparel, etc. (in excess of certain amounts).	10 per cent	5 per cent			
Jewelry, watches, clocks, etc	5 per cent	5 per cent	5 per cent		
Perfumes, cosmetics, patent medicines, etc	4 per cent				
Beverages (nonalcoholic), soft drinks, etc	10 and 15 per cent	2 cents per gallon		One-tenth of a cent per gallon (cereals).	
7. Occupational and special taxes—Rates of tax					
Capital stock tax	$1 per $1,000	$1 per $1,000	$1 per $1,000		
Theaters, museums, circuses, etc	Various	Various			
Bowling alleys, billiard and pool tables, etc	$10 each	$10 each	$10 each		
Shooting galleries	$20	$20	$20		
Riding academies	$100	$100	$100		
Autos for hire	$10 to $20 each	$10 to $20 each	$10 to $20 each		
Use of yachts	Graduated	Graduated	Graduated	Graduated	
Brokers	$50 to $200	$50 to $200 each	$50 to $300		
Admissions	10 per cent, etc	10 per cent, etc. (over 10 cents).	10 per cent (over 50 cents).	10 per cent (over 75 cents).	10 per cent (over $3).
Club dues	10 per cent (over ($10)	10 per cent (over $10)	10 per cent (over $10)	10 per cent (over $10)	10 per cent (over $25).
Narcotics:					
Importers and manufacturers	$24	$24	$24	$24	$24.
Wholesale dealers	$12	$12	$12	$12	$12.
Retail dealers	$6	$6	$6	$6	$3.
Physicians	$3	$3	$3	$1	$1.

[1] This tax declared unconstitutional by United States Supreme Court May 15, 1922.

G. MISCELLANEOUS

NOTE.—There have been no substantial changes in these taxes, and it appears unnecessary to detail the rates.

THE FLEXIBLE PROVISIONS OF THE TARIFF LAW—THE TARIFF AND THE FARMER

Mr. COLTON. Mr. Speaker, often in the discussion of political questions nonessentials are emphasized and we forget the fundamental issues involved. It is well, in the beginning of the coming campaign, to call attention to a few of the basic principles upon which the economic life and prosperity of this Nation depends.

Since the World War the American farmers have struggled valiantly to overcome the depression that fell upon agriculture at the close of that terrible conflict. They are, however, to be congratulated upon the substantial progress that has been made toward recovery, and I am sure may look forward with hope to the time when agriculture is on a parity with other industries.

In order to discredit the tariff and its helpfulness to the farmers in their efforts to recover from the effects of the depression following the war much has been unjustly attributed to the tariff law and its administration. It has even been charged that it was an unlawful and unconstitutional law and I want to direct your attention to that phase of the question for a few moments.

SUPREME COURT UPHOLDS PROTECTIVE-TARIFF POLICY

(See copy of decision herewith submitted)

In what may become one of the most important and history-making decisions of the Supreme Court of the United States, that court, for the first time in history, has recently held that Congress acts well within its powers granted under the Constitution when it passes a tariff act in which are fixed rates of duty high enough to protect or to encourage domestic industries. As far as the Constitution is concerned, Congress has the right to fix the rates of duty on imported articles as high or as low as it chooses. It may levy absolutely prohibitive duties if it should so desire and yet be within its constitutional rights and powers. Or Congress has the power to remove all duties on all products imported and to leave all domestic industries liable to absolutely free competition with imports from foreign countries. This decision leaves no doubt about the question of the constitutionality of the Republican tariff laws. In the minds of most people there never has been any doubt about the matter. It is now fully established that Congress has the power to protect the domestic industries from destructive foreign competition by levying adequate tariff rates.

The opinion of the court rendered April 9, 1928, was unanimous and delivered by Chief Justice Taft. The two following quotations give the conclusions of this point:

Whatever we may think of the wisdom of a protection policy, we can not hold it unconstitutional.

* * * the fact that Congress declares that one of its motives in fixing the rates of duty is so to fix them that they shall encourage the industries of this country in the competition with producers in other countries in the sale of goods in this country can not invalidate a revenue act so framed.

SECTION 315 ALSO DECLARED CONSTITUTIONAL

Another extremely important point covered by that decision of the Supreme Court is in relation to the adjustment of the customs duties by the President after scientific investigations by the Tariff Commission. One of the great powers conferred on Congress by the Federal Constitution, Article I, section 8, is that of levying and collecting taxes, duties, imposts, and excises. Congress has exercised that power in the past to the best of its ability, and before the commerce of this great Nation became so great and complicated it was able to do a fair job at it without the assistance of a body of technical experts to advise about the conditions in the various industries. At present, however, there are literally tens of thousands of articles of commerce that are imported into the United States each year and that compete with like or similar articles produced in this country. Many of these products are unknown to the average man. No adequate understanding of the problems involved in the growth or production of these thousands of articles is possible unless careful and complete data regarding them are systematically gathered, arranged, and interpreted by specialists who make it their business day after day to study and report on such problems. Congress realized this condition and organized the Tariff Commission in 1916, with its staff of now more than 200 experts, for the purpose of supplying the President and Congress with the information about these many articles of commerce necessary to fix or adjust the customs duties in an equitable and reasonable way based upon the actual facts existing in the industries of the United States and in competing foreign countries. Congress realized that without some such scientific body as the commission the Ways and Means Committee would be left to determine the rates from the maze of conflicting testimony of the interested parties that appear before that committee either to have the duty as high as possible or as low as possible.

In 1922 the Republican Party went further than the Democrats did in 1916 with the Tariff Commission idea. We gave the commission additional responsibilities. One of these additional tasks was the investigation of costs of production of articles of commerce in the United States and in the principal competing foreign countries for the purpose of assisting the President in the administration of section 315 of the tariff act of 1922.

The commission proceeded to carry out its duty under the law and made reports to the President, who acted upon the information furnished him by the commission, which was his duty under the law, and raised or lowered the customs duties as the evidence indicated was necessary to equalize the costs of production. Now the question of the constitutionality was raised with respect to section 315, under the authority of which the President adjusted certain tariff duties, and the decision of the Supreme Court, just mentioned, was that section 315 was constitutional, and that the President and the Tariff Commission acted within their powers and were merely doing their duty by so investigating costs of production and equalizing them by the adjustment of the customs duties in the manner described in that section of the law. The court said the President or the Tariff Commission, or any other body when designated by Congress, as they are, might adjust the customs duties just as the Interstate Commerce Commission adjusts the freight rates. Further, if the Congress should decide that all competitive conditions at home and abroad should be equalized rather than merely the costs of production at home and abroad, a law embodying such a policy would be constitutional. And if Congress should revise the law to give the Tariff Commission itself authority to change the customs rates as the Interstate Commerce Commission now changes freight rates, such a law would also be constitutional. Because of the wide powers that Congress may delegate to the Tariff Commission this decision of the Supreme Court opens up the way for a real test of the flexible tariff provision on its merits and for such amendments to that provision as may be found essential to its successful and satisfactory operation.

The following quotation taken from the opinion rendered by Chief Justice Taft gives the essence of the conclusions of the court:

The same principle that permits Congress to exercise its rate-making power in interstate commerce by declaring the rule which shall prevail in the legislative fixing of rates, and enables it to remit to a rate-making body created in accordance with its provisions the fixing of such rates, justifies a similar provision for the fixing of customs duties on imported merchandise. If Congress shall lay down by legislative act an intelligible principle to which the person or body authorized to fix such rates is directed to conform, such legislative action is not a forbidden delegation of legislative power. If it is thought wise to vary the customs duties according to changing conditions of production at home and abroad, it may authorize the Chief Executive to carry out this purpose, with the advisory assistance of a Tariff Commission appointed under congressional authority. This conclusion is amply sustained by a case in which there was no advisory commission furnished the President—a case to which this court gave the fullest consideration nearly 40 years ago. (Field *v.* Clark, 143 U. S. 649, 680.)

FLEXIBLE TARIFF PROVISION WORKS WELL

Recently a majority of a select committee of another body of Congress recommended the repeal of the flexible provisions of the tariff of 1922, and particularly the section which confers authority upon the President to revise tariff rates. That committee maintained that the practical value of the flexible provisions had not been demonstrated. With this view I take sharp issue.

Under the provisions of section 315 the President has adjusted the rates of duty upon some 35 or 40 articles imported into the United States. A number of these articles upon which the duty has been adjusted have been agricultural products upon which the duty has been increased. The increase in the duty on such products as wheat, flour, butter, swiss cheese, and cherries have greatly benefited the farmers of the country and especially those of the West where such products are grown in surplus quantities.

The duty on mill feeds which the farmers buy for the purpose of feeding their livestock was reduced under the flexible provision. This reduction greatly benefited the farmers by permitting them to obtain such feeds at lower prices and large importations have come in from Canada for such purpose.

It may be interesting to some to know that during the first three or four years the value of the commodities on which a

reduction was made was about equal to the value of those on which an increase was made. Since then there has been a change and the ratio is about one-third to two-thirds, the value of the increased commodities being the larger.

This quiet and unostentatious operation of the flexible tariff provision has gone on successfully. There has been no general turmoil in industry such as that which accompanies general tariff revisions. The industries of the country have prospered continuously during its operation. The maladjustment of the customs duties on imported foreign products is gradually being overcome and corrected by the operation of the flexible tariff under the excellent administration of President Coolidge with the assistance of the Tariff Commission.

While the adjustments in the tariff rates have been slower than was anticipated at the time the tariff act was passed, yet they have proceeded on a conservative and careful basis, and after thorough investigations by the Tariff Commission and due consideration by the President the country at large has greatly benefited by the adjustments that have been made.

The Republican Party is to be congratulated upon its far-sightedness in adopting the flexible tariff provision in the tariff act of 1922. The party may well be proud of the achievements of President Coolidge in his administration of the act. He has accomplished much good in spite of the opposition to his policy from certain members of the opposition on the Tariff Commission and from certain members of the opposition in Congress.

Not only has the flexible provision of the tariff act of 1922 already made possible the adjustment of a number of the inadequate original duties of the Fordney-McCumber Act, but the Tariff Commission has in process at the present time 40 or more additional investigations which will lead to further adjustments of tariff rates that are now out of line because of changed conditions since 1922. And in addition to the 75 or 80 investigations that have already been undertaken by the Tariff Commission, there are many other investigations that ought to be undertaken and that will be undertaken by the commission as funds are made available by the Congress for such work, and the duties will be adjusted by the President, as far as possible under the law, to equalize costs of production in the United States and in the principal competing country.

Thus without the usual upheaval in business that invariably goes along with the general revisions of the tariff, those duties that are out of line, being either too high or too low, will in time be adjusted by the operation of the flexible tariff provision, so that costs of production in the United States and in the principal competing country will be equalized by the rates of duties collected on imports of such products.

THE REPUBLICAN TARIFF POLICY IS A LIBERAL ONE

The adjustment of rates of duties on this basis is a liberal tariff policy. It permits the products of foreign countries to enter into competition in the markets of the United States on an equal basis with the products of the United States. The tariff policy of few, if any, other protectionist countries is so liberal as that. It is certainly fair to foreign producers and importers of foreign products.

While there is much sentiment in the United States, and much pressure has been brought to bear upon Members of Congress to induce the adoption of a tariff policy that would exclude foreign products from entrance into the United States, and thus keep them from coming into competition with the domestic products in the markets of the United States, yet the Republican Party has deliberately adopted the liberal policy of adjusting tariff rates to equalize costs of production of foreign and domestic products in our own domestic markets.

What can be fairer than such a policy? A more liberal tariff policy at this time would be un-American and would certainly not be for the best interests of the United States.

REPUBLICAN TARIFF HAS CONTRIBUTED TOWARD PRESENT PROSPERITY

The policy of protection for the purpose of encouraging domestic industries has, under the Fordney-McCumber Act of 1922, as under the former Republican tariffs, proved to be one of the outstanding and important factors contributing toward the present prosperity of the domestic industries and of the people in general of the United States. The Republican Party gladly issues the challenge to anybody to disprove that fact.

If the Democratic Party desires to go before the American people in 1928 on the tariff issue, the Republican Party will be delighted to accept the challenge and leave the result to the votes of the people with no fear of the outcome.

The people of this country understand by this time, after much experience, that to permit free entry of foreign agricultural and manufactured products to compete with their own products on the American markets, is to cut their own incomes and to make more difficult their own existence. Because the American people are now well aware of this fact, the Republican Party is anxious at any time to make the tariff the paramount issue in any presidential campaign.

PROTECTION ACCORDED TO AGRICULTURAL PRODUCTS BY REPUBLICAN TARIFF OF 1922

It is sometimes recklessly charged that the farmer is not benefited by the tariff. Let us look at that for a moment.

Schedule 7, the agricultural schedule of the tariff act of 1922, is a very important schedule. It is one of the largest and most active schedules of the whole tariff law. Import duties have been collected on about 350 specifically classified agricultural products and almost that many forestry products. Some of the important farm products imported under this schedule in considerable quantities are as follows:

Butter, milk and cream, wool, mutton, beef, fresh and frozen, cattle, swine, eggs, egg products, sugar beets, sugar, hay, corn, wheat, oats, barley, rye, rice, flaxseed, clover seed, alfalfa seed, tobacco, onions, tomatoes, apples, oranges, berries, cottonseed, other fruits, peanuts and other nuts.

The protection of the domestic markets of these products for the benefit of the farmers of this country has helped greatly in the agricultural situation during the past six years. The sheep and cattle men of the West have been greatly benefited. These industries are in a relatively profitable condition at the present time.

The beet-sugar industry has gone through a most difficult and almost ruinous period. The duty of 1 per cent per pound on sugar fixed in the Underwood Tariff Act of 1913 was entirely inadequate for the protection of the domestic industry. Had it not been for the World War the domestic sugar industry would have been ruined during the period that that act was in operation. During the war the Cuban sugar industry increased its production so tremendously and exported sugar to Europe in such large quantities that after the war, when the European beet-sugar industry began to get on its feet again, Cuba found herself with an overburdening surplus of sugar being produced.

The production in Cuba since the war has not been reduced to anything like the pre-war level. With the tremendous overproduction in Cuba hanging over the American market, prices of sugar in the United States have, in spite of the tariff, been so low as to almost bankrupt the domestic sugar industry. If it had not been for the Republican tariff the domestic sugar industry would have been completely ruined. The Republican tariff without a doubt is the only thing that really saved the domestic sugar industry from annihilation.

It is true that on a number of these products the duty is not sufficiently high to afford the protection needed. I understand, however, that the farmers have applied to the President and the United States Tariff Commission, through Congress in a number of cases, for investigations under section 315 in order that the duties on a number of these agricultural products may be adjusted. The commission now has under investigation milk and cream, eggs and egg products, corn, flaxseed, onions, peanuts, soya beans, cottonseed, fresh and canned tomatoes, and so on. These investigations are nearing completion and adjustment of the duties may be expected.

I am advised, and it is a significant fact, that no applications have been filed by farmers themselves or by farm organizations requesting reductions in duties on domestic manufactured products.

The farmers of the United States are at the present time more interested in the tariff than ever before. The tariff act of 1922 was in reality largely made up in accordance with suggestions from the Senators and Representatives from the agricultural districts. The rates of duty on farm products fixed in the act were thought at the time to be adequate for the protection of agriculture. If there are duties that are still inadequate, when the tariff is revised by Congress the Republican Party will undoubtedly place adequate duties on such farm products.

It has often been contended that tariff legislation is class legislation, but if that was ever true it is not true now. The low tariff advocates now generally accept the fact that the wage earners have accepted the tariff as an economic necessity and the advocates of the low tariff are beginning to fix their attention almost entirely on the farmer in an effort to capitalize his discontent.

They now declare that the protective tariff favors the manufacturer and the wage earner at the expense of the farmer. The farmer is being told that the tariff does not benefit him either directly or indirectly, but on the contrary he is penalized by having to pay higher prices for what he buys because of the protective tariff.

The fallacy of this argument is apparent when the farmer realizes that by protection the wage earners are guaranteed steady employment in the cities and towns, thereby giving him a great home market of buyers who are able to purchase the same quality of goods and food products as the average member of the so-called European upper classes are able to buy. In addition to this the farmer knows that he has a direct benefit from protection. Many of our farm crops could not exist under our present wage system in competition with cheap labor in foreign fields.

In the State of Utah in 1927 one beet sugar company paid two and a quarter millions of dollars for labor and four millions to the farmers for sugar beets in that year. Without a reasonable tariff on sugar this factory would be out of business. This is only one small item of the direct benefit to the farmers.

Our opponents would not dare this year to advocate the repeal of the tariff, but they are on record in the first session of the Seventieth Congress as favoring a revision of the tariff downward. This would mean that on all of the agricultural products there would be a downward revision of the tariff. Let this be known among the farmers of this Nation and I am not afraid of the result. Let the issue be squarely drawn between the great protective tariff as advocated by the Republicans and the uncertain undefinable attitude of the Democratic Party and without question the people of America will continue in power the great party that has been the greatest contributing factor in making America the leading nation of the world.

SECOND ANNUAL REPORT TO THE VOTERS OF THE FOURTH DISTRICT OF CALIFORNIA

Mrs. KAHN. Mr. Speaker, the first session of the Seventieth Congress has ended, and under the leave granted to Members of Congress to print in the RECORD their statements on any subject, I am utilizing this privilege once more to render to the voters of the fourth congressional district of California a brief résumé of the activities and accomplishments of the present Congress, with especial reference to my own votes and views on the legislative matters that have been before the Congress and the Nation during the session just ended.

The expense incident to the distribution of this report is not a charge upon the taxpayers; out of my own funds I shall pay for the reprinting of this statement, also for the addressing of the envelopes. I have estimated that the printing and distribution of this report to the 100,000 voters in the fourth congressional district of California will cost me between $450 and $500. Being mailed as a public document it has the advantage, of course, of the franking privilege and carries no postage. However, as explained in my previous report, I can think of no better use to which the CONGRESSIONAL RECORD can be put than to employ it as a means of acquainting the voters with the legislative record of Congress and with the attitude and vote of their own Representative on the important questions with which Congress has had to deal. The voters are in a true sense stockholders in this greatest corporation, the United States Government, and as stockholders are entitled to know what the directors—the Members of Congress—are doing and what the condition of the corporation is.

LEGISLATION

During the session of Congress just ended there were four major measures of national scope which particularly interested me; I refer to the revenue act of 1928, the merchant marine act, flood control, and the alien property act. These measures are now law, and in my opinion distinguish the session of Congress that achieved their enactment as one of constructive accomplishment.

It might be of interest here to note that during the session of Congress just ended there were 4,577 bills introduced in the Senate and 14,143 bills introduced in the House. In addition to these bills a large number of resolutions were introduced. These bills are referred to appropriate committees and by them referred to the departments affected for report; later they are returned to the committees for consideration and report to their respective Houses and placed on the proper calendar of the House or Senate. While it is a physical impossibility for a Member to keep up with all the bills introduced and pending before Congress each Member is expected to become familiar with those reported from the committees of which he or she is a member, and every conscientious Member must study the bills of general importance to the Nation, and especially those which peculiarly affect his or her own district or State. Nine hundred and ninety-two bills were enacted during this session of Congress.

COMMITTEES

I am a member of four committees: First, Committee on Education; second, Committee on the Census; third, Committee on War Claims; and fourth, Committee on Coinage, Weights, and Measures. I have attended on an average of four committee meetings each week, and have taken an active part in all matters coming before them for consideration, action, and report.

REVENUE ACT OF 1928

When the Seventieth Congress convened last December the first subject to engage its attention was that of tax reduction. I voted for this bill. The revenues collected and the payment of interest and part of the principal due on our foreign debts were in excess of our expenditures, which justified a further reduction of taxes. The money absolutely necessary to maintain the Government with rigid economy should, I believe, be collected from the people, taking into consideration their wealth and their ability to pay. With this in view, I favor a graduated income tax; in the first place, granting liberal exemptions to persons of small income and beginning with a lower tax upon those of moderate income and exacting a greater percentage from the larger incomes.

In the formation of the tax revision bill of 1928 three principles were followed: First, that the reductions should not be such as would produce a deficit in the Treasury; second, that the reductions should be distributed where the need for relief appeared most necessary and advisable; and third, that the taxes that had not been reduced since the World War should be given special attention.

The following table will show precisely how each individual class is affected by the new rates:

Reduction in revenue

Corporation rate, reduced 13½ to 12 per cent	$123,000,000
Corporation exemption, increased $2,000 to $3,000	12,000,000
Automobile tax, repealed	66,000,000
Admission tax, exemption increased from 75 cents to $3	17,000,000
Club dues, exemption raised $10 to $25	1,000,000
Earned income allowance, increased $20,000 to $30,000	4,500,000
Cereal beverages, repealed	185,000
Wine taxes, reduced	1,000,000
Foreign-built yachts, repealed	10,000
Narcotics, druggists' fees reduced from $6 to $3	150,000
Total reductions	225,295,000

The analysis of this reduction shows that the largest single item is the one beneficial to corporations and their stockholders. Previous tax-reduction measures had left the corporation taxes high in comparison with individuals and partnerships. The tax rate on corporations was reduced from 13½ to 12 per cent, resulting in a tax reduction of $123,000,000. In the case of small corporations with net income of $25,000 or less the exemption was increased from $2,000 to $3,000 resulting in an additional saving of $12,000,000 or a total corporation tax reduction of $135,000,000. It is estimated that there are not less than 3,000,000 individual owners of corporate stock in the United States, indicating that the benefit of this reduction will be widespread.

The second largest reduction in taxes will benefit the purchasers of automobiles. The present tax on the sale of cars, amounting to between $66,000,000 and $67,000,000, has been entirely eliminated.

The next largest item of reduction is in admissions. The exemption from tax of such charges was raised from 75 cents to $3, making a total reduction in the admission tax of $17,000,000.

The tax assessed against druggists and other dealers in narcotics was changed from $6 to $3 a year. I might explain that the purpose of this tax is not so much for revenue as to secure an accurate registration of every person in the United States who dispenses, or who is dealing in, narcotics.

The exemption on club dues was raised from $10 to $25, making a total reduction in that tax of $1,000,000. Members of clubs whose annual dues are $25 a year or less will pay no tax. This takes care of the smaller clubs, teachers clubs, country clubs, and various similar organizations.

The new tax bill provides for several administrative changes, which materially simplify the law by grouping the various related sections, and after these changes are put into general use they will be found to be of great benefit to the individual taxpayer, the student of taxation, and the attorney.

APPROPRIATIONS

One of the most important functions of Congress is to wisely appropriate money to operate properly and efficiently this greatest Government in the world. At the opening of each session of Congress the President, through the Bureau of the Budget, submits an estimate of the money which will be necessary to carry on the work of the various governmental departments. Upon the basis of these estimates the Appropriations Committee submits the various supply bills. During the session of Congress just ended the total amount appropriated was $4,595,-

448,625.59. The following are the major appropriation bills and the amount carried in each bill:

Agriculture	$139,138,793.88
District of Columbia	37,625,209.00
Executive and independent offices	527,593,111.00
Interior	272,656,039.00
Legislative	17,746,893.26
Navy	362,145,812.00
State, Justice, Commerce, and Labor	89,820,597.64
Treasury and Post Office	1,061,342,060.00
War	398,517,221.50
First deficiency	200,936,688.02
Second deficiency	99,172,485.76
Permanent annual and indefinites	1,388,753,735.53
Grand total	4,595,448,625.59

Happily, we are living through peaceful and prosperous years, and this is and should be a period of progress and of constructive development. While I have insistently voted against all unnecessary expenditures, I have supported certain measures carrying large appropriations that will yield returns in good roads, public buildings, flood control, and so forth, which I regard as investments. I believe, however, that all appropriations for nonproductive purposes should be closely scrutinized and reduced to the minimum.

MERCHANT MARINE ACT

The merchant marine act represents an effort on the part of our Government to further the development of a private merchant marine rather than a continuation of the shipping business under Government management. It provides a fund of $125,000,000 for this purpose, which may be loaned for the construction of private vessels, and in addition establishes favorable mail contracts. This act is considered a long step forward in American shipping. It will make possible the building of new ships of greater speed than any now flying the American flag, and so revive the shipbuilding industry in this country.

It is expected that it will stimulate an increased use of American ships for carrying American cargoes, as well as give us a larger measure of industrial and commercial independence. Also, it will provide us with naval auxiliaries in times of stress. But more important than all these advantages, the passage of this act served notice to the world that it is our settled purpose to retain upon the seas that which we now have and that it is our determination in due process of time to build and maintain a merchant marine of a size and efficiency commensurate with our national interests and national dignity.

FLOOD CONTROL

After extensive hearings, numerous conferences, and negotiations between congressional leaders and the executive branch of the Government, a flood-control measure was enacted which recognizes the principle that this is a national problem and obligation. The sympathy of the Nation went out to the people of the Mississippi Valley when that vast territory was inundated by a great avalanche of water, covering as it did every city, village, and farm in its path. Devastation, destruction, disaster, and death followed in its wake, and the total loss ran into many hundreds of millions of dollars. I believe that flood control is a national problem, and I supported the legislation recommended by the Flood Control Committee, carrying an appropriation of $325,000,000 for flood-control work.

ALIEN PROPERTY ACT

During the World War an immense amount of property belonging to the citizens of Germany was seized by the Alien Property Custodian representing the United States Government. In addition, we took over German ships which were in our harbors at the time war was declared, likewise a radio station and a large number of patents belonging to Germans. After the war was over many American citizens presented claims against Germany for losses sustained during the war period. It would have been unfair to return the seized property to Germany without giving consideration to the claims of Americans. The alien property act provides for the settlement of claims of American nationals against Germany, and of German nationals against the United States, and for the ultimate return of all property of German nationals held by the United States.

SAN FRANCISCO FIRE CLAIMANTS

When this legislation providing for the disposition of alien property was before the Ways and Means Committee of the House I appeared before that committee to press the claims of the Californians who suffered losses in 1906 at the hands of certain German and Austrian insurance companies who either completely failed to meet their obligations or met them only in part. It was decided, however, that consideration could be obtained for the California fire claimants through an amendment to be offered in the Senate after the bill should pass the House and be referred to the Senate. During the consideration of the bill in the Senate Senator SHORTRIDGE offered such an amendment, which was adopted by the Senate, but, unfortunately, it was stricken out of the bill in conference. Naturally, this was a keen disappointment to all of us interested in obtaining relief for the people who were so unjustly treated by the foreign insurance companies.

RADIO

Believing that radio is one of the greatest civilizing agencies of the present age, I supported the bill extending the life of the Radio Commission another year. This was necessary to enable that body to work out the many important and difficult problems which surround the art of radio. The act amends the previous law so as to require more nearly equal distribution of broadcasting stations, wave lengths, and operating hours among the five geographical radio zones. Order must be brought out of the existing chaos, interference prevented as much as possible, and broadcasting must be placed on a sound and permanent basis.

REVISION OF POSTAL RATES

The new postal rates law, providing for a reduction in rates estimated at more than $16,000,000 annually, is of interest and benefit to the people of the fourth district, as well as to the country in general.

Under this law the rate is reduced from 2 cents to 1 cent on post cards and private mailing cards. Provision is also made for the acceptance of business reply cards and letters in business reply envelopes without prepayment of postage. The purpose of this provision is to meet a demand from advertisers for a means by which they can encourage replies to advertising matter by the payment of the postage on such replies without the necessity for inclosing stamped post cards or stamped envelopes along with the advertising matter.

Second-class rates on advertising sections of publications and the postage on magazines and newspapers, when sent by others than the publisher or news agent, are reduced. A minimum charge per piece is fixed on second-class matter when there are more than 32 pieces to the pound.

The third-class rates remain the same as in existing law with the exception of some slight modifications in bulk rates.

Postage rates on fourth-class matter are reduced, and provision is made for bulk pound rates on third-class matter, a special rate on library books and combined special handling and delivery at reduced rates.

A bill has also been passed authorizing a new schedule of rates on air mail.

The Cuban parcel post bill, in which considerable interest has been expressed, remains on the calendar.

CONVICT LABOR BILL

I voted for this bill, which makes it possible for the State to prohibit the shipment of prison-made goods as articles of interstate commerce. It was supported by organized labor and many business and civic organizations.

VETERANS

A general bill increasing the pension rate for certain widows of Civil War veterans was enacted during the past session of Congress. Under this law Civil War veterans' widows who have attained the age of 75 and who were married prior to June 27, 1905, will have their pensions increased from $30 to $40 per month.

It is unfortunate that many bills of this character are brought up in the House under suspension of the rules, which prevents discussion in detail or amendment; in such instances the Members are compelled to vote for the bill as it stands and without change.

Omnibus pension bills, taking care of special Civil War and Spanish-American War as well as other cases, have also been passed during the session just ended.

Congress has also passed legislation further benefiting the World War veterans, including authorization of additional appropriations for hospitalization purposes, extending the time for conversion of insurance, prolonging the time for vocational training, liberalizing the law with reference to the filing of claims for compensation and the bonus, and the retirement bill for the disabled emergency officers.

A statement recently made by Representative ROYAL C. JOHNSON, chairman of the Committee on World War Veterans' Legislation, will prove of interest here:

Since the conclusion of the World War the Government of the United States has been most liberal in its treatment of disabled service men. Under the laws existing at the close of the war a soldier totally and permanently disabled with the most grievous injuries would receive compensation in the sum of but $30 per month.

By the passage of the Sweet bill that was increased so that total permanent disability to-day is compensated at the rate of $100 per month, and the soldier temporarily disabled receives $80 per month,

with allowances for dependents. With the passage of the veterans' act of 1924 the act was further liberalized.

Men disabled by mental diseases and by tuberculosis were by that law presumed to have received their disability in line of duty if the diseases were contracted prior to January 1, 1925, and by an amendment to the act, men arrested of tuberculosis receive for life compensation in the sum of $50 per month.

In the law (H. R. 13039) enacted in this present session of Congress, recently signed by the President, every service man is given the right, physically fit, to take Government insurance, and the time has been extended for all service men in which to file claims and present evidence showing that they have a compensable disability.

No country in the world has been as liberal to its service men.

I have actively supported all legislation in the interests of our veterans and their dependents. Hardly a day has passed since I have been a Member of Congress that I have not had opportunity to render some aid to ex-service men or their dependents in connection with pensions or increase of pensions, insurance settlements, compensation, hospitalization, and so forth. I believe the people who have actually made sacrifices for their country are entitled to every consideration.

FEDERAL EMPLOYEES

I have put forth every effort to improve conditions for the Federal employees. I supported the Welch bill, providing general salary increases, the Bacharach bill for the customs employees, as well as the differential pay bill for night workers in the Postal Service.

The bill liberalizing the Federal employees' retirement law was passed by the Senate, but failed to come up in the House. However, this bill retains its status on the calendar, and I am hopeful that it will be one of the first measures passed by the House at the December session of Congress. It can then be sent to the President for approval.

I introduced a bill (H. R. 10478) providing for the retirement of the licensed officers of the Army transport service. This bill was passed by the House on May 16, 1928. It is now before the Senate Committee on Military Affairs. I shall continue my efforts in behalf of this measure, and I believe those interested can be hopeful that the next session of Congress will see this bill enacted into law.

MUSCLE SHOALS

A question which has engaged the attention of Congress for several sessions is Muscle Shoals, and considerable discussion took place during the present session on this subject. Much has been said upon both sides of the matter, and a bill was finally passed by the House and the Senate and sent to the President for approval. The President has not signed the bill, and there is considerable question now regarding its real status. It is possible that the Supreme Court will have to decide the issue.

FARM-RELIEF LEGISLATION

The McNary-Haugen bill was introduced again, and after passing the House and Senate was vetoed by the President, who denounced it as unsound economically, suggesting it would injure rather than benefit the farmer. I voted against this bill. I believe that reduction in freight rates on farm products, reduction in taxes, better roads, and improved marketing facilities will prove of greater assistance to the farmer than the plan carried in the McNary-Haugen measure.

EDUCATION BILL

The Committee on Education, of which I am a member, held further hearings on the so-called Curtis-Reed bill, which provides for the creation of a Federal department of education with a secretary in the President's Cabinet. The present bill eliminates Federal subsidies to States and thereby gains increased support. As yet the bill has not been reported to the House.

REAPPORTIONMENT

The bill for the apportionment of Representatives in Congress was defeated. Under the Constitution of the United States, representation in the House is provided for by giving each State at least one Representative and representation otherwise in proportion to its population. The Constitution provides for the census to be taken within every 10-year period. These provisions of the Constitution recognize the certainty of the increase of population and the inevitable changes in the distribution of population, and the Constitution intrusted the Congress with the duty of readjusting representation to population for each 10-year period. At the end of each decade, with the exception of the last one, Congress functioned by reapportioning as provided by the Constitution. Following the census of 1920, Congress failed to reapportion, partly because of opposition to increasing the membership of the House and partly because of the opposition from States that would lose representation on reapportionment. The bill brought up in the House during the session just ended gave Congress its opportunity to perform its constitutional duty by providing in advance for reapportionment under the census of 1930. Its enactment would have provided a permanent system for reapportionment on the basis prescribed by the Constitution. Its passage would have given assurance to all States in the country that just representation would not be denied them. As a member of the Committee on the Census, I worked diligently for a favorable report on this legislation, and I voted for the bill when it was finally brought up in the House. California, whose population has increased tremendously during the past 10 years, is one of the States denied just representation through the failure of Congress to pass this legislation. Our State is justly entitled to at least three additional Representatives. While the measure has failed for the time, I believe that eventually right will prevail and this situation will be corrected.

CONSTITUTIONAL AMENDMENT

The joint resolution proposing an amendment to the Constitution, fixing the commencement of the terms of President, Vice President, Members of Congress, and fixing the time of the assembling of Congress, was defeated in the House. During the consideration of this resolution many amendments were proposed, one of which would extend the terms of Representatives from two to four years, their elections to be held at the same time the President is elected. As the discussion progressed the entire question became so involved that the best constitutional lawyers in Congress could not agree as to how the resolution would work out should it become a law. In attempting to amend the Constitution it should be done deliberately and carefully, and where any change can be accomplished by legislation rather than by amendment I favor the legislative process. If, during the next session of Congress, a less complicated measure is brought up in the House on this subject, I shall be very glad to consider it.

PROHIBITION

Approximately 60 bills were introduced to modify the Volstead Act, one of which I sponsored. These bills were all referred to the Judiciary Committee, but no action, I regret to say, was taken on them during this session. I consider the prohibition situation most deplorable, and I firmly believe that if the Volstead Act were amended to the extent of permitting the manufacture and sale of light wines and beer it would do much toward eliminating many of the evils that prohibition has brought about. Some most unfortunate accidents have occurred through the indiscriminate use of firearms by Coast Guard men and prohibition agents; I have advocated distinctive uniforms for these officials so that unoffending private citizens can distinguish them and be on their guard against accidents.

SAN FRANCISCO BAY BRIDGE

Hearings were held before the Committee on Interstate and Foreign Commerce of the House and before the Committee on Commerce of the Senate on bills to permit the construction of a bridge across San Francisco Bay. Cooperating with Congressman WELCH and a delegation of San Francisco officials, I appeared before the House committee to urge the necessity of such a bridge for the commuting public between San Francisco and the bay cities. The Senate committee made a favorable report on the matter to the Senate, but as yet the House committee has not taken any action in the premises. I shall renew my efforts in behalf of this project at the December session of Congress.

HETCH HETCHY

Toward the close of the session San Francisco was unjustly attacked in connection with the Hetch Hetchy project and our compliance with the provisions of the so-called Raker Act. I defended San Francisco against the charges made, and those interested in this controversy can find the details in the CONGRESSIONAL RECORD of May 19, 1928. My statement appears on pages 9247–9251.

PRESIDIO ROADS

Early in the session I introduced a bill authorizing the appropriation of $47,200 for the improvement of the roads in the Presidio. This measure was approved by the President on May 3, 1928, and this very necessary work will be done in the near future.

BOULDER DAM

One of the big issues before Congress is Boulder Dam. The bill authorizing the development of this project has been passed by the House, and is the unfinished business of the Senate, to be taken up early in the December session of Congress. The paramount purpose of this legislation is the protection of human life and property in the Imperial Valley, now under a constant menace of destruction from floods. In a comprehensive report by the Secretary of the Interior, he states, among other things:

The general plan and purpose of this measure have my support, and I favor its being made a national undertaking, to be carried out and administered by the Federal Government.

PEACE

While the Members of the House of Representatives have practically no voice in negotiations with foreign governments, I have followed with a great deal of interest the efforts of the President and the Secretary of State to bring about the acceptance of a multilateral treaty among the principal nations of the world renouncing war as an instrument of national policy in their mutual relations.

The trend of civilization is undoubtedly toward peace, and I believe that we as a nation can feel satisfied with the efforts of our Government in this connection. As President Coolidge has pointed out, the peace of the world can not be obtained by any one single act; but every treaty of arbitration and conciliation and every agreement against resorting to war adds another barrier against those conflicts which from time to time have recurred in the history of nations. It is the hope of mankind that these repeated steps may in time establish a mode of thought and a custom of action that will do much to prevent war. I believe we must cultivate and cherish sentiments of friendship and understanding, but I believe, too, that we must be mindful of our national defenses for the millennium has not yet been reached.

OUR DUTY AS CITIZENS

In an address before the Daughters of the American Revolution, President Coolidge called attention to the significant fact that—

since 1880 there has been a marked increase in the tendency to remain away from the polls on the part of those entitled to vote.

One way to counteract this widespread apathy and indifference is to stimulate in each individual citizen a keener interest in the business of Congress. This, my second annual report, is distributed in the hope that it will stimulate thought and a deeper sense of responsibility relative to the work of Congress, and also enable you, the voters, to determine to what degree and in what manner I have represented you and your interests.

PERSONAL SERVICE TO CONSTITUENTS

It is almost impossible to give an adequate description of the tremendous amount of work involved in the service rendered by a Representative to his or her constituents in an individual capacity. At times it is difficult to keep up with the daily demands and render the needed service as promptly and efficiently as it should be.

The requests for information and assistance require close cooperation with practically every Government department. They include inquiries regarding pending legislation, immigration and deportation cases, claims of ex-service men, pension cases, income-tax matters, the securing of passports for travelers, discharge of enlisted men in the Army, Navy, and Marine Corps, appointments to West Point and Annapolis, pardon cases, recommendations for appointments and transfers, the supply of general information on many subjects, the furnishing of publications, and so forth.

During the sessions of Congress my office is open every day in Washington, and during the adjournment periods of Congress I maintain an office at home in San Francisco, where I am always glad to see my friends and constituents and take up with them personally the matters in which they are interested. My office in San Francisco this year is located at 1027 Merchants Exchange Building, where I shall be until the convening of Congress next December.

In closing I can say with the utmost sincerity that I have continued to adhere to the established policies of Julius Kahn. Like him, I am a firm believer in party government, but blind partisanship was never his guide to action in voting on measures. I have voted on each measure purely on the basis of the merits of each question. I appreciate the splendid cooperation that has been given me by individuals and groups in the district. Only through your cooperation and your advice will teamwork in government come about.

I am a candidate for reelection as the Representative of the fourth congressional district of California. I am willing to stand on my record.

THE STONE MOUNTAIN MEMORIAL

Mr. LEA. Mr. Speaker, as a member of the congressional committee appointed to represent Congress at the unveiling of the Lee Statue on Stone Mountain on the 9th of April, 1928, I desire to express an appreciation of having served in that capacity. I appreciate the thoughtful consideration and many courtesies extended to us on the trip by our colleague, Congressman BELL. The genial and admirable qualities of Mr. BELL are known to all our colleagues. At no time were those qualities more appreciated than in his capacity of host to the congressional committee on this occasion. We found that our Georgia colleague was only a sample of that same geniality and hospitality we met generally among the people of Atlanta.

Certain unique features of this unveiling at Stone Mountain were impressive. Stone Mountain itself is unique among the mountains of the world. Detached from any range of mountains, it rises out of a comparatively level country, forming a conspicuous silhouette against the southern sky. It is not a great heap of soil, rocks, and brush, canyons and cliffs, as we ordinarily think of a mountain. It rather impresses one as a great monument, lifting up and spreading out in majestic proportions, fashioned by the Master Architect from one gigantic stone. The solidity of its materials and the vastness of its proportions make it secure against the destructive elements of all time. We gaze upon it and are reminded of "yesterday, to-day, and forever." The color of its gray granite adapts itself to the comparable uniform of the heroic characters to which it is now dedicated. Its enduring qualities are comparable to the enduring fame of the great leader. It rises up out of the heart of the land that gives such a tribute of affection and devotion to the memory of her great captain, such as has never been surpassed by the tributes paid to the victorious heroes of this earth, and the equal of which has rarely, if ever, been bestowed on the heroes of the lost causes of history.

The date of the unveiling was in itself significant. The 9th of April was the anniversary of Appomattox. It was there the cause of Lee and the South became the "lost cause." Appomattox was Lee's Gethsemane. From Appomattox Lee and his men turned away in defeat. The union of the Confederate States, as a separate government, was defeated forever. The Union of the States of America was confirmed forever.

Yet the memorial at Stone Mountain is not a monument to defeat but rather a tribute to triumph. The Union established and confirmed at Appomattox is now accepted without regrets—yea, happily. The memorial at Stone Mountain is a tribute to heroic and uncomplaining sacrifices to courage and to all those other great qualities of heart, mind, and soul of the southern people which find their noblest exemplification in the life, services, and character of Robert E. Lee.

In the travail of war and doubly in the following decades, when the South with patient toil, unmeasured discouragements and ultimate success sought its restoration, there was comfort and inspiration in the memory of Lee. In their poverty of material things, they yet had inspiration, pride, honor; they had spiritual wealth in affection, admiration, and reverence for their great leader. These remained as assets to the South. Stone Mountain stood on the 9th of April as a tribute to victory out of defeat.

Visitors will come from all lands to behold this tribute of a great people to the leader of their lost cause. They will behold a tribute unsurpassed by any similar monument on the face of the earth.

Behold the monument's majestic front,
The mighty captain carven in the stone!
Proudly he strides his peerless Traveler
Facing the battle field as when he viewed
His tried divisions march across to death.
High art has triumphed where an army failed.

Not the least pleasing feature of this dedication was the presence of little Robert E. Lee, great-grandson of the Confederate general. As the flags drawn aside revealed the heroic statue, little Robert released 48 pigeons, each representing a State of this happy, united country. With winged delight they arose and circled above the face of the mountain side.

This little 3-year-old great-grandson has a distinctive personality. He has a reserve power in embryo, a personal charm, the wholesomeness of a morning in spring, and a tinge of thoughtful calmness in a face that exhibits unusual mental penetration for one of his years. Manifestly he shares the rich heritage of his great-grandfather's blood.

FARM LEGISLATION

Mr. RAYBURN. Mr. Speaker, every thinking person in the land realizes that there is a farm problem. Everyone must realize that although many other industries are prosperous, as they never were before, that agriculture as a whole is in the worst state of depression in which it has ever been. The question of farm legislation has been up for discussion in Congress and in the country for several years. What are we going to do about it? Are we going to sit supinely by while the greatest industry in our land languishes? The question of farm relief has been raised. It must be met and it must be settled. Farmers from one end of our land to the other have awakened to their condition and to their rights and are justly demanding that agriculture be given justice. It has been wisely said by a

wise man, "When tillage begins, the other arts follow; the farmers are therefore the founders of human civilization."

The farmers have been the pioneers in all the advancement of our country. It was the farmer who went forth to clear away the forests and turn the sod of the prairie to make it a home for man that products may be brought forth to feed and clothe the world. He went into the tractless forest before the railroads went there or the factories or other businesses went there, and there never would have been railroads and factories or towns if the pioneer farmer had not blazed the way and settled the country and brought forth by his labor the things that the railroads, the factories, and all used to build towns. Every other industry in the land should want agriculture to be prosperous. If the farmers are not prosperous the revenue of the railroads shrink and labor upon the railroads is idle. If agriculture is not prosperous the smoke will cease to lift from the factories and their business shall perish from the earth, and thousands upon thousands of men and women will be left out of employment because the farmer will not have money with which to buy the output of the factories. So, with the merchants and the banks. We are all interdependent upon each other, and if the greatest and most basic of all industries is not prosperous then every other industry fails in prosperity.

To show you that other industries are prosperous and the farmers are not we have but to refer to the income-tax returns for the past six years. After Congress had made three great reductions in income-tax rates the surplus collected last from this tax was $635,000,000, which shows conclusively that many men and many industries are prosperous. What is the tragic story of agriculture? Within the last 15 years the wealth of the country has increased more than $200,000,000,000, while farm values have shrunk $20,000,000,000 and farm indebtedness has grown nearly $10,000,000,000. A further fact showing the depressed condition in our agricultural sections in answer to the boast of the prosperity under Republican administration, it may be cited that during the Harding and Coolidge administration there have been 3,785 bank failures and 2,800 of these failures occurred in the 12 leading agricultural States.

On top of this hundreds and even thousands of business houses have been forced to close their doors in these agricultural States because the farmer in his depressed condition was not able to patronize business concerns. These conditions stare the farmer in the face, and yet he has to buy upon a high price level and sell upon a low price level. The things that he has to buy are protected and the price made higher by tariff laws, and the things he has to sell are sold in open competition with the whole world. The tariff in a few lines of agriculture will help the producer, but in the vast majority of instances it is a snare and a delusion. Take cotton, for instance. America exports millions of bales each year and imports no cotton that would come in competition with the export cotton; therefore, a tariff on ordinary cotton, it matters not how high, would be of absolutely no benefit to the cotton farmer, as there is no competition to meet. Therefore, the only hope of the man who produces cotton is that the discriminations in the law against him be removed, and by better marketing conditions and in the aid of the strong arm of the Government these conditions may be brought about. This is part of the tragic story of agriculture. This is why the farmers throughout the land are crying out for justice and for Congress to take out the discriminations in the present law and pass other laws that will give them justice and a square deal.

If I sat on the Republican side of the House, regardless of what my President said as to the details of relief, I would join those who are seeking an honest solution of the farm problem. I would go further. I would vote to pass this bill over his veto the same as I would if the President of my party sat in the White House at this time and vetoed the measure that we have before us. The boasted prosperity under this Republican administration has never reached the farmers. The farmer will believe that prosperity has come to him like it has come to other people when he is able to pay his notes at the bank, pay the merchant, get out of debt, and have some left to clothe and feed his family and to buy them books that his children may go to school, and enough more left to buy some of the comforts and pleasures of life that all others seem to enjoy.

Two years ago I supported farm relief legislation. I am supporting farm legislation at this session of Congress, and I believe that the passage of this so-called McNary-Haugen bill, even though it has some features in it that I would like to see eliminated, will be a great step forward for the benefit of agriculture. Given an honest, intelligent, patriotic board, nonpartisan in its character, with $400,000,000 to buy up surplus crops and hold them off the market and to feed them gradually to the market with the constant threat to those who would try to manipulate the market and cheat the farmers, we will see a new day dawn for agriculture. Some of the timid ones in this House say they fear the power of the board created by this law. Any board is to be feared that is not composed of wise and patriotic men, and every board and every commission in this Government could be made an agency of great oppression if it were composed of the wrong sort of men. We have the Interstate Commerce Commission that has power over the whole railroad industry and the right to fix the rates that the railroads receive and that every shipper and every consumer must pay. This is a vast power, but who would be so bold as to ask for the repeal of the interstate commerce act and let the railroads go unbridled and back to the old days of rebates and favoring of the big shipper as against the small shipper? The Federal Reserve Board has great power, but who among you would advocate the repeal of the Federal reserve act that has done more to keep the country out of money panics than any piece of legislation passed in the last half century? Who would repeal the Federal farm loan act just because it has a board to administer it when it has loaned hundreds of millions to the farmers at a low rate of interest? The same can be said of the Federal Trade Commission. If we can live under these boards and not fear their power, then why fear the power of this board when we believe that it will have such powers and duties that will bring about relief to agriculture? The farmer not only wants some legislation for his benefit but he also wants you to remove some of the discriminations that already exist in the laws that are a constant burden upon him. Our Republican friends boast that agricultural implements are on the free list. This is a half truth.

Agricultural implements as such are on the free list, but every pound of steel and iron that goes into them is heavily taxed under your discriminating tariff law, increasing the price of every plow, every hoe, every wagon, every piece of harness that he uses in his labor on the farm. What has this administration done for the farmer? Nothing, except to pile his burdens higher by laws that favor the rich and discriminate against the poor. Never in the history of the last generation have farm products sold as high as they did under the last Democratic administration. Cotton and wheat reached an unprecedented price during that administration. Prices have decreased and agriculture has languished since the Harding and Coolidge administrations have been in power. What did the Democrats do while they were in power? We passed the farm loan act that was a boon to agriculture. We passed the Federal reserve act that has kept down panics and that has kept money in the banks for the farmers to get; and after that we passed the Smith-Lever extension act and many other acts too numerous to mention that helped and did not hurt agriculture. Since the Republicans have been in power they have passed no laws except to place upon the statute books laws that have been discriminatory and hurtful.

Every patriotic American, be he Republican or Democrat, should hope for the prosperity of agriculture, for every sensible man must know that the life of this Republic and the perpetuity of these free institutions of ours rests in the last analysis upon the prosperity, peace, and happiness of all classes of people. We must rear in this land a healthy, happy, virile race if we are to preserve the good in the Government transmitted to us by those who died to bring it into existence and who have fought for more than a hundred years to preserve it. In every war for liberty and the preservation of our institutions the farmers and their sons have gone to war, and upon the farms of our land have the torches of patriotism always been held high. More nations have gone down to defeat and have passed out of existence from hunger than from invading armies.

I know the condition of agriculture generally over the country, and especially do I know it in the five counties of the great district that I have the honor to represent. It is worse now than it has ever been. When I am at home I live on the farm. I watch conditions there. I am a director in the Fannin County Fair, my home county, where we are all trying by demonstration, by better seed, by better farming, by terracing land to preserve it, by dairying and livestock raising and by general diversification and getting away from one or two crops to help the conditions of agriculture. Yet with all this the farmers are not prosperous. It is harder to make a living on the farm now than ever before. In the district that I have the honor to represent the land is as rich, the people as intelligent, as patriotic, and as industrious as any under the sun; and if such people living in such a land as that can not be prosperous, then woe to this great industry from one end of the land to the other. These conditions should challenge the best thought and the highest patriotism of every American, whether he lives upon the farms or in the towns and cities. I warn you gentlemen from the cities and the great manufacturing sections that no

longer can you be prosperous if the men who till the soil do not have money to buy the output of your factories and your business houses. Even this bill in some of its particulars may not suit you and may not suit me. It is the best thought of those who have labored long and faithfully on this question, and remember that we must start somewhere, by some law, in order to bring about a solution of this almost appalling problem.

Again, I repeat, something must be done. It is the tragedy of the age and a black page on our history that this Congress should adjourn with nothing done for agriculture. My hope and trust is that in the coming election the people will rise up in their might, in their power, and in their patriotism and elect a President and a Congress that will do its duty and do justice to agriculture, that greatest of all our great industries.

THE FUNDAMENTALS OF DEMOCRACY

Mr. WHITTINGTON. Mr. Speaker, under the general leave to extend remarks I desire to submit the following address delivered as chairman of the Democratic State convention at Jackson, Miss.:

I wish first of all to express my appreciation of the high honor conferred upon me in being chosen temporary chairman of the convention.

We have turned aside from private pursuits and have assembled to consider public affairs. We must take high ground as we renew our allegiance to the fundamental principles of representative government and interpret the political faith of the people of Mississippi. There must be no rancor, discord, or dissention. We must banish the shams, hypocrisies, and nonessentials that frequently obtain in political conventions. The views of all should be considered and the decision of the majority should control.

We have met here conscious of our beneficent heritage and alive to the duties and obligations of citizenship. The Government is our greatest enterprise and participation in its affairs is an essential part of all our activities. Each must do his part; each must assume his share in the discharge of civic duties. He who is unwilling to shoulder his civic burden or to take his place in public affairs has no right to complain of misrule or injustice. The State or National Government will be good or bad as the citizen serves or neglects his country. A good government means a happy and prosperous people; a bad government means a discontented and oppressed people. Fertile lands, great natural resources, and mighty rivers do not make a great people. Only that land is great where the people are patriotic. The material is not enough; it will not suffice. The character and intelligence of the people and not material things make a country prosperous. The path of human history is marked by the wrecks and ruins of republics that fell because the people forgot and neglected their government. The government was bad and the people lost hope. Both the government and the people passed from the stage of history.

All government is human; none is perfect. The society that is satisfied is lost. No civilization is good unless it is growing better. We refer to the past, we recall the present, in order to point to the future. We review the fundamental principles of democracy in order to solve the complex and multiplying public problems of to-day.

FUNCTION OF GOVERNMENT

There is much confusion in the public mind to-day. Good men and women in Mississippi are anxious as to their proper course in the approaching presidential campaign. I have an abiding confidence in the people of Mississippi, and I believe that they will always do the right when once they analyze the real issues involved.

What are the real functions of government? It is not the province of the Government to engage in business or compete with private enterprise. It is not the function of the Government to supplant private initiative or to destroy the place of the individual in our economic life. It is not the function of the Government to deprive the individual of his self-reliance or take the place of competition in trade and commerce. Its aim is to protect society and to promote the peace and progress of the people. In the language of Thomas Jefferson,

"The freedom and happiness of man are the sole objects of all legitimate government."

MISSISSIPPI LIBERAL AND PROGRESSIVE

I can not refrain from expressing the satisfaction that all Mississippians feel in the forward and progressive legislation enacted by the present and immediately preceding State administrations during the past four years.

We can not live unto ourselves. The good opinion of others is a vital asset. Mississippi is regaining her prestige among the sister States of the Union. The recent constructive legislation, the favorable attitude toward both labor and capital, and the equal treatment of corporations and industrial enterprises have attracted favorable comment in the forum, in the public press, and in the business circles of the country. The State is being advertised as progressive and liberal. A new day of hope and of opportunity is breaking. The eyes of the Nation are turning to the South. We welcome industries and factories to our borders.

I am tempted to refer here to local problems—to the pressing necessity of reorganizing both State and county governments. I should like to emphasize a few of the important questions confronting the people of this State, questions that can be solved only by the cordial and sincere cooperation of the executive and the legislature, each working in the proper sphere as provided by the constitution. These problems are important, and they include revision and distribution of taxation, efficiency in administration, the use of the merit system in the selection of employees of the State, and a permanent highway program whereby those who use the highways shall pay for them. These questions can only be solved by mutual trust and confidence, in a spirit of cooperation, and in their solution there will be glory enough for all.

NATIONAL QUESTIONS

But we have come together primarily for the consideration of national issues. We are here to recall the fundamental principles of democracy, the great political truths for which the Nation was ordained, and the spirit and genius of the Declaration of Independence made a vital and living force by the Constitution of the United States. We are not here to straddle; we are here to confer; we are here to counsel and deliberate; we are here to think clearly and to speak plainly; we are here to interpret and proclaim the political convictions of the people of Mississippi. We are here to send to the national councils of democracy delegates to speak for us, delegates who are familiar with the best traditions of our people, of broad views, well grounded in the science of public affairs, honest and capable, who know our rights and are considerate of the rights of others, who are typical of our political ideals, courageous and resourceful, and determined to cooperate with the democracy of the Nation for the public welfare of all the people, and who will plan for victory in the coming campaign.

The people of Mississippi have a real interest in the issues before the country. There are questions that underlie the freedom and happiness of the people. I wish that the first inaugural address of Thomas Jefferson, the philosopher of Democracy, the great lover of the people, the most consummate politician and statesman of his or any other day, a message consisting of scarcely 4,000 words, might be read in every forum and proclaimed in every political meeting in the campaign of 1928. It enunciates the essential principles of good government, principles that are essential now as they were then. I recall a few of them:

"Equal and exact justice to all men; peace, commerce, and honest friendship with all nations, entangling alliances with none; the support of the State governments in all their rights, as the most competent administrations for our domestic concerns and the surest bulwarks against antirepublican tendencies; the preservation of the General Government in its whole constitutional vigor, as the sheet anchor of our peace at home and safety abroad; a jealous care of the right of election by the people—a mild and safe corrective of abuses which are lopped by the sword of revolution where peaceable remedies are unprovided; absolute acquiescence in the decisions of the majority, the vital principle of republics, from which there is no appeal but to force, the vital principle and immediate parent of despotism; economy in public expense, that labor may be lightly burthened; encouragement of agriculture and of commerce as its handmaid; the diffusion of information and arraignment of all abuses at the bar of public reason."

Jefferson emphasized the necessity of a wise and frugal government, which restrains men from injuring one another and leaves them free to regulate their own pursuits, and the imperative necessity of a government not taking from the mouth of labor the bread that it has earned. In a word, Jefferson summed up good government, and the principles he enunciated are as applicable to our own day as they were when he delivered his first inaugural address on March 4, 1801.

JEFFERSON AND HAMILTON

There are two theories of government. It is the age-long conflict between two great schools of thought—one the rule of the few, the other the rule of the many; one the centralization of power, the other the distribution of authority; one the exaltation of a class, the other the welfare of all; one special privileges, the other equal rights; one the Hamiltonian theory, the other the Jeffersonian creed. The conflict is just as real to-day as it was in the days of Jefferson and Hamilton; greed and avarice are just as selfish now as then. Eternal vigilance is just as applicable to peace as to war; it is always essential to success and victory. There are some issues that are national and not political, humanitarian and not economic, but the Republican Party adheres to the school of Hamilton and the Democratic Party is the spokesman for the principles of Jefferson. Under which banner will Mississippi march to the polls in November, 1928?

Have we forgotten the days of reconstruction? Insidious efforts are being made to create false issues and to revive settled issues, issues settled by both Constitution and by statutes, which no Congress can or will repeal, in the hope of dividing Democracy and in the hope of diverting attention from the real issues of the campaign. The party of Jefferson, Jackson, Cleveland, and Wilson is called upon again to do battle for the people against the entrenched powers of greed, monopoly, and corruption. The people are not receiving a square deal, and they

know it. If Democracy is united on essentials and if a leader is chosen who has the confidence of the great body of the people, the masses of Democracy will rally to his standard as they have never rallied to the call of a political leader since the days of Andrew Jackson. What shall be our battle cry? Who shall lead the hosts of Democracy against the boasting forces of deception and corruption? Who shall lead in the battle to restore the Government to the people?

We have a direct interest in national questions, and I mention but a few: The tariff, taxation, centralization, bureaucracy, agriculture, and foreign relations.

The average citizen may not pay a tariff at the customhouse, or a direct tax; but we pay them nevertheless. We pay them in the food we eat and in the clothes we wear; they are included in the rent we pay. All taxation is not direct; it is largely indirect, and ultimately falls upon the producers, wage earners, and consumers of the country. Let us turn aside from the nonessentials that so frequently engage the attention of our people and consider for a few moments some of the paramount questions in the coming campaign.

HIGH COST OF GOVERNMENT

The costs of government are alarming and they are steadily mounting. In 1923 the Budget estimated that the average cost of the Government for 1921 to each man, woman, and child in cities of more than 30,000 inhabitants in the country was $96.16. This is $480 contributed annually by the average American family of five to the costs of government.

There is one person on the public pay roll of the State, municipal, or National Government for every 12 persons over 16 years of age. Surely and certainly we are building a bureaucratic system of government. It is the most inefficient and demoralizing form of government ever conceived by man. Expenditures are made and appropriations authorized that are utterly indefensible. Every increase appropriation in the legislature or in Congress means more taxes, and those who ask for increased appropriations must know that they will pay for these appropriations in the long run. The National Budget for 1928 is about $4,700,000,000; just a few years before the World War it was only $800,000,000; and now, 10 years after the war, it is almost $5,000,000,000. The people are being burdened unnecessarily and unjust taxation is depriving them of the comforts of life. It is subversive of good government; it leads to corruption and unless checked it will result in the downfall of the Republic.

It is said that one person out of every five was supported by the Government at the beginning of the French Revolution. The bureaucratic Government of France fell and all other bureaucratic governments that have gone before have fallen. A bureaucratic system is not only destructive of the individual, depriving him of his self-reliance, the labor of his hand and the fruit of his brain, but it is destructive of the government. The tendency is to pass the taxes to the wage earners and consumers; the selfish effort is to shift responsibility from those who accumulate under our economic system to those who labor and toil.

DISHONEST TARIFF

What is the interest of the people of Mississippi in the present dishonest and unscrupulously high protective tariff? Our chief product is cotton, 60 per cent of which is exported annually. We receive the world price and we must compete with cheap foreign labor. We are for a reasonable tariff, an honest tariff; we would not disrupt the industrial life of the Nation, but the high schedules of the Fordney-McCumber tariff are not for the laborer; they are for the benefit of the manufacturer. A high protective tariff is not necessary to protect American industry. The employees in the automobile industry receive the highest wages in the country, and yet the automobile industry has developed marvelously without a tariff.

Again, no matter what may have been our views about a tariff before the World War, the situation is now completely changed. Seventy-five years ago England became the great creditor nation of the world and the protective tariff system was abolished. The United States has retained it, but the United States of 1928 is far different from the United States of 1914. We are now the great creditor nation of the world. We have become a lender instead of a borrower. We are no longer in our economic infancy. Our World War allies owe us $10,000,000,000; we have increased our loans abroad until the foreign loans of American citizens now aggregate some $15,000,000,000. In my judgment there is danger in further foreign investment unless the policy is restricted in European countries upon condition that the large military forces now being maintained are materially reduced. There is no way for our foreign debtors or foreign customers to pay unless they can exchange their products for our gold. The expansion of the protective system will spell economic and financial ruin for the United States.

FOREIGN POLICY AND TRADE RELATIONS

What is the place of the United States among the nations? Washington proclaimed it and Jefferson reaffirmed it: Peace and friendship with all nations and entangling alliances with none. We oppose a policy of isolation, we oppose a policy of indifference; we favor a policy of good will and of peace. The cotton growers of the South are concerned in better trade relations with all nations. The voice of America should be heard in all economic and international councils so that peace may prevail, commerce may be carried on among the people, and American rights and privileges may be everywhere recognized and protected. The American flag, whose stars and stripes have been baptized in the blood of our heroes, must protect the sons and daughters of the Republic on every sea and in every land, and must protect trade and commerce with all people. The markets of the world must be open to American trade and to American products. We are determined that neither the Army nor the Navy shall be used as a constabulary to protect and promote the greed and exploitations of those who would rob and plunder in Mexico, Central or South America, or elsewhere.

AGRICULTURE

Those who do not understand the problem of agriculture and those who are not interested dismiss the plea of the farmer by saying that laws can not aid agriculture. It is said that the farmer must work out his own salvation. This is the stock reply of those who are now enjoying the benefits of national legislation when the farmer asks that the aid now given to others be accorded to him. When the manufacturer pleads for a tariff, when labor asked for laws to protect the interests of those who toil, when banking asked for the Federal reserve system, when transportation pleaded for loans for rehabilitation after the war, did Congress ignore their appeals and tell each of them to work out their own salvation? The machinery has been provided to aid labor, industry, banking, and transportation. The farmer asks no special favors. He pleads for a square deal. He has not refused to work, but he asks for an adequate return for his daily toil. He asks that the Government provide the same yardstick in dealing with agriculture that has been established for the other interests of the Nation.

There is something wrong with both the laws and economic system of the country when the large cotton crops of 1925 and 1926 did not bring to the grower as much by 25 per cent in the aggregate each year as the average normal crop in preceding years. There should be some relief when the agricultural wealth has actually decreased since 1913, while the national wealth has steadily increased. The aim is not to put the Government in business, but it is to enable the fundamental industry of the Nation to function properly. The surplus should be the salvation and not the destruction of the farmer. Agriculture of itself and by itself can not solve the problem. I know of no panacea for all the ills of the farmer; I know of no magic wand whose wave will make the improvident prosperous and the inefficient successful, but I do know that the present economic system, under which the aggregate value of the large crop is less than the aggregate value of the small crop, under which the large crop is really a curse instead of a blessing, is wrong and ought to be remedied. The benefits that have been extended by the Government to others should be extended to agriculture or they should be withdrawn.

The problem is not local or State; it is national. Agriculture is entitled to the help of industry, trade, finance, and the Government. Taxes of farm property in 1926 were approximately 250 per cent of what they were in 1914, whereas the increase in the price of farm products was only 130 per cent of the 1914 figure. Taxes on lands must be reduced. The States can best help, not by endeavoring to control the weather and the yield, when statistics show that in the case of cotton 46 per cent of the factors affecting the yield is due to acreage and 54 per cent is due to weather, insects and other conditions, but by relieving the lands of the burdens of taxation. The Federal Government can best help by promoting marketing and by financing the surplus.

FLOOD CONTROL

The flood of 1927 wrought frightful destruction in the lower Mississippi Valley. The heart of the Nation was touched and the conscience of the country was aroused. The people were of one accord. There was never such unanimity of sentiment about any matter of national import. From shore to shore, from Lakes to Gulf, the country was of one mind. American public opinion was unanimous. The problem was not sectional or political, but national. The Government has recognized the obligation and the flood control act of 1928 is the most constructive legislation for a great public internal improvement ever authorized by a law-making body.

The burden of taxation for levees and flood control has been transferred from the shoulders of the people along the river to the shoulders of the Nation. The flood control of the Mississippi River means the dawn of a more prosperous era in the Mississippi Delta. I here and now gladly acknowledge the debt of gratitude of the people of the Mississippi Delta to the National Congress, to my colleagues in the House, to the Senators from Mississippi, to the Governor of Mississippi, and to the legislature, and to all of the people for the kind and sympathetic interest and for the fine cooperation and adequate legislation that meant so much to the people of the Delta, who were overwhelmed by the great flood of 1927.

PROHIBITION AND LAW ENFORCEMENT

The Democracy of Mississippi is for law enforcement and for prohibition. Ours was the first State to ratify the eighteenth amendment. State-wide prohibition has obtained in Mississippi since 1908. Thirty-

three States had enacted prohibition laws, covering 95 per cent of the area and 68 per cent of the people of the United States, before the eighteenth amendment was ratified by 46 States. The majority of the people and the vast majority of the States have spoken. The saloon has gone, never to return. The people of Mississippi stand squarely for prohibition. We are opposed to the modification of the eighteenth amendment or to the repeal of prohibition statutes. There is not now, nor can there be any uncertainty as to where the Democracy of Mississippi stands on prohibition.

Again, the sentiment of the country is for prohibition. The expressed will of the majority of the American people is being attacked by a militant minority. The task of the friends of prohibition and law enforcement is to promote public opinion by example as well as by precept. We live under a government of men and women rather than of laws. It is not necessary for the patriot to hold office to be of service to the country. The man or woman who shapes public opinion exercises a greater power than the judge who writes judicial decrees or the legislator who enacts laws.

A policy of education and observance will help. Public opinion must be right. It will not do to denounce the man who differs with us on the prohibition question. He has the right to exercise his own judgment. Many of our best friends differ with us; they are entitled to their views. I accord to any man the right to advocate the repeal of any law or the modification of any constitutional amendment that in his judgment is unwise and not for the public welfare. I do not denounce the man or woman who advocates a change in statute or Constitution. It is his privilege. It is both intellectual cowardice to denounce the man who differs with us on political questions. The resort should be to the bar of reason and not the forum of denunciation. The better way is to persuade and educate. The successful way is to reason and convince. A man may be thoroughly orthodox on the prohibition question and absolutely unfit to represent the people in any capacity on scores of other questions. I am interested in a man's record on prohibition, but when he undertakes to shape public sentiment or aspires to political preferment, I am more interested in his honesty, capacity, and loyalty to the public service. Freedom is one thing but disobedience to law and constituted authority is quite another thing. Laws ought to be obeyed by those who opposed as well as by those who favored their passage. Disregard of law breeds disorder and makes for anarchy. The best guaranty of liberty and freedom is obedience to the law. The man who disobeys has no right to ask for the repeal of a law. The Constitution must be obeyed. I take my stand with Jackson for the Union and for the Constitution. The tendency to evade, to disregard, and disobey the law gives me the most concern. I am interested in public sentiment and in promoting public opinion, but I am more interested in the cultivation of a public conscience for the enforcement of all laws.

Prohibition is entitled to a fair trial. The advocates of repeal and modification would strengthen their case if they would couple with their appeal a plea for the enforcement of the Volstead Act. There is no place for bigotry in representative government, nor is there any place for those who violate either statute or Constitution. Violation debauches the public conscience; it tears the very heart out of good government. We stand for the enforcement of all laws; we stand for the Constitution from the first to the seventh article and from the first to the nineteenth amendment. There may be those who advocate repeal, but there can be none who advocates disobedience. Some, either by careless thinking or by design, would create division in our ranks, but the democracy of Mississippi stands for prohibition and temperance no matter who may be nominated or elected President of the United States.

WOMEN IN POLITICS

We welcome the women in the solution of the prohibition question. They can play a constructive part in promoting temperance. We welcome them to share with us the responsibilities of voting. The ballot is not a right, nor yet a privilege, but it is a trust—a sacred trust—to be discharged not for personal gain but in the public and national interest. The Government was made for man and not man for the Government. Its aims are more and more in the interest of human welfare and social well being. I believe that woman has come into the political kingdom for just such a time as this. She can supplement and reinforce the fight for clean and honest government.

LEADERSHIP

A nation without leadership is doomed. "Where there is no vision the people perish." Those who lead in thinking and in shaping public opinion in Mississippi can clarify the political atmosphere. The political leaders in Mississippi must not be shirkers or slackers; the leaders can not seek an easy place for safety nor a safe place for retreat. No man can lead who ever sold the truth to serve the hour. The conflict between justice and injustice, between right and might, between the forces of ill-gotten gain and the advocates of liberty, is on. Those who command and those in the ranks must not fail; there must be no turning back. And in the conflict where would Jefferson take his stand? In whose column would Andrew Jackson ride?

MISRULE AND CORRUPTION

There are issues vital to the perpetuity of the Republic; they strike at its very foundations. It is the eternal conflict between man and mammon, between honesty and dishonesty, between the protectors and the betrayers of the people. The corrupting power and influence of money must be eliminated from the body politic. The very temple of the Republic has been invaded. The use of money is debauching the public conscience. Corrupt and tainted campaign funds can not be retained by those who preach clean government and clean politics. The fight is on; the battle lines are forming, and the issue is between democracy and plutocracy.

The Democratic Party, under the leadership of Woodrow Wilson, fought the greatest of all wars without taint of fraud in any branch of the Government, and put on the statute books the most constructive legislation in the history of the United States. But after the muck and mire and blood and destruction of war, with the return of peace, the country tired of the ideals of Wilson. We went back to the fleshpots again, we turned from the human ideals to material gains, from the protection of human rights and the promotion of human freedom to the accumulation of wealth. But the country has paid the price. The public service is being corrupted. The Republican administration is now discredited and demoralized. The party in power has been weighed in the balance and found wanting. The public domain, the great oil reserve, the property of the people, were bartered to swell the campaign funds of the Republican Party. Cabinet officers have betrayed their trusts and have been driven in disgrace from their places. The charges of bold fraud have been sustained by the Supreme Court of the United States. The appropriations of a grateful Nation for the veterans of the greatest of all wars have been embezzled. Public offices have been assigned to the largest campaign contributors. Seats in the greatest deliberative body of the world have been sold to the highest bidder. The official benefactors of the most corrupt and gigantic bribery in history have retained the fruits of crooked and tainted money without a word of protest or a murmur. The Nation has been shocked; the time is ripe for a change. The Republican Party must be scourged from place and power. The battle is on. The spirit of Jefferson, Jackson, and Wilson is hovering over the democracy of the Nation.

"Now has come the time for action,
Clear away all thought of faction."

PARTIES AND MAJORITY RULE

In a democracy the people are sovereign. They speak through their representatives and the majority rules. Party government is essential in a republic. Parties are inevitable; majority rule is fundamental. No free country has been without parties; a republican form of government can not exist or function without them.

The meaning of democracy is the rule of the majority. Its conception is based upon equality and majority rule. There is and can be no better rule. No man is bigger than his party and no party is bigger than its principles. Party government is not a matter of blindly following, nor is it a matter of herding the voters like sheep or cattle, but it is a matter of every person asserting his rights, participating in public affairs, doing his civic duty, not passively but actively, and then abiding by the will of the majority. The majority must rule in the Nation and it must rule in the party.

The fewer the political parties the better for the country. We have no place for the bloc system. It is a product of continental Europe. The multiplicity of parties is a menace to any government. It results in the rule of the minority. Blocs and minorities lead to autocracies and dictatorships. It is said that in Spain, Italy, and Turkey there is a separate party for every statesman, and the result is that the dictator has succeeded the premier. There must be patience and cooperation in government. The majority must rule; the principle is the very genius of our institutions. There is no place for the slacker; there is no place for the political coward. Achilles dragging Hector around the walls of Troy is always preferable to Achilles sulking in his tent.

Mississippi can afford to trust her delegates to the national convention. If they are good enough to be sent, they are good enough to be trusted. Why should the delegates of Mississippi, of all delegates in the Union, be singled out by negative and undemocratic instructions? They are entitled to the same freedom of action and the same opportunity to promote the interests of our people that have been accorded to other delegates. There must be no repetition of Madison Square Garden. The voice of Mississippi must not be silenced nor the arm of Mississippi made impotent by any instructions that will thwart the delegates at every turn.

I respect the man and the woman with courage and conviction, although I may not agree with their views. Robert E. Lee believed that secession was wrong. He opposed it, but he cast his lot with the majority of his people, and he offered his sword to the people and State of his own Virginia. The late President Woodrow Wilson differed from Congress on the prohibition question, but no official was ever appointed who advocated disobeying the laws of the land,

nor would any judge or other official advocating disobedience of the laws or Constitution have been confirmed by the Senate. The vast majority of the House and Senate is dry and the vast majority of the next House and Senate will be dry. Republicans and Democrats alike voted for prohibition, and they will sustain prohibition. There is no danger of repealing the eighteenth amendment, no matter who may be elected President of the United States. It gives comfort to those who love their country to know that no man has ever been or will ever be elected Chief Executive who will not advocate the enforcement of all laws; no man has ever been or will ever be elected President who has disgraced the office by becoming a traitor to his people. No such man is being seriously considered by either great party to-day as a candidate for the Presidency.

MISSISSIPPI DEMOCRATIC

The South is as strongly Democratic as New England is Republican. In Mississippi and the South the people and democracy are the same. No independent party has ever shaped or controlled legislation for the Nation. Mississippi and the South will remain Democratic as long as the Republican Party is affiliated with the office-selling, political-trafficking, black-and-tan, alleged Republicans, masquerading in the livery of a great party, but in reality debauchers of the public service.

The recent efforts of some otherwise excellent citizens to organize a lily-white Republican Party in the State proved abortive. The itching for office and the urge for political pie caused them to embrace with open arms the political outcasts that even the black-and-tan, regularly recognized, colored-in-fact, disreputable regular organization would not tolerate. It is ours to condemn and not to commend the political trafficking and Federal office selling that have obtained in Mississippi under the Republican Party for the last seven years. There is not a chance for those who are Republican from principle to have a look-in in the voice and control of the Republican Party in Mississippi or in the South. Our hope in the future as in the past lies in cooperating with the Democrats of the Nation.

HARMONY AND VICTORY

I have been in a storm at sea. I have seen the waves rise and lash the ship in fury. During the storm the ship made but little progress, but after the storm, when the sea was calm, the ship sailed on in its course. It is only when the sea is quiet that the heights and depths can be measured. It is only when the sea is calm that the surveyor measures the depths and the astronomer calculates the heights.

The campaign of 1928 will be memorable. It will be bitter. Yes: there will be strife. Tempests will rage and the storms of passion and prejudice will be violent. The billows of hate will roll. But when the storms subside the judgment of the American people will be formed. The great voice of America will be heard, and that voice will not come from the universities, the colleges, or the great educators; it will not come from the banks or the counting rooms, but it will come from among the plains, over the hills and through the valleys. The voice will gain in volume and authority as it comes from the homes of the United States, and it will be the voice of liberty and equal rights. The verdict of the people will be given when prejudice and passion have been overcome by reason and justice, for after the political tempest has subsided the thoughtful voters of the United States, around 10,000,000 firesides in America will recall the struggles and sacrifices of our heroic dead, give thanks to Almighty God for our great country and our greater men and women, recount the glories of the past, the high privileges of the present, the hopes and dreams of the future, and in the light of peace, with good will for all men, as reason holds sway and conscience sits enthroned, the men and women of America, with the love of home and country in their hearts, will vote to preserve and perpetuate the Government for which Thomas Jefferson thought, Andrew Jackson fought, and Woodrow Wilson wrought.

IMMIGRATION FROM COUNTRIES OF WESTERN HEMISPHERE

Mr. SANDERS of Texas. Mr. Speaker, under the general leave to print I wish to insert the following address before the Immigration Committee of the House on February 21, 1928, as follows:

Judge BOX. I will now ask Mr. SANDERS, of the third congressional district of the State of Texas, to make a statement in regard to this bill.

Mr. SANDERS. As a result of my experience in appearing before and serving on committees of the Congress I know the value of time, and I may save a little time for this committee if I may have permission to incorporate in the record, without reading them, some remarks and clippings that I had in mind.

The CHAIRMAN. If there is no objection, the Representative will be granted permission to extend his remarks in the record.

Mr. SANDERS. Thank you. I desire to say, at the outset, that when I was first elected to Congress I advocated prohibiting all immigration. I still feel that way about the matter of immigration.

I am supporting Judge Box's bill whole-heartedly.

Mr. Chairman and gentlemen of the committee, ours is a democracy and our Government is representative in form.

It is our duty as representatives of the people to translate their wishes into law. The immigration problem is one of the most important with which we have to deal. Its importance is more fully realized now than ever before, for the reason that the World War opened our eyes on this important question. When the United States became involved in the World War and preparations were made for the registering of our citizenship, we found to our surprise and sorrow that we had millions in the United States enjoying the blessings of liberty and living under the protection of our flag who were with us but not of us, and not for us. This condition ought not to exist. This Congress at this session ought to enact such legislation as will make it impossible for these conditions to continue. Congress is to be congratulated because of the immigration act and amendments which have been passed in recent years, but it is my belief that Congress has not gone as far in that direction as a vast majority of the citizens of the United States desire. While Congress was applauded for the act of 1924, yet at that time, in my judgment, the country as a whole was demanding that all immigration should be stopped for at least a period of five years. Abraham Lincoln once said that "this country could not endure half slave and half free."

May I now apply that saying to the present by saying that the United States can not endure half citizen and half foreign? I do not mean to say that those of foreign birth are all bad. Many of them are good citizens and have contributed much to our present greatness and past glory, and I would not pluck one star from their crown. Many of them made good soldiers in war and have made good citizens in times of peace, but the fact remains that we have now in the United States 7,000,000 of foreign birth who are not American citizens. A man ought not to be permitted to live under the shadow of our flag and enjoy the protection of our laws who does not think enough of this country to qualify as a citizen and discharge the duties of a citizen. A man ought not to be permitted to live in this country who does not prefer it above all other countries. "If you don't like your Uncle Sammy, go back to your home over the seas; to the land from whence you came, whatever be its name; don't be ungrateful to me. If you don't like the stars in Old Glory, if you don't like its red, white, and blue, don't be like the cur in the story; don't bite the hand that's feeding you." And in this connection I wish to say to the committee that I am glad that you have reported a deportation law, and trust that it will pass soon and become a law. Of course, I realize that you are not going to report out a bill at this time restricting immigration entirely, but I do hope that you report out the Box bill. I can't conceive of any reason why the quota law should not be made to apply to Mexico, Canada, and South American countries.

I know I voice the sentiment of the majority of the citizens, not only in my district but in the great State of Texas, when I say they indorse the Box bill. The only opposition to it that I know anything about comes from that class, small in numbers, who are farming by proxy—that is, who do not till the soil themselves, but have their land cultivated by cheap Mexican labor. They are not looking out for the public welfare but for No. 1. With them it is a matter of dollars and cents, regardless of country and regardless of citizenship. This small class oppose this legislation, of course. It interferes with their business. Jesus Christ encountered opposition in the country of the Gadarenes because He ran their swine into the sea. Their position is illustrated by the story of the negro in the World War. When told that he would have to go to war he asked, "What for?" He was told "To fight for his country." He said he didn't give a darn for the country; he lived in town.

Many tell us that one of the troubles with agriculture at this time is that our farms are producing too much. These cheap Mexicans are helping to aggravate this condition. When we apply the quota law as provided in the Box bill we are rendering a service to our country, and we are really assisting the real honest-to-goodness farmer who toils through the long hot days to feed the world. The class of immigration which would be excluded by this bill are not worth anything as citizens, even if they could become citizens. They are decidedly a liability and not an asset. They do not build schoolhouses and churches, nor do they contribute anything worth while to the community or to the country. If we are to keep our Nation great and strong and preserve our Government and its institutions and transmit the blessings of liberty to those who are to come after us, we must look well to our citizenship.

In order to show you how the people of my district feel about this immigration matter, and especially about the bill which is now pending before you, introduced by my colleague, Hon. JOHN C. BOX, I wish to incorporate here a letter received from the manager of the Chamber of Commerce of Henderson, Tex.:

HENDERSON CHAMBER OF COMMERCE,
Henderson, Rusk County, Tex., February 10, 1928.

Hon. MORGAN G. SANDERS, M. C.,
Washington, D. C.

DEAR MR. SANDERS: I am requested to advise you that the Henderson Chamber of Commerce has passed a resolution indorsing the bill of your

colleague the Hon. JOHN C. BOX on immigration, having particular reference to the provision to prohibit the importation of the large quantities of Mexicans to Texas.

We are of the opinion that these are brought in to cultivate large acreage on cheap labor, in competition to the tenant farmer, who, we believe, it is the Government's duty to protect and encourage.

Large acres of the western plains through the importation of the Mexicans are being cultivated in cotton on a large scale, which is disastrous to the entire South, as the one particular question with us is to reduce rather than increase the present cotton acreage.

We are advising you this that you may know our attitude in the matter. With kindest personal regards, I am,

Yours truly,

E. M. PRESTON, *Managing Director.*

I also wish to incorporate at this point a copy of a letter which I received from the commissioner of labor of the State of Texas:

BUREAU OF LABOR STATISTICS,
Austin, Tex., February 6, 1928.

Hon. MORGAN G. SANDERS, M. C.,
Washington, D. C.

DEAR SIR: The "Box bill" now pending in Congress has our unqualified support. Seemingly, it is the consensus of opinion that the defeat of this measure would be an irreparable loss to the laboring masses of this country.

The fact that we have had a serious employment problem since the war is convincing proof that the tide of immigration should recede, and that instead of lowering the standards of our own workmen something should be done to sustain and elevate them.

Land barons and other special interests may desire to make labor a cheap commodity; they may maintain a lobby and petition your body from time to time, but the great masses of this country who can not be heard demand the passage of this act.

Texas is now flooded with undesirable Mexicans, immigrants. On every corner the tamale and chili vendor is shouting his wares. On the large farms he has replaced the white man, due to the fact that his living standards are low, and it takes little to satisfy his needs. In railroad gangs and on public works Mexicans and negroes have pushed the white man out and threaten the respectability of the most numerous American families.

Records of this department indicate a tremendous oversupply of labor and an investigation discloses that this condition is traceable to the vast influx of Mexican immigration.

An expression from you as to the position you are taking on this bill will be duly appreciated.

Yours very truly,

CHAS. MCKEMY,
Commissioner of Labor.

I want to give you an extract from a letter which I have received from Mr. J. L. McKinley, a farmer at Big Sandy, Tex., which shows you how the farmers are feeling generally on this proposition:

"I wish you would render all the assistance you can to the Hon. JOHN C. Box in trying to control the hordes of daily germ-carrying Mexicans from flooding our State with cheap labor. They are hurting the cause of all the common people to such an extent that it will breed something bad if not stopped. I have been here a long time and must say that I have never seen the like before. Thousands of people can't get work and other thousands who are lucky enough to get work find wages so low that they can't make both ends meet, and it is all caused by these hordes of Mexicans. They are used, trainloads, on all big construction works and our common labor is crowded out. We don't need them on the farms. We are raising too much cotton now. They ruin the schools; they carry germs; they add nothing to society. All they want is a hovel in which to stay. Must we common people be brought to their level? We can not do so. Please do what you can to help us."

I also wish to incorporate just here a letter received from Mr. O. W. Otterbury, of San Antonio, Tex., which is as follows:

124 DREXEL AVENUE,
San Antonio, Tex.

Hon. MORGAN C. SANDERS, M. C.,
Washington, D. C.

HONORABLE SIR: Permit me, as a voter who lives in a city where he can see and appreciate the social and economic menace of the Mexican peon in the United States, to say that there are literally thousands of American voters in San Antonio who long will hold in appreciative remembrance those members of our national legislative body who give their whole-hearted support to the Box immigration bill.

I am, my dear sir, most sincerely,

O. W. OTTERBURY.

I also submit for your consideration copy of a letter which I have received from the San Antonio Typographical Union, No. 172, as follows:

Hon. MORGAN G. SANDERS, M. C.,
Canton, Tex.

DEAR SIR:

"Whereas the restrictions by law of immigration has operated to materially reduce the menace to the American workingman of competition by a large volume of cheap European labor with its attendant low standards of living, and has thus proven of incalculable benefit as a factor in maintaining and enhancing the social and material welfare of the people of this Nation, thereby demonstrating its right to an honorable and permanent place in the laws of our land; and

"Whereas this law has failed of application in so far as it concerns the great influx of the peon class from the Republic of Mexico, thus leaving wide open a portal through which annually countless thousands of the most undesirable of aliens flock into our country; and

"Whereas this great inpouring of people constitutes a growing menace by reason of its large percentage of moral and financial pauperism, incapable of development away from that condition, whose influence is toward the breaking down of our social and economic fabric; and

"Whereas the employment furnished to these people by those who clamor loudest for their continued admission in unlimited number is of a seasonable nature only, at wages which permit of the purchase only of the bare necessities for a temporary existence, thus filling our southern cities and towns during the greater portion of the year with a large and growing army of unemployed, who become immediate objects of charity, constituting a heavy financial burden upon our people; and

"Whereas, by reason of their inability to support themselves, together with their lack of established morals, they become in large measure, as soon as admitted to citizenship, a great volume of purchasable vote, thus debauching our political franchise system; also, in unnumbered instances, they become lawless invaders of the rights and property of our self-respecting citizenship; and

"Whereas they populate and propagate in congested areas and in filthy hovels; and their personal habits, their lack of sanitation and hygiene, and their general uncleanliness are conducive of the breeding and transmitting of perilous epidemics and loathsome diseases; and

"Whereas from time to time the undesirables migrate farther inland, invading other and various cities and communities of the United States, thus becoming cheap bidders for employment against better paid, better fed, more capable workers throughout the length and breadth of our land, at the same time carrying with them their ignorance of and indifference toward established laws of health, their lawlessness, and their marketable votes; and

"Whereas the unlimited admission into the United States of this wholly objectionable and dangerous class is of benefit only to the individual few whose personal greed for cheap labor constitutes their own highest ideal, and is altogether repugnant to every thinking citizen who has at heart the welfare of the country at large rather than the filling of his own pockets at the expense of the hopeless; and

"Whereas the restricted immigration bill now before the Congress of the United States, known as the Box bill, embodies those provisions and regulations best calculated to safeguard the moral, mental, physical, and economic welfare of our citizenship, and should have the unqualified indorsement and support of the people generally: Therefore be it

"*Resolved*, That San Antonio Typographical Union, No. 172, an organization of approximately 200 thinking men, who have deeply at heart the welfare of the many against the selfishness of the few, declares by unanimous vote in regular session assembled that its sympathies and encouragement, both as an organization and as individual members, are hereby extended to the author of the bill and to its proponents in unlimited measure, believing in the righteousness of their endeavors to prevent the undermining of the very foundations of our existence, with full confidence that in the eternal order of events right must and will prevail; and be it further

"*Resolved*, That copies of this resolution, bearing the official seal of this organization, be sent to such individuals and into such quarters as are deemed necessary in order that its import shall carry the utmost weight in favor of the bill."

Adopted by unanimous vote, Sunday, February 5, 1928.

WILLIAM B. ARNOLD, *President.*
E. G. KOERPS, *Secretary.*

There is much talk at this time about flood control, and it is an important question, and I expect to support any matter which offers any solution to that difficult problem, but I also recognize that equally as important is the flood control of this immigration. Only 80,000 immigrants came to this country in the first 250 years after the discovery of America. From 1890 until 1924, when we enacted the immigration law, this country received 22,000,000 immigrants, about one-fifth of our present population. Many of these immigrants came from countries which had no orderly government, and they brought their Bolshevik ideas with them, and they know nothing about our Government and its institutions, and care less.

From the press of the United States, which reflects the sentiments of the people on this question, we must conclude that the great mass of our citizenship want our immigration restricted even more than it is now, and if we are to preserve American standards, and preserve

this country of ours and transmit to those who are to come after us in such a way that they will enjoy the blessings of liberty which we now have, we must look well to restricting immigration.

Mr. FREE. Will the white Americans pick cotton?

Mr. SANDERS of Texas. Yes. I myself have picked it.

Mr. FREE. But, generally speaking, it is picked by the colored people or the Mexicans, is it not?

Mr. SANDERS. No. The colored people do pick cotton, but many of the white folks in my section of the country that I know also pick cotton. They not only pick cotton in their own section of the country, but they move as the crop ripens to other sections of the country. If the crop opens in west Texas, they harvest it and then move eastward.

Mr. FREE. If you were to push out of this country all the Mexicans who are here unlawfully and then reduce the immigration to a quota basis, would you have enough laborers to pick your cotton?

Mr. SANDERS. I think we would. That is true. When you talk about labor, I say that my view is that it is vastly more important to protect our citizenship and to build up our American country properly for Americans, even if somebody does suffer by way of labor, but I do not admit there would be a shortage of labor.

Mr. FREE. If the State of California should reach out and take a large number of your negroes away from you, would you then have enough left?

Mr. SANDERS. I think so. I would not regret it if many negroes in our country should leave.

Mr. FREE. Would you still be able to harvest your crop satisfactorily?

Mr. SANDERS. Yes; we would. Certainly we would. A large number of people in my section of the country do not covet the negro, and they would give him to any section or sections that want him.

The CHAIRMAN. The inference is that the permitting of Mexicans to come into the United States in large numbers is creating a problem that would be more troublesome than the negro problem has been to you?

Mr. SANDERS. Yes; that is true.

The CHAIRMAN. And the Mexican people bring about a condition where the white people can not work side by side with them?

Mr. SANDERS. That is true.

Mr. FREE. Do you believe that the Mexicans who come in are more or less itinerant? Do you find that they come and go, or do they remain in a community once they settle there?

Mr. SANDERS. There are two classes of them. A great many of them go back, while a great many of them remain. My own judgment is that very few return to Mexico; that the vast majority of the Mexicans who come to the United States remain here.

Mr. FREE. Do they remain in the particular community to which they first came or do they circulate about?

Mr. SANDERS. They remain in the same communities generally, but they circulate about some also.

Mr. SABATH. They do not remain on the border, but they go farther east, so much so that thousands and thousands of them are to be found in the Middle West.

Mr. SANDERS. I did not understand that question. He asked whether they remained in the community where they first located. They are invading all of our southwestern territory. In my district, which is 300 or 400 miles from the border, I receive letters complaining about conditions there, and it is in the northeastern part of Texas.

Mr. FREE. Do you find any competition between the negroes and Mexicans in the sort of labor the Mexicans themselves engage in?

Mr. SANDERS. I do not know about that.

Mr. FREE. Do you find that the Mexicans are displacing the negroes in labor?

Mr. SANDERS. They have not invaded my territory to any large extent, but my understanding is that they have displaced large numbers of negroes in other sections of my State. My territory covers the northeastern part of Texas.

Mr. FREE. Are the crops there similar to what they are in the southern and western part?

Mr. SANDERS. Yes.

Mr. FREE. What crops do you grow?

Mr. SANDERS. Corn, cotton, strawberries, vegetables, and all sorts of garden truck. In fact, I believe we grow almost every kind of thing there.

Mr. FREE. Southern Texas is devoted more to growing cotton than anything else, is it not?

Mr. SANDERS. I think so.

Mr. RUTHERFORD. Have you not a device down there now whereby a man with two mules may handle 5 or 6 bales of cotton a day?

Mr. SANDERS. That has not been a success.

Mr. FREE. The cotton does not come on all at once. It is a continuing crop, and that is perhaps the reason.

Mr. SANDERS. The difficulty with the machine is that it will not reach out and actually pick the cotton.

Mr. SABATH. The first letter you read a little while ago was from a gentleman who is interested in the tenant. Who are these tenants; are they Americans?

Mr. SANDERS. Yes.

Mr. SABATH. By whom is this land owned, the land upon which these tenants live? Is it owned by corporations or private individuals?

Mr. SANDERS. In some instances it is owned by corporations, but we have many prosperous farmers who own more land than they can personally look after, and they have to rent it to white folks and negroes as tenants.

Mr. FREE. You have prosperous farmers in Texas?

Mr. SANDERS. Yes; that is to say, they prosper as much as they can under present conditions.

The CHAIRMAN. Your incoming Mexican is not much of a taxpayer?

Mr. SANDERS. He is not a taxpayer. He is a drone and barnacle upon society. He is not worth anything. He is in our social organization what a pound of putty would be in the stomach of a dyspeptic. [Laughter.]

Mr. FREE. Are the tenants mostly white or colored people?

Mr. SANDERS. White. We have some colored tenants and we have some colored people who own their own farms.

Mr. SCHNEIDER. I take it that the American negro, as a farmer, is suffering as a result of the cheap labor from Mexico the same as the white man is suffering from it.

Mr. SANDERS. Yes.

Mr. SCHNEIDER. Which is the more preferable as a citizen in Texas at the present time, the American negro or the average peon from Mexico?

Mr. SANDERS. I think that the negro is the more preferable.

The CHAIRMAN. It is all right to ask the question, but I do not think that matter should be brought in. You must remember that the entire negro population of the United States, with few exceptions, were born here and are citizens, whereas the Mexicans largely are newcomers. The Mexican is a newcomer. There are some people of Mexican ancestry, but it is the duty of this committee to inquire into conditions with a view to protecting the negro population in these Southern States as well as to protect any other people there.

Mr. SCHNEIDER. I think it is a fair question. The American negro should be given the same consideration that the white American is given.

The CHAIRMAN. We do not want to get into any comparison of peoples, even though one set are our own people and the other set are newcomers.

Mr. RUTHERFORD. I take it that if we had a quota restriction the condition of the negro laborer would be very much improved in the State of Texas.

Mr. SANDERS. I think so.

Mr. SCHNEIDER. The negro will be leaving Texas for elsewhere under present conditions, will he not?

Mr. SANDERS. Yes; they are crowding him out to some extent.

Mr. SCHNEIDER. What would the people of your section of the country say to the importation by certain absentees, landowners, of negroes from Haiti, South Africa, or some other country?

Mr. SANDERS. That is the same as if they were brought in from anywhere else. The people who own these large tracts could import their labor from the places you have mentioned, but it would be all the same. They would be brought into competition with the honest-to-goodness farmer and would be likely to drive him out.

The CHAIRMAN. If there are no further questions to ask Mr. SANDERS and he has nothing further to say, let us hear further from Judge Box.

Mr. BOX. It has been expected that Prof. Robert de C. Ward, of Harvard University, Cambridge, Mass., would be here to present his views to-day, but he is unable to be here, and his son, Mr. Henry de C. Ward, of Boston, is here to present his views.

THE TOLL BRIDGE OCTOPUS

Mr. COCHRAN of Missouri. Mr. Speaker, convinced the highway toll bridge, privately owned, should no longer be sanctioned by Congress unless proper provisions are made to safeguard the public interest, I propose at the opening of the next session to introduce a resolution providing for a thorough investigation of the toll-bridge question.

My resolution will either provide for an investigation by the Committee on Roads or a special committee consisting of five members of the Committee on Roads and five members of the Committee on Interstate and Foreign Commerce. The Roads Committee would, I feel, be the proper committee to make such an investigation, because the toll bridge is fast becoming a part of our national highway system.

The Committee on Roads has jurisdiction over all legislation affecting public highways as well as Federal aid for road construction, and while the Committee on Interstate and Foreign Commerce considers all bridge legislation, it simply approves applications for bridge franchises.

I hope by such an investigation to show beyond question, first, that individuals and corporations have petitioned and secured from Congress its consent to construct bridges when as a matter of fact the sole purpose was to sell the franchise; second, to prove a large number of projects have been financed far in excess of the actual cost; third, disclose that the majority

of the privately owned toll bridges are charging excessive tolls, some earning as high as 50 per cent on the actual investment; fourth, that the situation calls for an immediate revision of the privately owned toll bridge bill forms.

The revision of the bridge bill forms is most important. The bills should provide, first, that the individuals or corporation can not assign the grant, but must either construct the bridge or forfeit the rights; second, that all privately owned toll bridges shall be subject to the jurisdiction and supervision of the Government if an interstate bridge, and by the States, county, or municipality if an intrastate bridge; third, that a provision be inserted providing for the creation of a sinking fund, where a certain per cent of the tolls shall be deposited; this money to be used to retire bonds, and when all bonds are retired the bridge shall be forever free; fourth, that some provision be made whereby the Government shall have control over the amount of securities that can be issued in connection with an interstate bridge, and by the States in the case of intrastate bridges.

The consent of Congress certainly should be vested in the corporation that actually constructs and operates the bridge, and not in the name of promoters who simply dispose of their rights, thus adding to the cost of the structure.

Unless drastic action is taken by the Congress, toll bridges will dot the Federal-aid highways of the United States.

A survey just completed by the Bureau of Public Roads discloses that on October 1, 1927, there were 233 toll bridges operating in the United States, and on the same date 29 other toll bridges were in process of construction. Of the 233, but 42 were owned by the public, the remaining 191 being privately owned. Of the 29 under construction, 9 will be operated by the public, 2 by States, 4 by counties, and 3 by cities, while 20 will be operated by private corporations. How many projects where Congress had granted its consent to construct, but where building operations had not as yet started, were not included in the report. For instance, this report listed two new bridges as under construction near my home city, St. Louis, one at Alton, Ill., and the other at Bellefontaine, Mo.; but did not include the new bridge at the Chain of Rocks, just north of St. Louis, now nearing completion.

Two hundred and fifty-three bridge bills were favorably reported by the Committee on Interstate and Foreign Commerce of the House from December 5, 1927, to May 29, 1928, or during the session just closed. About 235 of these bills became laws. None of these projects are listed in the survey.

This in itself presents an alarming situation. The owners of 23,000,000 motor vehicles operating in the United States are paying for the construction and maintenance of roads by the tax on gasoline and license taxes. When their money is used to bring the road to a bridge approach where tolls are collected, can any good reason be advanced why part of the bridge tolls at least can not be set aside in a sinking fund to ultimately retire the securities so that eventually the bridge shall revert to the municipalities, counties, and States and be operated as free bridges thereafter? This certainly is not confiscation of property for public use without just compensation, because if proper provisions are made in the bills providing for recapture the owners will be liberally paid for their holdings before the securities are retired. The promoters will fully understand the conditions confronting them before engaging in building operations, because the agreement will be embodied in the law.

To say the Government, with absolute control over navigable streams and control over interstate commerce, can not carry out the suggestions heretofore advanced is not sound reasoning.

I know that some of my colleagues, especially some who have been handling bridge legislation, will disagree with me, but I predict without fear of contradiction if a bill embodying these features is presented to the Congress it will pass by an overwhelming majority.

The comptroller rendered a decision in which he held Federal-aid funds could not be used in the construction of any road leading to a toll bridge. Mr. DENISON, of Illinois, chairman of the subcommittee on bridges of the Committee on Interstate and Foreign Commerce, introduced a bill (H. R. 18) in the last session, which, if enacted, would have permitted the use of Federal-aid funds for this purpose. Hearings were held by the Committee on Roads, at which some rather startling as well as interesting facts were disclosed.

The committee is to be congratulated on its action in declining to report the bill, for in my opinion such a law would have inspired promoters to increased activity in advocating privately owned toll bridges. It developed at the hearing that the provision upon which the decision was based was placed in the road act for the sole purpose of discouraging toll bridges and toll roads.

Mr. DENISON made an extensive argument in favor of his bill. I have read his views and when he points out the States are heavily taxing the people to provide road construction, he advances, in my opinion, a real argument why the money of the people so taxed should not be used to construct a road that will lead them to a bridge where they will be required to pay a toll to private individuals, the owners probably living a thousand miles from the site of the bridge, and having no other interest in the structure other than to gouge the public.

Again I say, to have passed this bill would have resulted in a flood of applications being made to Congress for the construction of toll bridges by private individuals.

In some instances, it must be admitted by all, toll bridges are a necessity, and especially interstate bridges which can not always be constructed by the States and municipalities. In such cases public-spirited citizens should be encouraged to promote the construction of the bridges and not permit get-rich-quick promoters to exploit the public.

During the hearing Mr. ROBSION of Kentucky, a member of the committee, cited the situation in his State. He told of how the bridge promoters employed about one-third of the main lawyers in Kentucky and subsidized newspapers in making their drive to build privately owned toll bridges in that State. He also told of one toll bridge which cost in the neighborhood of $20,000. The Dixie Highway was constructed, brought to the point where the bridge crosses the Kentucky River, and in 1927 Mr. ROBSION said over $120,000 in tolls were collected by the owners of this bridge.

The situation in Louisville, where the city saw the wisdom of borrowing money at a rate of 4½ per cent to construct a bridge, the tolls to be used to retire the bonds and then make it a free bridge, was cited at the hearings. If Louisville can eliminate the private promoter why can other cities not do likewise?

The investing public should scrutinize all private toll-bridge securities before purchasing. Mr. MacDonald, who as Chief of the Bureau of Public Roads has studied this question very thoroughly, said before the committee that the only service that may be rendered by private toll companies in connection with bridges is the supplying of capital from investors for the construction. He holds this is both unnecessary and a costly service to the public. He insisted that, generally speaking, these bridges are of sufficient importance that the public can have the benefit of the bridges without spending a cent from property taxes or without putting a dollar of property behind the bonds issued. In other words, he maintained through the use of revenue bonds, a bond issued against the earnings of the bridge, the public can have the benefit of bridges on the main traffic highways and pay for them, pay the security off, out of the earnings of the bridge.

Mr. MacDonald, in my opinion, has an opportunity to perform a real public service. No individual connected with the Government is better informed on the highway question. He knows the toll-bridge situation, agrees that it is a menace, and is the proper official to lead the fight against this octopus. In my judgment he must, however, assume a more aggressive attitude, care not who he hurts, so long as he is waging a fight for free public highways. He is in a position through his bureau to secure the information that will destroy the toll-bridge monster which feasts upon the pocketbooks of the public. I suggest to him that he prepare now to submit to the Secretary of Agriculture in his annual report a comprehensive review of the toll-bridge situation, showing in detail how these get-rich-quick promoters have gouged the public and offer comparisons of their projects with those of legitimate promoters, who have not only secured in their own right the consent of Congress to construct bridges, but have retained that right, properly financed their projects, and erected the bridges. This information should reach the Secretary of Agriculture in time for him to place the matter before the President, so that the Chief Executive can, if he so desires, make such recommendations to the Congress in his annual message as he deems advisable.

An outstanding project which was discussed at the hearing was a bridge over Lake Pontchartrain in Louisiana. Private individuals secured permission to construct a bridge which required a very long approach. It connected with what is known as the Old Spanish Trail. The State a few miles away connects up the same roads with free bridges, with the result that a bridge which some estimate as having cost $5,000,000 has no earning power. Who is going to lose on this investment? Why, the public, purchaser of the securities, of course.

Mr. MacDonald maintained in his statement that the private promoters used every means at their disposal to prevent the construction of the free bridge, not only taking the matter to the courts but tried to make it an issue in the elections. It

was because there was a great prize in the way of tolls that would accrue to the private toll bridge that funds were available to defeat the will of the public, and that is one of the very serious things that is happening continuously, according to Mr. MacDonald.

On behalf of the American Association of State Highway Officals, Mr. W. C. Markham appeared in opposition to the Denison bill and suggested if the committee did intend to report the bill to so word it that the State highway departments would have the same control over the bridge as they now have in the construction and maintenance of Federal-aid road projects. Mr. Markham insisted—and his statement bears out my views often expressed on the floor, but challenged time and again by Mr. DENISON and others—that the States have no look-in on the construction of toll bridges after Congress once grants the franchise. The States have nothing to do, nothing to say, as to what the plans shall be or as to whether they are correct or not. Mr. Markham further argued that when the time comes for construction the States have no look-in as to whether the private corporation sublets to some of their own crowd at a certain price. He suggested that if such protection was assured the States then, as in road building, public bidding could be arranged for construction.

Mr. DENISON expressed the opinion Mr. Markham did not fully understand the situation, but the chairman of the committee replied that Mr. Markham may understand, but the Interstate Commerce Committee may not understand what it is doing.

Mr. DENISON also suggested that the committee not inquire into the form of bridge bills and offered to appear at some other time if the committee would like to discuss that subject and give an analysis of the bridge situation. That is what I desire to accomplish by my resolution, but I want others besides Mr. DENISON speaking on the subject because it is evident that all do not agree with his views as to the amount of protection the present bills extends to the public and States. There is a vast difference of opinion between Mr. DENISON and many I have talked with, some insisting the present forms are absolutely useless when it comes to protecting the general public. As Mr. MacDonald pointed out the law gives authority, but does not direct, the Secretary of War to make certain examinations of these projects. He also insisted that outside of giving jurisdiction to the War Department to pass on the location of piers neither the Government or States had any jurisdiction over the character of bridge to be constructed, nor as to the amount that could be spent. This has been my contention, but Mr. DENISON is not in accord with this view. A thorough investigation will disclose who is correct.

Mr. MacDonald fully agrees with me in reference to allowing promoters to sell franchises because he says it is his opinion as a first condition of the granting of a franchise the public has a right to demand that those who seek the exclusive right to operate a bridge upon a public highway shall give evidence of a sincere purpose to build the bridge for which the franchise is sought, and if after the franchise is granted conditions develop that make it impossible for the holder to carry out his implied agreement to build, the right to dispose of the franchise should rest in the public only and not in the individual or corporation, and he adds, just as I have contended all along, it is difficult to conceive of any sound public reason for the granting of assignable franchises, and the fact that its confidence has been gravely abused in many instances, should incline the public to look with suspicion upon application for this form of franchise.

Some months ago I thought I ended the activities of E. M. Elliott, who boasted in the press that he had over 33 projects, some secured in his own name and others in the name of citizens of a community, but during the last two weeks of the session I was twice approached by Members of Congress—one from Oregon and the other from the State of Washington—advising me Elliott was in that part of the country and was trying to prevail upon citizens to secure franchises from Congress for him for two bridges. Both assured me they would have nothing to do with any bridge project in which he was interested in any way.

The vice president of a very large financing company called at my office and told me they had paid Elliott for his rights in connection with certain grants; that Elliott had nothing to do with the construction or financing after they took the projects over. He was paid solely for the franchise which the Congress voted him to construct a bridge which he had no intention of building. How many more individuals are engaged in this business only an investigation such as I propose will disclose.

Mr. Markham made a rather amazing statement before the Roads Committee during the course of his testimony, when he brought out that Senate Reports 121, 123, 124, and 128, and House Reports 410, 425, 434, 435, 439, and 440 all state the toll bridges referred to had the approval of the Secretary of War and Secretary of Agriculture, when, as a matter of fact, all letters in the reports from the Secretary of Agriculture definitely stated he opposed the construction of the bridge. Mr. Markham further pointed out in other cases where the Secretary of Agriculture thought the bridge should not be constructed no mention was made of his opposition in the report.

I have just examined each of the reports referred to and find Mr. Markham's statement to be correct. I am sure this will prove to be a surprise to Members of the House as well as the Senate.

Strange as it may seem, nevertheless it is true, less attention is probably paid to bridge bills than any other class of bills introduced in Congress. When a bill is introduced copies are sent to the Committee on Interstate and Foreign Commerce of the House. The clerk sends one copy to the Secretary of War, who passes solely on the question as to whether it will obstruct navigation. Another copy is sent to the Secretary of Agriculture. When the reports are received the bill is referred to a subcommittee of three members, known as the bridge committee, which prepares the report or has the clerk prepare it, report the bill to the full committee, which automatically votes its approval, and the bill is sent to the House and placed on the Unanimous Consent Calendar. I am told not more than six hearings were held on all the bridge bills reported to the House at the last session.

It was only a few years ago that permits to construct dams across navigable streams for power purposes were authorized in this same manner, but finally Members were aroused and the water power act was passed.

No better law could be enacted than one giving the Secretary of War and the Secretary of Agriculture joint control over the issuing of permits to construct bridges in the United States. The Bureau of Public Roads, a part of the Department of Agriculture, has an organization that can take this work over without delay. It has its engineers, and cooperating with the Chief of Engineers of the Army, their trained engineers could supervise the construction of bridges jointly, they could see that the specifications were carried out and supervise the issuing of securities, and so forth.

Bridge construction is a very important factor in our national defense, and no better training for the engineers of the Army could be secured than in supervising the construction of these bridges.

We have the power under the Constitution to carry out such a plan, and unless a better suggestion is advanced I propose to recommend such a law when Congress reconvenes, through the introduction of a bill.

Such a plan will not only be a guaranty to the public that its interests will be properly safeguarded, but it will relieve Congress of a great deal of unnecessary work.

The Bureau of Public Roads and State officials at present are denied information relative to the revenue derived from certain toll bridges, the cost of construction, amount of securities issued, and so forth; but a committee of Congress duly clothed with proper authority can get such information, and it should be secured and made public.

When the Bureau of Public Roads shows that the total capital already invested or probably to be invested in 424 toll bridges which were in operation, under construction, or known to be in contemplation on October 31, 1927, was approximately $547,000,000, together with several hundred additional millions, to construct the bridges authorized during the session just closed, we are certainly justified in asking for an investigation.

As an example of exorbitant charges and excessive earnings by the operators of toll structures I will cite several cases. The Bureau of Public Roads is authority for the figures.

One structure was built in 1911 at a cost of about $25,000. Its gross income—only 8 per cent of the investment in the first year of operation—increased with increase in the traffic to a maximum of $46,311, or 185 per cent, of the original cost in 1924. For the 15-year period, from 1912 to 1926, inclusive, this bridge earned an average annual income equal to nearly 75 per cent of its original cost, or 975 per cent in 13 years. In 1925 a new toll bridge was opened a thousand feet downstream, and the earnings of the first bridge fell off from the 1924 peak of $46,311 to about $500 in 1926.

The Williamsport, Md., bridge, which cost $87,000 in 1907, had a total income of $56,273.31 in 1926; net income of $41,678.22.

The Columbia River Bridge, near Portland, Oreg., cost $1,683,556 in 1917, and had a net income in 1926 of $480,000, or 29 per cent of the original cost. Is it any wonder the biggest fight ever staged in Congress against the granting of a franchise to construct a bridge was made by people from Portland,

when the application for a bridge over the Columbia River at Longview was pending?

So far as is known, the overcapitalization of the Gandy Bridge in Florida, which I called to the attention of the House when I showed E. M. Elliott was the securities sales manager, is in a class by itself. The organization expenses of this bridge as listed in the office of the Florida Railroad Commission, which by special statute has control of the bridge, as $2,704,136, which is 125 per cent of the tangible property value of $2,138,554. The oustanding bonds, representing $2,934,500, exceed the cost of the tangible property and, in addition, there is outstanding $2,000,000 worth of stock. The gross income in 1926 of $743,868 was only 15 per cent; but it was 34 per cent of the cost of the tangible property.

I firmly believe a full investigation of the bridge situation will bring to light numerous cases of exorbitant charges and inflation and will in the end mean the death of the toll bridge, privately owned, as it will arouse the people to such an extent that the promoter will disappear from the picture.

The fight on toll bridges which I inaugurated during the session just closed has only started, and while I had few supporters at the outset, I am pleased to say a large number of the Members are now showing a vital interest in the subject and stand ready to assert themselves at the proper time.

I serve notice now that no toll bridge bills, where the consent of Congress to construct is vested in private individuals or corporations, will be passed by the House at the next session of Congress if I can prevent it until the present forms have been revised and an investigation held by a committee of the House on this subject. I shall offer no objections to the bills where the consent is given to a city, county, or State, but I will object even though the officials of the city, county, or State are named in the bill.

The toll bridge must disappear from the public highway as did the old tollgate.

THE PROTECTIVE TARIFF AND AMERICAN LIVING STANDARDS

Mr. TILSON. Mr. Speaker, ever since the principle of a protective tariff has been a political issue in this country the opponents of this policy have from time to time raised the cry that tariff duties high enough to be protective necessarily increase the cost of living, and on this plea have several times succeeded in committing the country to brief periods of nonprotection. The opponent of protection who declares that this policy in some instances increases the cost of living in the United States is stating the truth, but only half the truth. The fact is that protective duties in some cases do increase the cost of living, but it is even more true that the effect of such duties is to increase wages proportionately much more than living costs.

If an American workman receives $5 a day and a comparable foreign workman $2, while it costs the American $5 to buy the same thing here that the foreign worker buys for his $2, it is apparent that the American workman is no better off than his foreign competitor. If this were in fact the situation created by a protective tariff, the opponents of the policy would be justified in their opposition. On the other hand, if the American workman receives $5 a day and the foreign worker $2, while it costs the American only $3 to buy what the foreign worker can buy for $2, it is equally clear that the American is better off, and this is, in fact, the situation that now prevails, though the actual figures show a somewhat greater variance than the illustration given between the buying power of the American's wages and that of the foreigner's wages to the advantage of the American.

In considering the effect of protection, in order to be perfectly fair, we should always look not to the amount of wages paid but to their buying power. Even were there no figures to sustain the claim that the buying power of American wages is greater than is the case with the wages of any other country of the world, no one would have any doubt on this point if he stopped to consider the better food, better living conditions, conveniences, and luxuries enjoyed by American wage earners that are unknown to foreigners doing similar work, and which can be bought by the American only because his wages are not only higher in amount, but have a vastly greater buying power. The fact that millions of people in Europe would gladly leave their homes to come to America, if not stopped by strict immigration laws, proves that even the most ignorant classes of Europe thoroughly understand these conditions.

Mark Twain, in "A Connecticut Yankee at King Arthur's Court," humorously discussed the tariff from the nonprotectionist standpoint, but nevertheless with logic and sound argument, if the hypothesis upon which he based the logic had been equally correct. The transmuted Connecticut Yankee, who had become "the boss" at King Arthur's court, is represented as discussing protection with a peasant of a neighboring protectionist country:

> Why, look here, Brother Dowley, don't you see? Your wages are merely higher than ours in name, not in fact [says the Yankee, speaking, of course, of the wages in King Arthur's realm and those in the peasant's own country].
>
> Hear him! They are the double—ye have confessed it yourself.
>
> Yes, yes. I don't deny that at all [says the Yankee]. But that's got nothing to do with it; the amount of the wages in mere coins, with meaningless names attached to them to know them by, has got nothing to do with it. The thing is, how much can you buy with your wages?—that's the idea. * * * What I say is this: With us half a dollar buys more than a dollar buys with you—and therefore it stands to reason and the commonest kind of common sense that our wages are higher than yours.

Here is a sound argument against protection if the facts were correctly stated, but the great humorist unfortunately made up his facts to fit his argument instead of changing his theory to fit the facts. Mark Twain wrote this in the eighties and undoubtedly was aiming at the tariff controversy then raging in the United States. There are no figures showing the relative buying power of wages in this country and abroad at that time and as there was then no League of Nations, Labor Office, or Bureau of Labor Statistics to gather such data it must be presumed that the humorist had none at his command. Consequently he based his logic on an entirely false premise—that protection, in this country at least, had raised living costs more than it had raised wages, while the facts are that wages have increased under protection much faster than the cost of living. The very argument he used against protection when the facts were fashioned to fit his theory has become, with the aid of reliable data now available, a telling argument in favor of protection.

The following table prepared by the Bureau of Labor Statistics of the Department of Labor furnishes some illuminating data on the subject of the relative purchasing power of wages as measured in cost of living in the United States:

BUYING POWER UNDER PROTECTION AND NONPROTECTION

This table shows the general index of wages, 1907 to 1926, in parallel columns, with index numbers for cost of living, and for the purchasing power of wages as computed therefrom:

(1913=100)

Year		General index of wages per hour	Index number of cost of living	Relative purchasing power of wages as measured in living cost	Changes in purchasing power as compared with 1913 (per cent)
1907		89	82.0	108.5	+8.5
1908		89	84.3	105.6	+5.6
1909		90	88.7	101.5	+1.5
1910	Under protective tariff acts of July 24, 1897, and Aug. 5, 1909	93	93.0	100.0	0.0
1911		95	92.0	103.3	+3.3
1912		97	97.6	99.4	−0.6
1913		100	100.0	100.0	0.0
1914		102	103.0	99.0	−1.0
1915		103	105.1	98.0	−2.0
1916		111	118.3	93.8	−6.2
1917		128	142.4	89.9	−10.1
1918	Under nonprotective tariff act of Oct. 3, 1913	162	174.4	92.9	−7.1
1919		184	188.3	97.7	−2.3
1920		234	208.5	112.2	+12.2
1921		218	177.3	123.0	+23.0
1922		208	167.3	124.3	+24.3
1923		217	171.0	126.9	+26.9
1924	Under protective tariff act of Sept. 22, 1922	223	170.7	130.6	+30.6
1925		226	175.7	128.6	+28.6
1926		229	175.2	130.7	+30.7

It is worthy of note that the buying power of wages in the United States was relatively low during the war, even though the wages were high in money. In the nonprotection period from 1913 to 1922 the buying power of wages was small except in the years 1920, 1921, and 1922, when prices were falling faster than wages, and employment conditions were so bad that millions had no wages at all. As soon as we returned to protection in 1922 the buying power of wages was stabilized at a high figure and unemployment was promptly relieved.

ACTUAL WAGE DIFFERENCES

The next table shows the differences in wages in money between those paid for certain occupations in the United States and similar occupations abroad:

Comparison of American wages (per hour) with those of foreign countries

	United States	Germany	France	England
Lathe hands, automobile	$0.76	----------	$0.17	----------
Milling-machine operators, automobile	.74	----------	.17	----------
Bakers	.93	$0.24	----------	----------
Bricklayers	1.57	.23	.22	$0.40
Carpenters	1.27	.31	.18	.40
Electricians	1.34	.25	----------	----------
Laborers (building)	.50	.21	.09	.31
Painters	1.31	.30	.18	.40
Plasterers	1.60	.36	----------	.41
Plumbers	1.38	.31	.18	.40
Stonemasons	1.55	.31	.18	.41
Ironworkers	1.36	----------	.17	----------
Tailors	.86	.23	.20	----------
Miners	.62	----------	----------	.27
Farm laborers	.23	.07	.11	.13
Stonecutters	1.41	.36	.20	----------

The figures in the last preceding table are taken from the Monthly Labor Review, issued by the Bureau of Labor Statistics of the Department of Labor, for August, 1927. In some cases where the wages are given in days or weeks, they have been worked out into hours, in order to make the comparison uniform, and wherever this has been done an 8-hour or a 10-hour day has been used both for the United States and for foreign countries. The differences between the United States and the three countries indicated are in most instances about 4 to 1 for Germany, 5 to 1 for France, and about 3 to 1 for England.

COMPARISON OF BUYING POWER

As shown by the previous tables, the American wage earner receives in return for his services a greater wage in money than any foreign workman, and the buying power of wages in the United States is higher and more stable under protection than in nonprotective periods. The further point that the American's wages have a vastly greater buying power than the wages of foreigners is proved by the fact that he can afford to buy comforts, conveniences, and luxuries for himself and his family that no comparable foreign worker can buy. There are those, however, who must have statistics heaped upon statistics before they will believe, and for their benefit there is inserted here a report, as of July 1, 1927, issued by the international labor office of the League of Nations, comparing the buying power of wages in typical cities throughout the world, and certainly no one can claim that such an agency is biased in favor of the Republican Party or the protective tariff policy. The figures are as follows:

Index numbers of comparative real wages in various cities July 1, 1927

[London, July 1, 1927=100]

City	General average index numbers	
	Based on food only	With allowance for rent
Philadelphia	178	178
Ottawa	156	154
Copenhagen	106	106
Dublin	102	110
London	100	100
Stockholm [1]	92	90
Amsterdam	87	87
Berlin	67	62
Madrid	54	----------
Paris	53	----------
Milan	52	53
Brussels	48	52
Riga	48	51
Prague	46	49
Tallinn	46	47
Rome	43	45
Lodz	42	44
Vienna	41	46
Warsaw [2]	37	38
Lisbon	31	----------

[1] The figures are based on wages in the building, furniture-making, and printing industries only. For other cities the metal industry is also included.

[2] Based on a weighted average wage. For other cities an unweighted average has been used.

The only city which even approaches the one American city in the list is Ottawa, Canada, which is also under a protective tariff, and where conditions are quite similar to those under which the high wage standards were created in this country.

The table shows that the Philadelphia wage earner can buy 78 per cent more, or nearly twice as much with his wages as the wage earner in similar industries in London, nearly three times as much as the wage earner in Berlin, more than three times as much as the Parisian, and four times as much as the wage earner of Rome. It should be remembered that this means buying power and not merely the amount of wages in money, the difference in the money amount of the wages being in fact much greater. American wages, as shown in the table already given, are from three to five times higher than abroad.

The Bureau of Labor Statistics in connection with these figures says:

> In considering the figures presented it is very important to note that the wage data relate only to a few classes of workers (building, engineering, furniture, and printing and publishing) and the price data are limited to certain articles of food and to rent. Thus the index figures can be taken only as a very rough indication of the relative levels of real wages of adult male workers in certain occupations and cities. In many instances, however, the figures shown indicate such wide differences between cities that they may be accepted as reflecting real differences in the level of well being of the workers in different countries.

That there is no real question as to the truth of the broad inferences which can be drawn from the figures is indicated by a statement made by William B. Wilson, of Pennsylvania, former Democratic Secretary of Labor and recently Democratic candidate for Senator in Pennsylvania, who was quoted, as follows, by Drew Pearson in the Washington Star of July 4, 1926:

> The real wage is not the money received, but the amount of buying power received. A dollar will buy more in Germany, perhaps, than in England. I believe that no figures exist to-day which show the relative real wages of the workers of the world.
>
> However, my work in the Labor Department gave me some approximate estimates. There is not the slightest doubt that the American worker is not only better paid than any other worker but can buy more with his money.

It is not claimed, of course, that protection alone has been responsible for increasing the buying power of wages in the United States or that alone it can maintain such a condition. It can be properly claimed, however, that without protection other forces could not have brought this condition about and without protection such a condition can not be maintained in free competition with foreign articles manufactured and produced under other standards. The tariff can not control purely domestic disturbances of the American market and economic conditions.

THE TARIFF AND FARM PRODUCTS

Seeking every point of attack upon the protection policy, its opponents have attempted to take advantage of the real distress in certain branches of agriculture growing out of the dislocations caused by the war to persuade the farmer that in some way or other he is being injured by the tariff. Nothing could be further from the truth. The fact that farm products receive the same benefit from protection as other products of industry is clearly established by an examination of comparative prices in periods of protection and nonprotection. Such an examination shows that in periods of protection farm products have relatively increased in price faster than all commodities, and that in periods of nonprotection, except during the World War, prices of farm products have decreased much faster than the prices of all commodities.

The Bureau of Labor Statistics has for many years kept records of all commodity prices and translates the prices for each year into an index figure showing how much the average is above or below the average for the year 1913, which is used as the base. In the following table the index figure 102, for example, shows that the average price of the year indicated was 2 per cent higher than the average price for 1913, and the figure 98 shows that the prices for the year indicated averaged 2 per cent below those of 1913. The table follows showing the wholesale price index figures for farm products and for all commodities in periods of protection and nonprotection:

Comparison of wholesale prices of agricultural products and all prices by Labor Department index figures

[Average, 1913=100]

Year	Farm products	All commodities	Ratio of agricultural prices to all prices
UNDER M'KINLEY PROTECTIVE TARIFF ACT OF OCTOBER 1, 1890			
1890	69.8	80.5	86
1891	75.0	80.0	94
1892	68.5	74.8	91
1893	70.7	76.6	92
DEMOCRATIC WILSON-GORMAN TARIFF ACT OF AUGUST 27, 1894			
1894	61.4	68.7	88
1895	61.2	70.0	87
1896	55.0	66.7	82

Comparison of wholesale prices of agricultural products and all prices by Labor Department index figures—Continued

DINGLEY PROTECTIVE TARIFF ACT OF JULY 24, 1897, AND THE PAYNE-ALDRICH ACT OF AUGUST 5, 1909

Year	Farm products	All commodities	Ratio of agricultural prices to all prices
1897	59.2	66.8	88
1898	62.8	69.6	90
1899	64.1	74.9	85
1900	70.4	80.5	86
1901	73.6	79.3	94
1902	81.4	84.4	96
1903	77.2	85.5	90
1904	81.1	85.6	94
1905	78.8	86.2	92
1906	80.3	88.6	90
1907	86.7	93.5	93
1908	86.5	90.1	96
1909	97.0	96.9	100
1910	103.2	100.9	102
1911	93.0	93.0	100
1912	101.3	99.1	102
1913	100.0	100.0	100

From this table it will be seen that under the McKinley Protective Tariff Act the prices of all commodities dropped 4 points while farm products went up 1 point; that under the Wilson-Gorman nonprotective tariff farm products dropped 15 points in price while all prices dropped only 10 points; and that under the Dingley and Payne-Aldrich protective tariff laws the prices of agricultural products forged steadily upward much faster than other prices. From 1896 to 1913, under protection, agricultural prices advanced 80 per cent, while the prices of all commodities advanced a trifle less than 50 per cent.

When we examine the situation from 1913 to the present day we find that under nonprotection and the stress of the war agricultural prices went up 23 per cent, while all other prices were going up 47 per cent from 1913 to 1921, and that from 1921 to the present, under protection, agricultural products have advanced 16 per cent, while other prices have stood practically stationary. The table for 1913 to 1927 follows:

DEMOCRATIC UNDERWOOD TARIFF ACT OF OCTOBER 3, 1913, TO 1921

Year	Farm products	All commodities	Ratio of agricultural prices to all prices
1914 (war)	102.6	98.1	105
1915 (war)	103.9	100.8	103
1916 (war)	122.8	126.8	97
1917 (war)	189.6	177.2	107
1918 (war)	218.5	194.3	112
1919 (demobilization)	230.8	206.4	112
1920	217.9	226.2	96
1921 (to June 1)	127.5	155.7	82
FARMERS' EMERGENCY TARIFF ACT OF MAY 27, 1921 (PROTECTING ONLY FARM PRODUCTS)			
1921 (from June 1)	120.8	141.1	85
1922	133.3	148.8	89
FORDNEY-M'CUMBER PROTECTIVE TARIFF ACT			
1923	141.1	153.7	92
1924	143.4	149.7	95
1925	158.1	158.7	99
1926	142.2	151.0	94
1927	143.5	146.8	98

In examining this table it should be remembered that we had practically no foreign competition of any kind in the years 1914 to 1919, owing to the World War, which interrupted all foreign trade. The Underwood low tariff law was passed late in the fall of 1913, but before the greater part of our crops were ready to market the following year the outbreak of war—in August, 1914—ended any danger of foreign competition, and the demand for food for European armies sent the prices of food products, as well as other products, sky high. These conditions continued until 1919, when the demobilization of European armies began to bring about normal conditions and immediately a flood of foreign goods began coming to the United States which gave us an army of unemployed in 1920 and 1921 which equaled at least 5,000,000 persons. Farm products then began to drop in price more rapidly than other commodities, and in the first five months of 1921, before the adoption of the emergency farm tariff on May 27, 1921, farm products had slid down to a comparative index figure of 82, showing that the ratio between the prices of farm products and the prices of all commodities had changed 18 per cent to the detriment of the farmer since 1913. Farm products began to go up in price as soon as the emergency farm tariff was passed and the last seven months of 1921 showed the comparative index figure of 85, which made the comparative index figure for the entire year 84. From that point on the relationship between farm prices and other prices continued to change in favor of agricultural products until the prices of farm products have now practically reached equality with all commodity prices, based on the 1913 relationship.

During the last four months of 1927 and during the present year wholesale prices of farm products have been higher than the wholesale prices of all commodities, based on the 1913 relationship. The comparative index figure for agricultural prices fell to 94 in 1926, but the tendency since then has been upward, and it will undoubtedly continue upward if our tariff policy remains unchanged.

Farm products, therefore, receive just as much benefit from a protective tariff as all other products, and apparently suffer more in periods of nonprotection than other commodities. If, as contended by some, the farmer does not now get as much proportionately as he at one time received, the problem is in no way related to the tariff. If this condition exists, it can be due only to the fact that the wholesaler, or middle man, or transportation is getting more proportionately than formerly and this must be remedied by some other method than changing the tariff.

The inevitable conclusion is that under protection agricultural prices go up much faster than the prices of other commodities, and, under nonprotection, except in time of war, they go down much faster than all commodities. How a farmer can be anything but a protectionist under these conditions is difficult to understand.

WHAT IS PROTECTION?

Having in mind the persistent efforts, especially when an election is pending, to confuse the voters and lead them to vote against their own best interests, it may help serve to clear the atmosphere on the subject to state in elementary form the reasons for and purpose of a protective tariff.

In political parlance, a tariff is a duty on articles imported into the United States from foreign countries and a protective tariff is a duty large enough to at least equal the difference in the cost of producing the article here and abroad. A very large part of the cost of every finished article is labor. In producing a simple article made of iron or steel, by way of illustration, the portion of the cost of the article to the user which represents the actual value of the unmined metal contained in it is negligible. It requires labor to get the metal out of the ground, it takes labor to move it, and it takes labor to fashion it into its final form. All of this labor is paid for in the United States at higher rates than in foreign countries. The reason why higher wages can be paid is because when the foreign-made article reaches the customhouse the importer must pay a duty which theoretically equals the difference in cost between the foreign article and the domestic, which is very largely the difference between the wages paid in making the American article and those paid in making the foreign article. If this differential is not covered by import duties, then the domestic producer must go out of business or become bankrupt, while the wage earner in this line of business loses his job. If it be taken care of, both the producer and wage earner prosper together, and then there is what we call "good" times.

The opponents of protection admit that wages are nominally higher under protection, and when overwhelmed with the facts must concede that these wages are also higher in buying power, but will still claim that the consumer suffers as a result. Only to a very limited extent is there any such class as a consumer class; for, while all are consumers, nearly all are also producers of something or dependent upon someone who is a producer. The wealthy idler, who lives on the income of his money without doing any work, may get more out of his money by living abroad, as many of them do. Some of these who would like to live in the United States under the same conditions naturally oppose the protective-tariff policy, for they believe that, without protection, for a time at least, they could buy more with their income than under protection. Persons of this character whose first concern is not the welfare of the country as a whole, and who believe that they could weather the economic storm which would accompany a transition here from American standards of living to foreign standards for wage earners, might consistently urge free trade. Such an economic change, by reducing the buying power of the American public would ruin many great industries, and especially those producing what are sometimes considered luxuries, such

as the radio and automobile industries, and would so reduce the volume of many others as to cause untold economic loss. Only those ready to capitalize the misfortunes of others would gain by the change.

The state of affairs in the United States under which wage earners receive higher wages, with higher buying power, than those of foreign countries has been brought about gradually and is due to the fact that scarcity of labor, coupled with the necessity for developing our great natural resources, made it possible for wage earners to sell their services at a high figure in the comparatively early days of our history. In later years the efforts of organized labor groups, which in most instances could have been successful only in a protected market, have further raised living standards, thereby benefiting not only organized labor, but the country as a whole.

The natural conditions which originally contributed to the high wages and living standards in the United States no longer exist to the same degree, and neither organized labor nor any other agency can maintain these standards without some barrier against the importation of foreign products. Let us illustrate: If it cost an American manufacturer or producer $5 to produce the article which a foreign competitor can produce for $2.50, it follows inevitably that the American producer can not continue to do business if the foreign product is allowed to enter freely into the American market. If he would continue in business, the American producer must reduce his own production cost to the level of his foreign competitor and this usually means reducing wages to the same standard as his foreign competitor. This is elementary, and yet in election after election there are enthusiastic organized-labor men who go to the polls and vote for candidates who are committed against tariff protection. They frequently listen to political demagogues who talk about the "interests" grinding down the common people, and often they swallow with a relish such catch phrases as the "robber tariff" and "special privileges" without ever stopping to figure out what the tariff means to them in better food, better homes, and increasing luxuries for themselves, their wives, and children.

SOME TARIFF HISTORY

The principal opposition to a protective tariff policy for a long time has come from the southern portion of the country, which is or has been largely agricultural. In examining this traditional opposition it is interesting and instructive to take a short review of tariff history. The protective-tariff policy dates from the very beginning of our constitutional form of government, the first act for the purpose of protecting American industries and American labor being passed by the first Congress. Alexander Hamilton, the first Secretary of the Treasury, favored the policy, and all the earlier Presidents gave it their approval. The policy was the favorite one of Henry Clay, and has been advocated by Calhoun and other illustrious southerners in the earlier days of the Republic. Calhoun later turned against it with his State, and in Jackson's administration advocated the famous South Carolina nullification act. From that period opposition to tariff protection spread rapidly in the Southern States, then almost entirely agricultural. Since then this opposition has been traditional with the Democratic Party, which has for nearly a hundred years found its greatest strength in the Southern States. Opposition to the tariff on the part of the South has been a matter of tradition rather than a policy based on conditions as they now exist.

Using slave labor almost entirely, the Southern States in the period before the Civil War had no high wages or living standards for wage earners to maintain, and contended with considerable force and some show of reason that protective tariffs merely raised the cost of living without giving any compensating benefits. For nearly a century cotton has been the principal product of the South, about 62 per cent of this crop being sold abroad in an unprotected market. The cotton planter therefore may still believe that he is penalized by a protective tariff that forces the cotton producer to sell in an unprotected world market and buy in a protected domestic market.

Without discussing this contention, for it would require a very thorough review of the cotton industry to determine its truth or untruth, it is sufficient to say that this is probably the only large American industry for which this argument could be made with any degree of force, namely, an industry which depends more upon the foreign market than upon the domestic market. In recent years some of our southern Democrats have been trying to convince the farmers of other sections that their situation is the same as that of the cotton grower, but although some of the elements in their problems are alike they have not yet succeeded and probably will not succeed, because there is no real similarity between their respective situations as regards their principal dependence upon a foreign market. The fact remains and experience as well as statistics prove it, so that it can not be denied or explained away that periods of protection are and always have been best, both absolutely and relatively, for the farmer.

DEGREE OF PROTECTION NECESSARY

In theory protective duties should be such as to equal the difference in the cost of production between the United States and the competing country having the lowest production costs. In practice this is a very difficult figure to determine. Costs fluctuate so that it is difficult to obtain accurate information on production costs in foreign countries, and it is not to be expected that foreign producers would go out of their way to furnish data calculated to aid us in designing a scientific tariff law.

If it be not practicable to obtain exact figures, the best possible approximation should be made having in mind that the purpose of a protective tariff is to prevent unequal competition. It is claimed that if the rates are too high, domestic competition will not operate to keep prices from being exorbitant, especially in case of monopolies. In the first place it is not often the case that a domestic monopoly can be made so complete as to force abnormal prices, but if this should be attempted in connection with an article produced both here and abroad, the present tariff law carries a provision which gives the Tariff Commission power to raise or lower rates 50 per cent, which gives ample power to curb exorbitant charges by monopolies. As a matter of fact, however, in a country of 120,000,000 people there is enough domestic competition in practically all lines of industry to keep prices at reasonable figures with due regard for our living standards.

While we have had only five years since the Civil War during which our tariff laws have been avowedly nonprotective, and have had an opportunity to work without the aid of war conditions, we have had several periods during that time when depression has resulted because duties were not sufficiently high or because they did not cover certain articles. The tariff law now in force is an excellent one on the whole, though with changing conditions it, too, will need to be changed. Changed conditions have probably made some duties unnecessarily high. In a number of instances experience since 1922 has shown that they are not sufficiently protective. Rates in such cases should be increased, and some articles should be taken from the free list and placed in the dutiable list; but whenever and whatever revision is made it should be done by the friends of protection and with the avowed purpose of maintaining the principle of protection in proper measure.

REVENUES FROM CUSTOMS NOW NECESSARY

It should be kept in mind that there can be no such thing as "free trade" as long as a considerable part of our national income must be raised by customs duties. If the opponents of protection should come into power at the election this year, they would probably have to raise just as much revenue at the customhouses as is now raised, unless they are willing to increase internal taxation. They would, however, if they should practice what they preach, probably place the duties mostly on noncompeting articles, that is, articles not produced in the United States, and take them off or radically reduce them on competing articles.

EFFECTS OF LOW TARIFF

Since the Civil War this country has, fortunately, had only five years under two different laws, of what for want of a better name has been called tariff for revenue only—the six years from 1914 to 1920, nominally under the low tariff act of 1913, being completely nullified by the World War. Both of these experiments were somewhat disastrous and would have been more so if the people of the country had not promptly restored protection. It would take four or five years before the full effect of any change of this kind would be felt, because it would take time for foreign producers to equip themselves adequately to take full advantage of our markets. The effect was felt, however, as all who are old enough will remember, in the second Cleveland administration, again in the early part of 1914, before the war broke out in Europe, and finally in 1920 and 1921, before the present tariff law was enacted when the army of the unemployed reached the staggering number of 5,000,000 persons, according to figures well authenticated.

THE ANSWER TO THE CONSUMER

The opponent of the tariff is forced to concede that under protection employment is more general and wages are higher, but his heart still aches, at election time, for the poor unfortunate consumer. While I have shown that the consumer can not be separated from the producer, except in a very limited way, still there is a sufficient answer for the consumer as such for his adherence to protection.

When the consumer asks why he or she should be required to pay more for articles purchased in this country than for similar articles purchased abroad he should have a Yankee answer, begun by propounding another question such as this:

Are you one of the idle rich, living on an income, or are you dependent for a living on your own wages, or the wages of some other member of your family?

If the questioning consumer admits that he or she is living on an income from capital alone not invested in industry, it would be a sufficient answer to say: "Admitting, if you will, that you pay more for goods purchased in this country than for similar goods purchased abroad because of a protective tariff, do you wish to take a chance of having all your wealth wiped out in the economic disturbance which would be caused by making so violent a change in our living standards? If so, vote the Democratic ticket at the next election. If you don't lose all your money in the wreck caused by the change you and all other wealthy idlers may be able to buy more with your income than you do now."

On the other hand if the questioner admits that he or she is also a wage earner or is dependent upon some wage earner, the answer should be: "Prices are somewhat higher in this country because we have a protective tariff, but don't forget that wages and salaries are even higher than prices. You can buy more with your wages here than you could with the wages you would receive abroad, even though prices are higher here, and remember that this also is due to a protective tariff."

As usual the homely, practical wisdom of Abraham Lincoln answered succinctly but completely the high-living cost argument against protection when he said:

It is easier to pay a big bill if you have the money than a little one if you haven't.

ANOTHER RECORD OF ACCOMPLISHMENT

Mr. TILSON. Mr. Speaker, the first session of the Seventieth Congress will be long remembered on account of the number of matters of major importance with which it had to deal, and for its success in dealing satisfactorily with most of them. No session of Congress has a better record of performance of things worth while, and at the same time no session in recent years has done its work under more adverse conditions. As a rule it is not conducive to good legislation for politics to hold full sway, and yet this is just the situation in Washington for the six months preceding the presidential nominating conventions. It is bad enough when there is a real fight for the nomination in one party. This year there was a struggle of unusual fierceness and bitterness in both major parties, and Congress felt the disturbing influence. It is to the credit of Congress that more of the kind of legislation whose chief merit is that it is supposed to catch votes, did not pass under the circumstances.

All will not agree as to the relative importance of the measures that have become law, but all will admit that the tax reduction bill, the alien property bill, the merchant marine construction bill, and the flood control bill are all matters of momentous importance. Special mention of these does not in any way detract from the importance of others.

TAXES REDUCED $222,000,000

First reference to the tax reduction bill does not mean that it necessarily ranks first in its effect upon the public interest, though it is a measure far-reaching in its importance. As the bill was finally agreed to by the conferees on the part of the House and the Senate and approved by the President it reduced the annual tax burden approximately $222,500,000, which is about $20,000,000 above the Treasury estimate of the probable surplus of revenue receipts over expenditures. If business continues good so that there is no falling off in net income, it is believed that the bill as it becomes the law will produce sufficient revenue and at the same time relieve a large number of taxpayers.

The following table, prepared by Clayton F. Moore, clerk of the Committee on Ways and Means, is inserted so as to show where the reductions are made:

Corporation tax reduced from 13½ per cent to 12 per cent	$123,450,000
Credit for corporations whose net income is $25,000 or less, increased from $2,000 to $3,000	12,000,000
No change was made in the rate of tax on individuals, but the amount of earned income upon which the 25 per cent credit applies was increased from $20,000 to $30,000	4,500,000
The exemption from tax in the case of admission tickets was increased from 75 cents to $3	17,000,000
(A tax of 25 per cent on admissions in excess of $5 per seat to prize fights will increase the revenue on this type of admission about $750,000.)	
The exemption from tax of club dues, if not in excess of $10 annually, was increased to $25	1,000,000
Automobile tax (3 per cent on manufacturers' sales) repealed	$66,000,000
Annual tax on the use of foreign-built boats repealed	10,000
(But, by reason of the definition of the term "motor boat," as contained in the tariff act, the customs duty on such boats will be increased by $50,000.)	
Cereal beverage tax of $\frac{1}{6}$ of a cent repealed	185,000
Wines, war-time tax rates reduced to peace-time basis	1,000,000
Narcotics, annual license tax on retail dealers reduced from $6 to $3	150,000
	225,295,000
The law also provides for the withholding at the source, at the rate of 5 per cent in the case of individuals and of 12 per cent in the case of corporations of the income from tax-free covenant bonds in the hands of foreign owners, to prevent evasion of taxes, which will increase the revenue about $2,000,000.	
The total revenue provided in the bill is	$225,295,000
The increased revenues above mentioned	2,800,000
So, the net reduction is	222,495,000

In addition to these substantial reductions, the law itself is very much simplified for the convenience of the taxpayer, and is a new departure from previous revenue laws in its arrangement and style. It follows the recommendations of the Joint Committee on Internal Revenue Taxation made after a detailed study of the previous laws.

It is well to call attention to the fact that the tax bill just passed is the fourth consecutive tax reduction bill to be enacted into law since the Republican Party came into power in 1921. It must be borne in mind that in order to be able to thus reduce taxes there must be prudent and economical administration of governmental affairs and that the Republican Party has given the country such an administration should not be forgotten as it can not be successfully denied.

RETURN OF ALIEN PROPERTY

The return of alien property held since the World War is a matter of great gratification to the entire American people as well as to our present friends, though lately enemies in the war, to whom the property is now returned. It is not American policy to confiscate the private property of the nationals of a country with which we happen to be at war; but a number of complications had arisen out of the war making it more difficult to return the property than would at first appear. Our own nationals whose property in other countries had been held or destroyed had rights that must necessarily be protected. It was a fortunate solution that was finally worked out to which all parties in interest agreed as just and reasonable.

MISSISSIPPI FLOOD CONTROL

Not many weeks after the final adjournment of the Sixty-ninth Congress the country awoke to the realization that the Mississippi Valley was undergoing one of the most destructive floods of all history. People throughout the country were appalled as they read from day to day of the unprecedented losses. It was a catastrophe of such character that all agreed a national problem had been developed of such magnitude as to require additional legislation by Congress in order to set about solving it. Large sums of money would surely be required, which it would be impracticable, if not impossible, to provide by the method heretofore utilized of joint contribution. Congress must act, but there never was an instance where it was more imperative that Congress act upon reliable information. Government engineers began at once the tremendous task of gathering the necessary data and by the time Congress met were ready to submit tentative plans.

The Committee on Flood Control of the House of Representatives met several weeks before Congress convened in December and held hearings continuously for about five months. As is usual where such important interests are at stake and where so many are interested, sharp differences of opinion developed both at the hearings and in the consideration of the bill in the House. There was, however, a general desire that the necessary legislation should be enacted during the session, so that it was only a question of the form it should take. The bill as it finally received Executive approval was the result of laborious and extended negotiations carried on and concluded in a fine spirit of reasonable compromise, with the result that a bill was passed that it is believed will meet all the proper purposes of such legislation while reasonably safeguarding the Treasury. It reflects credit upon all concerned in its passage.

MERCHANT MARINE LEGISLATION

In my opinion the most important piece of constructive legislation enacted at the session of Congress just closing and the one that will in the end have the most far-reaching effects is the merchant marine construction bill. The exigencies of the war brought into existence a nondescript aggregation of merchant ships, which had cost the country a very large sum to

build, for war stands not upon expense. After the war under the supervision of the Shipping Board the Government continued to operate after a fashion a portion of this war-time fleet. The enterprise was foredoomed to failure from the beginning, as is Government operation of all such enterprises. A direct subsidy to privately operated ships had been refused by Congress, but ever since the war deficits on Government-operated ships have been paid, aggregating many times the largest direct subsidy ever proposed. Nor has the service furnished been equal, except in rare instances, to the demands of our trade. The Jones-White bill is the most important step taken in many years in the direction of building up a privately owned and operated American merchant marine. This law, through secured loans at low rates of interest on new ships constructed and by other advantages offered, will encourage the building and operation of new, up-to-date ships which will meet present-day requirements. It is believed that this law lays the foundation for the restoration of the American merchant marine to its former prestige on the high seas.

Emanating from the same committee another bill of importance passed both Houses of Congress and became a law earlier in the session. It dealt with the new and rapidly developing activity—the radio. The law enacted at the preceding session of Congress was amended and extended and the exigencies of a very complex and difficult situation met for the time being, or at least until the rapidly developing industry indicates additional legislation.

THE IMMIGRATION PROBLEM

The present Congress, like its predecessors for some years past, is strongly restrictionist on the immigration question; but there was practical unanimity of opinion as to the desirability of passing the so-called Jenkins bill, which grants a preferred status to the wives and minor children of aliens now living in the United States. The greatest hardships caused by the present quota immigration law have resulted from the separation of families. The passage of the Jenkins Act goes far toward curing this defect. The foreign-born residents of this country who have not yet been able to become citizens will, under the terms of this law, be able to bring in their dependents ahead of other quota immigrants and have their families with them while they are awaiting citizenship. It is a humane act and will remove one of the just criticisms made against the present immigration laws.

BENEFITS FOR WAR VETERANS

During the present session Congress has not been unmindful of our war veterans and their dependents. New hospitals have been authorized and new forms of compensation have been authorized for certain classes. Such legislation can not be called major legislation, nor can it be properly characterized as constructive. It is simply the fulfillment of a solemn obligation of the Nation. It is after a fashion paying the piper, for war is the most costly pastime in which a nation can indulge, and the people of the Nation would have us pay the debt we have thus incurred. The only difference of opinion in connection with such legislation is as to what is fair and just between different classes of those to whom we owe the obligation and also between all these as a class and the taxpaying public whom we also represent.

Salaries of a portion of the civil-service personnel of the Government have been increased during the present session. The civil service is being and should be maintained at a high standard of efficiency. In order to do this salaries must be paid comparable to those paid in private employment in comparable occupations. Salaries lower than this standard will inevitably lower the efficiency of Government service. Salaries higher than this standard can not be justified to the taxpaying public who foot the bills. Congress has endeavored to hold the scales as evenly as possible between the Government employee on the one side and the taxpayer on the other, with due regard for the highest possible efficiency of the public service.

REDUCTION OF POSTAL RATES

Substantial reductions in the rates on practically all classes of mail matter are made by a bill which was enacted into law during the closing days of the session. The new law includes provisions as follows:

To restore the 1-cent postage rate on post cards.

To provide for accepting business reply cards and letters in business reply envelopes for transmission in the mails without prepayment of postage.

To provide for collecting 1 cent additional an ounce on first-class matter when mailed with postage deficient more than one rate.

To reduce the postage on advertising portions of second-class matter.

To reduce the postage on magazines and newspapers when sent by others than the publisher or news agent.

To effect a minimum charge per piece on second-class matter when there are more than 32 pieces to the pound.

To provide for bulk pound rates on third-class matter.

To reduce the postage on fourth-class matter.

To provide for a special rate of postage on library books.

To provide for special handling and special delivery, combined, at reduced rates. This service is extended to all classes of mail.

Many other bills have been enacted into law, minor in their relative importance to the general public but of considerable consequence to those most directly concerned. To attempt even a synopsis of a portion of them would unduly prolong these remarks. On the other hand, it is too often forgotten that the prevention of unwise and unnecessary legislation is quite as important as the enactment of good legislation. This session of Congress has done its share of work along this line also.

FARM-RELIEF PROPOSALS

Some of the very important matters which have been considered during the present session of Congress have not eventuated in legislation. The most-talked-about measure was that of proposed relief for the agricultural producer. The enormous overproduction of certain agricultural commodities directly caused or encouraged by the war brought about a very serious maladjustment of prices as between farm products and other commodities used by the farmers. The relative prices of farm commodities, as compared with all kinds of service necessary to be paid for by the farmer, have been and still are very greatly to the disadvantage of the farmer, the disparity being greatly augmented by the effect of our restrictive immigration laws. The deflation of agriculture came somewhat suddenly, and was felt most keenly in 1920 and 1921.

Many proposals for relief have been made, and a number of them have been adopted, including an emergency tariff act in 1921 for the special relief of agriculture, several acts extending credit on most favorable terms to aid in more orderly marketing and other measures designed to aid agriculture in readjusting itself to normal conditions, all of which have been helpful, for while agriculture has not yet fully recovered the relative position it should have as our basic industry, it has very materially improved, as is clearly shown by Government statistics showing wholesale prices of agricultural products as compared with wholesale prices of all commodities.

It must be borne in mind that in 1921 the wholesale prices of farm products had reached the lowest relative figure as compared with the wholesale prices of all commodities since 1893, while in April of this year, the last month for which complete figures are available, wholesale prices of farm products were 7 per cent higher than the average for 1926. At the same time the average of wholesale prices for all commodities was 2 per cent lower than the average for 1926, showing that the relative position of agriculture is gradually but surely improving.

Recognizing the supreme importance of having agriculture fully regain and maintain its position as our primary industry Congress came together in the present session in a spirit of accord so far as farm relief was concerned, with a somewhat generally recognized concensus of opinion among those who had favored and those who had opposed certain proposals for relief in previous Congresses, that at this session those features of relief as to which there had not been serious disagreement should be enacted into law. Failure to carry out a program of this character and the consequent failure to enact any measure of relief whatever at this session must be charged in all fairness against those who insisted upon passing through Congress a particular form of measure, knowing well that it could not become a law. Whether it were wiser and better to have no legislation at all on the subject rather than accept anything different from the McNary-Haugen proposal, I do not attempt here to decide. Certain it is, however, that the supporters of that bill and not its opponents made the deliberate choice in favor of no legislation whatever.

REAPPORTIONMENT OF REPRESENTATIVES

Another bill that failed of passage was the proposal to reapportion the membership of the House of Representatives in accordance with the population, as found by the 1930 decennial census. The failure to perform this constitutional duty following the taking of the 1920 census has served to emphasize the danger of waiting until after the census of 1930 has been taken and the results known, for it is inevitable that the difficulties in the way will become greater as the differences in the rate of increase of population in different parts of the country become greater. The defeat of the measure in the House was not due to a party alignment on either side, though quite a considerable majority of the Republicans voted for it and a very decided majority of the Democrats voted against it.

The President's veto of the bill to authorize the operation of the Muscle Shoals plant under Government management was expected. All are agreed that some way should be found to utilize the natural power resources at Muscle Shoals, but even the most fervent desire to dispose of this long drawn-out controversy should not blind one to the fact that the bill presented to the President for his approval would have squarely committed the Government to the operation of a purely industrial enterprise, in direct competition with private industry.

The naval construction bill that passed the House failed to receive consideration in the Senate for lack of time, but will doubtless have full consideration at the short session of Congress and become a law, thus making provision for the continued maintenance of a Navy adequate for our purposes of national defense.

The proposal to take steps toward the control of floods in the delta of the Colorado River and to otherwise utilize the waters of that great stream by the building of a great dam at or near Boulder Canyon passed the House a few days before the end of the session. The bill did not come to a vote in the Senate. One of the very important provisions of the bill as it passed the House was the appointment of engineers to make a further study of the engineering problems. This provision in the form of a separate resolution passed both Houses and became a law, thereby assuring additional information, which should be most helpful in the final stages of the consideration of the measure.

Other measures of greater or less importance are left for consideration at the short session of Congress. Some of them should receive consideration, while others, especially those authorizing the expenditure of considerable sums from the Treasury, may well wait for a more propitious time when the new tax bill shall have demonstrated its ability to produce sufficient revenues to meet our present Budget requirements.

No account of the work of the present Congress would be complete or would do full justice to Republican control of affairs since the party came into power in 1921 that does not connect up and join in a single statement at least a brief summary of the record during the entire period of seven years.

THE SITUATION IN 1921

In some remarks made by me at the close of the Sixty-ninth Congress I referred to the conditions which confronted the Republican Party when it came into power in 1921. I can scarcely improve upon the language used at that time. I then said:

Our international affairs in 1921 were in a deplorable condition. Although hostilities had been terminated for more than two years, we were still technically at war with the Central Powers of Europe. Our relations with many other countries were strained. The principal nations of the world were engaged in a mad competition for the upbuilding of navies and naval armaments for the next world conflict, which was freely predicted.

Our national interest-bearing indebtedness had grown from less than $1,000,000,000 to the staggering sum of nearly $25,000,000,000, a considerable portion of which was shown to have been due to recklessness and extravagance in the conduct of the war. The annual interest charge had grown from less than $23,000,000 to more than $1,000,000,000. Eleven billion dollars had been loaned to foreign countries and no provision made for the funding of that enormous indebtedness.

A vast merchant fleet had been built for war use, but a great many of the ships were worthless and hundreds of them had been built after the armistice because there was no cancellation clause in the contracts for their construction. The cost of our shipping program amounted to over $3,000,000,000. In 1921 there were assets in ships estimated to be worth less than $500,000,000, with claims against the Government amounting to nearly $200,000,000 growing out of our shipbuilding venture.

The railroads of the country were thoroughly demoralized under their extravagant management and operation by the McAdoo administration, which cost the country in taxes alone the sum of $2,950,000,000. Extra burdens had been placed upon the railroads—increased wages alone amounting to $1,765,000,000—and no provision had been made to enable the roads to meet those extra burdens.

We have been hearing much recently of the farmer's hard lot. The masterly array of facts and figures presented a few days ago by the gentleman from Oregon [Mr. HAWLEY], as well as the strong, convincing speech of the gentleman from Iowa [Mr. GREEN] delivered on this floor last Thursday, demonstrate conclusively that however hard the present lot of the farmer, it was far worse in 1921. The farmers of the country were in fact then face to face with financial disaster as a result of the sudden fall in the prices of agricultural products.

The manufacturing and commercial interests of the country were suffering in 1920 and 1921 from an unparalleled depression resulting in widespread unemployment, 5,000,000 persons being out of work according to the American Federation of Labor and the Department of Labor. (See report by Ethelbert Stewart, Commissioner of Labor Statistics under Wilson administration and still holding that office, in CONGRESSIONAL RECORD of August 16, 1921, page 5037.) This condition was intensified by the threatened influx of foreign-made cheap goods, already in full swing, under the Underwood tariff law then in force.

Such was the heritage the Republican Party received from the last Democratic administration, which, having failed to prepare the country for war when war was imminent, had equally failed to prepare the country for peace after war had ceased.

THE REPUBLICAN RECORD

Summing up very briefly only a few of the many things accomplished to meet the unusual and abnormal conditions existing in 1921, the record of accomplishment of the Republican Party in control of both the executive and legislative branches of the Government during the past seven years may be briefly stated as follows:

First. Peace has been established and maintained with all the nations of the world.

Second. Most of the loans made to our allies during the World War have been adjusted on terms which are just both to ourselves and our debtors, assuring, so far as possible, the repayment of approximately $11,500,000,000, which represents considerably more than half of our present national debt.

Third. The Washington Conference for the Limitation of Armaments has been much criticized by many of our own people who claim that we yielded too much, but whether that be true or not, the fact remains that it was the greatest single step in history toward universal peace. It pointed the way and asked others to join us in it.

Fourth. A budget system has been firmly established which has already resulted in greater efficiency and more effective economy than has been known at any previous time in our history.

Fifth. Taxes have been reduced from $5,700,000,000 annually in 1920 to an estimate of approximately $3,187,000,000 for 1929, while many thousands with incomes less than $3,500 annually have been relieved from all direct Federal taxes.

Sixth. The national debt has been reduced by approximately $6,500,000,000, and the interest on the national obligation by nearly $300,000,000 a year.

Seventh. Abuses in the Immigration Service have been corrected, and the threatened flood of immigration of a character that constituted a menace to American labor has been restricted, while during the present session the immigration law was liberalized in a humane and commendable manner for the uniting of families.

Eighth. A number of laws in the interest of agriculture have been enacted, including the agricultural credits law, the emergency tariff law—which saved the farmers from ruin in 1921—the grain futures act, the act regulating meat packers, the act authorizing agricultural cooperation in interstate commerce, the act creating a cooperative bureau in the Department of Agriculture, and others.

Ninth. The tangled mass of legislation relative to World War service men has been reformed, and the pensions granted to veterans and their dependents have been increased until the Government is now expending annually more than $700,000,000 for veterans' relief. The present session of Congress has authorized an expenditure of $15,000,000 for new veterans' hospitals, amended favorably to the veterans the adjusted compensation act, and added to the compensation of certain classes of disabled officers.

Tenth. A general protective tariff measure was enacted in 1922, which on the whole has worked well and has helped very materially in restoring prosperity to the country. While protecting in most respects adequately the home market, it has operated so that 63 per cent of all imports come in free and the average rates on dutiable articles are lower than in any previous protective tariff law. In fact, experience under the law has proved in quite a number of instances that the rate is too low to give adequate protection.

Eleventh. Postal rates were revised in the Sixty-ninth Congress so as to put the Post Office Department almost on a self-supporting basis, while at the same time substantial increases were made in the salaries of postal employees. The present session of Congress has found it possible to further substantially decrease postal rates on some important types of mail matter.

Twelfth. An aviation building program has been adopted and is being carried out, which at the end of a five-year period will give the Army 1,800 and the Navy 1,000 airplanes and probably give the United States leadership in the air.

Thirteenth. The national banking system has been reformed and strengthened, and national banks have been placed more nearly on a parity with State banks.

Fourteenth. Substantial increases have been made in the pensions allowed to veterans of the Civil War and their widows, and

Spanish War veterans and their widows have been placed more nearly on a parity with the veterans of other wars.

Fifteenth. A public-building program has been authorized calling for an expenditure of $265,000,000 under which the executive branch of the Government has the power to select sites and erect suitable buildings where most needed, thus ending the old "pork-barrel" system of appropriating for public buildings.

Sixteenth. A comprehensive plan for flood control for the Mississippi River has been adopted as above indicated, at a cost estimated at $325,000,000, to prevent so far as humanly possible the recurrence of another great disaster such as that which occurred in the summer of 1927.

Seventeenth. As stated above, a plan has been approved and is now being carried out for the return to German and Austrian owners of property seized during the World War and held since that time by the Alien Property Custodian. This legislation has been coupled with the payment of American claims against Germany, thus settling a problem which has embarrassed the Government since peace was declared.

Eighteenth. As above outlined in referring to the work of the present session, legislation has been enacted to foster the development of a privately owned merchant marine. Additional funds to the amount of $125,000,000 have been made available for loans in aid of new steamship construction, and other legitimate inducements have been offered to encourage the building up of a merchant marine under the American flag.

ECONOMY POLICY UPHELD

Once again we have been able to keep appropriations substantially below the Budget estimates. The appropriations for 1929 show some little increase over those for 1927 and 1928, but the increase has not been large. President Coolidge said in 1926 that Government expenditures had then reached almost a rock-bottom figure, and from that point on they would probably show moderate increases from year to year as the country continues to grow and expand. These increases are for the most part being taken care of out of increased tax receipts at lower tax rates and are being made without disturbing the balance between income and outgo owing to the rapid decrease being made in the public debt and the resultant decrease in our interest obligations, due to the very able and farsighted policy of the present administration of our fiscal affairs.

The total number of Federal employees has been reduced approximately 100,000 in the seven years of Republican control, and this of itself is no mean accomplishment, considering the incessant demand, not easy to resist, for more and ever more employees. On December 31, 1920, two months before the Republican Party came into power, the records of the Civil Service Commission showed 358,681 civilian employees, exclusive of the Postal Service. The last public statement by the Civil Service Commission, on December 31, 1927, showed 244,014 employees, exclusive of the Postal Service, a net reduction of 114,667.

Owing to the natural growth and increased business prosperity of the country, it has been necessary during the same period to increase the number of postal employees—who are paid entirely out of postal revenues—from 281,494 to 310,161, an increase of 28,667. Despite this increase in postal employees, there has been a net decrease for all departments of 86,000.

THE FINANCIAL RECORD

An indication of the trend of Government expenditures is found in a summary of actual disbursements made, as shown in the following table:

Government expenditures, 1920–1927

(Exclusive of postal expenditures paid out of postal revenues)

Fiscal year—	
1920	$6,482,090,191.21
1921	5,538,209,189.30
1922	3,795,302,499.84
1923	3,697,478,020.26
1924	3,506,677,715.34
1925	3,529,643,446.09
1926	3,584,987,873.50
1927	3,493,584,519.40

The above table shows the reduction in annual expenditures since 1920 of approximately $3,000,000,000 a year. In making these comparisons postal expenditures and appropriations are excluded, because they are paid out of postal receipts and have necessarily increased rapidly with the growth of the postal business. Deficits in the postal expenditures and appropriations are included, however, in the figures given, so that they accurately reflect the net financial transactions of the years indicated.

The following table indicates the reductions made in the national debt and in taxation:

National debt, 1920–1928

National debt, June 30, 1920	$24,299,321,467.07
National debt, May 29, 1928	17,756,000,000.00
Reduction in 8 years	6,543,321,467.07

Taxes, 1920–1928

Receipts from taxes, including customs, income, and profits, and miscellaneous internal revenue for the fiscal year 1920	$5,722,685,804.00
Estimated receipts from same sources for fiscal year 1929 (under new law)	3,187,555,000.00
Reduction in annual taxes	2,535,130,804.00

In the time-honored language of political-party platforms we as Republicans can well afford to point with pride to the notable record of achievement that I have so imperfectly, incompletely, and in such a fragmentary manner outlined here. It would require a volume to make even a brief reference to the more important accomplishments of the last seven years. In spite of all the perplexing and harassing problems left by the war it has been a period of remarkable prosperity, growth, and development. The Republican Party, in power throughout the period, has squarely faced the problems presented, has shirked no responsibility, and is ready with full confidence to give an account of its stewardship. The session of Congress now closing has added very materially to the record of things well worth while accomplished. We submit our work to the calm, dispassionate judgment of our fellow citizens and await with confidence their just appraisement and approval.

"WE MUST PRESERVE AND STRENGTHEN OUR IMMIGRATION LAWS"

Mr. UNDERWOOD. Mr. Speaker, ladies, and gentlemen of the House, I believe that one of the most important questions confronting the American people to-day is the question of immigration. The preservation and strengthening of our immigration laws should have the careful and sober thought of all our citizens. Strong and well-organized forces are actively at work attempting to weaken, modify, or repeal the law. Since the passage of this law I have received much propaganda in the form of letters, resolutions, and requests to vote for various bills that have been introduced in Congress tending to have this effect. I voted for the immigration law because I have always been in favor of restricting immigration to the lowest possible limit. In fairness to the good people who sent me here I feel that I should state some of the reasons for my vote upon this important legislation.

We have a perfect right to say whom we shall admit or refuse admittance to our shores. There is no Member of this Congress who has a greater respect and esteem than I have for the naturalized citizens of this country. I do not care from what country he comes if he is a true and loyal American. I have an equal contempt for any citizen of this country who is not patriotic and loyal, whether he is native or foreign born. I am not unmindful or forgetful of the part that immigrants have played in the progress and development of this Republic. I do not claim to be more patriotic than others; neither do I bear malice or ill-will toward anyone. I have a charitable feeling for all. I believe that all fair-minded Americans will agree with me when I say that we have an inalienable right to say that no person should be admitted to this country, regardless of percentages, unless he shows a clean bill of health, mentally, morally, physically, socially, and politically. Upon the exercise of this right is dependent the preservation of American rights, institutions, and ideals. It is for the best interests and common welfare of our country. If we are to maintain an American standard of living, properly safeguard American rights, institutions, and interests, then we should have no hesitancy in throttling down this inflow of persons from other lands. Selective and restrictive immigration is the best protection for our country that was ever provided by any land. We want to be fair and just in our relationships with other nations and other peoples, but first we want to be fair and just to our own citizens.

Confronted by the problem of assimilating those who are already here, the time is past for introducing vast groups who are alien to our language, alien to our political institutions, to our habits of life, to everything we hold dear. If we depart from the system that we now have I fear that we will jeopardize the rich heritage that we now enjoy and endanger the welfare of our posterity.

Let us review for a few moments the history of our country. Let us ask ourselves who and what is an American and what does America stand for. From a study of our past we may be able to chart our course in the future. We boast of a land where all men are free and equal. We highly prize those immortal documents—the Declaration of Independence and the Constitution of our country. In building the foundations of our country, we owe much to the picked stock that came to this splendid land, rich in natural resources. The early colonists or settlers did not have any inseparable differences in race, culture, or traditions.

I fear we too easily forget the suffering, hardships, and dangers of our early pioneers and their descendents; those

peoples who had the heroism, courage, and spirit to colonize, develop, unify, and make possible the many privileges and benefits which we now enjoy. History tells us that almost three-fourths of those colonists who landed at Plymouth were under the sod at the end of the first year they were here. That of those brave people who settled at Jamestown, numbering 900 souls, but 150 remained after the passage of three years. It took courage, will power, and determination for these intrepid people to come and to live here. The early colonists along our seaboard spread westward clear across the continent. They blazed the trail for those who followed.

Let us consider for a moment our colony history, a history that was longer than the history of our independence. The trend of American people of the colonist period was toward American independence; toward unity. After the close of the Revolutionary War and our independence had been accomplished, the one great question was and is to-day, what sort of America will it be? It made little difference what they thought about immigration at that time because America was a vast continent and there were practically no immigrants. This was true for almost a generation after the revolution. It was not until half a century had passed that the tide of immigration began to assume larger proportions. Those who had come during this period were similar in blood, outlook, and culture to those already here.

A popular idea existed that America should be a refuge for the oppressed of all nations. For the first 100 years of our existence we welcomed immigrants from all lands, regardless of origin, blood, or condition. It was considered un-American to exclude anyone. I think it is fortunate for this country that no great tide of immigration came during our formative period.

A great tide of immigration followed our Civil War, to take advantage of this wonderful land rich in natural resources, a land that had already been prepared for them by the sturdy pioneers. The first attempt to restrict immigration was made in 1882, when an attempt was made to limit the great number of Chinese that were entering this country. Only during the past few years has America really been awakened to the need of restrictive and selective immigration laws. During the years prior to the passage of our first restrictive immigration law in 1921 immigrants were coming to this country at the rate of approximately 1,000,000 each year. This great tide was broken temporarily during the period of the late World War. After the close of the war there came another great rush of people from foreign lands endeavoring to escape from the destruction, havoc, destitution, and suffering that followed in the wake of this great world catastrophe. It was then forcibly brought to our attention that America could no longer be an asylum for the millions who desired to come to our shores. It was then that American citizens became aroused to the great danger confronting this fair Republic. As a result of the millions who had come during recent years, we found upon investigation that the melting pot was not melting, that many people with ideas wholly foreign to ours, with communistic and bolshevistic tendencies, with a contempt for our institutions, had been admitted; that many of them had come from lands where there was no semblance of a government.

That their object and desire was to destroy the Government which we all so highly prize and cherish. We found them congregating in certain sections of our country, living as they had lived in foreign lands, speaking their own languages, editing their own newspapers in that language, without any desire or incentive to become Americanized or prepare themselves as citizens of this their adopted country. With all these conditions confronting us, we were brought to a realization of the seriousness of the situation and an urgent demand for a more restrictive and selective immigration law. As a result of these conditions, and to prevent the flooding of this country by millions of undesirables, we passed what was known as the Johnson Act in 1924. This is the most restrictive immigration law that has ever been placed on our statute books. In my opinion the importance of the passage of this act to the future of this country can only be estimated with difficulty. It is a humane law, fair to all the peoples of the world. It was the first real effort we have made to select the type of people whom we want as our future citizens. It provides rigid tests to determine whether or not those who wish to enter are mentally, morally, and physically sound. It searches the record of their social and political past. Every applicant must meet this test before admission.

We should strengthen and not weaken existing immigration laws. All true and patriotic Americans desire that this be done. We must be fair and just to all, but our first consideration should be for our own country. We do not need any additional immigrants to-day. Unemployment exists in this country. Many American wage earners are unable to find employment or support their families. To let down the immigration laws would mean a flood of immigrants to this country who would come in competition with American wage earners. There is no demand upon the part of the farmer, business, laboring, or professional man for a weakening of existing immigration laws. The contrary is true. The American Federation of Labor, the American Legion, and many other organizations and patriotic societies have urged upon Congress the necessity of limiting immigration to the lowest possible point. With that attitude I am in hearty accord.

It is our duty to Americanize those we have here; to urge upon them the importance of taking immediate steps to become American citizens; to teach them that ours is the greatest and most prosperous country in the world—a country where people have freedom, equality, and liberty, with abundant opportunities to accumulate property and enjoy our great natural resources; to teach them obedience to our laws, love for our common country, and respect for our flag. If those who come to our shores find it impossible to maintain, uphold, and protect American institutions and ideals, then I would deport them and send them back to the land from whence they came. I have always considered it my duty as a Representative in the American Congress to help preserve and strengthen our immigration laws.

BALTIMORE

Mr. LINTHICUM. Mr. Speaker, we have just secured the incorporation in the rivers and harbors bill reported by the Rivers and Harbors Committee to this session of Congress an authorization for an appropriation of $507,640 to dredge an anchorage basin opposite Dundalk 35 feet deep, 1,500 feet wide, and 4,500 feet long, which will give a considerably additional anchorage to our harbor and which is very much needed. In addition to this we have received authorization for $12,000 annually for the maintenance thereof.

I consider this a very great acquisition to the port of Baltimore, because it will not only give us this additional anchorage basin but the bill also provides that the dredge material shall be used in filling in at Dundalk for the contemplated airport, which airport when completed will be second to none in our country, thus accomplishing two important projects at the same time.

Baltimore at present has a 35-foot channel from the city to the sea, which is found to be inadequate, owing to the great depth required for the modern large ships; and, backed by the city of Baltimore, the association of commerce, and other organizations, I am, with my associates of the Maryland delegation in Congress, endeavoring to procure a channel 40 feet deep and 1,000 feet wide.

A general survey is now being made by the local engineers at Baltimore, and I trust we shall be ready to make a splendid showing before the Rivers and Harbors Committee by the next session of Congress.

I mention these facts to show that the congressional Members from Maryland have not been slow in grasping every opportunity for the promotion and improvement of the harbor facilities of Baltimore and the channel to the sea. It is well that we should do this, because I believe the great prosperity, future growth, and wealth of our city will depend more upon its harbor than any other one thing, and will add to its future growth and greatness more than any improvement we could possibly make.

BALTIMORE'S STRATEGETIC POSITION

When you consider that Baltimore's geographical position is of such great advantage in the development of its commerce to both foreign ports and, through the Panama Canal, with the Pacific coast, likewise its nearness to that great central West, the bread basket of the country and a wonderful manufacturing center, we can not but realize that Baltimore plays a very large part, indeed, in the future history of our country and of the commercial world.

PROXIMITY OF BALTIMORE TO CENTRAL WEST

It will be interesting to note from the figures which I give below distances of the principal cities in the central West from Baltimore, Philadelphia, New York, and Boston:

	Baltimore	Philadelphia	New York	Boston
Buffalo	396	414	396	498
Pittsburgh	311	349	432	673
Harrisburg	84	104	196	428
Cleveland	442	497	580	681
Cincinnati	577	660	743	943
Chicago	796	817	899	1,033
Louisville	691	774	857	1,057
St. Louis	916	961	1,044	1,217
Kansas City	1,210	1,239	1,331	1,484

Baltimore as a distributing center for the Southeastern States is by far the greatest manufacturing city south of the Ohio River and east of the Mississippi, exceeding Louisville, Ky., by more than 1,300 industries, and, with the exception of St. Louis, Mo., is the largest manufacturing center not only in the territory south of the Ohio River in Pennsylvania but of any manufacturing center west of the Mississippi River—some 28 per cent greater than Los Angeles and 70 per cent greater than San Francisco.

GROWTH OF BALTIMORE

Baltimore has grown rapidly during the last 24 years—that is, since the great fire—and I may say with pardonable pride that I was a member of the general assembly, at that time chairman of the city delegation, and helped pass much of the legislation for the reconstruction and improvement of Baltimore. The prosperity and size of an individual's business depends largely upon the number of people who pass his store and who live in close proximity thereto. So it is with cities. When we, therefore, realize that the territory east of the Mississippi River, excepting New England, during 50 years prior to 1920 increased in population from 28,193,378 to 66,620,263, and in those eight States more closely surrounding Baltimore the population increased from 10,767,754 in 1870 to 25,639,986 in 1920, and that the population in Maryland itself increased in 50 years from 780,894 to 1,449,000, we can realize how Baltimore must have grown in business and in commercial importance by reason of this great influx of population in the territory upon which she depends. And so it is that the population of Baltimore increased from 1890, when we had 434,439, to 1927, when we had 820,000, and that the manufactured products from 1904 to 1925 increased from $150,000,000 to $671,000,000; in other words, the manufactured products averaged a yearly increase of $26,000,000.

TIDES AND CURRENTS

Baltimore has a wonderful advantage both in tides and tidal currents, while other cities have tremendous tides. Baltimore has a very slight tide in comparison with them. The tide varies from 1.2 feet at Fells Point to nine-tenths foot at Seven Foot Knoll, and at Fort McHenry it is 1.1, and the tidal currents vary from four-tenths of a knot at Fells Point to six-tenths of a knot at Fort McHenry. The advantage of this is that the cost of maintenance is extremely low in comparison with cities that have much greater tides and swifter currents.

MARYLAND AND BALTIMORE COOPERATE WITH NATIONAL GOVERNMENT

There has always been cooperation with the National Government by Baltimore and by the State of Maryland. The Federal Government has contributed up to 1926 $11,963,180 and the city of Baltimore and State of Maryland approximately $12,750,000 for harbor improvements. The city of Baltimore has expended in addition some $12,000,000 to improve the harbor both for dredging and erection of docks, wharves, and so forth. The General Assembly of Maryland has authorized an additional expenditure by Baltimore for harbor improvements of $50,000,000, of which a considerable part has been expended. The city of Baltimore and the local companies are continually improving our terminal situation, both for the accommodation of ocean-going vessels and other ships which visit the port. A port development commission was organized in 1920 and has charge of expenditure of the $50,000,000, so that the work is going ahead in a progressive manner, and the National Government will receive cooperation in every particular by the local authorities.

IMPORTANCE OF PORT TO CENTRAL WEST

To illustrate how important the port of Baltimore is to the Central West, I cite the fact that in 1926 the total export freight by rail was 559,047 tons, of which Illinois, Indiana, Ohio, and Pennsylvania contributed 422,956 tons, or 76 per cent. Of the States west of the Mississippi River, Wisconsin, Iowa, Minnesota, and Missouri contributed 33,235 tons, and from the Southeastern States, not including Maryland, 38,543 tons. It will be seen by this that when we ask for the improvement of the Baltimore Harbor and the channel from the city to the sea it is not solely by any means for the city of Baltimore but for the great Central West and other portions of the country which prefer Baltimore because of cheapness of transportation and excellent facilities. It might be well to mention right here the fact that Baltimore, in competition with all the large ports of the Atlantic and Gulf coasts, excels by reason of the cheaper freight rates through this port, which the shippers of export and import freight appreciate.

FREIGHT RATES

Some 50 years ago, Baltimore claimed the right by reason of her nearness to the Middle West of a cheaper freight rate, and procured it, and in order to stabilize it, the trunk lines of the East agreed definitely to establish it in favor of Baltimore and Philadelphia, so that their rates are much lower than those of New York and Boston. Traffic eastbound to Baltimore is 3 cents per 100 pounds less than the rates to New York and westbound the differential is 8 cents on the first two classes and 3 cents on the lower classes of freight than New York.

The people of this country have been led to believe that New York is the only port along the Atlantic through which to make shipments to foreign ports or for distribution. The result is too much freight has piled up at that port and the great facilities offered have been flooded and congested so that quick operation is practically impossible.

LOWER COST FOR EXPORT AND IMPORT COMMERCE

It is my desire to impress upon the people of the country, and particularly the Central West, that Baltimore offers every opportunity for import and export commerce and at very much lower expense. To summarize, when we realize that Baltimore is 200 miles closer to St. Louis than New York and 63 miles closer than Philadelphia, that it is 109 miles closer to Chicago than is New York and 118 miles closer to Indianapolis, that it is closer to Detroit and even closer to Buffalo, in the State of New York, than is the city of New York herself, we can then understand the wonderful advantage to the shipper in using the Baltimore port by reason of the differentials in freight rates.

LOW COST IN HANDLING FREIGHT

Some time ago I distributed among Members of Congress a circular comparing the difference in handling a 5,165-ton steamer with general cargo in the ports of Baltimore and New York. It showed by an itemized account that a saving of $4,177.81 would be made by shipping through Baltimore, and at the same time quickness and dispatch, without congestion. Also a circular of a shipment from Pittsburgh to Baltimore or New York, which showed a saving of 19.7 per cent through the port of Baltimore. Another comparison of a shipment from the same city to the same points via warehouse shows a saving in favor of Baltimore of 47 per cent. That the country and shippers abroad are beginning to realize the importance of Baltimore and its harbor is conclusively shown by the statements I have given of the immense increase of commerce to and from Baltimore.

DEVOTED MY TIME TO HARBOR AND CHANNEL IMPROVEMENT

I have devoted my energies to improving and enlarging the port of Baltimore, and have secured large appropriations for the widening and deepening of our channels, including the channel into Curtis Bay and Spring Gardens, which I think have cost certainly not less than $2,000,000. I do not desire, however, to limit my activities entirely to the harbor and channels of Baltimore, though I do feel that in the future growth and progress of our city it is one of the greatest acquisitions we have.

FEDERAL BUILDINGS

I have spent some years in Congress, passing through the World War, the reconstruction period up to the present time of consolidations and trusts. With my colleagues' cooperation in both Houses we have added other facilities to our city, notably the Federal branch bank, to cost when equipped $1,500,000, which will be of inestimable benefit to the banking, commercial, and industrial interests when completed. The Federal building for the housing of the post office, Federal courts, and other governmental activities, including the Third Corps Area, will add to those branches of our Government greater facilities and comfort. This building, we hope, will be not only of practical construction, but likewise architecturally beautiful, and is to cost when completed and equipped around $4,000,000.

FORT M'HENRY A PATRIOTIC SHRINE

Funds have now been appropriated under my bill to restore Fort McHenry to its condition at the time of the War of 1812. The dedication of it as a national military and patriotic reservation we hope will be during the present administration, when thousands of our fellow citizens will meet and glorify where Francis Scott Key wrote The Star-Spangled Banner on the memorable occasion of the Battle of Fort McHenry and North Point. This should add great interest to the patriotic and memorable acts which the people of Baltimore have played in all the great wars of our country.

IMMIGRATION STATION HOUSING PROHIBITION BUREAU

It is to be deplored that the immigration station, of which we were so proud and for which we all worked so hard, located as it is just alongside of the Francis Scott Key shrine, should be taken over by the prohibition officials. It is well to enforce the law, but it is not necessary to enforce it upon ground sacred to the hearts of our people by the glories of the War of 1812. The conservation of liberty by that war is certainly not in the category with restriction of liberty, the violation of the Constitution and bill of rights in the manner practiced by prohibition of-

ficials. Old bottles, stale beer, and captured automobiles are not picturesque in the shadows of Old Glory as immortalized by Francis Scott Key.

THINGS YET TO BE ACCOMPLISHED

As people outgrow their clothes, so cities outgrow their facilities. Before the Baltimore & Ohio Railroad ever reached the Ohio River the Government constructed an appraiser's warehouse in Baltimore. This warehouse still stands opposite the customs building. It is unique because of its old-fashioned architecture, but it does not represent the steel age but the concrete age; wherefore, great concrete pillars abound occupying space and destroying utility.

The city has long outgrown this building, and my colleagues and I are endeavoring to secure another building whereby better facilities may be afforded and greater efficiency procured. This we have every opportunity of securing in the near future.

As in the case of the warehouse so in the case of a new marine hospital, the old one being of frame construction, insufficient in size, and overcrowded. We are therefore endeavoring to obtain, with good prospects, a new marine hospital building to adorn the present site and to render every advantage and facility of a modern hospital.

To these matters and to the widening and deepening of our channel—also general legislation—it is my intention to devote my entire time, to the end that Baltimore may become even a greater city by virtue of its port facilities and its complete equipment in every detail.

SHALL THE AMERICAN COMMONWEALTH BECOME THE OPPRESSOR OR THE LIBERATOR OF THE AMERICAN PEOPLE?

Mr. KENT. Mr. Speaker, from the time of the foundation of this Government the present Democratic Party and its predecessors have usually remained true to the principles of those who founded it. If there is one course that was clearly and definitely charted by the founders of the Government, and especially the founders of the Democratic Party, it was that the Federal Government is one of clearly defined powers, and all powers not delegated to the United States by the Constitution nor prohibited by it to the States are reserved to the States, respectively, or to the people. My own conception is that the people desired to establish a constitutional form of government in which they reserved unto themselves as much liberty and freedom as possible consistent with the things they desired to accomplish as set forth in the preamble of the Constitution. They surrendered their rights, which ordinarily could be exercised without restriction by savages or ungoverned people, first unto the States, in order that each State would definitely protect the people within its borders. The Constitution of the United States was ratified by the legislatures of the several States. It was not ratified by the people of the United States or of the several States, and therefore we have the people conferring upon their State governments certain rights to promote the common defense and the general welfare, surrendering unto the States themselves certain rights, in order that they might procure benefits common to all citizens similarly situated. Then the State legislatures ratified the National Constitution and expressly delegated to the National Government certain clearly defined powers. The founders of this Government never had any idea that the Government would engage in any commercial enterprise. It was far beyond their thoughts or expectations that the Government they were founding would go down into any State and engage in private enterprise. The Federal Government was to do nothing more than that which is set forth in the preamble of the Constitution, within the clearly delegated powers set forth in the Constitution and its amendments. But of late years men calling themselves Republicans and Democrats have charted out a course for the Federal Government to accomplish which the most liberal person in the Constitutional Convention never conceived. The members of that convention went into its sessions representing their people, surrendering no valuable right which affected the daily lives, social customs, and commercial activities of the people back in the States.

But now party lines have dropped. Men have conceived the idea that this Government is all powerful and all embracing; that it can enter into private enterprise even though it may compete with persons engaged in private industry. To-day it does not seem to matter that men devote a lifetime to the building up of an industrial concern. They and their fathers before them for generations may have developed a business. All they have may be invested in it and yet the Government, according to the new-found theories of those so-called liberal constructionists, can go down into the State in which such industries are located, enter into business under some power imagined to be in the Constitution, and drive these industries out of business.

I am opposed to any such procedure. Big business, the special interests, organized wealth, without conscience and unrestricted, may do that which is against the law. But it does not necessarily follow that two wrongs make that which is right. The Government clearly has the power to control and restrict that which is illegal on the part of business, but it is not right to go down into any State or any number of States and obliterate any business already established by the entrance of the Government itself into business. No business concern can compete against the greatest and wealthiest Government in all history. Behind the ability of this Government to do business there rests the greatest power ever known to man, namely, the power of a Government to tax individuals and enterprises. If the Government sustains a loss in business, all the people pay it. If an individual or corporation sustain losses, they alone must pay them. If the Government competes with an individual or enterprise, then that individual or enterprise becomes the competitor of all business individuals and enterprises in the United States. The Government thus becomes the business enemy of such citizens and corporations as it may thrust into competition with itself.

That is why I am opposed and have always been opposed to Senate Joint Resolution 46 on Union Calendar 324, commonly known as the Muscle Shoals bill. Muscle Shoals is nothing more than a "hangover" after the war. Excuses are made that we desire to put to work the many millions of dollars now lying idle on the Tennessee River. It is estimated that we have spent there something over $150,000,000. But in the great World War we spent over 26,000,000,000 of dollars which we never expect to get back. We have canceled principal indebtedness and interest due on our foreign loans to our allies to the extent of over 8,000,000,000 of dollars, yet the hue and cry is now made that the comparatively small sum of $150,000,000 expended during the war on Muscle Shoals should immediately be put to use. I have been just as anxious as any other Member to utilize this plant and investment. I have always hoped that private capital would take it over by lease or purchase and that we would at the same time reserve to the Government certain rights to produce nitrates for the Government in the event of war. To that end I voted to lease the property to Henry Ford in the Sixty-eighth Congress and was much disappointed that such disposition was not made of Muscle Shoals.

But now the shades of Thomas Jefferson and Andrew Jackson, perhaps the greatest of all Democrats, and the shades of Daniel Webster and Abraham Lincoln, perhaps the greatest of all Whigs and Republicans, even the ghost of Alexander Hamilton, the greatest centralizationist of them all, would be astounded if they believed that the present Muscle Shoals bill would ever become a law. Members have fallen into some strange hallucination. The aftermath of the war seems to have swept aside the ability of Members in both branches of Congress to keep close to fundamentals, because the Muscle Shoals bill and the McNary-Haugen bill, the soc-called farm relief bill, have passed both brnches of Congress and the Boulder Dam bill is now being debated in the Senate. Even the White House is not immune from the modern tendency not only to centralize government here in Washington, not only to surrender the rights of our people back home, but to engage in private industry for the purpose of temporary expediency. Although the President vetoed the McNary-Haugen bill, and properly so, yet we hear that he himself is disappointed and has some kind of a method whereby the Federal Government can control the law of supply and demand in an endeavor to give what is commonly known as farm relief.

Members stand upon the floor and at the end of every sentence use the words "agricultural relief for the farmers" when they discuss the McNary-Haugen bill. When they talk about Muscle Shoals they end their sentences with "fertilizer for the farmers." This appeal is made principally to the farmers, but everyone who has seriously studied the situation will know that no relief can possibly be given to the farmers with either of these measures. Both are nothing more than political gestures and should be entitled "Acts to bunco the American farmer." Legislation can not control the law of supply and demand. We have waited so long after the great World War to take our place in world rehabilitation that other nations have taken upon themselves the opportunity and obligation of entering into the world's markets and to control their own domestic markets wherever possible. The balance of trade has quietly slipped away from us. For example, England in Egypt and Abyssinia has caused more acreage to be placed in wheat than ever before in the world's history. The World War shook the financial world to its foundations. Social, industrial, economic, and political conditions all over the world have been revolutionized. Labor and supply costs are changing overnight in the markets which we formerly controlled, and yet men on Capitol Hill resort to the

temporary expediency of trying to control this situation by purchase of surplus agricultural products in America in the hope of stabilizing prices when there are no markets to take up the surplus. This question can not be solved on the basis of conditions as they existed prior to the World War. New world problems are here. They are different from any other problems in the world's history and they must be solved along new and definite lines.

For that reason the McNary-Haugen bill should not become law as it now stands, with or without the equalization fee, for the reason that the Government of the United States should not go into private business. Both the Muscle Shoals bill and the McNary-Haugen bill should fail of enactment. In a more limited sense the same condition prevails in the Boulder Dam bill. It is amazing to note that so many men voted for the Cooper-Hawes bill and at the same time voted for the McNary-Haugen and Muscle Shoals bills. I have seen men stand on this floor and heard them declaim against the injustice which the Cooper-Hawes bill sought to strike down, whereby the State governments themselves, in the penitentiaries of the land, manufactured without overhead charges and practically without labor charges many articles of commerce and sent them out into our markets to compete with goods made by free labor. The argument all of us used in favor of the Cooper-Hawes bill was that free labor and free industry could not possibly compete against the labor and industry fostered by any government; and yet these same men have reversed their position and desire the Government to embark in business, first, with the McNary-Haugen bill, in the purchase and sale of agricultural products, and, second, in the Muscle Shoals bill, in the direct manufacture and sale of nitrates and fertilizers. Certainly Shakespeare did not conceive that the American Congress would so act when he stated, "Oh, consistency, thou art a jewel."

Muscle Shoals legislation is the first step in the iniquitous system which places the Government directly in the manufacture of articles of commerce and the sale of the same.

There are many objections to the bill, but the chief objection lies in the fact that the Government not only attempts to go into business but is directed to give away without cost a portion of the product. If losses occur the American people are to pay the deficit. New jobs are created as though we did not have enough governmental employees in the country to-day.

In my judgment, although I am not a chemist, electrical and mechanical development is moving along at a swift pace. Ten years have passed by since Muscle Shoals was constructed, and in that period of time my thought is that the plant has become inadequate and private chemists in private industries have developed new and more complete machines and methods for generating power than are to be had at Muscle Shoals. In time of war this Government has the right even to confiscate private property in order to sustain the Nation and preserve it. I see no reason why Muscle Shoals can not be used as a power plant to generate electricity to develop the great southeastern part of the country, for a lease of this property surely will be made at some future time. The Government always has the right to use it in the event of war. We should proceed with our experimentation in the manufacture of gases and explosives for manufacture and use during war. This can be done in the War Department and the Navy Department. Our isolation will give us plenty of time for use of the private industrial plants scattered all over the country. In my own State of Pennsylvania there are hundreds of thousands of horsepower daily going to waste in our streams. The same condition prevails all over the country. In time of war we can catch up without much difficulty and can utilize this great horsepower in the manufacture of nitrates, electrical energy, and other means of conducting war according to new and improved methods then existing.

In order to be consistent the Cooper-Hawes bill should become law, but the McNary-Haugen and Muscle Shoals bills should not. It would seem that the average Senator and Congressman would have enough to do in Washington representing his people back home, preserving their rights, views, and sentiments in the Nation's Capitol rather than surrendering all the rights or any of them that the people back home may have possessed and cherished.

The Hamiltonian theory of government now and for a few decades particularly persisted in by Republican administrations is responsible for this condition. The Jeffersonian theory under which the Democratic Party has operated since Jefferson's day has been to leave business enterprises and the people alone as much as possible to work out their destinies. The Hamiltonian or Republican theory requiring centralization of practically all governmental activities at Washington has brought this Nation into a condition where there is too much government. Government now afflicts the people. It does not afford them relief from oppressive burdens which the social, economic, and political activities of the Nation bring to pass.

A careful analysis of the cost of government in the United States shows conclusively that all the gold bullion in the civilized world, if placed together on one pile, would not pay the cost of government in the United States for a single year. From the foundation of this country until 1860 there was 1 person to every 1,000 upon governmental pay rolls, National, State, or municipal. From 1860 to 1890 the processes of centralization under the Hamiltonian theory of government went steadily forward, and at the close of the fiscal year in 1890 there was 1 person to every 100 upon a public pay roll, National, State, or municipal. From 1890 to the close of the last fiscal year this Hamiltonian or Republican theory of government has so progressed and has become so thoroughly intrenched that at the close of the last fiscal year there was 1 person to every 15 upon a public pay roll, National, State, or municipal. Before the great World War began it was said that every German citizen went to work in the morning with a soldier upon his back. This was a reflection upon the great militaristic machine developed by the German Empire then in power. By analogy of reasoning it can be truthfully said that if conditions continue in America under this Hamiltonian or Republican theory of government it will be only a decade until every American citizen will go to work with an officeholder upon his back.

The present tendency to look to Washington and to our State capitals for relief from every ill that afflicts the Nation, the State, and every local community, is a dangerous one, and if something is not done soon to check this tendency dire results will surely follow. The average citizen will not look upon his Government with pride as an agency for his protection and through which he can work out his welfare, but he will lose confidence in his Government and regard it as his oppressor rather than his liberator.

SIX MONTHS AT WASHINGTON

Mr. MOORMAN. Mr. Speaker, ladies and gentlemen of the House, under the leave given to each Member of Congress on May 21, 1928, I desire to render to the people of my district a brief report of my official service. Although elected November 2, 1926, I was not sworn in until December, 1927. I have been, therefore, only in actual service about six months. However, I did much preliminary and preparatory work.

PREPARATION

I went to Washington and spent about six weeks after I was elected, paying my own expenses, opening my office, and endeavoring to familiarize myself with my duties and learning how to efficiently serve my constituents. My office has been open since, with a Washington secretary in charge. I spent seven or eight hundred dollars getting a mailing list and doing many other such things necessary to get to the people the things intended for them. I am sure the people of my district are familiar with the efforts I have made in their behalf and the attention I have given to correspondence, to departmental work, to legislation, and their affairs generally. All letters to me are answered the same day received, unless delayed by departments in getting the desired action or information. I did not start out on a one-term basis.

HELPFUL INFORMATION SENT OUT

I sent out more than 350,000 pieces of literature and mail, exclusive of the letters answered in the general mail. I had as high as five people working in my office for weeks at a time. I wrote letters advising thousands of the valuable information available and endeavoring to cooperate with teachers, county agents, doctors, officials, and many individuals in an effort to promote the advancement of our district. I placed much valuable information in each courthouse, beginning a county library. The daily CONGRESSIONAL RECORD is sent by me to each county clerk's office and the bound volumes will be placed there as permanent records.

My idea is to bring the people into closer cooperation and contact with their Representative and their Government at Washington. Such will help me and them. I have now several hundred Yearbooks from 1920 to 1927 and will furnish them on request as long as they last. Have now to my credit and will furnish all the farm bulletins desired by anyone.

RURAL MAIL SERVICE

The farmers are rendered no more important service than by rural mail. This service was started in an experimental way in 1896. It has been extended to the most remote parts of the country, and on May 1, 1928, there were 44,370 rural mail routes. I gladly cooperate with the postmasters and rural carriers in my district, offering assistance in bettering the mail facilities of the district. I voted for the bill granting allowances for rent, fuel, light, and equipment for fourth-class postmasters. I supported other measures designed to help the mail

service and those engaged in it. I made the fight for the substitute railway clerks of Kentucky and succeeded in doing them some material good. I exposed the "spoils system" in vogue under the guise of "civil service" and will send anyone desiring it a copy of my speech made in Congress and approved by the National Civil Service Reform League. It can be found in the CONGRESSIONAL RECORD of March 22, 1928. I succeeded in having a number of rural routes extended and several new ones established. Numerous important matters were handled by me before the Post Office Department in the interest of constituents, as many of them know. The best way to get things needed is to ask for them.

SOLDIERS AND DEPENDENTS AIDED

I wrote each veteran whose name I could get—four or five thousand—advising him and his dependents of their rights and offering my interested services. I thus aided hundreds and hundreds of World War, Spanish-American War, and Civil War veterans. I voted for pension increase for Civil War widows and helped many of my Spanish-American and World War comrades in many other and different ways. I secured many increases and original pensions by special acts and aided a great number before the Pension Bureau and Veterans' Bureau. I was a member of the Pension Committee. I made a speech before the Veterans' Committee in securing the new hospital for Kentucky. I supported all veteran legislation that I thought merited it.

COLLECTED CLAIMS

A Congressman is largely the business agent of his district at the National Capital. I successfully prosecuted many claims before the departments. One boy was allowed $2,500 by a special bill for injury received during the war. Many matters were handled before the Comptroller General, Court of Claims, patent authorities, and other branches of the Government. I furnished information to hundreds on special requests.

TOPOGRAPHIC CENTER

With the assistance of Doctor Jillson, State geologist, I was able to get located in Kentucky the second topographical training center ever established in the United States. It is hoped that it will mean much to Kentucky's development. It will be located in Breckinridge County, and the men trained there will complete the topographic mapping of the fourth district and Kentucky. I also induced the United States authorities to renew the soil survey work in Kentucky. However, the legislature did not make any appropriation for this work, and we are thereby denied the benefits. We are sadly behind in this service in Kentucky; the other States are getting their part of the Federal appropriation for this purpose, and we are failing because we do not put up our 40 per cent. Our people should demand it.

LINCOLN MEMORIAL FARM

I induced those in charge of the Lincoln memorial farm, under the Secretary of War, to undertake extensive improvements of the Lincoln birthplace near Hodgensville. Surveys and preliminary plans are being made to beautify the place, build roads, and create other conditions that will be in keeping with the importance of the undertaking and will comply with the Government's contract taking it over. The estimate of costs by the department is something less than $200,000. The matter is being pushed by the Hodgensville Chamber of Commerce now, but many organizations will be enlisted later. I feel that our efforts will meet success in due time.

CENSUS COMMITTEE ACTIVITIES

Every 10 years the Census Committee is one of great importance. I happened to be on it when it reported the 1930 census bill. That census will be the most complete and most comprehensive enumeration ever made by any country in the history of the world. It is estimated to cost $40,000,000 and will employ 100,000 people in doing the work. Whether due or not, I have received credit from many colleagues for my fight made in the committee in the interest of agriculture. My speech on the subject, made just before the vote was taken, can be found in the CONGRESSIONAL RECORD of May 21, 1928. My contentions were sustained almost unanimously both in the committee and by the House. The hearings of the Census Committee are in each county clerk's office and in each tax commissioner's office. I ask that you examine these reports and the CONGRESSIONAL RECORD to see what part your Representative played in these matters. I have a few copies of the hearings. The Census Committee also had the subject of reapportionment of representation in Congress, fixing the number, to handle. Kentucky, under the proposed plan, was to lose two Congressmen.

I favor reapportionment, but as we are to have a new census in 1930 it was absurd to use 1920 as a basis or to enact the proposed anticipatory legislation. I signed the minority report of the Census Committee and helped to defeat the bill our committee reported. My speech on the subject is in the CONGRESSIONAL RECORD of May 18, 1928. In all my work I had the welfare of agriculture foremost in my mind. The census can be of great service if the information is advantageously used. I impressed this fact on those in authority, as the hearings show. I urgently request that anyone desiring information as to my committee service to communicate with Hon. JOHN E. RANKIN, ranking minority member of the Census Committee.

FARM RELIEF OR AGRICULTURAL RUIN

Farming is the basic industry of the country. There are 6,500,000 farms, upon which approximately one-third of the entire population of the Nation live. Every person in whatever business he may be engaged is dependent upon the prosperity of the farmer. Farmers, through the years following the World War, and more particularly those in the South and the Middle West, are in a depressed condition and should be favored with helpful and sympathetic legislation. They have lost $30,000,000,000 during the past five years in exchange values of their farm products and in the shrinkage of farm-land values. This was more than we spent in the World War. The purchasing power of the farmer's dollar in exchange value has declined to 60.3 cents. Mortgages have been foreclosed and farms sold for taxes in large numbers.

I come into intimate touch with the farmers, and from personal knowledge I know their problems. I was born and reared on a farm. I own land and personally operate a farm. By business connections and as one myself I am in entire sympathy with our farmers. Farming is the principal industry of my constituents. While not a member of the Committee on Agriculture, I have kept in close touch with the bills affecting agriculture while pending before that committee, and joined in every effort to secure beneficial legislation for the farmers during the present session.

I made a speech in Congress on farm relief on May 1, 1928. It can be found in the CONGRESSIONAL RECORD of that date, or I will be glad to send the speech to anybody making the request. It fully outlines my convictions on the subject. We must depend largely on ourselves to succeed as farmers, but there is beneficial legislation that can be enacted. It is largely a fight of the consumers against the producers, the cities against the rural sections. They are simply succeeding in running the country, wholly ignoring agriculture. There is often little to encourage those who stand firm for the farmer in Congress, as those back home often fail to recognize the service rendered, and too often let local road or other political issues dominate in the selection or indorsement of Representatives. Those who would buy farm products know or fear that the McNary-Haugen bill would work, as evidenced by the votes of city Congressmen. The Washington Post, in its leading editorial May 26, 1928, the morning after the Senate voted to sustain the President's veto of farm legislation, admitted that it would enable the producers to secure more for their farm products by saying:

> The farm-relief issue—the bill designed to rob the consumers of the United States for the benefit of the producers—has died the death.

Those of us interested in the vocational education bill, which undoubtedly was sound and would only have cost the Government $500,000 annually, could not even get a vote on it. This fact showed the utter disregard of agriculture by those in control. The excuse was economy, yet they canceled about $10,000,000,000 of indebtedness due from foreign countries. They can not be much worse off than our farmers. I supported the Muscle Shoals fertilizer bill. The Fertilizer Trust was stronger than the unorganized farmer again, plenty of lobbyists being in evidence, and agriculture again lost. A sound solution can and will be yet made of this great problem and this valuable property utilized for the original purposes. I supported everything that I thought could be helpful to our people not engaged in agriculture. I voted to take the tax off of automobiles, to aid the small corporations in tax reduction, and to increase the exemptions on small incomes.

PUBLIC EXPENDITURES—EXPERIENCE

Rigid economy in all public expenditures, local, State, and Federal, is one of the most important subjects before the people. A large part of our taxes are local. Comparatively few people pay any direct Federal taxes, but everyone pays a tariff tax. To reduce expenditures to a minimum and to repeal or lower the tariff on certain articles is the surest way to reduce taxes. I have favored appropriations that yield returns, such as for agriculture, rural mail service, Federal aid for good roads, and like purposes, which I regard as investments, whereas I regard the excessive appropriations for the Army and Navy, and for

like purposes, as nonproductive. They should be closely scrutinized and reduced to the minimum.

The total expenditures of the Government during the first 15 months of Washington's administration amounted to $4,269,027. The expenditures for the coming fiscal year will aggregate $4,642,293,897.57. We spend a thousand times as much now for the expenses of the Government in one year as during the administration of Washington. The appropriations for the coming fiscal year for agriculture amount to $56,638,793.88, not including, of course, the $82,500,000 appropriated as Federal aid to roads, which will aggregate $139,138,793.88. I was not really in favor of as large an appropriation as was made for the Navy and some features of the Army. Like many other legislative matters we got as near as possible what we desired.

Thousands of bills are introduced each term, billions of dollars are appropriated, and no one mind can master the details of all the work of a Congress as its record is being made. Anybody will overlook a few things and possibly make some mistakes. To some extent we must rely upon our party leadership and members of committees we trust, coupled with our own information and convictions and the representations of our constituents. It is harder for a new Member than for one with some experience. Speaker Champ Clark, in giving advice as to what a district should do, said:

It is a high honor to be a Representative in Congress, if for only one term, and with the number of terms the honor increases in geometrical rather than in arithmetical proportion. A Member's usefulness to his country should increase in the same proportion. A man has to learn to be a Representative just as he must learn to be a blacksmith, a carpenter, a farmer, an engineer, a lawyer, or a doctor. The best rule, it seems to me, is for a district to select a man with at least fair capacity, industrious, honest, energetic, sober, and courageous, and keep him here so long as he discharges his duties faithfully and well. Such a man will gradually rise to high position and influence in the House. His wide acquaintance with Members helps him amazingly in doing things.

It is an unwise performance for any district to change Representatives at short intervals. A new Congressman must begin at the foot of the class and spell up. Of course, the more brains, tact, energy, courage, and industry he has the quicker he will get up. If he possesses these qualities, and if his constituents will keep him in the House, he is as certain to rise as the sparks are to fly upward. No human power can keep him down. It is only fair and rational to assume that every Representative's constituents desire to see him among the topnotchers.

FLOOD CONTROL

No question is of greater interest to the entire Nation than flood control. Congress enacted comprehensive flood-control legislation during the present session and provided not only for flood control on the lower regions of the Mississippi River but for surveys of all of the tributaries. I actively participated in these matters, especially as relating to the appropriation for relief in Kentucky. I refer anyone to Dr. A. T. McCormack or any member of the Kentucky delegation as to my interest and assistance in this legislation.

CONGRESSIONAL DIRECTORY

For the convenience of all interested, a committee is charged with the duty of placing in the Congressional Directory a short sketch concerning each Member of the Congress. Mine is as follows:

HENRY DEHAVEN MOORMAN, Democrat, of Hardinsburg; born on Planters Hall Stock Farm, near Glen Dean, Breckinridge County, Ky., June 9, 1880; son of W. R. and Betty DeHaven Moorman; lawyer, farmer, and vice president of the Bank of Hardinsburg & Trust Co.; was county judge of Breckinridge County at 25; was Commonwealth attorney, ninth judicial district, 13 years; foreign service in Spanish-American and World Wars; member national committee which wrote constitution of the American Legion; first commander Department of Kentucky; was president of Commonwealth Attorneys' Association of Kentucky; bachelor; Baptist, Mason, and Elk; elected to Seventieth Congress by a majority of 4,690 votes, defeating Hon. Pal Garner, Republican.

All official communications should be addressed to HENRY D. MOORMAN, M. C., Room 172, House Office Building, Washington, D. C. My secretary is there the year round and will promptly respond to any request. Matters requiring my personal attention should be addressed to me until December at Hardinsburg, Ky. If official business, time will be saved by writing me at Washington.

CONCLUSION

The individual record of each candidate should be studied and the right of franchise should be exercised by every eligible voter. I invite attention to and make this record of some of my activities during the present session of Congress peculiarly affecting the people of my district, as well as the Nation as a whole, for two reasons: First, because the people who commissioned me to represent them are entitled to know what their Representative has accomplished and his position on important public questions; and, second, in order to afford no opportunity for anyone to misstate my position on public questions. I have worked in entire harmony with the other Members of the Kentucky delegation in the House, regardless of politics, and have had their hearty cooperation, assistance, and active support. Ask any of them about the character of my service, interest manifested, and efforts put forth. I submit this record to the people of my district for their information and consideration, with the confident hope that it will meet with their approval and indorsement. I stayed at my post of duty until Congress adjourned. I can not see and talk to all, but I urge your loyal support in my official efforts. Let me emphasize the fact that every citizen of the Nation should carefully study the individual record of each Member of Congress in order to form a correct opinion as to his knowledge of conditions, his sympathy with the needs of the people, his business and general experience, and his ability and fitness to represent them, and should not fail or hesitate to exercise the right of franchise both in the primary and general election. When every citizen—not 51 per cent of them—goes to the polls and votes for his best interests and that of his children, and not his prejudices, his views will be reflected in Congress.

I trust that the foregoing brief summary will give to my constituents and to those interested some idea of the things that I have done. I shall stand for the same principles in the future. My record is my platform. I am deeply grateful to the people of the fourth district for their confidence and support. I have but one ambition—to serve them and the Nation to the very best of my ability.

JUSTICE FOR THE STEEL WORKERS, JUSTICE FOR THE STEEL COMPANY, AND A SQUARE DEAL FOR THOSE WHO BROUGHT IT ABOUT

Mr. KENT. Mr. Speaker, on this unanimous-consent day objection has been made to H. R. 5780, but I am very happy that the House at our urgent request has finally passed and sent to the Senate H. R. 5780, "A bill to provide for the further carrying out of the award of the National War Labor Board of July 31, 1918, in favor of certain employees of the Bethlehem Steel Co., Bethlehem, Pa."

The genesis of this legislation was a bill which was originally passed on March 4, 1925, and signed by President Coolidge one-half hour before he took his second oath of office. In the Sixty-eighth Congress I addressed the House, calling its attention to the fact that from a historical standpoint and from every view of justice and square dealing that legislation should pass. Some of us stayed up several nights while the Senate and House were in night session in order to bring about passage of this legislation. We then called attention to the fact, and my remarks in the CONGRESSIONAL RECORD of the Sixty-eighth Congress will bear this out, that during the great World War the Bethlehem steel plant, in my own home county of Pennsylvania, was performing an invaluable service for the benefit of the allied cause. Fixed-price contracts had been made with the Bethlehem Steel Co. for materials needed in the Army and Navy. The battle was raging on the western front. General Pershing foresaw the need of war materials then contracted for at Bethlehem, and urgent requests were being hurried across the cables to Washington and from Washington to Bethlehem demanding quick shipment of these materials to the western front. Living costs from every angle were growing by leaps and bounds throughout the Lehigh Valley, and thousands of employees of the Bethlehem plant were confronted by the necessity of moving from the Lehigh Valley into other sections of the country for employment at more attractive wages. As heretofore stated, contracts for these materials were fixed-price and not cost-plus contracts.

The Bethlehem Co. had established its overhead on the basis of fixed-price returns and therefore could not in justice to itself make any contractual charges for labor and materials which would disturb the contracts themselves in time of war. Dissatisfaction arose throughout the plant and the War Labor Board was called into session at Bethlehem, and after exhaustive hearings an award was made in favor of the men. On the strength of this award, and in reliance upon it, the men stayed at work and the Bethlehem Steel Co. paid electric workers advanced wages in the amount of $133,000. At the close of the war the men, with the cooperation of the Bethlehem Steel Co., endeavored to procure the increase from the Government provided for in the award, hoping that the Dent Act would cover the situation. The administration at Washington changed meanwhile, and the result was that new men in ad-

ministrative positions insisted that legislation was necessary to provide for carrying out the award of the War Labor Board.

Ever since the Sixty-seventh Congress legislation in this matter has been pending, and it has been one of the prides of my life that I was enabled to assist in the passage of the original legislation on March 4, 1925. I have never regarded this matter as a political question. It will be noted that the original legislation was passed after I was defeated in my second race for Congress; but in pursuance in the passage of that legislation the men were paid approximately 75 per cent of their money for work done under contracts with the War Department.

During an intervening term, while I was out of Congress, an attempt was made to use this matter for political advantage by persons other than myself. It became temporarily the football of politics. Men who had done nothing more than to sit in ordinary conferences to determine questions of bookkeeping and detail arrogated unto themselves the entire credit for passing this legislation. The result was that great confusion was caused by these politicians, and after my second victory for Congress, when I again took up representation at Washington for the thirtieth congressional district on March 4, 1927, it was necessary for me to clear up all the difficulties which had been created by politicians interested only in their own selfish ends.

The fact is that the groundwork for the original legislation had been well laid by former Congressman and now Federal Judge Hon. William H. Kirkpatrick and former Congressman Hon. Fred B. Gernerd, as well as by the Bethlehem Steel committee. headed by Edward Bennich and John K. Robinson, representing the Bethlehem Steel Co. David B. Williams and others representing the International Association of Machinists did splendid work also. Senator George Wharton Pepper in the Sixty-eighth Congress rendered invaluable aid. Whenever in this article praise is given to anyone, sight must not be lost of the fact that the present Congressman from Reading, Hon. ROBERT GREY BUSHONG, is entitled to the praise of everyone interested. His courtesy, ability, and level-headed judgment has carried the legislation over many a rough spot. When I took up my duties in the Seventieth Congress, one of my first and chief concerns was to bring about the passage of legislation to provide for the payment of the balance due the men for work which they did under contracts with the Navy Department, this amount being approximately 25 per cent of the total. I am pleased that the House has now passed this legislation. I thank every Member who objected for withdrawing his objection, and all those who participated here upon the floor and in the committee, and those who helped generally to bring about the passage of this meritorious measure.

In this connection, I wish now to advise the House that I have introduced another measure to provide for further carrying out the award of the War Labor Board so as to pay the Bethlehem Steel Co. approximately $133,000, which the company has already paid to the electric workers in reliance upon the provisions of the award. I firmly believe that this legislation will also pass. I have every assurance that the present measure providing for payment of the Navy's share will be passed by the Senate in the next session and that the company's advances will be fully met also by both branches of Congress in the next session.

Throughout the entire history of this legislation I have been variously charged with favoring the claims of the men and also favoring the claims of the company. Unscrupulous politicians, not having the interest of this congressional district at heart and seeking to exploit the interests of my district for personal ends only, have gone to some of the men and explained that I was interested only in the company's claim, and the same individuals have sought to carry information to the company that I was interested only in the claims of the men.

The truth of the matter is that the Bethlehem Steel Co. has taken a great interest in bringing about payment to the men. The company's representative, John K. Robinson, has always stated publicly and privately that the company wanted to see the men paid first, so that there would be no possible question about justice being done for the men. The company has always been willing to forego its claim temporarily so that no possible obstacle would be laid in the way of the men receiving their money. The company specifically requested me, through its representatives, to refrain from pressing its legislation until after definite assurance was given that the men were going to be definitely cared for. The company's bill is now before the Claims Committee and was not even introduced until after we were assured of passage of the legislation protecting the interests of the men. Since 1921 the company has cooperated, has sent the committee's and its own representatives to Washington frequently at the expense of the company, and has always, through its representatives, notified me that the interests of the men were paramount. The men have cooperated with the company. At no time have those who are familiar with this matter found any cross purposes existing between the men and the company. Politicians only have attempted to disturb the pleasant relations between the men, the company, and myself, as a Member of Congress, which have resulted so admirably in procuring legislative results.

Now, I want to sound a word of warning. Great difficulty has been experienced in the passage of this present legislation because, as a matter of governmental policy, some Members feel that their own constituents stand in the same relation toward the Government as the Bethlehem men do. They have not felt that the Bethlehem legislation should be passed while their matters have not been passed. These Members have been extraordinarily pleasant about this matter to me, as well as to Congressman BUSHONG, who has been a powerful factor in bringing about the passage of the Bethlehem legislation. If this matter is made the football of party politics hereafter, as it has been in the past, then I greatly fear disturbances will be caused which may defeat the legislation which has already been passed by the House as well as that which has been introduced for the payment of the company. Let the politicians, most of whom have only temporary and transitory connection with our congressional district, permit this matter to proceed as a nonpolitical one and let justice be done to the men, to the company, and give a square deal to those who have already brought about results.

THE OLD-TIMERS—THE PIONEER CANAL DIGGERS—THE BUILDERS OF THE PANAMA CANAL

Mr. KENT. Mr. Speaker, there is a body of men, women, and children under the jurisdiction of the Government of the United States who are deserving beyond our poor power of recognition for the services they have rendered our Government. I refer to the men who are still working at the Panama Canal, living there with their wives and children.

They are still there. They have not been able to get away yet. They were young and spry when they left their happy homes and families and friends 20 or more years ago for Panama to dig the canal. They are getting older and their ranks are getting thinner year by year. There are only about 300 left of those who went there prior to April 1, 1908.

They went there, pioneering, during the early days, facing the jungle, yellow fever, smallpox, and malaria; knee-deep mud, reptiles, red bugs, ticks, old French quarters full of rats, bats, and vermin; dobie itch, prickly heat, scorpions, tarantulas, and what not. They were told by President Roosevelt when he was there in 1906 that they were connected with the greatest feat of the kind ever performed in America—the greatest feat ever performed by any nation in the history of the world, and that they were earning the right to the gratitude of the country such as could ordinarily be earned only by soldiers who have served in the few great wars of history. They think they fought a good fight; they won the war over disease and elements of nature; they dug the canal, and when it was all over they were transferred to the army of occupation, where they have remained ever since. They rather expected some time to be mustered out—retired.

Their hope for recompense has always been in adequate retirement legislation. The first civil service retirement act took in a very few of them. The next act took them all in, by requiring them to contribute 3½ per cent of their salaries into the fund, without a maximum contribution, subject to retirement after 30 years' straight service, at the age of 62 and at an annuity of $83.33 per month. Those builders of the Panama Canal who have been down there for 20 years or more already do not feel that they should be required to remain there another 10 years or more in order to get credit for the full 30 years, nor wait until they are 62 years old, and they think that when they do retire they should receive enough in annuities to enable them to come back, pay rent, buy the necessary bread and butter, and live in reasonable decency; otherwise they might as well stay there as long as they live at some kind of salary sufficient to eke out an existence.

They knew that Panama was an unhealthy tropical country when they went, where it was said that the construction of the Panama Railroad cost a life for every tie laid, and where, while the French were trying to dig a canal, the death rate was so high that, after the ranks of laborers were almost depleted through yellow fever, and so forth, the remaining Chinese gathered together at Matachin and committed suicide one night to hasten the end to which they figured they would come to anyhow. They went there in spite of what they knew about the place. They did not intend to stay so long. They have always been in a transient mood, unsettled, always hoping to be able some day to come back to God's country. They have made efforts from year to year, as they have come up on vaca-

tions, to reestablish themselves back here, but have found it next to impossible, and have always gone back looking forward to another year, when they would make another attempt. They know that those whom they left behind have moved on with the progress of the country, and have had business and other opportunities which they had not, and now may never hope to have. They have worked and paid and spent their earnings on expensive necessary vacations from year to year, on clothes which they needed here but which they could not use there, large hotel bills, and traveling expenses. They have not been able to accumulate sufficient savings to deliberately break away, to come back and start on their own account, to buy homes and furniture, and to continue the education of their children.

They have helped each other along by passing a subscription list whenever one of their number died leaving dependents and in other needy cases; have helped financially through the Red Cross; have invested in churches, lodge halls, and other buildings and organizations; and in many other ways, always with the knowledge that what they invest there may not be of any permanent benefit to them; but what they have done has been of considerable value to the Government in relieving it of assisting the needy and in establishing permanent religious, fraternal, and relief institutions which work for the contentment of the operating and maintaining force of the Panama Canal and thereby directly reduce the cost to the Government.

These old-timers, these canal diggers, these builders of the Panama Canal think that something should be done for them to enable them to retire soon, so that they can come back to the States and establish themselves before they get too old. They know that they ought to take vacations annually, or at least every two years, in order to recuperate. The enervating climate there requires more effort for work and has a tendency to shorten life accordingly. Their families have died out at home, most of their parents are gone, and their vacations with no old homes to go to, together with the expenses eating up their savings from year to year, become more of a burden than a pleasure.

Commercial companies reward their employees who have worked for them in foreign fields by eventually bringing them home and giving them employment at the same or higher salaries, but not so with the Government. Should these canal diggers be able to effect transfers to other departments of the Government in the States they could not expect to get anywhere near the salaries they are getting there as a result of long and faithful service and gradual increases, but they would probably have to start in at the bottom at an entrance salary. Mechanics, if they are able to find work, may be able to start in at the regular union rates of pay, but a good many of these old employees who are receiving monthly salaries can not. It is the general practice of companies to move men up from the bottom, and they very rarely put men in over their older employees. In making a change from the Panama Canal to some other job in the States the experience gained there and the quality of service rendered counts for nothing here.

The present retirement act gives no consideration to the Panama Canal diggers whatever. They are simply included in the general legislation with all other employees—legislation which is not adequate for employees of the Panama Canal generally and certainly not for the old-timers, who went there in the early days and paved the way for others. When the canal was completed they remained on and helped to get it on its operating feet, and now that it is turning into the Treasury $25,000,000 per year in revenue they feel that they should have some kind of reward for their labors.

There are those whose service on the Isthmus was divided between the Isthmian Canal Commission and the Panama Railroad Co., having been transferred back and forth between these two services—all under the same administration—at the will and convenience of the administrative heads and for the good of the service. There are old employees on the rolls of the Panama Canal now whose time was thus divided almost evenly—half with the Isthmian Canal Commission and half with the Panama Railroad. They do not get credit for railroad service under the present retirement plan, and having less than 15 years' service with the Panama Canal alone do not even benefit by the disability clause in the retirement act, although they contribute their 3½ per cent monthly to the fund and have more than 15 years to go to be retired, after having been down there for 20 or maybe 22 years all together. This will result, if not corrected, in faithful old employees being separated from the service without any chance to receive any annuity whatever.

The Panama Canal is a big revenue-producing branch of the United States Government, and its operation and maintenance is a man's job at this crossroads of the world, where the eyes of all nations are upon Americans, and where they expect the very best service, better than they probably ever expect in any other port of the earth, and the personnel to operate and maintain it should range from young to middle-aged men, and proper provision should be made to retire the older men—first, those who risked their lives to go there and help to dig the canal 20 and more years ago, and then the later arrivals who also grow old in the service. Adequate retirement can be provided in a number of ways, a simple one of which is to set aside a sufficient amount of tolls to finance it if and when the contributions from the employees do not cover the amount required to pay annuities. The employees of the Canal Zone are willing to pay 5 per cent of their salaries into the retirement fund if the annuity for them is fixed at an amount which will really enable them to retire.

Let us, as Members of the Seventieth Congress, do justice to these men and their wives and children. Let us retire them with liberal provisions so that they may come back home and leave to younger hands the work of carrying on the engineering project in the construction of which the old-timers played so valiant a part.

THE SOUTH WILL REMAIN TRUE TO JEFFERSONIAN PRINCIPLES, DEMANDED BY ITS BUSINESS PROSPERITY AND THE PRESERVATION OF ITS CIVILIZATION

Mr. HARRISON. Mr. Speaker, on March 4, 1921, the Wilson administration came to a close and transferred the control of the Government in all its branches to the Republican Party. Perhaps no eight years were so filled with civic triumphs and progress as the Wilson administration. At its conclusion a long catalogue of legislation in the interest of the people of this country had been written on the statute books and a great war had been fought and brought to a triumphant close. It would be impossible in a short space to enumerate all the history-making acts of legislation which had been written on the statute books, but none stands out more significantly than the Federal reserve banking act, of which the Senator from Virginia [Mr. GLASS] was the author. When the war opened the country was utterly unprepared. The speed necessary for mobilization of our resources demanded large expenditures of money, but in 18 months an army of 4,000,000 men was organized and equipped and over 2,000,000 men had crossed the seas and fought the great battles of the war. Of course, there was waste and extravagance. In such haste this was a necessary incident to the expenditure of such vast sums of money, but in all the vast expenditure there was not established any instance of criminality in high places. No sooner, however, had the Wilson administration vacated and the Harding administration been installed than crime in the very Cabinet of the President became rampant. Daugherty, the Attorney General, was driven from office in disgrace and his administration became a byword and a scandal. Fall, the Secretary of the Interior, sold his trust, which but for subsequent litigation would have deprived the Government of millions of dollars. Forbes, the Director of the Veterans' Bureau, stole the money which a grateful people had dedicated as compensation to those who had suffered in the camp and on the battle field. The oil thieves had replenished the treasury of the Republican campaign committee which had brought the Harding-Coolidge administration into power. Not since Tilden turned the rascals out had there been such a betrayal of public trust and such revelry of dishonesty as has marked the eight years of Republican rule.

This is true not only in national administration but in the State administrations of the Republican Party in some of the Western States. As has been said in regard to one of them, one Republican governor going into the penitentiary would exchange greetings with another Republican governor as he came out. The whole administration of the Republican Party has been honeycombed with fraud and dishonesty, not because Republicans are in themselves dishonest, but because the whole theory of the Republican administration of Government is based on a wrong basis. According to the Republican ideal, government is a benefactor distributing gifts, and not according to the Democratic ideals, the servant of the people.

PRIVILEGED CLASSES

As a distributor of governmental favors, those seeking favors are more intent on securing their object than the methods pursued, nor is the claim that such policy produces national prosperity justified. Of course, the beneficiaries are exceedingly prosperous, but those who must pay tribute to the privileged class are poor indeed. The great transportation companies, under the Cummins-Esch bill, have waxed fat on the toll that they have exacted out of the agricultural interests and the mass of the people. When this bill was enacted it was promised that the Interstate Commerce Commission would stand between the people at large and the transportation companies. This commission had powers greatly increased and they had a great opportunity to serve the people, but it was not long before the

Republican administration had so dominated its composition that the Interstate Commerce Commission had become simply an instrument of the transportation companies to exact toll out of the general public and out of agriculture. The transportation companies have grown prosperous, but the farmer faces bankruptcy.

Again, during the Wilson administration, great stress was made of the theory that the tariff should be taken out of politics and administered in accordance with the business interests of the general public. It was not long, however, after the Republican administration had become thoroughly installed before the Tariff Commission had been packed in the interests of the contributors to Republican campaign funds. It has become more or less the laughing stock of the country. While the great agricultural interests were suffering demoralization and bankruptcy was prevalent in agricultural sections the President increased by 50 per cent the tariff in favor of the great steel industries. The prosperity of the Republican Party is the prosperity of the favored few who control the emoluments of power, but it has never extended to the great agricultural sections which are made to pay tribute to these favored few. And so, step by step, it would be possible to go through the achievements of the Republican Party in eight years which are now before the people for review and at every step to find an utter disregard of the general public and of subservient cringing to a predatory class.

AGRICULTURE NEGLECTED

In no respect has the Republican Party shown greater delinquency than in its care for the agricultural interests. They have been lavish in promises, but not one single measure of relief has been accorded to this stricken industry. We hear much from their spokesmen about the agricultural problem, but what a Republican Congress undertakes to do is promptly nullified with Republican applause by a Republican President. At the recent Republican convention at Kansas City the very Members of Congress foremost in their attempt to legislate farm relief were subservient to the outcome of that convention, pledged to continue to destroy all the attempts which they had made for farm relief.

Under the Fordney-McCumber tariff the agricultural dollar has dwindled and dwindled until, by the findings of the Republican Secretary of Agriculture, its purchasing power is not more than 65 cents. On the other hand, every form of farm machinery has increased in price until such prices range from two to four times as much as they were prior thereto. The enormous increase in the price of steel has been made the excuse for the increase in price not only of farm equipment but in the transportation freights, which the transportation companies have, by a subservient commission, been licensed to exact. The farmer not only finds the domestic market circumscribed by unduly high transportation charges but his foreign markets almost destroyed. Foreign countries buy farm products by exchange of their products for our products, and the tariff wall intercepts and destroys the foreign market for the national surplus.

The McNary-Haugen bill was an admission that the tariff laws of this country had unduly and wrongfully burdened the farmer and that such legislation was necessary to put agriculture on an equality with other industries. Twice the Republican Congress, in different forms, passed legislation of this character, admitting in the one breath that agriculture was discriminated against by the tariff and in the other demanding compensation in the shape which such legislation afforded. Twice the Republican President has vetoed this measure without affording any suggestions as to any legislation which would be a substitute. His veto message, analyzed, showed that every feature of this legislation, which he specifically condemned, could be said equally true of the tariff legislation which benefited the privileged classes. He complains that such legislation is class legislation. Is not this true of the tariff protection which enables the manufacturer to charge a greatly increased price to the consumer? He complains that such legislation would stimulate production. Is not this true of the tariff which enables the manufacturer to charge an enormous price for his product? He charges that such legislation is a delegation of the tax power to a board, but what of the tariff legislation which enabled him by a stroke of his pen to increase the tariff on steel 50 per cent without further congressional action? On the floor of the Senate a distinguished Republican Senator wrote into the McNary-Haugen bill the word tariff and demonstrated that with this alteration the McNary-Haugen bill became in effect the Fordney and McCumber tariff bill.

If the McNary-Haugen bill was an objectionable form of farm relief, it should certainly have been the function of the President to submit to Congress a bill which would have furnished farm relief, and which would not have been susceptible to the objections of which he complains. His only suggestion was that the farmers should go out of business. They should cease to produce a food surplus in this country. It is true that the McNary-Haugen bill may be a crude form of farm relief and that the surer method would make our tariff laws and the other oppressive laws conform to the interests of agriculture, but it is none the less true that agriculture is entitled to the same consideration as the steel, textile, or other pampered industries.

REPUBLICAN SECTIONALISM

There is nothing in the history of the Republican Party's attitude toward the South, either State or National, which should tempt any Virginia agricultural section to desert the Democratic banner. Again and again during this session of Congress have there been attempts to enact hostile legislation to the South based upon race appeal to the negro. I may say that so far as Virginia is concerned such assaults are wholly unjustified. Our suffrage laws are wholly free from race discrimination. We have now in our constitution no grandfather clauses and no understanding clauses. Every person of sufficient age and resident qualifications is submitted to the same test, whether he is white or black. A simple educational test is provided in making his application for registration and in casting his ballot. He must pay a small capitation tax, which is dedicated to the public free schools and prepares the applicant to meet the educational qualifications. This tax is $1.50, insignificant in amount, and the voter must be delinquent in the payment of it in order to deny him the right to vote. These qualifications are a great protection to the ballot box, both against unworthy white people as well as against unworthy black people. If there was no race question involved whatever, I believe that it would be almost the universal sentiment of the people of the State to maintain them. In order to free the ballot from any form of corruption in the payment of this tax, it must be paid six months in advance of the election and be personally paid by the voter. It is about the only tax the negro as a race pays, and out of the taxes of the white people he is educated and receives all the benefits of government. Certainly it is no burden on white or black to contribute this small sum to the free schools as a right to vote.

It is a curious fact that the race question seems to be invoked by the Republican leaders. It was reserved for Mr. Hoover to bring this question up in his recent order in the Department of Commerce. Under the old régime in his department it was found more acceptable to have a segregation whereby the young white women and white men should do their work apart from the young black women and black men. I have no doubt it was more agreeable to both races to work in separate apartments, and certainly no good purpose seems to have been served by Mr. Hoover requiring the white girls and the negro men and the negro girls and white men to discharge their duties side by side. It was simply a bid of social equality to secure negro suffrage.

Again it was one of the conspicuous Republican State leaders who sought to organize the lily white Republican Party of the State of Virginia. He seems to have been solicitous in excluding the negro from Republican primaries and enrolling them to vote for the Republican ticket in the election. As a matter of fact, the Republican leadership of Virginia does not desire a Republican Party in Virginia. One of these leaders was shown on the floor of the House to have profitably engaged in the sale of patronage, and another of them seems to have had a gay if not a profitable job in spending Red Cross money in the Balkans. Such leadership does not desire any material development of the Republican Party in the State. It would seriously interfere with the profitable disposition of patronage if there were more Republicans among whom the patronage would have to be distributed. Republican presidential candidates pay court to such Republican leaders in the South who can successfully corral the Republican southern delegate and deliver his vote in the convention.

PROHIBITION

It may be that some Virginians may not agree with the views of our Democratic nominee for the presidency on the subject of prohibition, but certainly there are other matters to be considered beside the view of a candidate on prohibition. The very civilization of the South may be at stake and the influence which the President can exert will be small as to prohibition in comparison with such a momentous question. He can enact no laws and I have no doubt he will faithfully enforce those that have been enacted. Certainly he could not fall far short of the total lack of enforcement that is now prevalent throughout the United States. Under the present administration, with Secretary Mellon in charge whose views on prohibition are well known, the enforcement of the law has been brought into utter contempt. It would simply mean an exchange of a Democrat whose high devotion to duty is an assurance that all

laws will be faithfully enforced for a Republican whose views on prohibition are possibly the same, but whose lack of the enforcement of the law has been notorious.

THE LOBBY

Never in the history of this country has there been such a lobby as has invaded Washington during the recent sessions of Congress. Many ex-Senators and ex-Congressmen who have the privileges of the floor are in the pay of the predatory interests. The disclosures before the Federal Trade Commission disclose a condition of things that is truly alarming. These great trusts are thoroughly organized. There is no path to the influencing of public opinion that they have not invaded. They write the school books for the children. They invade the colleges to infect the teachers. They invade the churches. They invade the editorial sanctums of all classes of newspapers and they have unlimited and untold wealth at their disposal. All this has been fully disclosed in testimony recently given before the Federal Trade Commission, and unless some stop is put to such pernicious methods, there will be no avenue to the public ear that is not poisoned by them.

There was no measure before Congress which in any degree affects their interest that is not subject to this lobby. There has not been a measure introduced in behalf of these great powerful trusts that has not received the favorable ear of the administration. Generally speaking, all measures of general import which would affect the profits of the great trusts have been coldly received or preemptorily turned down by the Republican administration.

MUSCLE SHOALS

Before the war, in 1916, in the national defense act, provision was made for investigation in regard to securing nitrate from the air for the purposes of munitions in time of war and fertilizer in time of peace. During the war this country was seriously handicapped by the fact that all nitrates had to be purchased from the Chilean trust at a very heavy toll, and now during peace the same heavy toll is exacted from the manufacturers of fertilizer. During the war the Government undertook to erect what is known as the Muscle Shoals plant and expended many millions in the costly construction of dams to secure the necessary water power. The war ended, however, before the completion of this work, and since then it has been a constant struggle on the part of the trusts to prevent the Government from continuing this work and also a struggle to secure the work already done for themselves. After much debate the Morin bill, which provided for the manufacture of fertilizer, was turned down, and in lieu thereof a simple bill was passed providing for Government ownership of this enormous undertaking and for its completion, in order to secure the nitrogen which would be available for the manufacture of fertilizer. Fertilizer companies, instead of buying at a heavy price from the Chilean trust, could buy from the Government at reasonable figures, and this reduced cost in the production of fertilizer could be passed on to the farmer. This bill was enacted into law, but met the usual fate of all laws that did not have the trust's rubber stamp and was vetoed by a pocket veto. The President did not even think it necessary to furnish his objections to this legislation.

MILITARISM

Enormous appropriations have been made for our military establishments, and in the main they have been necessary, but why the President should recommend an enormous expansion running into hundreds of millions for the upbuilding of a great Navy it is hard to understand. The administration has been intense in its advocacy of peace, and yet toward our South American neighbors has assumed a hectoring spirit which has made our South American neighbors regard this country as a bully, and instead of entertaining for us feelings of affection and attachment they regard us with intense hostility.

At the very time we were seeking to recover from the oil thieves—Sinclair, Doheny, and the like—the oil reserves which they had stolen by the corruption of a Secretary of the Interior we were threatening Mexico in the interest of these self-same thieves for undertaking to recover her oil concessions. In Nicaragua we present the sorry spectacle of making war on a faction in that little country, without, so far as an intelligent public can discern, the slightest provocation. It is said we are down there to see that there should be a fair election, but that was after we had entered into the country on some supposed mission of protecting American property and American nationals. After we became involved from our presence in the country in their innumerable revolutions it was said that we stayed there for the purpose of securing a fair election. I believe the Christian people of this country are opposed to our mixing ourselves up in the eternal and everlasting revolutions in these Spanish-American countries. If Americans go there and invest in property, as they sometimes do by the bribery of the public officials, they should be solemnly warned that they go there at their own risk. Day by day we learn of the casualties among the brave young men who compose our marine force. There is not enough American treasure in Nicaragua to justify the shedding of one drop of American blood. We had no business going into that country with our armed forces, and we should take the earliest opportunity to withdraw as soon as the door is opened for such withdrawal.

SLUSH FUNDS

Not only do the trusts invade all the departments of the Government, but the enormous expenditures of money in the Republican primaries by these trusts have become a stench in the nostrils of the decent people of this country. It is VARE who stampeded the Republican convention to Hoover and it is VARE who has been denied admission to the Senate because of the prostitution of the primary Republican elections to an unparalleled slush fund. If the expenditure of millions of dollars in our elections for Senators and Congressmen as well as for Presidents is not condemned by an emphatic vote at the polls this fall, we are taking a long stride toward the destruction of our free Government.

However viewed, the Republican administration of this country stands condemned and we should return under the Democratic banner to the principles of Wilson, Cleveland, and Jefferson. Under a Democratic administration we can hope to secure a fair enforcement of the law, equal laws for all classes, and peace and good will between this country and all our neighbors and foreign nations.

GEORGIA FROM THE SAVANNAH TO THE ST. MARYS

Mr. LANKFORD. Mr. Speaker, the eleventh congressional district in Georgia is the extreme southern part of what was the inhabited portion of the original thirteen Colonies of our Nation. Just across the beautiful St. Marys River were the Spanish possessions of Florida.

Almost from the time the first white men crossed the Atlantic the Georgia coast from the Savannah to the St. Marys has been the arena of human events of tremendous historical importance.

Inspired by the magnificent forest of stately pine and cypress, in a scene glorified by the wonderfully moss-draped oak and magnolias, and in a land endowed with a sunny winter climate and even more delightful summer time, the Indians loved the Georgia coast and the white man found it a veritable paradise in the New World. The soil fertile, the forest filled with game, and the waters teeming with fish, this section was all that could be desired by the early settler, and here he made his home.

Here he has lived all these years and wrought mightily in the affairs of men. Here Wesley preached under the moss-covered oaks of St. Simons in God's own open-air cathedral. Here Lanier, beneath a spreading oak, where the lanes of the ocean meet at the river's mouth, thrilled with the expanse of marsh and forest and water and sky, wrote the "Marshes of Glynn." Here on St. Simons Island are avenues of oaks along the roadways of great men of the past and shading the cottage and residence of the splendid citizenry of the present.

Here on St. Simons, Thomas Butler King, a former Member of Congress, lived in an antebellum home of old-time southern splendor. The flower gardens and magnificence of his old southern home blend with the growth and progress of the present. Recently as I stood amidst the time-worn splendor of the old South I took from my pocket a faded envelope and wrote, "Here, where the lanes of the ocean meet at the river's mouth, are now entwined the very best of the old and the new South."

Mr. Speaker, Brunswick, Ga., in my district, is the gem in the midst of this splendid section, and I now wish to speak more specifically of that splendid city by the sea.

Mr. Speaker, the city of Brunswick, on the coast of Georgia, long known in maritime circles as the possessor of one of the finest harbors in the country, has had a long and interesting history. When Oglethorpe came to found his Colony of Georgia and settled his oppressed debtor colonists on Yamacraw Bluff, where Savannah now stands, a great plantation on the present site of Brunswick was being operated by a Virginian, who grew fine tobacco there and later sold his crop to the quartermaster of Oglethorpe's garrison at Frederica. It seems evident that the first tobacco grown by white men in Georgia, now becoming a great tobacco State, was produced on land included within the city limits of Brunswick.

History has treated the establishment of Georgia as a visionary philanthropic enterprise, when as a matter of fact General Oglethorpe was camouflaging his erection of a barrier against the Spanish in Florida by turning the spotlight on the relief of worthy debtors in English prisons. By the time Spain

quit laughing at his efforts to make pioneers out of lily fingered unfortunates there stood at Frederica, within view of the present Brunswick, the largest British fortification in North America, and there on St. Simons Island the northward march of the Don was stopped at Bloody Marsh, and Spain was started on the downward path that led finally three centuries later to the loss of her last American colonies.

When Oglethorpe's colonists were near starvation at Savannah, it was corn and wheat grown where Brunswick now stands and on Jekyl and Blythe Islands near by that saved them. The fields that produced those crops had been cultivated by Spanish for many years. So far back as 1575 there were important plantations around Brunswick, and in that year the French trading fleet bought sassafras, wild turkeys, and the peltries of deer and beaver from the Indians of the Spanish Province of Guale, and that fleet lay in Brunswick waters.

History dealt lightly with the area until recent years. For nearly 300 years it was a part of Florida, and its history is included in the records of that State. It is now known that most references to Florida for three centuries regarding its beauty, its fruitfulness, and its remarkable flora really applied to the six great islands of the Georgia coast and to a narrow strip of the mainland. On Cumberland, Jekyl, St. Simons, Sapeloe, St. Catharines, and Ossabaw Islands were great Spanish missions with groves of oranges, olives, lemons, pomegranates, and figs. On the mainland from near Darien to St. Marys were other missions and military establishments, and this was the Florida of the travelers and writers of the time, for only St. Augustine in the present State was an important settlement then.

We know now that from the waters included in Brunswick Harbor went out North America's first exports. Beaver pelts before Canada began; wild turkeys before a Pilgrim foot touched Plymouth Rock; sassafras when it was regarded as a panacea for all human ills; and china-root, a sort of brier, from which Indians made a flour that appealed to the French and Spanish palate. There seems to be another valid claim to priority in that area. Barbed-wire entanglements were invented in the recent World War, but on St. Simons Island in 1742 Oglethorpe carpeted the ground before his fort with prickly-pear joints and the barefoot Spaniards found it impossible to make headway in their charge.

The Brunswick area between the Revolution and the Civil War developed into the finest agricultural region in the world, with cotton on the sea islands and rice in the reclaimed swamps of the rivers as staple crops. Our wonderful Reclamation Service, with all its modern knowledge and equipment, has done nothing finer in the way of irrigation and drainage than was done around Brunswick by Georgia rice planters more than a century ago—thousands of acres of fertile soil watered by tidal flow and drained by its ebb twice daily in unending succession, without pumping expense. All this went into abandonment as a result of the Civil War.

The islands of the Brunswick area have been known for 50 years as winter resorts of great charm, and no less desirable as summer beach playgrounds for southerners. Just at this time Michigan capital is developing wonderful summer and winter resorts on near-by islands and New York capital is restoring old rice plantations and making great farms for truck growing there. To study this latter development the honorable Assistant Secretary of Agriculture of the United States recently went to Brunswick. He was most favorably impressed and has let the world know what he saw.

In conclusion, Mr. Speaker, I wish to thank Mr. George D. Lowe, secretary of the Coastal Georgians, for the splendid assistance he rendered me in the preparation of these remarks. He is giving special attention in Georgia to the conservation of fish and game resources, restoration of early structures, preservation of ancient landmarks, reforestation, highway marking and beautification, and historical research.

FITNESS FOR OFFICE

Mr. LANKFORD. Mr. Speaker, this is the year of candidates and the time of campaigns, and it may not be amiss to discuss briefly the qualifications of aspirants for public office.

As a Member of Congress I have given special attention to the qualifications of Members of this important body. Of minor importance are educational or book-learned qualifications. Most candidates also have sufficient natural ability and are eloquent enough speakers. Of supreme importance is the real interest a Member has in the people whom he represents. If he has the interest of his folks at heart, he will stay on the job in their behalf.

If a Member is already in Congress and his record is true to the common people, he should be retained if he is willing to serve again. Experience and seniority double a Member's usefulness again and again as years go by, and then, again, his people have had ample opportunity to judge his loyalty to them. A record of loyal service to the common people without a single blemish of turning aside is to be preferred to thousands of promises to secure votes. But ofttimes people come to judge candidates for Congress who have never had an opportunity to make a record in Congress and wish to consider his fitness from his record in other offices and in private life. In this event it is well that inquiry be made as to the candidate's activities in behalf of the common people or in behalf of those who wish to exploit the common people and make unconscionable profits out of the labor and toil of others.

It is well ofttimes to study the line up behind a candidate. If the crowd backing him have considered public office to be a thing to be bandied about as so much nails or potash rather than as a sacred trust coming from the people and to be faithfully held and returned to the true owners when the temporary possessor tires of the blessed privilege of being a public servant, then what do they expect of those whom they are vigorously and strenuously helping? Do the promoters of the candidate consider office as a chattel of barter and sale or as a most solemn and sacred trust? Is the candidate in full accord with the views of his managers? If not, why not; and why does he keep managers unless he is in accord with them, and to be managed by them now and henceforth? In considering all the surrounding facts and circumstances the voters may give such weight and credit as they wish to the service which a man or his parents or his grandparents have rendered the people. For my part, I have the greatest respect for the record of both my grandfathers and humbly strive to carry forward the splendid service of mankind which they so nobly began. Their service and sacrifice had much to do with the shaping of the humble but most honorable lives of my parents, and my father and mother, although long since departed this life, still live through their children and shall never, never die so long as their splendid influence for good shapes the affairs and destinies of men. Hundreds who knew them and loved them shall render in their behalf a noble service to mankind. I am most happy to strive to perform well my part as their son.

My maternal grandfather, Malachi Monk, was closely related to the early settlers of a large part of my district. His mother being a Parrish, he is therefore of kin to the Parrishes, Suttons, Griffins, Mathises, Knights, and a host of others in Lowndes, Berrien, Cook, Brooks, Colquitt, Irwin, Lanier, Clinch, and adjoining counties, as well as the Tomlinsons, Weatheringtons, and many others in Clinch and other counties. My grandfather Monk was sheriff of Lowndes County about 100 years ago and lived near where Adel, Ga., is now located. He later moved to Appling, later Clinch County, where my mother was born and I was reared. My father was born in what is now Atkinson County, Ga., and grandfather William Lankford, while my father was a small boy, lived a while in Berrien County, Ga., moving later to a point on the Steinhatchee River in Florida, and then back to Clinch County, Ga., about the time of the outbreak of the Civil War. Grandmother Lankford died in Florida and grandfather Lankford, true to the South, fought through the Civil War.

During the Civil War my father, then just a little past 12 years of age, and a sister about 2 years older were left in charge of four younger children in a little rented log house on Red Bluff Creek about 6 miles south of Pearson, Ga. The good men and women of that section left at home during the war kept this little family of children alive through four long years. My father ofttimes told me of the lesson of service he learned from this hardship. My father was never wealthy, but he came to own a home and have an abundance of food and the things which go with a small farm. My father never in his life after he grew to be a man refused to let a poor person have meat or bread, regardless of whether they paid him or not. He said if they did not pay he might not let them have all they called for, but he never would send them home empty handed. He would always let them have food for their wives and children. My father has passed to the beyond, but I have never found any higher standard of service than that which he learned from Civil War hardships, and of which he told me.

The true purpose of all good legislation is the service of children and their fathers and mothers.

After the Civil War my father plowed for a while as a day laborer for Uncle "Billie" Meeks in Coffee, now Atkinson County, and then worked as a track laborer on what is now the Atlantic Coast Line Railroad. He worked all the way from Du Pont, Ga., to Doctortown, on the Altamaha River. My father was engaged to my mother for four years while working on the railroad and sent her part of his small pay each month. She saved this money for the two and they bought the old

home place the first of 1877 and married, and I was born on December 7 of the same year.

In conclusion, Mr. Speaker, I feel my record has been one of loyalty to the farmer, the laborer, and the common people; that I truly represent the folks of my district, and that my efforts have always been and are in behalf of my people and as my father and mother would desire were they living. All that I am I owe to my father and mother, to my brothers and sisters, relatives, and friends.

The campaign manager of my opponent, evidently with the approval of my opponent, claims that the eleventh district has been practically without representation since the retirement of Hon. W. G. Brantley, of Georgia. I would not discount in the least the standing in Congress of the Hon. Henry G. Turner or the Hon. William G. Brantley. Both these men were able and stayed in Congress much longer than either Congressman Walker or myself up to the present time. I am willing to pass the intimation that I am a failure as a Congressman and let the people of the district judge of my efforts.

Congressman J. R. Walker, my predecessor, also served during the time it is claimed the district has practically been without representation, and as his successor I have had the opportunity of seeing just what he did while serving six years in Congress. He served during the World War and dealt with some of the most important matters ever handled by the American Congress, writing with his own hand part of some of the important measures. He was my opponent in two political campaigns and I never criticized either publicly or privately his vote or stand on a single measure. I probably differ with him on some of his views, but I differ with all my colleagues in Congress on matters every day of the session. I simply mean to say that Mr. Walker's votes and support of measures were honest, sincere, and in behalf of his people as he saw his duty to them. Many people asked me to attack him on some votes cast by him during the war and I refused, saying, "Mr. Walker was honestly discharging a most sacred duty under the stress of a great war and I shall not attack him for doing his best under the most trying circumstances. I only pray I may not have thrust upon me so serious a responsibility."

I am sure that for 6 years Mr. Walker represented the district in an honorable and efficient manner, and during the last 10 I have done my best.

My opponent's campaign manager says that my bill to close Sunday movies, theaters, and dance halls has brought me "unpleasant notoriety." Let me suggest that the criticisms of those who would destroy our Bible, who hate our churches, and who deny the divinity of Christ and the existence of God do not worry me much. On the other hand, the praise of good men and women is not "unpleasant" to me. I like the crowd that are with me.

Again, the "manager" says I introduced "an agricultural bill that places a large part of the financial cost of the solution on the farmers." This statement was made very probably by one not familiar with the facts and therefore is erroneous. I shall gladly ask the voters of my district, who are more familiar with my record than is the "manager," to pass on my efforts in behalf of the farmer, the laborer, and the common people.

RECORD OF THE REPUBLICAN PARTY AND OF TAMMANY

Mr. BERGER. Mr. Speaker, ladies, and gentlemen, in every Congress in which I have served since the Volstead law was enacted by a Democratic Congress, with the aid of Republican votes, I have offered bills designed to make legal the manufacture and sale of light wines and beers under conditions that would prevent the return of the saloon.

My position on the subject of prohibition—like the position of the Socialist Party—has been clear and consistent from the very beginning.

PROHIBITION NEITHER POSSIBLE NOR DESIRABLE

Realizing that many of the ills which resulted from the liquor traffic were due, in no small measure, to the fact that the private profit motive was permitted to have full sway, I have advocated, and the socialists generally have advocated, the manufacture and sale of alcoholic liquors under Government supervision.

By yielding to the demand of the Anti-Saloon League that bone-dry prohibition be foisted upon the country, the two old political parties not only failed to remedy the ills of the liquor traffic; they brought about a condition which defeats true temperance.

I am more convinced than ever that bone-dry prohibition is not desirable, even if it were possible, and not possible even if it were desirable.

THE HYPOCRISY OF "WET" POLITICIANS

It is not my intention to enter at this time upon a discussion of the grounds upon which my conclusions rest. They are set forth at some length in my speeches of June 6, 1924, and February 15 of this year. Anything I would now say concerning the failure of prohibition to prohibit would of necessity be a repetition of what I said on those occasions, with the only difference that additional facts might be cited to support the position I take and have taken.

But prohibition comes to the fore as a political and campaign issue in the pending presidential election. The deceptive tactics employed by the leaders of the two old parties regarding the prospects of enforcement or modification are such as to justify consideration of that particular phase of the subject. Dishonest business and dishonest politics appear to go hand in hand, and after the orgy of corruption through which the Nation has passed—or attempted, perhaps unsuccessfully, to pass—our people are no longer amazed or shocked at the hypocrisy which surrounds the prohibition enforcement question.

I am not now referring to the hypocrisy of the law, or to the lawmakers who vote dry and drink wet, or to the prohibitionists of the Anti-Saloon League variety who profess to expect enforcement when they know that the people they are supporting neither observe the law themselves nor desire to have it enforced as to others. I refer now to the hypocrisy of the so-called "wets" to whom prohibition has become a means of riding into office.

"LAW ENFORCEMENT" COVERS MULTITUDE OF "WET" AND "DRY" SINS

But pardonable to a certain extent as that may be in the case of individuals, to whom the office may mean more than principle, the situation is different when candidates for presidential office and the national political organizations embark upon the same program of deception, knowing that they are creating hopes they can never gratify—and which they never intend to try to gratify.

The temptation to which these politicians and their machines have now yielded is to come out for modification where sentiment is wet, for observance where it is dry, and for law enforcement where sentiment is pretty evenly divided.

A glaring instance of this unmitigated hypocrisy was furnished at the Republican National Convention in Kansas City. The "drys" in the Republican Party announced their "determination" that the party should come out for "strict observance" of the prohibition laws.

NEW PROMISES FOR OLD

It did—by adopting a plank in the platform which reads:

The Republican Party pledges itself and its nominees to the observance and the vigorous enforcement of this provision of the Constitution.

Was the Republican Party ever opposed to law enforcement? If it was, it never admitted it. On the contrary, it always stoutly proclaimed its adherence to law enforcement.

Four years ago, when it drafted a platform, it included this plank:

We must have respect for law. We must have observance of law. We must have enforcement of law. The very existence of the Government depends upon this. The substitution of private will for public law is only another name for oppression, disorder, anarchy, and mob rule.

Every government depends upon the loyalty and respect of its citizens. Violations of law weaken and threaten government itself. No honest government can condone such actions on the part of its citizens. The Republican Party pledges the full strength of the Government for the maintenance of these principles by the enforcement of the Constitution and of all laws.

The Republican Party was returned to power four years ago. It had an opportunity to make good its pledge to use—

the full strength of the Government for the maintenance of these principles by the enforcement of the Constitution and of all laws.

If it did not carry out its pledge then, why promise now? And if it did carry out its pledge, then why proclaim an intention to do what they claim to have done?

Why, then, this hue and cry about law enforcement?

A GOOD TIME WAS HAD BY ALL

The fact of the matter is, of course, that there is no enforcement of the Volstead law, that the leaders of the Republicans know it can not be enforced, and they have not the slightest intention of attempting the impossible.

Not only do they not intend to enforce the law—they do not intend to observe it, although the plank reads, "The Republican Party pledges itself and its nominees to the observance" of the law.

Observance, like charity, should begin at home. Yet the delegates to the Republican National Convention—the leaders of the party throughout the nation, those who adopted this solemn declaration to "observe" the prohibition laws—were consuming

more liquor during the convention than was being consumed anywhere else in the United States.

According to press reports, just before daylight each morning the convention was in session wagons made the rounds of hotels collecting empty liquor bottles. From one of the larger hotels the average was 15 barrels of quart and pint bottles a day.

ENOUGH DRINKS AND DRY PLANKS TO SATISFY ALL

And the most joyous tippling was done, according to press reports, on that midnight hour when the resolutions committee broke up after adopting the driest prohibition plank ever written into the platform, a plank pledging the Republican Party to "observe" the law they were busy violating.

The plank will satisfy the Anti-Saloon League; it can now claim that it got what it demanded in Kansas City. It will satisfy the bootlegger, who will continue his nefarious practice, purchasing immunity for violating the law by contributing to the local campaign funds of the Republican Party. And the average citizen, who is opposed to prohibition but who can still get his hootch even though it might give him blindness, will likewise be satisfied.

REPUBLICAN PARTY—CONSISTENT IN ITS CORRUPTION

Thus the hypocritical attitude of the Republican Party is to be continued, getting votes from the "drys" because the party is dry in theory and getting votes from "wets" because the party is wet in practice.

All one can say about the rottenness it discloses is that it shows the Republican Party to be consistent—consistently crooked. A political party that could produce so many corruptionists in high office in such a short time—and many more who still blush unseen—can well claim to be consistent.

BUT WHAT OF THE DEMOCRATS?

But if it is hypocritical—disgustingly hypocritical—for the Republicans to pretend to advocate either observance or enforcement of the Volstead Act, what is to be said of the Democratic Party, whose present leader, Alfred E. Smith, is to become the Moses of the "wets," the man who will lead them—and also the "drys"—out of the cellars right to the bars and the railings?

It was the Democratic Party that was mainly responsible for the eighteenth amendment and the Volstead Act. It was the delegation of the solid South, the backbone of what is left of the party of Thomas Jefferson—which may explain why it has no backbone—that was the principal force behind the prohibition movement. United States Senator MORRIS SHEPPARD, of Texas, framed and introduced the eighteenth amendment. The South furnished the bigotry and fanaticism and the capitalists the sinews of war, which made the prohibition movement and its leaders go round.

It is this delegation from the solid South in our Congress that has not only resisted every attempt to reexamine the mistake that was made when bone-dry prohibition was attempted, but it has even been willing to cast aside without the slightest compunction every constitutional right found in our Constitution in order to enforce the unenforceable Volstead Act. Using the entire Army and Navy is but one of the minor demands of this crowd.

PRESENT DRY PLANK IS DRIER THAN EVER

And now the Democratic Party outdistances the Republicans in double dealing and hyprocisy. While nominating for President a man who professes to be a wet, it adopts a platform plank on prohibition which is even stronger than the one Bryan had inserted in the Democratic platform four years ago.

Four years ago the Democratic plank on prohibition merely promised "to respect and enforce the Constitution and all laws." This year the plank not only condemns the Republicans for not making prohibition enforcement effective but "it pledges the party and its nominees for an honest effort to enforce the eighteenth amendment."

The plank adopted this year was written, it is reported, by Senator CARTER GLASS, of Virginia, leader of the dry contingent at the Democratic convention. And Bishop James Cannon, of the Methodist Episcopal Church South—and one of the leaders of the Anti-Saloon League—said the plank suited him.

This is the crowd Gov. Al Smith will lead in this campaign.

The New York World, which insisted that "the Democratic Party should not nominate Governor Smith if it wants Volsteadism," and which maintained that to nominate Smith on anything but a wet platform "would be little short of contemptible," will now find itself helping this contemptible performance.

WHO'S WHO IN TAMMANY'S HISTORY

And now let us see—who is Al Smith?

A number of books have been written on Tammany, but the most extensive and the most readable one that has yet appeared is by M. R. Werner, entitled "Tammany Hall." The chief sources of the author are the numerous investigations that have been made of Tammany in its long criminal career, and out of the huge mass of documents he has succeeded in culling the more important phases of the organization.

A START IN LIFE—ONE MILLION STOLEN

By the time that Andrew Jackson came to the Presidency in 1828 Tammany had already assumed two phases which have been conspicuous into the modern period. These are the appearance of the grafter and the marketing of "philanthropy" by its leaders.

In the period of Jacksonian Democracy Tammany was radical and shared the grievances of the workers of the cities against the old suffrage restrictions, but before the end of the thirties this attitude became a compound of demagogy and an itch for office for the sake of the loot that was available.

One of its henchmen, Samuel Swartwout, collector of the port of New York, made a hasty trip to Europe, leaving a shortage of over a million dollars. He was accompanied by another worthy official who had stolen over $72,000.

THE DEPREDATIONS OF "PHILANTHROPIC" TAMMANY

These first raids were simultaneous with the appearance of "philanthropy" when its leaders distributed food among unemployed workers during the panic year of 1837. Unfortunately for "philanthropy" it was discovered that one of the most prominent Tammany leaders, a police justice—

gained his money by extorting it from counterfeiters, thieves, and prostitutes who were brought into his court.

By the middle forties brothels into which unfortunate girls of the working class disappeared became a rich source of funds for Tammany "philanthropy." The house of prostitution had become a permanent fixture of the Tammany system of revenue for its leaders. From the evidence one gathers there was a general schedule of rates collected from madams and inmates, while arrests for cause and without cause provided fees for various officials.

The police system had by this time been fairly well penetrated by this grafting on brothels while various offenders in jail were released and others permitted to escape for the value of their votes and services on election day.

The outlines of modern Tammany were fairly complete a decade before the Civil War. The boozing kens had already become an integral part of the system as well as the low dive and the half-savage gangs whose members might be hired to rob a till, cut a throat, or stuff ballot boxes at elections. Occasionally a Tammany leader fell out with the chieftains and annexed a gang of his own and a gang war followed, but as a general rule the insurgent made peace with the chiefs who alone could satisfy the appetites of those who wanted office and the plunder that went with it.

THE FORTY THIEVES BLAZE THE TRAIL

In the early fifties came the reign of "the forty thieves" in the board of aldermen, a body where the later notorious Tweed was getting schooling for the most extensive grafting ever known in the history of politics. The period of old graft survived and it was not to mature as a ripe contribution to municipal science till after the war, but the thieves sold ferry leases and franchises to the highest bidders.

Even Tammany "patriotism" produced dividends.

They raised the bills for fireworks in the city celebration of the Fourth of July in 1852 and dividends were even extracted from corpses. In transporting the body of Henry Clay from the city to Albany the thieves padded the bills for undertaking and included one bill of $1,400 for liquors and cigars. There was a difference of $70,000 between the real value and the price paid for a paupers' cemetery. Meantime "philanthropy" was not forgotten. It paid.

ENTER THE TWEED RING

Fernando Wood, whom another writer called the "prince of rascals," was elected mayor in 1854, and then for two successive terms. Street-cleaning graft, of which we are again hearing something in Walker's administration, had been a valuable source of profits, but in Wood's administration he and his family raked in quite a bag of cash from it. Tammany was proslavery and so was Wood, who complained that New York City investments in southern slavery would be lost if the South seceded from the Union. The mass of the Irish voters organized by Tammany and influenced by a proslavery clergy carried the city against Lincoln in 1860 by a heavy majority.

Wood and the proslavery elements paved the way for the Tweed ring—and here we come across some remarkable analogies with the Tammany Hall of 1928.

A SHIRT FRONT HELPFUL TO TAMMANY

A. Oakley Hall was mayor during the looting of the city by the Tweed gang, while the New York Herald, which had pro-

posed a war of foreign conquest to obscure the issue of slavery, became the organ of Hall. By the time the gang had become all powerful they seriously considered moving next to the Federal money vats.

The plan was to elect Gov. John T. Hoffman President in 1872, send Hall to Albany as governor and Tweed to the United States Senate, while Comptroller Sweeney was to remain in New York City to rule the city treasury.

Had the plans matured it is said that Hoffman was to send Tweed as American ambassador to London.

Change the names and observe how some of these plans fit with the program of to-day. For Hoffman read Smith and for the New York Herald read the New York World. Perhaps Walker is slated for London. Tammany was supreme in New York in 1870 and it is supreme in New York to-day. The looting and graft were rife gossip then; the sewer and street grafts are rife now. History is never repeated, but analogies occur just the same. It is certain that Smith is the shirt front to-day as Hall and Hoffman were in the previous period.

BOSS TWEED STEALS $70,000,000 OR SO

The Tweed ring added one accessory to its rule which was essential. It had not been neglected by previous gangs of looters, but Tweed and his associates operated on such an enormous scale that it was more essential than ever. He had filled the courts with his agents, the most conspicuous of whom was Judge Barnard, later impeached for his crimes, but the press was always a source of danger. The following paragraph tells the story:

Six or eight men on almost every newspaper in New York were put upon the city's pay roll at salaries of from $2,000 to $2,500 a year. They were engaged in no municipal business, but their duty consisted in writing blurbs in favor of Tweed and his associates as part of their newspaper work, for which they also received pay. Another effective method of controlling the press and public opinion was by means of corporation advertising. The ring gave legal and municipal advertising to 26 daily and 54 weekly newspapers at exorbitant rates. Writers were also hired to send letters to newspapers in other cities praising the members of the ring individually, Tammany Hall as an organization, and the administration of the city generally. These were copied by the New York papers after they appeared elsewhere, and they created the impression that the entire Nation admired the city government.

Tweed later testified that occasionally an article was brought to the ring, and the writer was paid to kill it.

They even arranged for newspaper attacks on the ring so filled with errors that they were easily answered, and the ring thus added to their prestige. As much as $5,000 was paid for this type of article. When the legislature was in session the Albany newspapers enjoyed rich incomes from the ring for a variety of services.

When the storm began to beat around the ring one of its agents, an eminent lawyer, offered the Times $5,000,000 through Comptroller Connolly, and Thomas Nast was offered $500,000 to abandon the attacks. The two men would not be bribed, and the exposures followed. The rats scattered. Tweed died in prison. The real extent of the looting probably never will be known, but the estimates run as high as $75,000,000.

REPUBLICANS GET THEIR SHARE OF THE LOOT

The evolution of Tammany had reached the stage of having trusted Republican allies, which feature has continued to the present day. Tammany is no more Democratic than Standard Oil is. It is a capitalistic business concern handling certain wares, and it needs Republicans as well as its own professionals.

The Republican State committee chairman, Cornell, discovered during the reign of Tweed that—

Seventy-five per cent of the officers of the Republican county committee and 75 per cent of the Republican district leaders were either in the pay of the Democrats or held sinecures from Tweed and Tammany Hall.

Perhaps this care of Republicans was also a phase of the "philanthropy" in which Tweed, like other Tammany leaders, indulged.

While the spotlight was focused on the Tweed ring John Kelly was enjoying a pious trip to the Holy Land. His letters home dwelt upon—

the Mount of Olives, the way of the Cross, and the Holy Sepulchre.

Kelly had already made a pile out of the office of sheriff.

PIETY AND PLUNDER GO HAND IN HAND

While abroad he commissioned an artist to execute some religious paintings which he presented to St. Patrick's Cathedral in New York and then ascended the Tammany throne as successor to Tweed. Kelly's contribution to the institution was to perfect a system of assessing candidates and Tammany officeholders upon a percentage basis according to the salary the offices paid, and the day before election became known as "dough day." This was the day for distributing the money to the district leaders for carrying elections.

Affectionate cooperation with Republican leaders continued.

There was an unwritten, unmentioned agreement between the Democrats and the Republicans to take care of each other's election district captains with jobs even when one party was not in power—

Writes Werner. Gangs were employed and election days was a drill of thieves in thievery.

Kelly's personal fortue was half a million dollars, and in 1886 he was buried from the church to which he had given the paintings upon his return from the Holy Land. This combination of piety and plunder runs through the history of many Tammany Hall leaders.

THE ERA OF HONEST GRAFT BEGINS

Richard Croker was next in line for the Tammany throne and his reign is conspicuous as the period of the rise of the great corporations, the attraction of Tammany leaders to corporation investments, and the beginning of a system of "honest graft" which George Washington Plunkitt, a Tammany illiterate, expounded with naïve candor in the first few years of the present century.

Croker himself invested in New York corporations, and it was in his reign that alliances between Tammany and large corporate enterprises had their origin.

His successor, Murphy, developed the partnership to that quiet mutual understanding which all but the simple-minded know exists to-day. This also provided another source of revenue for Tammany campaign expenses. The organization had now drifted far from the days of early Jacksonian Democracy when Tammany would purchase an occasional dwelling in the name of a dozen workers so that they could qualify for the franchise.

The understanding with Republicans reached high enough at one time to even include Platt, the Republican high potentate of New York State.

NO SOURCE OF GRAFT IS LEFT UNTOUCHED

While the "cadet" and the procurer stalked through other eras of Tammany rule they are also conspicuous in the reign of Croker. Here we also get occasional glimpses of forms of vice so foul and disgusting that they are unprintable. The most important source of graft was preying upon prostitutes and levying on brothels and saloons.

There were also side lines of graft which involved the sale of wines and beers to houses of prostitution and the supply of cigars, cigarettes, food, clothing, jewelry, furniture, and medical attendance.

They were valuable concessions as—

the profits were large and the purchases could be made compulsory by the threat of the law. There were also abortionists, midwives, and baby farmers, who worked with the police and the district leaders, or who paid them for protection from the laws.

CHARLES MURPHY, THE MAN WHO MADE SMITH, SUCCEEDS CROKER

The author declares that the complete facts regarding the financial investments of Tammany leaders in houses of prostitution are not available—

because the Tammany men always covered themselves carefully by using their friends' rather than their own names.

Croker left Tammany Hall for Ireland a millionaire, and as the author remarks—

New York experienced a period of rule by an absentee landlord, for Croker spent the next few years of his political career in England, Ireland, and on ocean steamers. Government by cable was what some of the newspapers chose to call it.

At his death his estate was estimated at $5,000,000. This was only a small portion of the total gouged out of the people of the city by the Tammany vampire.

After a short experiment with a triumvirate of three leaders, including Charles F. Murphy, the latter became leader. It was under the Murphy régime that Al Smith blossomed into a "statesman," that the "new Tammany" came into being, that "honest graft" eventually emerged as a system, and that relations with corporations became established on a basis of mutual respect.

BIG-HEARTED TIM SULLIVAN—HE LEFT ONLY $2,000,000

Murphy had been dock commissioner and had organized a contracting and trucking company which leased docks from the city and—

made 5,000 per cent on its investment.

Of the corporation opportunities and investments of the leaders of the "new Tammany" the author writes:

In the twentieth century the leaders of Tammany Hall were in the contracting business or were interested in water, gas, electricity, or railroads, rather than prostitution, liquor, gambling, or extortion; for it was Murphy's great and lasting contribution to the philosophy of Tammany Hall that he taught the organization that more money can be made by a legal contract than by petty blackmail.

Of course, the old forms of graft survive, as we know from the current milk, sewer, and street-cleaning scandals, but the larger forms of income are derived from inside connections with capitalist enterprises.

Tammany must continue to receive the support of the voters if its leaders are to fatten on the millions who live in the disease-breeding fire traps which they call homes, so the leaders continue to toss "philanthropy" to the dupes.

"Big Tim" Sullivan worked "philanthropy" on a large scale; his distribution of food, clothing, and money to the Bowery wretches of his district were estimated at $25,000 annually, but as Werner observes—

the political profits of his district were estimated between seven and eight times as much as he gave away.

Political returns were also reaped when Sullivan headed gangs of Bowery thugs from one polling place to another on election days. When he died Sullivan's estate was estimated at between two and three millions.

DISTRESS, DISEASE, AND DEATH THE PRICE OF TAMMANY "CHARITY"

The "charity" given by Tammany leaders costs them nothing. It is an investment that pays dividends in cash and votes. The poor devils who are swindled by this sob stuff pay the cost in disease and often death. Professor Merriam, of Chicago University, makes this striking and truthful comment regarding Tammany "charity."

He points out that the boss—

gives $100 to charity but accepts $1,000 for voting against any ordinance for better housing. He pays the funeral expenses of the man who dies because the boss killed the law to safeguard the machinery on which he worked. He helps the widow, whose suit for damages was blocked under a system he was paid to perpetuate.

I may add that the worker goes to his death in fire-trap buildings because fire hazards are ignored by Tammany inspectors who are close to real-estate interests. The worker's family is the prey of disease because Tammany contractors are opposed to municipal housing. One may add to these illustrations to show that Tammany "charity" is a tiny part of the profits derived from distress, disease, and death which afflict the working-class families of the city.

MURPHY PUTS SMITH THROUGH TAMMANY'S SCHOOL

Murphy passed to his reward in April, 1924, with a big funeral ceremony in St. Patrick's Cathedral. His estate was estimated at over $2,000,000.

The book ends with the passing of the sainted Murphy, but we also get a glimpse of Al Smith in the closing pages. Smith, it must be remembered, is the modern "shirt front" behind which Tammany hopes to enter Washington as the Ohio gang used Harding for the same purpose. Al Smith would have no chance if he had wallowed in the dirt as the other leaders have, so he has been groomed for the job with the knowledge that he must be "clean." He is, except for his acquiescence in election steals, for responsibility for these crimes is inevitably shared by all leaders, including Smith.

But Smith's share in the impeachment of Governor Sulzer in 1913 shows that he is just as capable of going along in a dirty political job as any other of the leaders.

SMITH OBEYS CHARLEY MURPHY

Al Smith was speaker of the assembly of the State of New York and ROBERT F. WAGNER, now United States Senator, was the Tammany leader in the State senate. Smith took orders and played Murphy's game. So did WAGNER. Sulzer was not proven guilty of any offense in office that would warrant his removal. Every count against him had reference to his actions before he was elected governor.

The removal of Sulzer was a legislative crime, and Smith shares in that crime. Moreover, Sulzer could have looted the State treasury with the consent of Murphy if he (Sulzer) had consented to obey the vulgarian Murphy. Werner declares:

Governor Sulzer was impeached because Charles F. Murphy wished to avoid exposure of Tammany graft in the State government.

FROM FOURTEENTH STREET TO WASHINGTON?

Shortly before the impeachment of Sulzer State Senator Stilwell was being tried for accepting a bribe, and Murphy told Sulzer that Stilwell would be acquitted. Murphy added:

How do you expect a senator to live on $1,500 a year? That is only chicken feed.

In other words, Murphy told the man he later threw out of office that Tammany senators were expected to accept bribes because their salary was only "chicken feed."

Stilwell was being tried by a Tammany-controlled senate, and he was acquitted of the charge by a vote of 28 to 21. Now for the sequel. Stilwell was later indicted in New York County for bribery upon substantially the same evidence which was rejected by the Tammany senators and was convicted and sentenced to two years in prison!

Certainly the sainted Al Smith and the "new Tammany" are entitled to move next to the Federal money vats, and the "liberal" New York World may be congratulated on selling Smith to the Nation as a "progressive" and "liberal."

Here is the story of the evolution of Tammany Hall by way of the boozing ken and the brothel through decades of "philanthropy" for its dupes, through debauching of elections, and enriching of vultures.

And Al Smith is its brightest flower.

HE WILL NOW BE WET—AND ADMITS IT

In order to get the nomination, Smith—or rather his friends—had to do a lot of trimming and hemming and hawing. He had to be all things to all men. His friends down South, where dry sentiment is strong, proudly pointed to the fact that he was in favor of law enforcement. His friends up North, where sentiment is wet, pointed to the fact that he had signed the bill repealing the State enforcement act.

Of course, during the campaign Smith will be wet. It was politically unwise to be wet while he was trying to get dry delegates to support him for the nomination. Having gotten the nomination, it may be politically unwise to pretend that he is a dry. There is more to be gained by being wet during the campaign than by being dry.

The reason for this is simple: The South, where the dry sentiment prevails, is Democratic anyway. It will not go Republican. And outside of the South wet sentiment is strong, and it will be for that vote that the Democratic Party will have to make its bid. Therein lies what hope the Democrats have of returning to the pie counter, from which they were separated almost eight years ago.

VICTORY OF SMITH FOLLOWERS WOULD MAKE MODIFICATION IMPOSSIBLE

But supposing the Democrats win and Al Smith gets into office, can that affect the course of the prohibition movement?

No one who knows the situation can honestly contend that it will have the minutest effect on the Volstead law.

That law can not be changed without Congress, and there will be no group in Congress more unyielding in their opposition to a change in the law than the Democrats, most of whom will be from the solid South.

They may represent less people than a Congressman from a Northern or a Western State—just as a Senator from the State of Mississippi represents only about one-sixth of the population that a Senator from New York does—but their votes count for as much in Congress, and no progress can be made with that solid vote to overcome.

THEN IT WAS "HE KEPT US OUT OF WAR"

Democratic politicians who intimate that a modification of the law will be possible with the election of Smith are deliberately misleading the voters. A victory for the Democratic Party this year may mean the destruction of all constitutional and civil liberties in a vain effort to enforce the law.

In raising this issue the Democrats are trying to repeat the trick they played on the American people in 1916, the last time they elected a Democratic President. That time the battle cry was, "He kept us out of war." They came near fooling the people of Wisconsin into supporting Wilson that year—much nearer than they have come since or ever will come.

MODIFICATION—ANOTHER FALSE SLOGAN

In 1916 the Democratic President could have kept us out of war. The battle cry of modification will have harder sledding; the people now know, first, that the Democrats can not be relied on to do what they can do; and, second, that modifying the prohibition law is one of the things a Democratic President could not do, even if he wanted to.

I believe that eventually the prohibition laws will be modified. I can think of few things that would be more helpful to the future progress of our people than a repeal of these laws. But it will not be accomplished by politicians who betray the people by misleading slogans and false campaign issues.

BOTH OLD PARTIES RESPONSIBLE FOR PROHIBITION MESS

The Socialist Party, although always opposed to prohibition—I do not know of any one of its elected officials who ever voted for it—refused to become a party to this deception. At its national convention in New York City, held in April, it declined to incorporate a plank on the subject. A majority of the dele-

gates, most of them opposed to prohibition, felt that anything it would do to help make this the dominant issue of the campaign would divert the attention of the people from the numerous economic and political problems upon which the socialists have always centered their attention.

We consider both old parties responsible for the mess prohibition has created, but will not follow the red herring the ruling class is drawing across the trail for the purpose of getting the people to forget other equally important issues. The capitalist class of this country has found in prohibition a method of preventing the consideration of other issues. To the extent that the socialists can they will try to have the people consider these other problems.

SOCIALISTS REFUSE TO MISLEAD OR BE MISLED

That is the position the Socialist Party and its candidate for President, the late Robert M. La Follette, took four years ago. Senator La Follette was besieged to have the progressive movement he headed come out for a modification of the Volstead Act in the Progressive platform. He declined, taking the position that he would not permit the urgent economic questions he considered important, and which he wanted to keep in the forefront, to be obscured by a debate on prohibition.

Wisconsin cast its electoral vote for Robert M. La Follette—it was the only State that did so—even though the State has by a referendum vote expressed a reference for modification.

NORMAN THOMAS IS THE CANDIDATE OF ALL PROGRESSIVES

Least of all will the progressives support the Democratic Party. They remember only too well the suppression and persecution which it sponsored during the war. They remember very vividly the era of patrioteering and profiteering which the Democrats made possible during the Wilson régime.

And they would not expect Al Smith, the product of Tammany Hall and the protégé of Charlie Murphy, the late Tammany boss, to be better in office than the professor who occupied the presidential chair from 1912 to 1920.

Any citizen who has learned the lesson of history and is willing to use his thinking power must reject both Al Smith and Hoover—reject both the Republican and the Democratic Parties—and vote for Norman Thomas and the Socialist ticket as the only effective protest against graft and misrule.

AN ACCOUNT OF STEWARDSHIP

Mr. HAMMER. Mr. Speaker, under leave to extend remarks in the RECORD I include a statement to be submitted to the voters of the seventh North Carolina district.

I shall endeavor to present to you, my constituents and the voters of the seventh congressional district, as complete and intelligent report of my work as your Representative in Congress as is possible in the limited time and space at my command. One of the most disturbing facts of the present is the growing apathy and indifference of the American people toward their Government, the conduct of their public officials, and the public life of the Nation. In the last general election not half the legal voters of the country went to the polls. Then why wonder that our Government at Washington should be disgraced and dishonored by such men as the Falls, the Daughertys, Dohenys, Sinclairs, and their ilk on down the line?

INDIFFERENCE SOON BEGETS CORRUPT GOVERNMENT

This country has grown so enormously great, its problems of government so complex and many sided, and the duties, the opportunities for diversion, and the burdens of the average citizens have been so greatly multiplied that unless the people can be brought into more intimate and direct touch with their Government there will come the menace of a national catastrophe. Indeed, that danger is already showing itself on the horizon, for an apathetic, indifferent people in America, where the people are their own masters, soon begets a dishonest and corrupt government. The callous reactions of the public are amazing as evidenced by its votes, to the scandals that have been unearthed in Washington within the last seven years.

It is my opinion that the interest of the public in the work of Congress since the World War has lamentably declined. Congress itself is, of course, largely to blame for this state of affairs, more especially the party in power. That party controls the dominant portion of the press and other channels for the dissemination of public information, and instead of taking the initiative in house cleaning it has shown not only a positive disinclination to act but has attributed to the opposition party selfish, partisan motives in forcing action. That view was accepted by a large majority of the people as the election in 1924 demonstrated. If the party in power can loot and plunder and dishonor the fair name of the Government and get away with it by charging false motives to their opponents, the gravity of the situation can not be exaggerated.

I trust that the great historic Democratic Party will be in a position in the approaching election to demonstrate that the heart of the American people is as sound and true as it ever was and that we as a nation have not slipped a notch in our ideals. In my judgment the only way to stop this wrongdoing at Washington and elsewhere in our Government is to punish the Republican Party by driving it from power.

The thing now most needed to improve and purify government is to establish contacts between the intelligent, conscientious public official and the people he is chosen to serve. Especially is that necessary between the Member of Congress and the people of his district, for contact strengthens both. We need teamwork. The individual voter comes to feel that he is a stockholder and a power in this greatest corporation—the United States Government—when he contacts the honest individual officeholder, who in turn is encouraged and inspired when he comes to know that his constituents are watching the political game intelligently.

I shall therefore attempt in this short report to set out some of the more important acts of legislation and bills which have been given my approval or disapproval by vote. But before doing that I think it advisable to tell you how I am placed as a worker in Congress, that is, my work in committee. As you know, Congress does its real work through committees, for no important legislation is ever enacted without having first been thrashed out by a committee. The committee serves as a fact-finding and determining body. It is not only the eyes and ears but the faculties of Congress, and it is through its committees that Congress as a legislative organism most directly contacts the public. It is most often through committees that quack and dishonest proposals of legislation are attempted, and if a bill of that character is favorably reported by a committee it is given a status for ultimate consideration and disposal in Congress. The committee having failed to detect or stop a vicious legislative proposal, it may be passed by Congress. Lamentably often has that occurred.

So on coming to Congress in my first term I resolved to make myself above all else an efficient and attentive member of all the committees on which I should be appointed. One of these committees is the District of Columbia, one of the most important of the committees, because Congress legislates for the Capital District in the sense that a legislature makes laws for its State. It has been the experience of Congress that honest, efficient legislation for the District of Columbia has been one of its most difficult tasks. The Capital City has attracted here all sorts of schemers, and many of them have found the path of least resistance to the approach to Congress through local channels, such as street-railway franchises, the police department, and other functions of this city and District.

MY WORK IN COMMITTEE ROOMS

On coming to Congress I was asked by the late Claude Kitchin, one of the greatest men the State has ever sent here, to become a member of the District of Columbia Committee. He said in substance that on that committee I would serve as a sentinel on one of the dangerous outposts to guard Congress from the resourceful enemy from without. He declared it one of the most important committee assignments and outposts in Congress. I well knew that work on this local committee would not attract great attention in the home district, but as solicitor and United States attorney I had had some experience in prosecuting wrongdoers in my own State, and it seemed to me that perhaps I could on this committee be of more service to the country than on any other committee. My experience as prosecuting attorney fitted me in the very outset for much of the work of this committee and I consented to take this post. How well I have served is for others to say, but I can say that I have often been amazed, even astounded, at the brazen effrontery of schemers to deceive the Congress and the country.

Outside of the work on this committee and the Committee on Pensions and the Committee on Patents and the Committee on Expenditures in the Executive Departments, a new committee doing the work of 16 smaller committees abolished, and taking over some of the work of the Judiciary and Appropriations Committees, I have tried to devote every atom of strength and energy at my command to the great questions before Congress and the country, such as liberalization of the House rules, taxation, and specifically the tariff, farm relief, prohibition enforcement, flood control, a practical disposition of Muscle Shoals, rivers and harbors, the question of freight rates, banking and public credit, the public debt and the war debt owed the United States by foreign countries, public buildings for post offices and Federal courts. I feel that for no vote I have cast in the House on any measure that has dealt with any one of these questions I am due the excellent people of my district apology or defense.

I am confident that they believe that every vote that I have cast is honest and intelligent in the light of all the available facts to guide me. But let me give you the votes as they stand on the more important of these measures:

LIBERALIZATION OF THE HOUSE RULES

One of the most important problems affecting the efficiency of Congress is how to make the House a workable body, responding promptly to the desires of the people. On account of our present basis of representation and the growth of the country the House has increased its membership to enormous proportions, and the dominant Republican Party in the days of Speakers Tom Reed and Joe Cannon in order to put through its programs of legislation placed the House under gag rule. The chairman of a committee that had reported a most important bill could pocket it, and sometimes did pocket it, and the steering and Rules Committees could and did often prevent it from ever coming to the floor for consideration. When the Republican Party recovered control of the House after the World War it adopted a rule that a bill could not be brought into the House over the ukase of the Rules Committee without a petition signed by 150 Members. A combination of Democrats and insurgent Republicans changed this rule to 100 signatures, but the Republicans changed it back to 150 in a subsequent session, and on January 17, 1924, an amendment was submitted to adopt the rule of 100 petitioners. I voted for the adoption of that amendment, but it was rejected by the House. You will see the importance of the amendment when I tell you that all the membership of the Southern States combined signed to a petition is not sufficient to bring a bill into the House over the decision of the Rules Committee, nor could the group of States west of the Mississippi River get action if the autocratic Rules Committee forbade.

TAXATION AND TAX REDUCTION

The guiding principle in my votes on tax reduction has ever been to reduce the taxes equably of those people in the lower brackets and to let the higher brackets stand or increase them when it is demonstrated they ought to be increased. The men of great wealth are permitted to accumulate and enjoy that wealth by the protection the Government gives them, and they should not object to paying in full proportion for that protection. In every bill for tax reduction I have voted either against reduction of surtaxes or when necessary to raise revenue for increases of taxes on large incomes and great estates.

FARM RELIEF

Since coming to Congress I have done everything within my power to place agriculture on a parity with other industries in this country. I am convinced that the safest legislative road to farm relief is the reduction of the tariff to a point where the farmer's dollar will buy as much in the market as the dollar of the manufacturer or banker. For that reason I voted against the increase of duties in the Fordney-McCumber tariff bill. I voted for the resolution rejected by the House to reduce the tariff on sugar. I think the worst feature of the Fordney-McCumber Tariff Act was the provision giving the President authority to raise or lower the tariff. In the last session of the Sixty-ninth Congress President Coolidge almost on the same day vetoed the McNary-Haugen bill and raised the tariff on pig iron. By those two acts he deprived the farmers of the one opportunity Congress had offered them for relief and increased the cost of iron they must use in their farming utensils. Was there ever a more striking illustration to deny relief to agriculture with one hand and to rob it with the other?

For the last eight years Congress has labored to find relief for agriculture. Four times a McNary-Haugen bill has been introduced. In the Sixty-ninth Congress the bill the President vetoed was for the first time passed. Again in the present Seventieth Congress what is regarded by most friends of the administration at least as a much improved McNary-Haugen bill was passed by an increased majority, but at this writing the President is expected to veto it. Thus farm relief as an issue will be thrown into the campaign. If the Democrats should capture Congress this fall, they will endeavor to go to the roots of the trouble by reducing the tariff.

MUSCLE SHOALS

The disposition of Muscle Shoals has turned out to be as difficult a problem for Congress as has farm relief. In my first term in Congress I voted to lease this property to Henry Ford, and I remain of the opinion that it was the wisest disposition that could have been made of it. The plant was projected during the World War at a cost of $150,000,000 for the purpose of supplying the Government with powder. When peace came and powder was no longer needed the Government discovered in Muscle Shoals it had a white elephant on its hands. The use that Muscle Shoals could be put to would be to make nitrates for farm fertilizer and supply electric power to neighboring States.

The Government has never engaged in that sort of business, and when the question what to do with this plant came up in Congress a struggle at once followed between the advocates of Government operation and the guardians of private business. The Fertilizer Trust and the Power Trust have, of course, backed and supported the latter forces, and after 10 years Muscle Shoals remains a problem on the hands of Congress and the Fertilizer Trust continues to exploit the farmers. I voted to put fertilizer on the free list, and had it been done the Muscle Shoals problem might not have been so difficult to solve. Unless the property can be leased to a private corporation or individual on terms that will guarantee cheap fertilizer to the farmers, I favor the Government's operation of the plant, but not on the plan laid down in the Morin bill as originally introduced. That bill simply offered a sinecure to the party in power. Under that bill it is my judgment the Government will make a complete failure of that operation of Muscle Shoals and discredit Government operation. Muscle Shoals is offered as an experiment in the production of cheap nitrates from the atmosphere, and well founded is the justification for the Government's making the experiment. (Since writing the foregoing the Morin bill has been so amended as to remove the chief objectionable features.)

RESTRICTION OF IMMIGRATION

One of the most serious problems facing this Republic is the assimilation and the Americanization of the alien peoples who have landed on our shores within the last 40 years. There are now in our Northern States and great cities 7,000,000 of these aliens who have not become naturalized citizens. This great mass of aliens, many of whom will never become American citizens, have unduly increased the representation of certain Northern States in Congress and in the Electoral College. With the greatly increased political power from these States and communities, the aliens who have become voters but not assimilated American citizens, have deteriorated and undermined our ideals as a people to such an extent that we must soon either house clean morally and politically or perish. The aliens in ideals are striving now with all their might for control of both the great political parties. It is they who have contributed most to making a farce of the enforcement of prohibition by the present administration. It is the alien-dominated States that are the wet States. In view of this grave situation, I have voted to restrict the number of aliens seeking to enter our country, but the fight is still on in Congress for the aliens and their political agents and friends in this country have not accepted the restriction.

PROHIBITION ENFORCEMENT

What is said above goes to the heart of prohibition enforcement. It has got to be met with a resolution that the party in power has not shown. It is now the great moral question of the Republic, great as the question of slavery and perhaps as dangerous, for a powerful minority of the people are openly resisting enforcement. With every opportunity I have voted to strengthen the law and to furnish every dollar necessary for enforcement, but I see before the American people a struggle of years, perhaps a generation, before the goal of satisfactory enforcement is reached. This question is closely associated with that of immigration.

BANKING AND PUBLIC CREDIT

If there is not a money trust in this country, it is not the fault of the bankers. The big national banks have made every effort to control the credit system of the country by the establishment of branch banking in every State wherever possible. In the enactment of the McFadden banking bill an effort was made on the part of national banks to put State banks out of business. This purpose was embodied in the amendments which I opposed with my vote. In my judgment, no form of monopoly is more dangerous to the welfare of the people than a monopoly that controls money, the blood of business, and dictates the rate of interest on it.

ARBITRATION IN LABOR DISPUTES

I have supported by vote every effort made in Congress since I became a Member to arbitrate and peacefully adjust differences between employer and employee. The disputes that have most completely crippled the business of the country and afflicted the life of the people are those that have arisen between the railroads and organized labor. What was known as the Howell-Barkley bill was a measure strongly supported by the labor unions for the prompt settlement, mediation, and arbitration of such disputes, but it had much cumbersome

machinery and contained some objectional features. The most important features of this bill were embodied in the present railway labor act which I supported.

PEACE AND INTERNATIONAL ARBITRATION

Although the House is not a part of the treaty-making machinery of the Government it did by an overwhelming vote indorse the proposal to have the United States join the World Court. I know in my vote for that proposal I represented 100 per cent of the people of my district, and I feel that in voting against the jingo expansion of the Navy I am in accord with the great majority of our people, who see in the so-called naval race which our country is inviting a new temptation to war.

PUBLIC BUILDINGS

There are a number of growing and prosperous towns in the district I have the honor to represent that are entitled to public buildings for their post offices and courts, but when and how these towns are ever to get these buildings can not, under the present law, be determined by Congress. Congress has practically surrendered its function of providing for a public building to the Treasury and Post Office Departments and the Budget Bureau. In this matter Congress may propose, but these departments and this bureau dispose. This is one of the most striking encroachments of the executive branch of the Government on the legislative branch.

The erection of public buildings have heretofore been a matter for Congress to plan, locate, and execute, and the Constitution so provides. Even in those days the term "pork barrel" had begun to find place in the vocabulary of the high-brow economists of the great cities, especially when some one or more Representatives from the "sticks" got to Congress to plant a post-office building at a town of 40,000 population in Dixie or in the Mountain or Prairie States of the West. The eastern economists now fling the term "pork barrel" in the face of any Congressman who demands that Congress should recover its old rights of determining the question of the erection of a public building. Consequently I have voted against the public building bills that have come up. I knew that these bills were designed to spend the money in the great centers of population and wherever it would best serve the interests of the party in power. My State would get little and my district nothing, and so far that has been the result.

HELPING THE WORKINGMAN

I have received commendation from Samuel Gompers for "sympathetic and helpful" attitude toward labor. William Green has recently given high commendation of the friendly, conservative helpfulness and the exercise of good judgment in all matters pertaining to the welfare of the people. Believing in the protection of American workingmen against underpaid foreign labor, I have voted for every immigration law now on the statute books.

EDUCATION

The National Educational Association gave highest praise for helpfulness in preparing a teachers' salary bill in the District of Columbia which will be a model for the Nation.

The teachers' association of the District of Columbia adopted strong commendatory resolutions. Other associations have done likewise. The joint conference on retirement representing more than 250,000 Government employees expresses "deep gratitude for high integrity and broad vision in meritorious legislation affecting so many people." Others have testified as to "unfailing, effective advice and excellent judgment in support of legislation for the general welfare."

KEEPING THE FAITH

As a candidate seeking reelection I welcome the opportunity of giving an accounting of my stewardship. When I accepted the Democratic nomination as your representative I stated I would go to Washington as the representative of all the people, not a part or sect or faction, but in the interest of all.

I have tried to keep your faith. My services have been given freely to all alike. It is my greatest desire to be of real service to the public and to merit the confidence and esteem of the good people to whom I am trying my best to give worth-while service. It does not take a Member of Congress long to learn that great ability or superior gifts of eloquence avail but little in making headway as a legislator. It is work and sticking to the job that count.

Attending the numerous social functions, the ball games, playing golf, the placing of pleasure above and ahead of service of the people will not make a Member of Congress useful to his constituents.

Length of service is a most valuable asset for Members. Each additional term adds much to the usefulness of a Member. Some Members are more useful than others—many times more so.

I have had printed and circulated as many speeches as I have been able to pay for. Many people think that a Member of Congress gets his speeches free. Such is not the case. Franking privilege is only a small part of the expense of printing and sending out speeches, and so forth. The franking privilege is sometimes abused and often criticized, but is one of the privileges of the common people. It helps in part to enable the Member with small means to get his views before the people. The wealthy Member and those who receive large contributions do not need the free-mail service. The congressional frank is not so much the property of the Member of Congress as it is those he represents, for it is for them that it is intended to be used.

It is my opinion that Members of Congress should make reports to those whom they serve.

I have accepted nothing whatever from anyone save my salary and wages in any office I have held, not even my traveling expenses to make speeches at schools or on other programs.

I have tried my best to represent all the people as best I could, and especially the farmer, for he is in the worst fix of any class and has been legislated against more than any other class. The Republican Party has through legislation enacted a highly prohibitive protective tariff on necessities the farmer buys. While the farmer is compelled to sell his products in competition with world products, under these conditions the farmer has grown poorer and poorer.

Should the Democrats have a majority in the House next session, I, under the seniority rule, will be chairman of either one of two important committees.

I have opposed all legislation for a big Army and Navy and have favored adequate compensation to ex-service men and their dependents.

I have favored and voted for cheaper fertilizer and aided in keeping the tariff off of potash, thereby saving millions to the farmers.

I have done what I could for cheaper fertilizer at Muscle Shoals and lower the cost of power to consumers.

I have introduced bills to repeal section 15 (a) of the Esch-Cummins Transportation Act, and have advocated the restoration of reasonable freight rates based upon scientific principles.

A FINAL WORD

The record of my votes will show that I have opposed monopoly wherever it has shown its head, that I have opposed the reactionary interests wherever I have discovered their hand in the game of legislation. One of the most notable efforts of the reactionaries was to hamstring the Federal Trade Commission by getting Congress to reduce the appropriations this commission needed to carry on its investigations of dishonest business. The effort failed. I have done what I could to render simple justice to the World War veterans by voting them a bonus over the veto of the President. I voted against the bill to settle the Italian debt owed the United States on the basis of less than 25 cents on the dollar for the reason that Congress had no right to tax the American people to make Italy a present of more than three-fourths of the $2,150,150,000 loaned to that country. I did not vote for or support in any way the settlements with other foreign countries wherein the United States surrendered and gave to other countries many millions of money loaned and justly due us.

I have kept open two offices throughout the years I have been a Member of Congress, one in Washington and one at my home in Asheboro so as to be able to respond promptly to every need and request of my constituents and in serving my district. I have expended much more than the salary paid me by the Government and the allowance for clerk hire in this service of trying to be an efficient Member of Congress. I may say in conclusion that with the growth of the country the duties of a Member of Congress have grown almost beyond measure, but these duties weigh lightly on his shoulders when there is manifested a responsive understanding and appreciation on the part of his people.

MUSCLE SHOALS—CHEAPER FERTILIZERS

Mr. LARSEN. Mr. Speaker and Members of the House, the national defense act of 1926 provided for the development of power at Muscle Shoals to be used for the cheap manufacture of fertilizer in times of peace and of nitrates for defense of the Nation in times of war. Especially since 1920 the farm situation has been such as to require aid in this respect. Upon my advent in Congress I aligned myself with that aggressive minority membership which has sought to aid oppressed agriculture. The question of cheaper fertilizer has been one of the most important subjects considered in recent years, and numerous plans and theories have been advanced for such production. Each year since the close of the World War the farmers throughout the country have asked that legislation be enacted

whereby the facilities at Muscle Shoals could be used for the manufacture of fertilizers. During most of this time prices have been high and this year they are almost prohibitive. The farmers who have suffered constantly for several years have hoped that with cheaper fertilizers they would be able to realize a greater profit—sufficient profit to insure, at least, a comfortable living. Each year the question has come before Congress and every method of disposition yet suggested has met with opposition.

Many farmers throughout the country thought that considerable benefit might be derived by leasing the Muscle Shoals plant to Henry Ford for the manufacture of fertilizer, but a sufficient number of Members protested at each session to prevent favorable action thereon. As a rule, those who protested then are still protesting. Yet they never make a suggestion as to what should be done. The Government still has the property on its hands and it is a very difficult problem to decide what disposition should be made of it in order that justice may be done to both Government and taxpayer. When the bill was before the House a few days ago many of the great fertilizer trusts were more active than ever. More propaganda was received at my office during the time this bill was up for consideration than has ever been received on any one subject before. Every Representative was deluged with telegrams, letters, and callers, asking that he oppose the bill. Most of them stated it would be detrimental to set such a precedent by having the Government enter into business. They seem to forget that the Government owns and operates a merchant marine, the Panama Canal, a railroad in the Panama Canal Zone, and one in Alaska, and that it operates our entire postal system, saving the people of this Nation billions of dollars which would be charged them if these necessary institutions were operated exclusively by private parties or great corporations.

As a rule I do not favor ownership and operation of business enterprises by the Government, but in a case where the Government owns such property as Muscle Shoals, and its operation will aid a great mass of its citizens and prevent a few corporations from taking advantage and oppressing them, I see no objection to Government operation.

The farmer as usual has not been active, but fertilizer and power corporations have been unusually busy. They have worked fast and have been, at least temporarily, successful. Provision for the manufacture of fertilizer was stricken out, but provision for the manufacture of nitrates was included therein. Why? Because the fertilizer people needed nitrates to use in the manufacture of fertilizers and they immediately saw an opportunity to reap benefit for themselves. They would get nitrates at a very low figure and make all the more profit on their fertilizers, but the poor farmer would gain nothing.

At the present time the Government is manufacturing power at Muscle Shoals, selling it to the Alabama Power Co., and that company is in turn selling it to the public for ten times more than they pay for it. Is there any reason why the Alabama Power Co. should reap all this profit? But the cry continues—the Government must not get into business. As before stated, I do not favor the Government entering all kinds of business, but, inasmuch as we have this property and it cost the Government about $68,000,000, it occurs to me that this plan for using it is a very good one, and I have been anxious to have it adopted. But it has not yet been done, and the Fertilizer Trust, with its lawyers, lobbyists, and money, has won another victory because there were not enough of us who really had the interest of the farmer at heart to save him, however much we desired to do so.

My desire to aid the farmer in securing cheaper fertilizer, particularly kindled upon my election to Congress, has grown steadily during my years of service. In 1921, when increased revenue of about $12,500,000 per annum was sought to be raised by a tariff on potash, I was the first Member of Congress to protest against it. I knew how necessary potash was to our southern farmers and how such tariff would oppress them. The opposition of myself and others was sufficient in this instance to prevent the tariff and to save the farmers many millions of dollars. We killed the tariff on potash then, and this question has not been revived since.

During the early part of the present session of Congress I received requests from constituents asking that my efforts be used to ascertain why the price of fertilizer had advanced so greatly in the past year and if such advance was justified. In accordance with requests, I introduced a resolution in the House asking that the Federal Trade Commission investigate the facts relating to alleged corporate violations of the antitrust laws in respect of operations of fertilizer and the effect of any such antitrust law violations upon demand and supply, prices and profits, and methods and practices of distribution and marketing in interstate and foreign commerce of fertilizer, and to report to the House the results of its investigation. The Federal Trade Commission is authorized to make such investigations, and the work could have been done by the regular functioning of that body. If there were any irregularities they would have shown up, and if not no harm would have been done.

I also introduced a resolution asking the Attorney General of the United States to furnish to the House of Representatives such information as he had regarding corporate violations of the antitrust law occurring within the past five years, as evidenced by penalties imposed by the department or by the courts, within knowledge of the department, in respect of operations in fertilizer heretofore investigated by the department or the courts, and the results of such investigations. The information requested from the Attorney General was voluntarily furnished the House Judiciary Committee, but the resolution asking for investigation by the Federal Trade Commission was never passed upon on account of my physical inability to gather information and press hearing before the committee.

In January, within a few days subsequent to introduction of the resolution, I was ordered to bed by physicians and remained there until April. Within three days after getting out of bed, and before my return to the House, it was necessary to go to Georgia on account of the illness and death of my wife. Since my return to Washington I have been under daily care of physicians and only permitted within the last few days to return to the House. I have participated in no debates, have voted but few times, have made no speeches, and this is my only extension of remarks. During my illness and confinement to bed one man residing in the district which I have the honor to represent has been somewhat insulting to me. He seems to speak for himself and a few others around him, all of whom appear to be associated with one of the largest fertilizer concerns in the country. He has persistently written to me, though I have told him of my physical condition and the objections of my physician to my being annoyed with business or other matters. I am now threatened with opposition which I am quite sure emanates from this group on account of my position on the fertilizer question. My physical condition at this time is such that I shall not be able to actively engage in a campaign for several weeks at least. In fact, I will not be permitted to even remain in Georgia until the latter part of the campaign. They undoubtedly know this to be true. But, regardless of what opposition may be offered me, I shall stand true to my convictions. No fertilizer corporations or their subsidiary interests will ever dictate any legislative policy to me which I deem detrimental to the interest of the masses.

"A CLEAN BALLOT, CLEAN ELECTIONS, AND HONEST GOVERNMENT ARE THE BULWARK OF OUR LIBERTIES"

Mr. KENT. Mr. Speaker, Pennsylvania has a great historic background. Within its borders the Constitution of the United States and the Declaration of Independence were signed. Valley Forge, Brandywine, Germantown, and Gettysburg lend luster to her great name. She is great industrially, economically, and financially. But her political system is a byword among the people of the earth. Her system of taxation, the outgrowth of that system, rests most heavily in proportion upon her women and the helpless poor.

To-day, she is represented in the United States Senate by only one Senator, because of a condition, the exposure of which shocked the Nation. Groups of wealthy people contributed sums, the extent of which will never be known, in order to purchase the governorship, a United States senatorship, a legislature, and a representation in Congress. Six millions of dollars have already been traced into the pockets of corrupt politicians who, in the primary and general elections of 1926, attempted to control the legislative and executive functions which I have just mentioned. Most of this information was derived when the politicians began telling on each other before the Senate investigating committee and otherwise.

In 1924, in my own congressional district, over $75,000 was spent by Republican politicians to purchase a seat in Congress. I was deprived of the right to contest the corrupt but successful attempt to purchase this seat and count me out at certain of the polls, because, first the House elected then was partisan and the majority antagonistic, and second, because the supreme court of my State, in the Bailey-Walters election contest, failed to decide in time the right of Pennsylvania courts to review the ballot count and recount the votes in an election contest. We now have forced through the legislature an act which gives some relief and under which we can open the boxes. In 1926 over $63,000 was spent in my district by the same people to purchase this seat. Only the vigilance of my friends saved me from being counted out.

Why this activity in purchasing elections? Why do the so-called Republicans purchase a branch of the Democratic Party in Philadelphia and Pittsburgh? Why must these interests control the legislature and Congress? The answer is—because they must perpetuate their iniquitous system in order to control the taxing power of the State and Nation that the burden of taxation may rest upon those helpless poor people who make up the mass of our population.

The House will provide for a committee to investigate expenditures in congressional elections. I am profoundly grateful, as it will now give us an avenue through which we can proceed to find the names of the persons who desire to place tools and puppets in Congress who, instead of representing their people fearlessly, will take orders from their masters over a telephone.

I want to sound my word of warning to those big business men who continue to contribute to political campaigns. Their money is going into corrupt channels. People have somehow concluded that money is buying elections. It is bad for such an idea to prevail. Most of the real money of the land is in the bank accounts of the common people. These same people have the votes. So, with the money and the votes, some day a generation may arise in its might and assert a dangerously assumed power not now contemplated which will bring disastrous results.

The safety of our churches, our banks, schools, business houses, and all our beloved institutions rests in the sanctity of the ballot. Destroy public confidence in the purity of the ballot box and chaos will follow. Our institutions will fall and our Nation will be destroyed.

Therefore our men of wealth should tread cautiously in this matter. Their safety and that of their wealth rests with clean elections. Let the idea and ideal be persisted in as heretofore, that the poorest boy from the poorest home, from the poorest hillside in our land has equal opportunity with the wealthy boy. Let elections be the free expressions of public opinion, the crystallization of the sentiments of the people. If the present system continues, there will be holideys and field days for the millionaires of the land.

In the next session of this Congress I will introduce certain bills which, if enacted into law, will prevent debauchery of elections and the electorate. During the coming campaign I will have had opportunity to further study corrupt methods in politics and will base the proposed legislation upon that study.

SPEECH DELIVERED BY MR. MENGES, MEMORIAL DAY, MAY 27, 1928, ON THE UNITED STATES SHIP "PORPOISE"

Mr. MENGES. Mr. Speaker, under the general leave to print I insert the following speech delivered by me at the Memorial Day exercises on the U. S. S. *Porpoise*, May 27, 1928:

Ladies and gentlemen, veterans of the Civil and Spanish-American and World Wars, I regard this high honor to be asked to address you this morning at this peculiarly fitting ceremony of decorating the bosom of the Potomac River in commemoration of the services of those who died on sea or land in defense of the country and that this country might attain a higher standard of human freedom. In the words of Lincoln, we can not dedicate, we can not consecrate, we can not hallow their deeds. It is for us, the living, rather to be dedicated to the unfinished work which they who fought on sea and land so nobly advanced that this Nation under God shall have a new birth of freedom.

The new birth of freedom to which Mr. Lincoln referred is a freedom which will not endure slavery within its domain. It required 170 years of colonial life and experience before the Colonies were willing to unite to establish a freedom in which was retained the enslavement of a part of the human race. However inconsistent this action may have appeared to many of those who at that time saw this evil and likely knew what it would eventually lead to were obliged to acquiesce in its maintenance or not have united Colonies. When, however, the fullness of time had come, by some spontaneous action the minds of all the Colonies were driving toward the goal for the establishment of this freedom, and with one accord the Englishman, the Hollanders, the German from the Rhinish Provinces, the French Huguenot, the Scotchman, the Scandinavian, the Cavalier felt the impulse which swept them all into united action at Lexington, Concord, and Bunker Hill.

No nationality had a monopoly of advancing this freedom, because all of the colonists came here for the same purpose, namely, for the establishment of civil and religious freedom, each nationality in its own way, inspired by its hereditary ideas, worked out its notions of this freedom until it culminated in the adoption of the Declaration of Independence and in the welding together of the Colonies—though somewhat loosely—by the Articles of Confederation.

During seven long years on land and on sea autocracy and democracy were in a death grip for supremacy. Democracy, at enormous sacrifices to foes from without and enemies and traitors from within, and by providential interposition and the superior generalship of Washington, that king of men and greatest character in history, who, when all things seemed to fail, was calm and undismayed, and in his own personality made up for the inefficiency of Congress, the indifference of the States, the discontent of the people, compelled autocracy to surrender to democracy at Yorktown on October 19, 1781.

I shall confine my remarks to a résumé of the activities of our Navy. At this time the continental Navy and the navies of the various States—for each State virtually established and maintained its own navy—were well-nigh completely wiped off the ocean, and had it not been that De Grasse with the French fleet was master of Chesapeake Bay and prevented a junction of the British fleet with Cornwallis, autocracy would have been victorious at Yorktown and the struggle would have had to continue.

Though well nigh wiped off the ocean and likely at best quite inefficient the Continental and State navies served an invaluable purpose in the attainment of freedom. It was through these navies that the States were able to keep up connection with Europe and thus through our representatives plead our cause with European nations and peoples for recognition of our rights. They also interrupted and captured supplies of all kinds sent from England for the support of the British Army and diverted them to the use of the colonists. But these navies Federal and State did not only enable the Congress to maintain communication with Europe and intercept supplies immensely valuable to the Americans but it developed a number of the most intrepid sea fighters that ever existed, such as John Paul Jones, Thomas Truxton, David Porter, Isaac Hull, Edward Preble, Richard Dale, Stephen Decatur, Commodore Bainbridge, Oliver Hazard Perry, Thomas Macdonough, and many others. After the signing of the treaty of peace with the burden of the war debt and the jealousies between the Colonies, the fear that some one or more of the Colonies might attain a naval prestige that others would not measure up to, it was felt that the navies were a menace to a free country and an inhibition to the permanent union of the States and therefore within two years, in 1785, the United States had no navy at all.

In such questions facts are far more impressive than theories. The States adopted the Constitution—the Congress became more efficient—the people elected Washington the President, and a Nation came into existence. The jealousies which existed between the States were now transferred to the nations of Europe and our recent ally, France, became the first offender against our newly formed Nation. England and France were fighting each other and the war vessels of each country took and plundered American merchant ships without a word of excuse. In fact French cruisers regarded American merchant ships as lawful plunder and French privateers had the impudence to make captures in American harbors. The American people were soon up in arms against this kind of treatment and in 1797 three frigates were launched. The *United States* of 44 guns, the *Constellation* of 36 guns, and the *Constitution* of 44 guns. The *Constellation* was put in command of Thomas Truxton, a bluff old sea dog and a born fighter of Revolutionary days, who started prowling the seas looking for the biggest game of the French Navy.

February 9, 1799, the lookout sighted the French frigate *Insurgente* in the vicinity of the Leeward Islands. Truxton put about a chase and soon engaged her in a stand-up fight. In an hour the battle was over, and after the surrender of the *Insurgente* Lieutenant Rodgers and Midshipman David Porter, the famous captain of the *Essex* in the War of 1812, with a squad of 11 men brought her into the harbor of St. Kitts. February 1, 1800, the ever active Truxton was again in the neighborhood of the Leeward Islands, a large sail was reported, and immediately he gave chase, but on account of the calm did not catch up with the French frigate until 8 o'clock in the evening of the following day. The French frigate without hailing or being hailed opened fire on the *Constitution*. The battle raged from 8 o'clock until 1 in the morning, when the French frigate, a thoroughly beaten ship, ceased firing and began running away as fast as she could. These two victories were the only frigate actions of the war. At this time Napoleon had become the real ruler of France, and being at war with England he did not want to be at war with America, and therefore he opened negotiations for a treaty of peace and hostilities ended. This war, short as it was, cleaned out the French privateers in the West Indies, made the commerce of the United States safe in those waters, enormously increased our export trade, made the newborn Navy popular, and disabused the minds of the people of the idea that a man-of-war was a ready tool for tyranny. We may well decorate.

From the adoption of the Constitution on September 13, 1787, the true birthday of the Republic, down to 1816, the Barbary States—Morocco, Algiers, Tunis, and Tripoli—stretching along the southern shore of the Mediterranean for a distance of approximately 1,800 miles, were capturing American merchantmen, enslaving their crews, securing ransoms and tribute amounting to millions of dollars, and when their demands were complied with they continued their nefarious operations during more than a quarter of a century.

In 1815, under Decatur, a powerful fleet was sent into the Mediterranean and appeared before Algiers. Decatur in his report to the Navy Department says at the mouth of the cannon he dictated a peace which abolished tribute in any form forever, released all Americans,

and forced compensation for and restoration of all American property seized or in the Dey's hands. The admiral then visited Tunis and Tripoli, imposed similar demands, as well as forced the instant payments of indemnities for British prizes captured by American privateers taken into the ports of these countries, and at their connivance were seized later by the British. This action stiffened the backbone of all European nations. Brenton, the English historian, says: "Think of it, that England should tolerate what America has resented and punished." The Frenchman Dupuy, in his History of our Barbary Wars, says: "The statesmen of America, breaking loose from this unworthy yielding of Europe to the Barbary States, had in hardly 30 years broken the abominable tradition which the Christian powers had shamefully respected for ages. We may well decorate."

During the time we were fighting the Barbary States and eventually subdued them our commerce was suffering many times more from the depredations of France, as we have already indicated, and of England, as we shall see. Napoleon dominated Europe by land and England by sea; there was almost universal war on the Continent, which made neutral America the great carrier. Our trade increased by leaps and bounds and made us the object of the hatred and envy of the tradesmen of all lands, but more especially of England. She needed men and she did not hesitate to impress our seamen and take them from our merchantmen to man British merchantmen, until approximately 11,000 were taken in this way before war was declared in 1812.

Thomas Jefferson was President of the United States from 1801 to 1809, during the time when our commerce was between the upper and the nether millstone of England and French oppression. To make matters worse, the President and his Congress laid an embargo on our trade to spite England and France, or, in other words, they would not allow an American ship to leave our ports. It seemed that one of the things that Congress and the President did not comprehend was that man is instinctively a trader and that trade is the real civilizer and missioner.

In the War of 1812 there are three outstanding naval victories—that of the *Constitution* over the *Guerriere*, the Battle of Lake Erie, and the Battle of Lake Champlain. Capt. Isaac Hull, to whose undaunted courage we have previously referred, on August 19, 1812, some 400 miles southeast of Halifax, with his frigate the *Constitution*, met the British frigate the *Guerriere*. The battle began a little after 6 o'clock in the evening and before 7 the English frigate was dismasted and in a sinking condition, while the *Constitution* was practically uninjured and in a few hours was ready for action. The English crew was taken off the *Guerriere*, the ship was set afire, and in a quarter of an hour she blew up. The defeat, capture, and destruction of the *Guerriere* was a second shot heard around the world, it was a second declaration of independence, it rejuvenated the dormant spirit of 1776, it delivered a death blow to threatened secession and renewed the spirit of nationality. Previous to and more particularly during the Jeffersonian period we had basely submitted to any kind of insult; we were called spaniels and curs in the British press, hence the impression was fixed in the British and French minds that as long as our merchant ships might sail the seas at all we would submit to any humiliation. Thank God for Hull's victory; we may well decorate. We were obliged to pass over the activities of the American Navy on the ocean and take up the naval actions on the Great Lakes. Oliver Hazard Perry, reared in the naval school of Edward Preble at Tripoli, reached Erie March 17, 1813, and took charge of the construction of the warships then going on at this place, and in five months he had his little fleet, composed of the brigs *Lawrence* and *Niagara*, of 20 guns each, and eight schooners, one of 3 guns, six of 2 guns each, and one of 1 gun. On September 10 he met the British commodore, Barclay, with the brigs *Detroit*, of 19 guns, the *Charlotte*, of 17 guns, the *Lady Prevost*, a schooner of 13 guns, and three small craft of 10, 3, and 1 gun each. The battle began at 11.45 in the morning, and at 3 in the afternoon the British flag was struck. How Perry fought, the story of his ship the *Lawrence*, unsupported by the *Niagara*, until the *Lawrence* was a wreck, how he boarded the *Niagara*, took personal command, and carried her to victory with the limited resources at his command, is an action of courage unsurpassed in the annals of the sea fights of the ages.

The inspiring effects throughout the country were equal to those following the victory of the *Constitution*. But the concrete results of this victory were more far-reaching than any victory hitherto won. Detroit and Michigan were evacuated by the British and occupied by the Americans and to this victory and the success of Chauncey on Lake Ontario are due the preservation of our northwestern frontier in the treaty of Ghent. We may well decorate.

One other battle on the Lakes, because of its far-reaching consequences, must be referred to—that of Lake Champlain. A map of this region will show that beginning with the Richelieu River at the north and Lake George and the Hudson River on the south there is a well-nigh continuous waterway between New York and Montreal. The British recognized this, and as during the Revolutionary War, so again in the War of 1812 they endeavored to get control of this area and attain easy access to New York from their northern possessions. On account of the sympathetic attitude of the New England States adjoining this waterway, the English with little difficulty maintained control of it down to and including Lake Champlain. Master Commander Thomas Macdonough, who was with Decatur when he burned the *Philadelphia* during the war with Tripoli was put in charge of naval affairs on Lake Champlain. While Macdonough was constructing the vessels with which to meet the British they came down the lake and attacked him. He landed his guns and made such a strong battery of them that he drove the British back and after this was able to finish his vessels unmolested. On the morning of September 11, 1814, when all was in readiness Macdonough, being as devout as he was brave, mustered the crew of the *Saratoga* for prayer.

Macdonough had anchored under Cumberland Head in a line northeast and southwest with the *Eagle*, *Saratoga*, *Ticonderoga*, and *Preble*, in line with his gunboats to the west of these ships, so close to the shore that flank movements were about impossible. The British Captain Downie, after rounding Cumberland Head with his ships, was almost head-on to Macdonough's line. The action began, and within 15 minutes Captain Downie was killed and in 2 hours and 20 minutes the *Confidence*, the flagship of Captain Downie, hauled down her colors and surrendered. Macdonough, in his report to the Secretary of the Navy, says:

"The Almighty has been pleased to grant us a signal victory on Lake Champlain with the capture of one frigate, one brig, and two sloops of war of the enemy."

The immediate effect of this victory was the retreat of Sir George Prevost, Governor General of Canada, with an army of 12,000 men without firing a shot into Canada; and the permanent establishment of the territorial domain of the United States just as it was previous to the war of 1812. We may well decorate.

Our next naval action was in the war with Mexico, declared May 12, 1846. This was almost wholly a military war, with the exception of the occupancy and blockading of the Mexican ports and an occasional encounter with the Mexicans on shore. This war secured for us California and the fact that our naval vessels were on the coast of California before the British, whatever the intention of the British may have been, our presence there made possession doubly secure.

At the beginning of this address I said that the Colonies were obliged to acquiesce in the maintenance of slavery or not have a United States. In 1861 slavery had attained such an ascendency that it demanded the disruption of the Union to maintain its existence. Free and slave labor could not exist under the same government. As long as slave labor competed with free labor, free labor was enslaved. The overthrow of secessionism and slavery gave this Nation the new birth of freedom to which Mr. Lincoln referred in his immortal address, and to obtain this freedom the Navy played an unequaled rôle. With England devoting her sympathy, her finances, her shipbuilding capacity as well as other agencies to the South it became obviously necessary to blockade every port and the Mississippi River. The magnitude of this work is evidenced by the fact that there are 186 harbors and river openings in the Confederate coast line between Alexandria, Va., and Matamoros, 40 miles up the Rio Grande River. By December, 1864, we had 559 steam vessels in the blockading service carrying 3,760 guns and 51,000 men. The blockade became one of such rigor that of the 84 steamers, largely built in England, running between Nassau and the confederate ports, 37 were captured and 24 wrecked or otherwise destroyed, and the region west of the Mississippi was entirely cut off from the South.

This naval activity, though not as dramatic as the Battles of Gettysburg and the Wilderness, deprived the Confederacy of food, clothing, arms, ammunition, and medical supplies; compelled the surrender of General Lee; made the Union one and inseparable, and forever crushed slavery to the earth, from which she will never rise.

The Spanish-American War was largely a naval war. It compelled us to construct the Panama Canal and will compel us to more securely fortify and direct the operations of that canal. It secured for us a new place among the world powers. It drew together the North and South, and such generals as Fitzhugh Lee and Joseph Wheeler, who fought in the Confederate Army, now commanded volunteers under the Stars and Stripes. Porto Rico and Guam became possessions of the United States. The Hawaiian Islands were annexed, Cuba was made a protectorate, and the Philippines were purchased. Through the activities of our Navy American democracy has made its influence felt in every land of the globe and has implanted the ideas of the new birth of freedom into the breasts of all nations.

LEGISLATION IN CONGRESS OF INTEREST TO THE FIFTH CONGRESSIONAL DISTRICT OF KENTUCKY

Mr. THATCHER. Mr. Speaker, under the leave granted to extend my remarks I take the liberty of making this general statement concerning certain legislative enactments and appropriations made at this the first session of the Seventieth Congress which affect my own, the fifth, district of Kentucky, the State of Kentucky, and the general region in which I live. I believe that such statement will be of interest not only to my own constituents but to the people generally of my section of the country. I shall also include in this statement some reference to certain other legislative matters which are of more than local import.

ZACHARY TAYLOR NATIONAL CEMETERY

At a former session I introduced and secured enactment of the measure creating the Zachary Taylor National Cemetery in Jefferson County, Ky., near Louisville, within my congressional district, and an appropriation of $10,000 for the construction of the mausoleum in which have been placed the remains of our 12th President, Zachary Taylor—"Old Rough and Ready"—and those of his beloved wife. President Taylor and Mrs. Taylor found their last resting place in the old Taylor burial grounds in Jefferson County.

The mausoleum, constructed under authority of this act, is a handsome one, and fitting and appropriate for the required purpose.

The State of Kentucky thereupon appropriated $20,000 and purchased 15 acres of contiguous and very valuable land, and donated same to the Federal Government; and this acreage, together with about 2 acres theretofore owned by the State of Kentucky, and comprising these burial grounds, was all conveyed to the United States Government for the purpose of this Zachary Taylor National Cemetery. At a former session, Congress appropriated about $16,200 for the building of a keeper's lodge, and outbuildings, on this cemeterial tract; and at a recent session Congress made an additional appropriation of $24,215 to cover the cost of constructing an adequate stone wall or iron fence around the entire 17 acres involved, and to make the other needed improvements.

In addition, the fiscal court of Jefferson County is building a handsome carriageway through this national cemetery from the Brownsboro Road, the adjacent highway, a distance of several hundred yards, to the Taylor burial grounds, where the mausoleum is located, and where, also, there is located a handsome monument erected to General Taylor by the State of Kentucky some years ago. The cost of this roadway will be $10,000 or more.

Hence the State of Kentucky, the county of Jefferson, and the United States Government have all joined together in this highly praiseworthy work in the establishment of this national cemetery and in doing honor to the popular hero of the Mexican War and one of America's sturdiest and most patriotic sons.

The land constituting this national cemetery is beautiful bluegrass land. It is located about 4 miles from the city limits of Louisville and not far from the Ohio River. It is a part of the old farm or homestead purchased by Col. Richard Taylor, the father of Zachary Taylor, from James Madison, the fourth President of the United States, and his niece, Dorothy Madison, in the early days of the Republic.

When this roadway is built and the entire tract is inclosed by suitable wall or fence, and the proper planting of trees and shrubbery shall be made, the whole will constitute not only a beauty spot, but, as well, a sacred and patriotic shrine of the greatest inspirational value.

In addition is the consideration that a substantial portion of this tract will be available for burials of our soldier dead in the years to come. The present Cave Hill National Cemetery in Louisville, where thousands of those who participated in the Civil, Spanish-American, and other conflicts of the Nation are buried, will soon be exhausted as to burial space, and it is very fortunate that in the Zachary Taylor National Cemetery provision will be made for the sacred needs of this character through many years of the future.

UNITED STATES COAST GUARD STATION

At the recent session Congress appropriated the sum of $35,000 for the construction of a new and adequate Coast Guard station in the Ohio River at Louisville, Ky.

The present Coast Guard station there is more than a generation in age and, being of timber construction, has been in use so long that it is now in such poor condition that a new station is greatly needed. The indicated appropriation is available on the 1st of July, 1928.

The new station will have steel hull and modern superstructure, with an adequate tower searchlight. The new station, like the old one, will be of the floating type, with general anchorage on the wharf between Second and Fifth Streets in Louisville. This Coast Guard station is, I believe, the only one on a river in the United States.

The falls of the Ohio River have always constituted a great danger zone and for this reason, years ago, the Louisville Coast Guard Station was established, and has since been maintained. Throughout its history it has been manned by high-class, sturdy, courageous, efficient men; and all told, they have saved numberless lives from drowning at this point, and rescued boats, barges, and floating craft of a very large aggregate value. Recently there was constructed across the Ohio River Falls at Louisville a new navigation-power dam raising the pool level above the dam over 6 feet. This new dam is a mile and a half or more in length—this unusual length being necessary for power purposes—and as a result the river hazards in this general area have been greatly increased.

The present Coast Guard crew at Louisville, headed by Capt. Walter T. Farrell, are in every way maintaining the splendid service and traditions of the Coast Guard. They are performing a greatly humanitarian work in the most effective way. The new station will enable Captain Farrell and his associates to render even greater service in the future than in the past, because the type of the new station will make for greater efficiency.

Admiral F. C. Billard, the highly efficient commandant of the Coast Guard Service, recently visited Louisville in order to make a personal investigation of the situation there as regards the Coast Guard work, and for the purpose of determining the type and location required for the new station.

PROPOSED GEORGE ROGERS CLARK MEMORIAL LIGHTHOUSE

In this general connection I may suggest that I have pending in Congress a bill authorizing the appropriation of $150,000 for the construction of a George Rogers Clark memorial lighthouse at or near the head of the Louisville and Portland Canal and the falls of the Ohio River, and this bill has gone over until next session for consideration.

The purpose of the measure is to authorize the construction of a memorial of adequate character to commemorate the great work of General Clark in his conquest of the northwest territory, and in saving to the Union Kentucky and other States to the southward, during the Revolutionary period. General Clark made his headquarters and rendezvous on Corn Island near the head of the Ohio River Falls—now within the Louisville area. From this location and from the blockhouse or fort he built there, he sallied forth to enter upon his illustrious expeditions into the wild regions to the northward, with the result that he destroyed the British and Indian power in that region and won the whole of it for his country, and as well saved for the Nation the entire Kentucky region.

No other place is entitled to higher consideration as a spot for the memorialization of the great deeds of this "Washington of the West."

Should this bill become a law, it is expected that a tower of masonry will be constructed on the indicated site to be surmounted by a heroic figure of General Clark, with hand or sword uplifted and pointing toward the Northwest Territory which he conquered; such sword or outstretched arm or hand to bear at nighttime a flashing light which will be of real service to navigation at this point of danger. The Ohio River here is more than a mile wide, and throughout the year—especially at the flood and ice stages—the navigation dangers are very grave. The currents are hidden and treacherous, and small boats are constantly being rescued, together with their occupants, by the Coast Guard crew from destruction.

The suggested memorial would serve the splendid purpose of commemorating the life and deeds of a great hero and at the same time, with enhancement of the artistic value of the memorial, a practical need as well.

The fact that Congress at the recent session made an appropriation for construction of a George Rogers Clark memorial at Vincennes, Ind., should not militate against the lighthouse memorial. There is no reason why both spots should not be memorialized.

The site of Clark's military headquarters at Louisville has equaled if not exceeded for commemoration any other place rendered historic by exploits of General Clark. Aside from the question of memorial, the light referred to is greatly needed at Louisville, and this will be doubly true when next year the completion of the all-year, 9-foot navigable channel of the Ohio River from Pittsburgh to Cairo will heavily increase navigation on the Ohio River, which traverses the greatest industrial region in the world.

AMERICAN PRINTING HOUSE FOR THE BLIND

During the second session of the Sixty-ninth Congress I introduced and secured the passage of an act authorizing an increase of the annual appropriation for the American Printing House for the Blind, located at Louisville, Ky., from $50,000 to $75,000; and during the recent session I aided in securing the appropriation of $25,000 additional to the $50,000 appropriated for the fiscal year ended June 30, 1928, and also appropriation for the full $75,000 for the fiscal year beginning July 1, 1928.

This institution operates under the corporate charter granted by the State of Kentucky. It prints the books and makes the apparatus for the blind schools of all the States, the District of Columbia, and the Territories. Kentucky was the pioneer in the work of printing for the blind, and in this way the institution was originally organized by the State of Kentucky for the State's benefit. Its work attracted the notice of

all the other States, with the result that some years after it was established—nearly two generations ago—Congress authorized a small annual appropriation to be used in the printing of books and making of apparatus for the blind for distribution to the various schools for the blind throughout the States and Territories upon the blind-pupil basis.

The State of Kentucky has donated a very valuable site and buildings for the work of this institution, but does not receive one penny's worth of advantage over any other of the States or Territories by reason of such donation. Kentucky shares in the publications and productions of the American Printing House of the Blind exactly on the same basis as do all the other States and Territories. This institution has come to be the best and most important printing house for the blind in the entire world; and chiefly through the books published here the blind children of the country at large have had opened up for them the paths and highways of knowledge which theretofore were absolutely sealed.

The work involved is a great one, and no appropriation made by Congress is devoted to a more beneficent service.

APPROPRIATIONS FOR FLOOD RELIEF

During the recent session I cooperated with other Kentucky Members of the House and Senate in the work of securing appropriation of nearly $2,000,000 for the benefit of the sections of Kentucky—eastern and western—which were so cruelly ravaged by the floods of May, 1927. In these floods 99 lives were lost, a greater number than were destroyed in all the Mississippi Valley flood of 1927. In addition, nearly $60,000,000 worth of property was destroyed in these floods. My own district will receive no share of this appropriation because it did not suffer the flood ravages suffered by the other sections of the State which will receive these funds for the rebuilding of roads and bridges destroyed by these floods.

VETERANS' BUREAU HOSPITAL FOR KENTUCKY

Referring to the item of $1,000,000 carried in the recently enacted Veterans' Bureau hospital construction bill, for the construction of a neuropsychiatric hospital in Kentucky for World War veterans, I have been very glad, at the instance of the American Legion, to lead the effort for this highly meritorious project. The Director of the Veterans' Bureau will now make a survey of the neuropsychiatric needs in the Kentucky region for the purpose of determining the location of this new hospital, and a site will be chosen upon his recommendation, with the President's approval. The initial appropriation, made at this session, of $7,000,000, under the recently enacted $15,000,000 authorization bill for this and other new hospitals and hospital facilities in the country at large will be sufficient to cover the expenditures for the full first year's program under the bill.

NEW BRIDGE AT LOUISVILLE

Another piece of legislation of interest to the people of my section enacted at this session was the measure which I had the honor to introduce and sponsor authorizing the construction—at an estimated cost of $5,000,000—and operation by the city of Louisville of a new highway bridge across the Ohio River between Louisville and Jeffersonville, Ind. The tolls to arise from the operation of the bridge have been pledged as security, and the funds for the bridge's construction have been borrowed by the city of Louisville, and the contracts for the various features of construction are now being let. This bridge will greatly augment the progress and prosperity of Louisville and her sister cities at the Ohio River Falls and will prove of the highest value as an adequate link in highway travel north and south through this region of the country. Ultimately, when paid for, the bridge will become toll free except to the extent that tolls may be required for maintenance and operation purposes. I have heretofore made a more detailed explanation of this project and same is to be found in the CONGRESSIONAL RECORD of an earlier date.

NEW FEDERAL BUILDING

A matter in which the people of my district have been particularly interested—especially those residing in the city of Louisville—has been the securing of authorization and appropriations for the purchase of a new site and the construction of a new Federal building at Louisville.

The present Federal building site is at the northeast corner of Fourth and Chestnut Street, Louisville, and is a very valuable piece of real estate, being in the very heart of the retail district of the city. It is built along old-fashioned lines; it contains a great deal of waste space; and has come to be altogether inadequate to house all of the Federal activities at Louisville.

Because of the great value of the present site it can be sold at a high figure, and the proceeds of sale should equal, or nearly equal, the cost of a new building and site, since a new site can be purchased at a much lower figure than the value of the present site. Moreover, the construction of a new Federal building will permit the inclusion therein of space and quarters sufficient to house all of the Federal activities in Louisville, including the Federal courts, the post office, and offices of internal revenue collector for Kentucky.

At a former session of Congress I introduced a separate bill authorizing the sale of the present building and site, and the purchase of a new site and the construction thereon of a new and adequate Federal building. At the same session, and after this bill was introduced, the Public Buildings and Grounds Committee of the House formulated and introduced a bill providing for a general building program throughout the country. This measure did not relate to any particular projects, but proposed a departure and a new system upon the subject of public buildings. I supported the bill because I believed it would permit a public-building program which had been lying dead for many years, to be revived. The enactment of that measure rendered unnecessary the enactment of the separate bill as regards the new Federal building for Louisville, and it prescribes the procedure which I have since followed in working for the Louisville project.

At the last session of the Sixty-ninth Congress I secured the inclusion, in the public buildings appropriation bill prepared under the authority of the general public building bill just referred to, of an authorization for the sale of the present Federal building and site at Louisville and the purchase of a new site and the construction thereon of a new Federal building, and this appropriation bill passed the House with the Louisville item included, but failed to pass in the Senate because of the filibuster in that body on other matters occurring at the close of that session.

This made it necessary to take up the matter anew at the recent session—that is to say, at the first session of the Seventieth Congress. This I was very glad to do; and in the regular Treasury-Post Office appropriation bill passed at the recent session there was included therein a new authorization for the sale of the old building and site and the purchase of a new site, and the construction of a new building, at an estimated cost of $2,800,000. The language in this appropriation bill authorized the sale of the present building and site at a price of not less than $2,500,000, but the purchase of a new site and the construction of a new building are not dependent upon the sale of the old building and site. In this appropriation act there was appropriated the sum of $700,000 to cover the cost of purchase of a new site, with something remaining for starting the new construction. This appropriation measure passed both Houses and was signed by the President and became a law. The $700,000 appropriated thereunder for the Louisville project immediately became available.

The Treasury and Post Office officials authorized by law to handle such matters immediately made surveys of the Louisville situation for the purpose of selecting a new site, and they are engaged in the making of such surveys. I have urged—and these officials have given every assurance—that every effort shall be made to expedite the selection and acquisition of a site and the construction of the new Federal building.

The United States Government is spending at Louisville large sums of money for rentals because the present Federal building is altogether inadequate to house some of the more important of the Federal activities in this city. These rentals, in net cost to the Government, are amounting to $50,000 a year or more, and they will be saved if and when an adequate new Federal building is provided.

It will require between two or three years to construct the new building and to render it fit for occupancy after the site is acquired.

The new Federal building for Louisville of the indicated character is costing, together with site, nearly three millions of dollars, and will constitute another milestone in Louisville's march of progress; and I have been very glad to do what I could to aid in securing the legislation and appropriation necessary therefor. In this work I am pleased to acknowledge with appreciation the cooperation rendered by Senator SACKETT, and the Treasury and Post Office officials whose duty it has been to deal with the subject in an administrative way. These officials upon the showing of fact which it has been my pleasure to assist in providing for their consideration, made the necessary recommendations upon which the required legislation was based.

GORGAS MEMORIAL LABORATORY

I shall now mention a matter of both national and international interest.

I was very glad, indeed, to introduce and secure the enactment of a bill authorizing an annual permanent appropriation of

$50,000 as a contribution of the United States toward the operation and maintenance of the project—the Gorgas Memorial Laboratory on the Isthmus of Panama. The measure received unanimous votes in the House and Senate, and the approval of the President; and thereupon, Congress, in the second deficiency appropriation bill, included an item making the first appropriation of $50,000 for the fiscal year beginning July 1, 1928. As was pointed out in the hearings on the bill and in my presentation of the measure in the House at the time of its passage by the House, the far-reaching and beneficial results to our own country, as well as to the world at large, which will result through the operation of this great laboratory in intensive research study touching the causes and prevention of tropical and other diseases, will be beyond estimation.

CONCLUSION

The legislation and appropriations which I have mentioned have been worthy in every sense, and I am grateful for the fact that I was able to be of service in regard to them. Each matter has stood upon its merits, and has been approved by Congress after full and careful consideration in the committees and in the two Houses; and thereupon each received Executive approval.

MY FIRST REPORT TO THE CITIZENS OF THE THIRD CONGRESSIONAL DISTRICT OF OKLAHOMA

Mr. CARTWRIGHT. Mr. Speaker, the first session of the Seventieth Congress has ended. This, my first report because of the multiplicity of important legislative matters that come up for consideration, must be very brief.

The Seventieth Congress convened December 5, 1927, the Members of which were elected in November of 1926. As you doubtless know, each Congress has two sessions—a long session and a short session. The one just closed was what is known as the long session and continued from December 5 to May 29.

It might be of interest to note that during the session of Congress just ended there were 4,577 bills introduced in the Senate and 14,143 bills introduced in the House. In addition to these bills a large number of resolutions were introduced.

It is difficult to realize the vast amount of work that comes to the attention of the average Congressman every day. I mean by this statement not only the legislation which has to be considered in the committees and in the House of Representatives but also the many personal-service requests which arrive in every mail—requests for assistance in pension cases, compensation claims, civil-service examinations, immigration and passport matters, appointments to West Point and Annapolis, pardon cases, recommendations for transfer, furnishing of publications, especially Indian matters from my district, and innumerable minor matters, all of which enable the Congressman to be of service to his constituents.

This report is submitted with the hope that it will stimulate thought and a deeper responsibility relative to the work of Congress, and enable you to some extent determine to what degree I have represented you.

During the session I have not been absent from any of the important roll calls. An inspection of the official voting records will show my record of attendance to have been very high. I cast my vote on every question according to conviction and having in mind the best interests of the people. I appreciate the splendid cooperation that has been given me by individuals and groups in the district. Although Congress has adjourned until next December, my office at Washington will remain open to serve the people of our district.

I regard it a very great honor to be the Representative of our district in the greatest and most powerful legislative body in the world. I am therefore profoundly grateful to all for the confidence reposed in me, and I shall be in a position to render more effective service during a second term.

COTTON INVESTIGATION

Mr. RANKIN. Mr. Speaker, early in the session I called the attention of the House to the manner in which the cotton market had been manipulated by certain powerful interests, aided and abetted by the unwarranted and disastrous misconduct of the Bureau of Economics of the Department of Agriculture in giving out its price-decline prediction on September 15, 1927.

Shortly after I brought this subject to the attention of the House a resolution was passed by the Senate providing for an investigation of this proposition, and the Members of the Senate appointed under that resolution kindly invited me to sit with them and assist in the examination of the witnesses. For nearly 90 days we conducted this investigation. We had witnesses representing every phase of the cotton industry and their testimony substantiated every charge that I made on the floor of the House, and revealed a condition in our present cotton-marketing system that is proving ruinous to the cotton farmers as well as to those legitimately engaged in the cotton trade.

We found that certain large interests have successfully manipulated the cotton market for their own financial gains over a long period of years, and especially during the last three years.

I charged in my opening statements that a large stock of cotton had been concentrated at New York, a large percentage of which was inferior in grade, character, and quality, and was being used to depress the cotton market. That statement was denied by persons interested in those stocks of cotton, so we ordered a reclassification of it, with the result that 172,002 bales were reclassed and 6,761 bales were found to be untenderable under the standard used, which standard, or "yardstick," was furnished by the representatives of the Bureau of Agricultural Economics as the standard used by them. Practically every representative of the spot exchanges selected to reclassify this cotton testified that this standard was shy of seven-eighths. Mr. W. J. Kenney, jr., stated over his own signature that—

in my opinion it is nothing but three-fourths cotton.

In the final report of the committee we find the following colloquy:

Senator SMITH. What was the average of those [meaning standards] that they [the representatives of the Bureau of Agricultural Economics] put on the table?

(Many cries of "Shy.")

Mr. SHEPHERD. I would say they were shy.

Senator SMITH. What do you say, Mr. Skaggs?

Mr. SKAGGS. They varied.

Senator SMITH. Next.

Mr. MORROW. I would say they were shy.

Senator SMITH. Next.

Mr. JONES. Shy.

Mr. CAVANAUGH. Shy.

Mr. BLACK. Shy.

Mr. SMITTON. Shy.

Mr. LOGAN. I would say they varied.

Mr. NOBLE. Shy.

Mr. WITHERSPOON. My opinion is it is the Government standard of seven-eighths the same as we have in Houston. It may be shy of what the trade demands.

Thus it will be seen that practically all of the distinterested cotton classers agree that the standard by which this cotton was classed was shy of seven-eighths, and Mr. Kenney testified that in his opinion it was not more than three-fourths of an inch.

Mr. T. Ralph Jones, of Norfolk, Va., who was in charge of the work of reclassifying this cotton, in his supplementary report, said:

Different ones of the classers sent from the six spot exchanges estimated the day before the work was finished that had the cotton been classed against a true seven-eighths inch standard, or even the new standard that goes into effect in 1929, that all the way up to 40 per cent of the remaining stock would have been thrown out. I would say that the average estimate was approximately 25 per cent, and I believe this is nearly correct. Or, in numbers, about an additional 40,000 to 41,000 bales would have been thrown out.

In other words, if a real seven-eighths standard had been used for reclassifying this cotton, more than 40,000 bales of it would have been rejected. Yet these 40,000 bales were tendered and retendered on the New York Exchange with the result that it hammered the market down from about 25 cents a pound to between 16 and 17 cents a pound, or at least contributed largely to that result, which cost the cotton farmers and the small cotton merchants over the country hundreds of millions of dollars.

Not only that, but on September 15, 1927, like a clap of thunder from a clear sky, came the unwarranted and unprecedented price decline prediction from the Bureau of Agricultural Economics of the Department of Agriculture in which they padded the carry-over of American cotton in foreign countries by about 800,000 bales.

After admitting that the ravages of the boll weevil were increasing to the extent that they would possibly destroy the top crop, they then reached into thin air and added to the stocks of American cotton in foreign countries 800,000 bales that never existed and predicted a decline in the price of cotton, precipitating a break in the market which, together with the manipulations above referred to and other influences to which I shall refer, drove the cotton market down about 8 cents a pound, with the most demoralizing consequences to the people of the cotton-growing States. In addition to this, the organization of spinners, which was represented before the committee by Hon. Walker D. Hines, joined in the "bear" raid and announced that they were going to curtail production, and some of

them even rushed into the market and offered cotton for sale. They did this in the face of the fact that everyone knew that the crop would be at least 5,000,000 bales short of what it was the year before. How any sane man can escape the conclusion that there was a conspiracy among these elements to depress the price of cotton I am unable to understand.

Lloyd S. Tenny, Chief of the Bureau of Agricultural Economics, came before the committee and, without any explanation that really explained, brazenly attempted to justify the conduct of his board in giving out this price-decline prediction, which was evidently inspired by outside influences. I told him at the time that if he did not resign his position we were going to demand it. He has since resigned and taken a position, so I understand, with the fruit growers of California. N. A. Olsen, who was mysteriously unable to explain his conduct in formulating this price-decline report, has been elevated to Tenny's place. Olsen's testimony before the committee showed that he was either reckless of the interests of the cotton farmers, grossly ignorant of the consequences of his own misconduct, or else actuated by outside influences in helping to formulate and promulgate this unwarranted price-decline prediction, which broke the cotton farmers and wrecked the cotton trade.

This unmitigated and brazen effrontery on the part of the Department of Agriculture in elevating this man, Olsen, to the position of Chief of the Bureau of Agricultural Economics is sufficient to arouse the indignation of every farmer and every honest Representative of the agricultural States in the House and Senate. If the Bureau of Agricultural Economics will thus conspire to wreck the cotton farmers, they will do the same thing for the wheat farmers, the corn farmers, the dairy farmers, and all other farmers whenever the same provocation presents itself. If the Bureau of Agricultural Economics is going to persist in violating the law, giving out false and unwarranted statements, issuing reports and predictions, if not for the purpose of, certainly calculated to, injure the farmers of this country, the sooner it is abolished the better it will be for those who have to wring their living from the soil.

We formulated legislation, which, in my opinion, would have corrected the present evils in our cotton marketing system, but it was blocked by those who camouflaged their insidious opposition behind a smoke screen of southern deliveries in order that their operations might not be interfered with. But we are not entirely without a remedy. Our committee has the right to convene at any time these manipulators and their cohorts renew their misconduct, summon them before it, and proceed to investigate their operations to the fullest extent.

I expect to renew this fight at the next session of Congress and to continue it as long as I am in public life or until we have freed the cotton market of these baneful influences, and given to the cotton growers and the cotton trade an untrammeled market free from squeezes, hedges, manipulations, and inspired bureau propaganda. I hope that every Member of the House and Senate, especially from the cotton-growing States, will join me in this fight, the success of which will mean more to the farmers of the South than anything Congress has accomplished within recent years.

SEVENTY YEARS OF NATIONAL PROGRESS

Mr. WOOD. Mr. Speaker, another presidential campaign is at hand. The hour of national conventions with their keynote speeches and their platforms is about to strike. It is pretty well understood what the Republican Party will do. Since it first won the Presidency and attained control of the Government 68 years ago it has held to a consistent course. It has never wavered in its support of fundamental economic policies. It has never seized upon a fake issue in an attempt, out of desperation, to win a campaign. It has always been the party of sound money and safe financial management of public affairs. It has always been a party of protective tariff designed to maintain the American standards of living by protecting American industry and American agriculture, which insures the welfare of the industrial wage earner and the man on the farm. Contrary to 50 years of Democratic misrepresentation that it is controlled by predatory wealth and animated by sinister motives, a review of national legislation for two generations shows that the Republican Party has placed upon our statute books practically every law which has for its purpose the improvement of the rank and file of American citizens.

The Republican Party has never followed strange gods. It has never indulged in political hallucinations. It has never sought to win a Presidency or carry a Congress by compromising with destructive influences and uneconomic forces. Sooner or later intelligent and patriotic Democrats have had to support the Republican Party in State and national elections in order to preserve American institutions and insure American progress. For that reason there is no doubt as to the general outline of the platform which the Republican Party will adopt at Kansas City, no doubt that it will nominate a candidate who will stand upon the platform and will go before the people as the representative in spirit and in fact of those principles and policies which have animated the Republican Party since the days of Abraham Lincoln.

DEMOCRACY'S RECORD OF NULLIFICATION OF FEDERAL CONSTITUTION

On the other hand what may we expect from the Democratic Convention at Houston? It is strangely fitting in view of that party's record that it should hold its convention in the State of Texas and have for its host Texas democracy which no later than 1923 enacted a law (sec. 1, ch. 32, of the acts of the Thirty-eighth Texas Legislature) which disfranchised all Negro citizens from participating in any Democratic Party primary held in that State. The text of that section reads as follows:

> All qualified voters under the laws and constitution of the State of Texas, who are bona fide members of the Democratic Party shall be eligible to participate in Democratic Party primary elections, providing such voter complies with all the laws and rules governing party primary elections; however, in no event shall a negro be eligible to participate in a Democratic Party primary election held in the State of Texas and should a negro vote in a Democratic primary election, such ballot shall be void, and election officials are herein directed to throw out such ballot and not count the same.

It is significant in view of the likelihood, according to all political prophets, of the nomination at the Democratic Convention of a candidate for President who is on record in favor of the nullification of certain parts of the United States Constitution which do not please him and certain of his constituents, that the convention which nominates him should be held in a State in which a solid Democratic legislature enacts a law nullifying the fourteenth and fifteenth amendments of the United States Constitution. There is no doubt that Texas Democratic law did nullify the Federal Constitution. A decision of the United States Supreme Court delivered March 7, 1927, by Justice Holmes declared the law unconstitutional. Toward the close of the opinion Justice Holmes in delivering the unanimous opinion of the court said:

> The important question is whether the statute can be sustained. But although we state it as a question the answer does not seem to us open to a doubt. We find it unnecessary to consider the fifteenth amendment, because it seems to us hard to imagine a more direct and obvious infringement of the fourteenth. That amendment, while it applies to all, was passed, as we know, with a special intent to protect the blacks from discrimination against them.

ANDREW JACKSON WOULD BE RUN OUT OF PRESENT-DAY DEMOCRACY

No doubt at the coming Democratic National Convention there will be a great deal said about Andrew Jackson, but there will be nothing in the remarks of either of the keynoters at that convention or in any of the nominating speeches emphasizing the historical fact that the thing which made Andrew Jackson a heroic figure, the outstanding spectacular act of his public career, was his threat to hang a number of gentlemen in South Carolina if they attempted to set aside and nullify Federal laws. No reference will be made to this fact because, as it now appears, the presidential nominee of the Houston convention will base his fight largely upon the fact that he does not believe in some of our Federal laws enacted to enforce the Federal Constitution, and as chief executive of his own State he has aided and abetted legislation to prevent that State from assisting in the enforcement of Federal laws.

If any Democrat at Houston attempts to take the stand that Andrew Jackson took against nullification of the Federal Constitution he will probably be mobbed by the overheated partisans of the convention's favorite candidate.

There will be another subject which will be taboo at the Houston convention. That is the attitude of Andrew Jackson upon the subject of a Federal bank. Andrew Jackson did not believe in a Federal bank. With the one exception already noted, his outstanding policy was violent opposition to the establishment of a national banking system. In that position he was sustained by the Democratic Party not only of his own time and under his own leadership, but for many years subsequent. In 1856 the platform of the Democratic National Convention contained this plank:

> Congress has no power to charter a national bank; we believe such an institution one of deadly hostility to the best interests of the country, dangerous to our institutions and the liberties of the people, and calculated to place the business of the country within the control of a concentrated money power above the laws and the will of the people.

No doubt one of the delegates to the Houston convention will be Senator CARTER GLASS, of Virginia, and another will be

Senator Hitchcock, of Nebraska, who is mentioned as one of the favorite-son dark horses, while one of the leaders of the Texas Democrats is Colonel House, the silent adviser of the late President Wilson. Yet to-day these Democratic leaders are engaged in a public quarrel as to which of them contributed the most to the creation of the present Federal banking system.

Andrew Jackson was a protectionist. He was a high-tariff protectionist. When he was in the United States Senate he gave support by his voice, his influence, and his vote to high protective measures. There will be no mention of this fact at the Houston convention.

DEMOCRATIC PARTY NEVER HAS ANY ABIDING PRINCIPLES

How typical of Democracy! Those things which it supports to-day with the solemn declaration that they are sacred and fundamental it repudiates to-morrow. Those things which it denounces to-day as tyrannical and inimical to the liberties of the American people it advocates within a few years—after the Republican Party has demonstrated beyond the shadow of a doubt the wisdom of such policies. The Democratic Party has twice embraced the destructive fallacies of cheap money and twice has abandoned its position because it was overwhelmingly repudiated by the American people. It nominated and, with a frenzy that was almost fanatical, it supported a candidate who was the evangel of cheap money and who denounced Wall Street and all who were on speaking terms with Wall Street as the arch enemies of American institutions and popular government. Yet the very next nominee the Democratic Party selected was from the heart of Wall Street, who believed everything that its former candidate denounced and denounced everything its former candidate had espoused.

In one campaign the Democratic Party was positive free silver was the paramount issue and would remain the paramount issue until it was settled by having free coinage. In the next campaign it had decided the money question was no issue at all but that the question of "imperialism" was the paramount issue. Imperialism, according to the definition of its candidate that year, was the denying to the black and brown men of far-away islands the right of self-government and the privileges of citizenship; yet at the very time he was preaching this doctrine in an effort to talk his way into the White House the Democratic Party organization in every State south of the Potomac and Ohio Rivers was denying the rights of citizenship to the black men in this country, although those rights were guaranteed them by the Federal Constitution.

The next paramount issue the Democratic Party paraded before the American people was Government ownership. It went the way of all Democratic paramount issues. The Democratic Party fought one campaign and won the election upon the false slogan, "He kept us out of war," with the promise that if reelected the same President would continue to keep us out of war, while every Democratic executive connected with the Federal Government knew at the very time the campaign was being waged on that deceptive basis that the Federal administration was straining every nerve and mobilizing every resource in preparation to enter the war, well knowing at that time that such entrance was inevitable. And within 30 days from the time the President elected on that slogan was inaugurated the United States did enter war.

In the last campaign, after a 10-day fight in the Madison Square "Bear" Garden, during which time the various factions and leaders of Democracy said more disgraceful things about their party associates than all the Republicans have said in 50 years, the party compromised by nominating a hard-shelled Wall Street conservative lawyer, every inch a gentleman, without the trace of demagoguery about him, and then to prove to the other element of its party that it did not have any faith in its presidential nominee it selected the most radical demagogue west of the Mississippi River as his running mate.

If it runs true to its record and its career the Democratic Party at Houston this year will perform something of the same feat. It will probably nominate a "wet" as President, one who believes in the nullification of those portions of the Constitution his wet constituency does not approve. He will probably be the product of the sidewalks of New York. He will probably be the product and one of the leaders of Tammany Hall. He will have no knowledge, either real or theoretical, of the agricultural section of the United States, because he has never in his public career expressed an opinion ever so trivial upon any subject related to agriculture.

In making this prediction regarding the probable nominee of the Democratic Party at Houston I am not flattering myself that I am a prophet, for all political signs and all political opinion points inevitably to his nomination. If he is the nominee, the Democratic Party will just as certainly repeat the same tactics it repeated four years ago in selecting as his running mate a man exactly his opposite, in the fond illusion that such a mismated ticket can by working both sides of the street succeed in catching enough votes to win.

DEMOCRATIC PARTY'S CONTRIBUTION TO CORRUPTION IN PUBLIC OFFICE

I have no doubt, furthermore, in view of what has already been said upon the floor of the Congress, upon the public platform at Democratic gatherings, and in the editorial columns of Democratic newspapers, that the convention at Houston will have a great deal to say about corruption. But there are a great many things upon the subject of corruption which it will not say.

It will not say that corruption and graft in the great Democratic State of Texas has been notoriously continuous for the last five or six years, occupying first-page positions in the newspapers, splitting the Democratic Party in that State wide open, keeping a large percentage of the Democratic State officials standing trial on criminal and civil charges in the State courts, resulting in the disfranchisement by court decision of one of its governors.

In making its observations upon corruption the Democratic convention at Houston will make no mention of the fact that in the solid Democratic State of Oklahoma for nearly a generation, beginning with Theodore Roosevelt's exposé of the Democratic Governor Haskell and continuing until a few weeks ago, when the Democratic legislature called itself into session in order to impeach the Democratic governor for alleged corrupt practices, only to be run out of town by the State militia upon his command, corruption has been the issue in every Democratic primary.

It will not have anything to say of the fact that less than two months ago the Democratic attorney general of the State of Alabama after sincere efforts to convict criminals of that State holding high positions in the Democratic Party publicly announced his intention to nolle prosequi all indictments on the ground he was unable to secure convictions on account of the influences of high Democratic State officials who were interested in protecting the criminals and suppressing the evidence.

The Democratic Convention at Houston will have nothing to say regarding the fact that Democratic State officials of Nevada have been found guilty of stealing something between $500,000 and $1,000,000 of the State funds.

The Democratic Convention at Houston will have nothing to say regarding the fact that the government of the State of Arkansas two or three years ago under Democratic control became so corrupt in the handling of public highway funds that the Federal Government had to refuse to continue to extend Federal highway aid in the State until a reform was brought about.

TAMMANY-CONTROLLED NEW YORK CENTER OF OFFICIAL GRAFT AND CORRUPTION

Above all, none of the keynote speakers at the Houston convention, none of those who make nominating speeches, and certainly not the platform that shall be adopted, will have anything to say regarding the wholesale organized graft and corruption, widespread and far-reaching, which exists in New York City with its center in Tammany Hall, one of whose four leaders is Governor Smith, who will undoubtedly be the nominee of the Houston convention. There will be nothing written in the Houston platform upon the subject of corruption having the least reference to the fact that corruption and graft to the extent of tens of millions of dollars have already been unearthed in Tammany-controlled New York City, involving practically every municipal activity—schools, milk, water, school houses, paving, push-cart licenses, bus franchises, city pay rolls, real estate assessment, and that portion of the judiciary which is reached by municipal magistrates.

Already it has been disclosed in court that the milk supply of New York City has been polluted by Tammany Hall grafters, Democratic politicians, ballyhooers for the Democratic nominee for President, who have put in their pockets not less than $34,000,000, a liberal portion of which was passed on to Tammany Hall for the privilege of being permitted to continue such graft at the expense of the lives and health of New York's children.

Already it has been disclosed in open court that the pay-roll graft so far exposed—with new disclosures daily—of the street-cleaning department operated by Tammany Hall amounts to $26,000,000 and the graft in school construction already unearthed—and the investigation has scarcely commenced—totals over $150,000,000. It has been disclosed in open court that the city pay roll in only one section—the East Side, where the Democratic favorite is most popular—was padded to the extent of $27,000 in three months!

All these grafters are Democratic politicians. The chief beneficiary is Tammany Hall. The graft is going on under the

administration of Mayor Walker, a Tammany Hall politician selected for the job by Gov. A. E. Smith, one of the "Big Four" of the Tammany inner circle.

There will be a great deal said in the Houston platform regarding corruption, but as the campaign goes on there will be a great deal said about corruption that will not be mentioned in the Houston platform.

There will be considerable said in the Houston platform and from the speakers' rostum regarding campaign contributions but in all probability there will be no mention of the fact that, under oath before the Senate Investigating Committee, it was disclosed that with the campaign in behalf of New York's favorite son just beginning, with an expenditure of $103,000 in behalf of that candidate, $70,000 of it was contributed by the head of one of the largest contracting concerns in the State of New York. Think of the possibilities in event Tammany Hall gets in control of Federal affairs, and Tammany methods now in vogue in connection with New York City contracts are applied nationally.

No doubt in this campaign, as in previous campaigns, the Democratic Party will endeavor to make an appeal by a campaign of misrepresentations of the facts both as they affect the Republican Party and as they affect the Democratic Party. It will upon the part of the Democrats be a campaign of evasion, of denunciation, of wild accusations, of unsubstantiated charges, a campaign devoted to dodging the real issues and emphasizing fake ones.

On the other hand the Republican Party will go before the people upon the record made by seven years of Republican administration. It is a record which has no equal in the history of constructive statesmanship in this country or any other country.

REPUBLICAN PARTY ALONE HAS STOOD FOR SOUND FINANCIAL POLICIES

Take the field of public finance. The Republican Party has been that party which, consistently and alone, has stood for the past 70 years in support of sound and sane financial policies in connection with the administration of our Federal affairs. During that period it has resisted strong temptation and terrific pressure upon several occasions to depart from the paths of financial wisdom, and has witnessed its opponent, the Democratic Party, following every financial will-o'-the-wisp and advocating every political vagary in order to play up to the unthinking, the unsuccessful, and the "lunatic fringe" which is always found advocating some wild-eyed fiscal theory.

The first responsibility which the Republican Party had in the realm of public finances was to provide revenue to conduct the Civil War and preserve the Union. It did this despite the fact that nearly half the Nation was in open arms against the Federal Government, despite the fact that those in open rebellion had a horde of influential sympathizers in the North who persistently back-fired the Republican administration under the leadership of Lincoln, and despite the fact that the largest financial nations abroad were sympathetic with the aspirations of the Southern Confederacy. The Republican Party financed the Civil War and by financing it preserved the United States of America to its present glorious position in the family of nations.

Following the Civil War came the period of reconstruction and the liquidation of the liabilities incurred by the prosecution of the war. So terrific was the drain upon our Federal resources and so antagonistic to our Federal Government were the financial powers of the world that at one time our paper currency, which was issued during and subsequent to the Civil War, was worth less than 40 cents on the dollar.

DEMOCRATS DECLARED FOR BOLSHEVIST CURRENCY

The Democratic Party at this crisis in our national history went on record in favor of continuing the régime of cheap paper money, setting the precedent by its position for exactly the same kind of finance with which the people of this day are familiar in the experiences of Germany and Russia, both of which have since the World War sought to find a way to easy payment of war obligations by a flood of paper money limited only by the capacity of the printing press. The Democratic Party in its platform of 1868 expressly protested against the payment of any public obligations in coin unless it was so stipulated in the contract. On the other hand, the Republican Party in its platform of 1868 stated:

> We denounce all forms of repudiation as a national crime, and the national honor requires the payment of the public indebtedness in the utmost good faith to all creditors at home and abroad, not only according to the letter but the spirit of the laws under which it was contracted. The national debt, contracted as it has been for the preservation of the Union, should be extended over a fair period for redemption; and it is the duty of Congress to reduce the rate of interest thereon whenever it can be honestly done. The best policy to diminish our burden of debt is to so improve our credit that capitalists will seek to loan us money at lower rates of interest than we now pay, and must continue to pay so long as repudiation, partial or total, open or covert, is threatened or suspected.

For the next 12 years the Democratic Party consistently stood in favor of repudiation of debts honestly made by paying them off with cheap paper money not worth its face value, and they sought, furthermore, to prevent the return to specie payment. On the other hand, the Republican Party steadfastly stood for sound money, the payment of all debts in coin worth 100 cents on the dollar as the only means of restoring both public credit and private confidence. The Republican Party was successful. How successful is best set forth in its platform of 1880, in which it made a review of its fiscal accomplishments during the reconstruction period following the Civil War:

> It has raised the value of our paper currency from 38 per cent to the par of gold; it has restored, upon a solid basis, payment in coin of all national obligations, and has given us a currency absolutely good and equal in every part of our extended country; it has lifted the credit of the Nation from the point of where 6 per cent bonds sold at 86 to that where 4 per cent bonds are eagerly sought at a premium.
>
> Under its administration railways have increased from 31,000 miles in 1860 to more than 82,000 miles in 1879.
>
> Our foreign trade increased from $700,000,000 to $1,150,000,000 in the same time, and our exports, which were $20,000,000 less than our imports in 1860, were $265,000,000 more than our imports in 1879.
>
> Without resorting to loans it has, since the war closed, defrayed the ordinary expenses of government besides the accruing interest on the public debt, and has disbursed annually more than $30,000,000 for soldiers' and sailors' pensions. It has paid $880,000,000 of the public debt and, by refunding the balance at lower rates, has reduced the annual interest charge from nearly $150,000,000 to less than $89,000,000.
>
> All the industries of the country have revived, labor is in demand, wages have increased, and throughout the entire country there is evidence of a coming prosperity greater than we have ever enjoyed.

It is not necessary to review at this time the next great financial battle in which the two parties engaged, the Republican Party on the side of sound money and a national credit based upon public integrity, with the Democratic Party aligned in behalf of that greatest of all financial heresies, the free and unlimited coinage of silver at the ratio of 16 to 1. The Republican Party maintained its position in the face of the honest and mistaken views of a large section of its membership, who left its national convention thinking that it had made a mistake in refusing to yield to the demand of those who favored the policy of free silver. The position of the Republican Party in that campaign was vindicated at the polls. It is now recognized, even by Democratic Party leaders, that had they been successful in that campaign national disaster would have followed. Indeed, the Democratic Party so speedily recognized that its stand in 1896 for cheap money was so ill advised, so unsound, so full of menace to the Nation and to every industry and business that it abandoned its position four years later for a new issue, that of "imperialism." This would not have been necessary, nor would it have been done, had the position of the Democratic Party in 1896 been founded upon principle and justified by logic or political economy.

PRESENT REPUBLICAN ADMINISTRATION CARRIED NATION THROUGH LAST CRISIS

The next great finanical crisis in our history was that following the World War, a crisis which has been handled by the present administration. When it came into power our Government bonds were selling as low as 85. The interest on our public debt was greater than the entire cost of operating the Government prior to the World War. Although the war had been over for more than two years, the Democratic executives were demanding appropriations for their respective departments and bureaus equal to that which they asked during the time the war was actually being prosecuted.

The Republican Party came into power March 4, 1921. In the little more than seven years which have elapsed it has reduced the interest-bearing public debt $7,000,000,000, reduced the annual charges approximately $275,000,000, and the annual routine expenditures of the Government approximately $2,300,000,000. It has in the past seven years enacted four tax-rate reduction measures. It has enacted a tariff law which provides annual revenues in excess of $500,000,000. It has so improved the credit of the Nation that not only are our bonds all quoted at above par but the Secretary of the Treasury has been able during the period from March, 1921, to the present time to refund that portion of the public debt which was subject to refunding at a lower rate of interest, the exact reduction in the average interest rate on our public debt during that period of seven years being from 4.29 per cent to 3.88 per cent. During

that period over $11,000,000,000 of securities have been retired or refunded into other securities bearing lower rates of interest. In addition over $11,000,000,000 of our foreign loans, which foreign nations made during the prosecution of the World War, have been refunded. Claims growing out of the war have been adjudicated and settled, the last notable example of that being the enactment in this session of Congress of the law providing for the return of property to aliens of the countries with which we were formerly at war.

FOUR TAX REDUCTION LAWS DURING LAST SEVEN YEARS

The most important financial achievement of the present administration has been its four tax reductions. We have come a long way from the state of war-time taxation, which was in full force and effect March 4, when this administration assumed control. Literally every individual and every enterprise were staggering under the terrifically high rates of the law then in effect, a law which was enacted in 1918.

One of the first acts of the Republican administration was the tax reduction act of 1921, reducing taxes by approximately $663,000,000 as compared with what would have been collected under the old rates.

Then came the second tax reduction law of 1924 which effected a saving to the taxpayers of about $519,000,000 annually as compared with what would have been collected under the rates of the revenue act of 1921.

Then the tax reduction act of 1926 which made a cut of $422,000,000 as compared with what would have been collected under the rates of the 1924 act.

Then the tax reduction act of 1928, which became a law this month, making a cut of $222,500,000 as compared with what would have been collected under the rates of the 1926 act.

SUMMARY OF PROVISIONS OF FOUR TAX-REDUCTION MEASURES

To recapitulate the outstanding features of these four tax reduction laws which have been enacted by the Republican Party since 1921:

The tax-reduction measure of 1921:

An increase in the exemption on income taxes for heads of families having a salary or wage of less than $5,000 a year. This benefited more than 4,000,000 heads of families, nearly 90 per cent of the Federal taxpayers of the country! The exemption for heads of families was increased $500 a year, with an additional increase of $200 a year for each child or other dependent.

A repeal of all taxes on freight, express, and parcel post; also of all taxes on passenger tickets.

A repeal of all excess-profits taxes.

A repeal of all the so-called luxury or commodity taxes on wearing apparel, cosmetics, proprietary medicines, musical instruments, sporting goods, soft drinks, and like articles.

A repeal of all taxes on insurance premiums and dues to fraternal orders.

A repeal of many of the "nuisance" taxes.

A reduction of the minimum surtax rate from 65 per cent to 50 per cent.

The exemption from taxation of the first $300 of income derived from building and loan associations. Estimated upon the basis of the average dividends paid by building and loan associations, this exemption would enable an individual to invest between $5,000 and $6,000 in building and loan stock with the income free from Federal taxation. This affected nearly 5,000,000 members in 9,000 building and loan associations.

The enactment of this tax reduction law, together with the enactment of other remedial legislation such as the emergency tariff, farm relief legislation, etc., by the Republican Congress, resulted in a decided improvement in business, industrial, and agricultural conditions. The increase in prosperity made it very evident that the country could stand another reduction in Federal tax rates. President Coolidge in his first message to the Congress on December 6, 1923, made recommendations along this line. That Congress enacted another tax reduction law which became operative June 2, 1924. The principal reductions in the 1924 tax law were:

First. A reduction of 50 per cent in normal income tax rates.

Second. An additional reduction of 25 per cent of the tax on "earned income" (meaning wages, salaries, and so forth, as distinguished from returns on investments) of calendar year of 1924 and thereafter up to $10,000 with the proviso that all incomes of $5,000 or under would be considered "earned" and therefore subject to the 25 per cent discount.

Third. Surtax rates payable only on incomes of $10,000 or more, where formerly they were payable on $6,000 or more; in addition the maximum surtax rate was 40 per cent applicable to incomes over $500,000, where formerly the maximum was 50 per cent and applicable to incomes in excess of $200,000.

Fourth. Repealed the tax on telephone and telegraph messages, nonalcoholic drinks, and on admission tickets where the cost of admission was 50 cents or less. The repeal of these three taxes saved the taxpayers $77,000,000 annually.

Fifth. Special tax on automobile accessories was reduced from 5 per cent to 2½ per cent, saving nearly $20,000,000 to the taxpayers.

Sixth. Repeal of the 3 per cent tax on candy, involving an annual saving of $13,000,000.

Seventh. A repeal of the special tax on certain merchandise and jewelry, involving a saving of $13,000,000 annually.

Eighth. Repeal of certain stamp taxes on drafts, promissory notes, bills of sale, etc., involving an annual saving of $7,000,000.

In addition, the bill provided for a blanket reduction of 25 per cent on all income tax payable during the calendar year of 1924, regardless of whether it was "earned" income or not.

By the time the Republican Congress which was elected in the fall of 1924 convened, there was practically an unanimity of opinion that a third tax-reduction measure should be put upon the books.

Prior to the convening of the regular session of Congress in 1924 the Ways and Means Committee assembled and framed a revenue bill embodying these reforms, which was reported to the House December 7, 1925. No revenue measure considered by the Congress in times of peace ever commanded the unanimity that this bill commanded. That representatives of all parties laid aside their partisanship and supported the bill is striking evidence of its economic wisdom and popular appeal.

The principal provisions of the law, which became effective February 26, 1926, are—

First. Maximum surtax rates were reduced from 40 per cent to 20 per cent, and surtaxes were to begin at $14,000 instead of $10,000.

Second. The maximum estate-tax rate was reduced from 40 per cent to 20 per cent and were to begin at $100,000 instead of $50,000.

Third. The capital-stock tax was repealed.

Fourth. The 25 per cent reduction on income tax provided for in the law of 1924 for earned incomes up to $10,000 was extended to incomes up to $20,000.

Fifth. Income-tax exemptions were increased from $1,000 to $1,500 for single persons and from $2,500 to $3,000 for heads of families.

Sixth. The normal rates applying to incomes were decreased as follows: On the first $4,000, from 2 per cent to 1½ per cent; next $4,000, from 4 per cent to 3 per cent; on remainder, from 6 per cent to 5 per cent.

Seventh. Practically all of the remaining "nuisance" taxes were repealed.

The principal provisions of tax reduction in the 1928 act as compared with previous laws were—

First. Corporation income tax reduced from 13½ per cent to 12 per cent, causing a net loss in revenue of $123,450,000.

Second. An increase of credit allowances on net incomes of $25,000 or less, causing a loss in revenue of $12,000,000.

Third. An allowance of 25 per cent credit on earned income on net incomes of $30,000. The previous act made such allowance only on net incomes up to $20,000. This change causes a revenue loss of $4,500,000.

Fourth. Repeal or reduction of taxes on admissions and club dues, aggregating a revenue loss of $18,000,000.

Fifth. Repeal of automobile sales taxes, causing a revenue loss of $66,000,000.

AVERAGE CITIZEN OF SMALL INCOME CHIEF BENEFICIARY OF TAX LAWS

Thus within a period of six years the Federal tax per capita has been cut in half, having been reduced from $45.23 in 1921 to approximately $25 in 1928. Moreover, all these tax-reduction measures have had as their object the benefit of the ordinary American citizen—the man with a small income. This is conclusively proved by the records of the income-tax unit of the Internal Revenue Bureau.

The records of the Treasury Department show that more than 2,300,000 individuals of moderate means, who had been paying income tax under previous laws, will not pay any income tax under this law. It also shows that the tax of the number who still pay on smaller incomes is trivial as compared with the amount they paid under the previous laws.

The following table gives the amount of taxes payable by a married man without dependents under the last four laws for incomes from $3,000 to $10,000, inclusive. A married man did not have to pay income tax unless he had an income of over $2,500, because he was entitled to a $2,500 exemption even under the old laws. The taxes of the acts of 1926 and 1924 are figured on the basis of an earned income, which entitles the taxpayer to a 25 per cent reduction of his tax after its computation.

Income	Act of 1918	Act of 1921	Act of 1924	Act of 1926
$3,000	$60	$20	$7.50	----------
$4,000	120	60	22.50	$5.63
$5,000	180	100	37.50	16.88
$6,000	250	160	52.50	28.13
$7,000	390	250	75.00	39.38
$8,000	530	340	105.00	56.25
$9,000	680	430	135.00	78.75
$10,000	830	520	165.00	101.25

Not only the tax-reduction measure of 1926 but the entire tax-reduction and tax-revision policy and program as put into effect by the Republican Party since 1921 has operated constantly and with cumulative benefits in favor of the individual of average income—the laborer, the clerk, the farmer, and the business man of modest means.

DEMOCRATS "THINK UP" FANTASTIC THEORY OF PUBLIC ECONOMY

In a vain endeavor to deprive the Republican Party of the credit of the unprecedented tax reduction and debt reduction which have taken place during the last seven years Democratic spokesmen and Democratic newspapers have recently "thought up" an explanation of these accomplishments in economy which they hope will befuddle the American public to the extent that the Democratic Party may get some credit for the savings which the American people are enjoying as a result of the Republican policies of the last seven years. This explanation is that a large portion of the income the Republican administration applied to the public debt was obtained from liquidation of assets bequeathed to the Republican administration by the Democratic Party. This is a most fantastic theory. These so-called war assets were obtained under the Democratic administration at almost incredibly inflated figures. War-time prices, which were many times those of peace time, prevailed, and the Democratic administration made the situation all the more aggravated by abrogating by Executive order the rules requiring competitive bidding in the sales of all material to the Government. It was this lavish expenditure of money at unheard-of prices which made America's short participation in the World War cost in excess of $40,000,000,000, more per capita than any other government which engaged in the war. The Democratic administration, in order to keep places for Democratic appointees, who were jammed into Federal offices by the tens of thousands during the war, refused to demobilize following the armistice and kept the Nation on a war-time basis in so far as expenses were concerned. By the time the Republican Party came into power a tremendous amount of the war property had so deteriorated in value—and still another very appreciable amount of it had become of practically no value whatever—that these so-called assets which the Democratic leaders claim their administration left the Republican Party, were sold at about 15 cents on the dollar. It certainly is a new theory in business management and public economy to claim any credit for an auctioneer sale at auctioneer prices of material bought with a prodigal hand at fictitious prices. What the Democratic Party really bequeathed to the Republican Party as a result of the war was a tremendous public debt and an unheard-of schedule of taxes, all of which were levied by the Democratic administration during the war to provide money for the unprecedented expenditures.

Quite recently Democratic leaders have been making much of the fact that the interest-bearing public debt was reduced $2,300,000,000 between August, 1919, and March 4, 1921, and they cite this as evidence of economy upon the part of the Democratic administration, which is entitled to quite as much commendation as the economy practiced by the Republican Party since March, 1921. However, the Democratic administration is not entitled to any credit in the reduction of the public debt prior to March 4, 1921, because what reductions they did make were made out of the money which the Democratic administration was forced to save at the hands of a Republican Congress. The plain legislative history of the Sixty-fifth and Sixty-sixth Congresses furnish ample and conclusive proof of this statement.

REPUBLICAN CONGRESS FORCED ECONOMY UPON DEMOCRATIC ADMINISTRATION

The campaign in behalf of public economy was launched by the Republican minority in the Sixty-fifth Congress during the last session of that Congress, which expired March 4, 1919. When that Congress expired by constitutional limitation it was found that six of the regular appropriation bills, one general deficiency appropriation bill, and one deficiency bill carrying appropriations for the Government's operation of railroads had failed of final passage. All of these bills had passed the House; in some instances they had been reported to the Senate from the appropriating committees of the Senate, and in one or two instances they had passed both House and Senate with items in disagreement and had died in conference. The fact that they had failed of passage in a Congress, Democratic in both branches, was due to the determined opposition of the Republican minority to the enormous amounts asked for in these appropriation bills.

At that time there was no Budget law, due to the antagonistic attitude of the Democratic administrative and legislative branches of the Government toward any budget system. Appropriation requests came to the Congress directly from the various executive departments, having first been submitted by the heads of those departments to the President for his approval. The total amounts requested by Democratic executives in the eight appropriation bills which failed aggregated $4,514,151,326. The amounts allowed in the bills as they had passed the Democratic House or Senate, or both, to die in conference, were $3,767,975,974.

The failure to pass those measures compelled President Wilson to call the Sixty-sixth Congress, elected in November, 1918, in special session May 19, 1919, in order that appropriations might be made for the next fiscal year, beginning July 1, 1919.

The Sixty-sixth Congress was Republican in both branches, and organized with Republicans in control of the committees having charge of appropriations. The appropriation bills which had failed in the previous Congress were reintroduced. But as they were finally passed by the Republican Congress they carried total appropriations of only $2,828,283,432. This was $1,685,867,893 or 37 per cent less than the requests made by Democratic executives whose departments were affected by the appropriations, and $939,692,541 or 25 per cent less than the amounts which were followed by one or both branches of the Democratic Congress. That saving was due solely to the opposition of the Republican minority in the closing days of the Sixty-fifth Congress.

The second session of the Sixty-sixth Congress handled the routine regular appropriation bills for the fiscal year July 1, 1920, to June 30, 1921. The estimates for those bills were submitted by Democratic executives in December, 1919. The total estimates of the Democratic executives amounted to $5,685,812,929. The Republican Congress cut these estimates in the amount of $1,312,417,650. There were also deficiency estimates submitted by the Democratic executives aggregating $680,500,000. The Republican Congress refused to grant many of these requests and reduced many more, making a total reduction of $162,000,000 in them.

The grand total of regular and deficiency appropriations requested by Democratic executives at that session of the Congress was $6,334,312,929 which they claim was absolutely necessary in order to run the Government. They not only submitted those demands in the routine procedure, but it is a matter of record that when they met with opposition by the Republican majority in the Congress they resorted to the most determined and persistant campaign on the floor and in the lobbies of the Congress and through outside propaganda to compel compliance with their requests that has ever been directed at the Congress by the administrative and executive departments of the Government. The Republican Congress determined to reduce the outrageous expenditures of the Democratic administration, refused to be coerced by this pressure and made a total reduction of $1,474,422,602, or 25 per cent, in the amounts requested by the Democratic executives.

Adding this to the savings made in the special session of that Congress in appropriation bills which had failed of passage in the last days of the Sixty-fifth Congress, there is a difference of $3,160,290,495 between the amounts demanded by the Democratic executive officials and the amounts appropriated by the Republicans in Congress during the period between the armistice and the close of the Democratic administration in March, 1921.

To phrase it another way, had the Republicans in the Congress granted the requests for money made by the Democratic officials who were in control of the Government's executive agencies until March 4, 1921, the Government would have spent $3,000,000,000 more than it did spend and there would have been no surplus to apply to the public debt. The record shows that such reduction in the interest-bearing public debt as was made by the Democratic administration between August, 1913, and March 4, 1921, was made with the savings forced upon the Democratic executives by the Republicans in the Congress. For this the Democratic administration is entitled to no credit.

DEMOCRATIC PARTY PERSISTENTLY OPPOSED ESTABLISHMENT OF BUDGET SYSTEM

The Democratic administration prior to March, 1921, and the Democrats in the Congress not only opposed a reduction in Fed-

eral expenditures, but they opposed the establishment of a Budget system of handling public finances. The record upon this is plain and incontrovertible.

The first concrete official proposal for the establishment of a budgetary method of handling Federal finances was made by a Federal commission authorized by the Congress appointed by President Taft in 1910. This commission made a most exhaustive survey of the Budget system and recommended to Congress in 1912 that it be adopted as the method of handling our Federal appropriations and expenditures. In conformity with that recommendation, President Taft on July 10, 1912, addressed a letter to the heads of the various executive agencies directing them to prepare two sets of estimates to be submitted to the Congress, one in accordance with existing practices and one in accordance with the forms and recommendations contained in the report of the commission. (Those forms were like those which are now used by the Budget Bureau.) This order of President Taft aroused bitter criticism by the Democratic leaders in the House of Representatives. The Democratic chairman of the House Committee on Appropriations made a speech denouncing it.

Democratic opposition to the budget system increased and finally became crystallized in the form of a provision which the Democratic House inserted in appropriation bills as follows:

That until otherwise provided by law the regular annual estimates of appropriations for expenses of the Government of the United States shall be prepared and submitted to the Congress, by those charged with the duty of such preparation and submission, only in the form and at the time now required by law and in no other form and at no other time.

The Democratic Congress thus went on record against the establishment of a Federal budget system. The following year the Democrats secured control of the executive branch of the Government and for six successive years they retained complete control of both branches of the Government. Notwithstanding the fact that during those years there was the most urgent need ever experienced in the Nation's history for a budget system in Federal finances, neither the Democratic President nor the Democratic Congress made any effort to establish such a system. It was not until the Republican Congress, elected in 1918, came into power that a budget bill was passed, only to be vetoed by the Democratic President. Notwithstanding his veto was based entirely on technical grounds, it was sustained by the Democratic House. Out of the total number of votes sustaining the veto, all but three were Democrats. Practically every Democratic leader either voted to sustain the veto or did not vote at all.

The Republican Party has long been on record in favor of the establishment of a Federal budget system. In 1916, astounded at the extravagance of the Democratic administration, which had taken complete control of the Federal Government in 1913, the Republican National Convention declared in its platform:

The increasing cost of the National Government and the need for the greatest economy of its resources in order to meet the growing demands of the people for Government service call for the severest condemnation of the wasteful appropriations of this Democratic administration, of its shameless raids on the Treasury, and of its opposition to and rejection of President Taft's oft-repeated proposals and earnest efforts to secure economy and efficiency through the establishment of a simple businesslike budget system, to which we pledge our support and which we hold to be necessary to effect any real reform in the administration of national finances.

The Republican National Convention in 1920 renewed this pledge in its platform in the following words:

We congratulate the Republican Congress on the enactment of a law providing for the establishment of an executive budget as a necessary instrument for a sound and businesslike administration of the national finances; and we condemn the veto of the President which defeated this great financial reform.

The Republican Party proceeded to redeem these pledges immediately upon assuming control of the Government in March, 1921. The Republican Congress, elected with Harding and Coolidge in 1920, was convened in special session by President Harding April 12, 1921. The Budget bill, which had been vetoed by the Democratic President, was immediately reintroduced, passed both Houses of the Congress, and became law June 10, 1921, in time for the Budget Bureau to be set up by the beginning of the fiscal year July 1, 1921.

Try as they may to befog the public mind by distortion of the record, the critics of the Republican program of public economy will not be able to change the historical fact that the fiscal achievements of the past seven years of the Republican administration forms the most brilliant chapter in national financing that has ever been written in the history of either this or any other nation. The benefits of this program have directly accrued to the plain people of this country and to its business and commercial interests, but they have also accrued indirectly to the whole world, because, due to the Republican policy of economy and sound financing, this country has been placed on a permanent peace-time basis and has, by reason of its financial strength and example, been able to stabilize conditions throughout the world.

REPUBLICAN RECORD OF 60 YEARS IN BEHALF OF NATION'S DEFENDERS

Just a word as to what the Republican Party has done for those who have from time to time enlisted under the American flag to do service in behalf of their Nation. Sixty years ago the Republican national convention, which nominated Grant for President and Schuyler Colfax, of Indiana, for Vice President declared—

Of all who were faithful in the trials of the late war there were none entitled to more special honor than the brave soldiers and seamen who endured the hardships of campaign and cruise and imperiled their lives in the service of the country. The bounties and pensions provided by law for these brave defenders of the Nation are obligations never to be forgotten. The widows and orphans of the gallant dead are the wards of the people—a sacred legacy bequeathed to the Nation's protecting care.

Since that time the Federal Government has expended $12,000,000,000 for the relief of the defenders of this Nation and their dependents. Of that sum $6,950,000,000 has been spent for Civil War pensions, $240,000,000 for pensions for veterans of the Spanish-American War, and the remainder in behalf of World War veterans. We are expending annually approximately $700,000,000 in pensions for those veterans of other wars than the World War and for the care of ex-service men of the World War and their dependents. Of this latter class over 600,000 have received hospital treatment, over 25,000 are in hospitals at the present moment, and approximately 21,000 so-called out-patient treatments are being furnished per month; over 128,000 have received and completed vocational educational training, and the records show that the majority of them are receiving in their present vocations an average wage higher than that which they received in their vocations prior to their entering the World War and receiving disabilities; nearly 600,000 ex-service men are carrying insurance at an aggregate of approximately $3,000,000,000; over $1,000,000,000 has been expended for disability compensation, and the present rate of expenditure for that service is $12,800,000 per month; while under the adjusted compensation or soldiers' bonus act over 3,385,000 claims, aggregating $3,300,000,000, have been adjudicated.

TWO OLD PARTIES DIFFER RADICALLY ON SUBJECT OF TARIFF

One of the fundamental differences between the Republican Party and the Democratic Party is their antagonistic positions in respect to the tariff. The Republican Party stands and has always stood for a protective tariff. The Democratic Party stands for what its party literature characterizes as "a tariff for revenue only," which means a tariff written without regard to the welfare of American industries and American industrial workers. Perhaps the most concise and the most lucid explanation as to the difference between a Republican protective tariff and a Democratic "tariff for revenue only" is that furnished by William McKinley during his service as chairman of the Ways and Means Committee prior to his election as President. His definition follows:

It is necessary that we rightly understand what constitutes a revenue tariff and exactly what is meant by a protective tariff. A revenue tariff, as the very term implies, is a tariff for revenue only, a tariff which has no purpose, no object, no end in view except putting money into the Treasury for public purposes. It is a tariff that dismisses and discards every consideration save the single one of putting money into the Federal Treasury.

A protective tariff not only looks to the question of revenue, not only has that in view, but while raising revenue it has consideration for the occupation of our own people. It has concern for our agricultural and mechanical development. In a word, it looks to the imposition of duties upon those foreign productions that will fall most lightly upon our own people and least retard the progress of the country. The one has the single purpose of raising revenue, the other has the double purpose of revenue and protection, support of our Government, and defense of our own interests against the competing industries of other countries.

A revenue tariff accomplishes but a single purpose—that of raising revenue; it has no other mission; while a protective tariff accomplishes this and more—it brings revenue to the American Treasury and discriminates in favor of the American citizen.

A revenue tariff invites the product of foreign labor and foreign capital to occupy our markets, free and unrestrained, in competition

with the product of our own labor and capital. A protective tariff invites the product of foreign labor and foreign capital which are necessary to the wants of our people (which we can not produce in the United States) to occupy our markets and go untaxed to the people, but it insists that every foreign product, the like of which is produced at home, or can be successfully, in quantities capable of supplying the domestic consumption, shall, whenever necessary to maintain suitable rewards to our labor, bear a duty which shall not be so high as to prohibit importation, but at such a rate as will produce the necessary revenues and at the same time not destroy but encourage American production.

It says to the world of producers, "If you want to share with the citizens of the United States their home market you must pay for the privilege of doing it. Your products shall not enter into free and unrestrained competition with the products of our own people, but shall be discriminated against to such an extent as to fully protect and defend our own."

If we were just beginning anew as a government and never had a tariff law, would not that be the correct principle? The things we can not make for ourselves or produce for ourselves we must buy elsewhere. Therefore we want no tax upon them; but it is economy for our people to buy from each other the things we can produce among ourselves and for ourselves, and if the foreign producer wants to enjoy any part of this market he must be subject to the terms we shall fix in the interest of our own countrymen. That is the principle of protection. That is the principle of our country first and our countrymen first. That is the principle of home and family. That is the doctrine of true Americanism.

Were it not for the continuous propaganda going on against the protective tariff, a propaganda which, I venture to say, is inspired, if not indeed financed, in a large measure by foreign interests desirous of gaining entrance into the American markets, it would be needless to enter into a defense of the theory and the practice of a protective tariff. The history of the development of the United States, both industrially and agriculturally, since the Civil War has been a history of the protective-tariff system. The two or three exceptions during this period of 60 years, and they were very brief, when the United States was not under a protective tariff were marked by industrial depression, commercial paralysis, agricultural distress, poverty among industrial wage earners, and bankruptcy among agricultural producers.

DEMOCRATIC TARIFF ALWAYS BRINGS NATIONAL DISASTER

A low tariff always brings disaster because it is based upon the false assumption that the interests of the producer and those of the consumer are antagonistic, and prosperity for one means exploitation of the other. There is no such division. There can be none. Every producer is, in fact, a consumer, and every consumer is a producer. Any proposition that seeks to divide the American people into two distinct classes and then seeks to prosper one class at the expense of another class is dishonest, is dangerous, and, if adopted, means ruin to everyone. That is exactly why hard times have resulted from every Democratic tariff law which has been put on the Federal books.

So, too, all proposals to repeal or lower the existing protective-tariff rates are dangerous, because in the last analysis they are dishonest. They are dishonest because they are a proposal that part of the American people can add to their prosperity by subtracting from the prosperity of the rest of the people. The farmer is told he can increase his prosperity if the protective tariff on manufactured goods is lowered or altogether repealed, because this would enable him to buy manufactured goods from abroad for less money than he can buy it from American industries.

The industrial wage earner is told he should repeal the protective tariff rates on food products which would enable him to buy beef from the Argentine, lamb from New Zealand and Canada, dairy products from Canada, New Zealand, and Northern Europe, eggs from China, fruit from southern Europe and Central America for much less than he now buys them from American agricultural producers. Such a policy if put into effect would ruin both the industrial wage earner and the agricultural producer.

FREE TRADE MEANS CHEAP PRICES, ALSO CHEAP WAGES AND CHEAP MEN

Such a policy is consistent, however, with the theory of free trade which sets up "cheapness" as an economic ideal. Whenever the Democratic Party has succeeded in gaining enough power to enact and put on the statute books a tariff law of its own liking, it has inaugurated immediately an era of cheapness. Labor immediately becomes cheap because there is no employment; farm products become cheap because they have no market. Imported goods are cheap until by their cheapness they drive American goods out of the market and then they advance in price. But the cheapness attained during periods of Democratic tariff are brought about by destroying the purchasing power of American consumers and once their purchasing power is destroyed it little matters to either the wage earner or the farmer how many bargains of cheap foreign goods are available for they have no money with which to take advantage of such bargains. Under such a régime the only beneficiaries are the rich who have a source of income unaffected by the closing down of factories and the loss of markets to the agricultural producers.

This experience has been repeated every time a low tariff has been enacted. The history of the United States, from the earliest days up to and including that period during which the Underwood tariff was in effect, shows that without exception every time a low tariff has been enacted we have had idle factories, an increasing army of unemployed, tremendous increases in business failures because the people have no money with which to buy, bankrupt agriculture because the unemployed in the cities must of necessity cut down on their food bill. These combined have resulted in terrific decline in transportation of goods both from the farm to the city and from the factory to the farm, which has in turn compelled the dismissal of tens of thousands of railroad employees and very frequently has thrown entire railroad systems into the hands of receivers. The general diminution of activity all along the line results in dismissal of employees in all lines of business, even those not remotely connected with production either on the farm or in the factory.

PROTECTIVE TARIFF STIMULATES AND STABILIZES INDUSTRY AND AGRICULTURE

On the other hand, there never has been a protective tariff enacted that did not bring good times to industry and business, to all sections of the United States, and to all classes of citizens. There has never been a protective tariff that did not build up American industries and improve and prosper American wage earners. A protective tariff stimulates and stabilizes industrial production. It thereby benefits directly the wage earner by giving him steady and profitable employment. It benefits every enterprise selling raw material or supplies to industrial concerns. It benefits every transportation company which hauls the products of industrial concerns. It benefits every business concern which sells goods consumed by industrial wage earners. It benefits every agricultural producer, for 90 per cent of the output of the American farmer is consumed in the United States, and a survey conducted by the United States Department of Labor shows that 40 cents of every wage earner's dollar is expended for food products which come from the farm, either directly or indirectly.

These are not partisan statements. They are the mere recital of facts, abundant substantiation for which is found in the official records of the United States Government.

A protective tariff stimulates industrial production. That is natural, for under a protective tariff American manufacturers, being assured of profitable production, increase their output and become active in seeking markets both at home and abroad for this increased output. The direct evidence that a protective tariff stimulates production is found in the figures issued by the United States Census Bureau for all manufacturing industries. This shows that in 1921, while the Underwood tariff was still in force and effect, there were employed in manufacturing industries 6,937,000, receiving a wage of $8,192,952,000, and the value of the products of those industrial establishments was $43,427,224,000. The Fordney-McCumber tariff became effective in September, 1922. By the close of 1925 it had been in operation three years. The industrial census of the United States for 1925—its being the rule of the Census Department to take such a census every odd-numbered year—showed there had been a net increase of 20.8 per cent in the number of wage earners, 31.7 per cent in the amount of wages paid, and 44.4 per cent in the value of products turned out.

Advocates of the protective tariff system have always maintained that because of the stimulus it gives industrial production it inevitably intensifies competition which, in turn, results in manufacturers making lower prices in order promptly to market their increased and increasing output. The history of all protective tariffs in this country substantiates that position. The present protective tariff is no exception to the rule.

For a number of years the United States Department of Labor has been publishing the wholesale prices of over 400 standard commodities, embracing all lines of production. Wholesale prices are the accurate index of prices charged by the manufacturer, for the manufacturer sells directly and almost exclusively to the wholesaler. If the manufacturer "jacks up" his prices, that fact is immediately and inevitably evidenced by an increase in wholesale prices.

PRICES OF MANUFACTURED GOODS HAVE DECLINED UNDER PROTECTIVE TARIFF

According to the figures issued by the United States Bureau of Labor Statistics, the wholesale prices of practically every class of manufactured goods in general use and entering into the household expenses of the average family have steadily declined since the present protective tariff became effective. Cotton goods have decreased over 30 per cent in wholesale, or factory, price; woolen goods have decreased over 10 per cent; silks have decreased 29 per cent. The only item of clothing which has not shown a decrease in factory prices under the present tariff is that of boots and shoes, yet boots and shoes and raw leather from which they are made and all hides from which leather is made are on the free list. Democratic free-trade orators, both on the floor of Congress and on the public platform, and Democratic newspapers remain significantly silent regarding the fact that while cotton goods, highly protected, have decreased in wholesale price over 30 per cent, and woolen goods, highly protected, as is also the raw wool from which they are made, have decreased in factory price over 10 per cent, leather goods, which are on the free list all the way from the raw hides to the finished product, have increased.

Wholesale (or mill) prices of iron and steel, which includes bar iron, wire, nails, steel bars, tin plate, barbed wire, fencing wire, and all raw steel and iron products which enter into the manufacture of farm implements, have decreased 19 per cent. Household furniture has decreased 11 per cent, table cutlery 13 per cent, table glassware 20 per cent. On the other hand, the price of labor, as represented in wages, has increased under the Fordney-McCumber Act, and the price of all staple farm products has increased.

This condition which is an apparent contradiction of all economic laws has attracted world-wide attention. In order that they might study it at close range and ascertain for the information of their government and their industries, commissions were sent from England, Germany, Australia, and Canada. Each of these commissions spent several weeks in this country in intensive investigation and made a report to their respective governments. These reports are too lengthy to quote in their entirety, but the following excerpt from the report made by the British commission to their government in March, 1921, affords very telling evidence in support of the policy of a protective tariff and the Fordney-McCumber law in particular.

> The value of exports of manufactured goods is small in relation to the total value of production, and the success of manufacturing enterprise depends largely upon the consuming power of a great domestic market. * * * Manufacturers are assisted in the development of this market by complete freedom from tariff restrictions within the Union of 48 States and by protection against competition from outside by a strong tariff machine which is capable of easy and rapid adjustment to meet changing circumstances.

In its analysis of the underlying causes of the great industrial prosperity of the United States, carrying with it unprecedented prosperity for the industrial wage earners, the British commission placed as first in importance the "mass production" of American industries. At several places in its report it stresses the fact that the United States has reached its present industrial supremacy in the world and prosperity at home by reason primarily of "mass production" which has enabled American industries to reduce costs and selling prices at home and at the same time increase wages, while it also enables them to compete successfully in the markets of the world. This is the same testimony which has been offered by others who have made a survey of the industrial conditions in this country.

The relation of industrial mass production to a protective tariff is intimate and direct. Mass production is made possible only by mass consumption, plus the certainty of its continuance on a profitable basis. Mass consumption is guaranteed only by a protected market. Throw open the American market to European competitors and you would immediately destroy for the American manufacturer the certainty and stability of his market.

The immediate and necessary consequence would be his cessation of mass production. With his curtailment of production, due to the decline in his market, would come curtailment of employment and cut in pay rolls. This starts the toppling of the entire industrial structure, the destruction of prosperity for the employer and the wage earner, as well as those agricultural producers and business men who sell their products or their services to the industrial wage earner.

SOME COMPARISONS OF WAGES IN AMERICA AND EUROPE

There is no wonder, then, that the commissions from England and other countries marveled at the prosperity of the industrial wage earners in the United States when one studies the wages paid in other countries. The British Ministry of Labor made a most extensive study of the industrial wage earner in the United Kingdom for the year 1924 and the result of this survey was published in the Ministry of Labor Gazette July, 1927. It showed that the average weekly earnings of 5,000,000 British industrial workers was $11.60. This average was appreciably raised by the inclusion of government workers and public utility workers, the two highest paid groups in the United Kingdom. The following table taken from the report gives an idea of the average weekly wage paid in the various industrial groups in the United Kingdom:

Industry group	Number of work people covered	Average of the weekly earnings
Pottery, brick, glass, chemical, etc	276,014	$11.70
Metal	1,355,328	12.53
Textile	1,017,381	9.17
Clothing	486,659	8.65
Food, drink, tobacco	390,041	11.22
Woodworking	174,383	12.27
Paper, printing, etc	233,483	13.02
Building and allied industries	279,452	14.11
Other industries	304,117	11.86
Public utilities services	473,860	14.29
Government industrial establishments	100,027	14.42
Total	5,090,745	11.60

Now, compare this wage of skilled workers in the skilled industries of the United States for unskilled common labor. According to the data issued by the United States Bureau of Labor Statistics the lowest average weekly earning of such labor in this country is among track workers on railroads who receive an average weekly wage of $17. The average hourly wage of common, unskilled, unorganized labor in 13 leading industries in this country was 43 cents. In plain language, common, unskilled, unorganized labor in the United States is paid higher to-day than the skilled, organized workmen in the leading industries of the United Kingdom, and of still greater significance is the fact that England pays higher wages than any other country in Europe. According to the latest available figures issued by the Government of France, the average hourly wage of all skilled workers in the city of Paris was 15 cents for a 10-hour day. According to the latest figures available, the average weekly wage of all workers in industries in Germany is $11.05; in Poland, less than $1 a day, the highest paid being metal workers, who receive from 73 cents to 97 cents per day. The average wage in 13 of the principal cities of Japan is less than $1 a day for all industries.

Taking wages by industries rather than by nations, we find the same result. A report prepared for use of the International Economic Conference held at Geneva, Switzerland, May, 1927, showed the average weekly wage of cotton textile industrial workers in the various European countries to be as follows: Austria, $4.45; Belgium, $4.90; France, $5.63; Italy, $4.83; Poland, $3.54; Japan, $2.91. Data prepared for the same conference by the economic section of the League of Nations furnishes comparative wages paid in a large number of industries, including those manufacturing office equipment and appliances, sewing machines, knitting machines, and other machines for domestic use, locomotives, traction engines, agricultural implements, steam fittings, weighing machines, machine parts, as follows, per week:

Austria	$5.74
Belgium	7.43
Italy	6.81
France	8.51
Czechoslovakia	8.11
Germany	11.01
Great Britain	14.33
United States	30.78

The same source of information gives comparative weekly wages for the metal trades in centers of metal industry as follows:

Belgium	$5.28
Czechoslovakia	7.23
Poland	4.08
England	15.10
France	8.71
Italy	7.41
Holland	12.88
United States	38.40

Comparisons could be given further, but these serve to show the general wage levels paid in other countries and furnish a compelling reason why if our wage earners are to be protected in their present living standards the existing protective tariff rates must not be lowered.

Students of economics have repeatedly pointed out that the high purchasing power which characterizes the American people is due to their high wages, but it should be kept in mind that high wages are the result of industrial prosperity, not the cause of it. We have high wages and correspondingly high purchasing power because our working people are steadily employed; they are steadily employed because our industries are prosperous; our industries are properous because they feel sure, under a protective tariff, of a stable market at a profitable margin. Backed by this security they can and do adopt mass-production methods, which they could not do if they were in a state of uncertainty as to the stability and the futurity of their markets.

DANGER TO AMERICA'S PROTECTIVE TARIFF MORE IMMINENT THAN EVER

The danger to our protective tariff system, and to the present tariff law in particular, is more imminent now than it has ever been. Attracted by America's market—the largest and the richest in the world—European producers are pooling their forces and resources in concerted attack on our protective tariff. They are doing this in many ways. By the organization of international combines or cartels for the avowed purpose of (1) parceling among their constituent members the markets of Europe in order to avoid destructive competition among themselves at home and (2) invading the markets of other countries, principally this country, by the device of combined destructive underselling. They are doing this also by offering government subsidies to home industries and of home industries offering rebates to purchasers of home-made products. They are also making this concerted attack by the use of the discriminatory tariffs and by export bounties.

In this connection it may be stated that the British Empire for 30 years has had operative a system of preferential tariffs between the United Kingdom and the British colonies, India, Australia, New Zealand, Canada, South Africa, and smaller British possessions, like the British West Indies, have for over one-quarter of a century discriminated against manufactured products from the United States in favor of those from their mother country. This discrimination has been as much as 25 to 40 per cent. In return, the United Kingdom has discriminated against agricultural products of the United States in favor of agricultural products from her colonies. This is not set down as a matter of criticism, for such tariff policy is clearly within the rights of England and her colonies. It is set down to show that when it comes to a matter of tariff retaliation and tariff discriminations those countries which are quickest and most prolific in their criticism of the tariff policies of this country are the ones which have the least right to offer such criticism.

The same observation applies to other countries which complain of the American tariff. A study of the American tariff system and the tariff systems of continental Europe discloses one fundamental difference. The American tariff is purely defensive and absolutely equitable. The European tariffs are generally punitive and grossly discriminatory. The American tariff is written solely for the purpose of protecting home industries. It is not written for the purpose of waging warfare on the industries of other countries or to be used as a weapon in an effort to coerce other nations into making us trade concessions. The American tariff is absolutely equitable. Its rates apply alike to all imports, regardless of the source of origin. A rate on steel remains constant, no matter whether the steel comes from Great Britain or Germany or France or Japan. A rate on butter remains constant, whether the butter comes from Denmark or Canada or New Zealand, and so on throughout the hundreds of schedules. Furthermore, these schedules can not be manhandled or manipulated in order to hurt one country and benefit another.

On the other hand, European tariffs are punitive and are purposely capable of manipulation. Most of them are written to be used for trading purposes. In the majority of cases European tariff rates are largely fixed by an administrative order instead of by parliamentary bodies. Many European nations have what is known as the coefficient system of tariffs, which enables officials to change rates overnight and as frequently as they desire.

AMERICA DISCRIMINATED AGAINST BY EUROPEAN TARIFFS

It is by means of this system of handling tariff rates, which prevails throughout Europe, that gross discrimination and equally gross favoritism in international trade is practiced, and of which the United States has been made the victim. There never has been any objection upon the part of our Government to any increase in any tariff rates of any nation, provided such increases were uniform against imports from all countries and not merely against imports from the United States. Increases in tariff rates are regarded as a domestic policy of the nation making them, but where a nation fixes tariffs upon American imports at four to eight times the rates fixed on like imports from other countries, it is so obvious and so flagrant a discrimination against the United States that it can not be overlooked or excused.

The United States asks nothing more than it gives in the matter of tariffs. It claims and exercises the right to make a tariff absolutely prohibitive, if such is needed, in its judgment, to protect American products. It grants, without argument or protest, the same right to every other nation; but where another nation, by manipulation of its tariffs, practically excludes American imports of a certain classification and at the same time invites increased importation of like imports from other countries, obviously its action is not for the purpose of defending or protecting its home industries.

In their assault on the American protective tariff foreign interests have the very valuable assistance of two classes in the United States—those who have a misguided and narrow devotion to the theory of free trade and those who have selfish, mercenary interests that would be forwarded by turning our domestic markets over to foreign producers.

The standard argument of these American associates of foreign interests is the assertion that the present protective tariff operates to the restriction of our foreign commerce; that, due to it, other countries are denied free access to our markets, which in turn results in the United States selling less goods abroad than it would otherwise. There is no foundation in fact for any such assertion, and there is no justification for its being made by anyone who poses as being possessed of sufficient information upon the subject of the tariff to justify his making any public statement, oral or written, regarding it.

AMERICA'S FOREIGN TRADE HAS INCREASED UNDER PRESENT TARIFF

The accompanying table furnished by the Department of Commerce shows the absurdity of such claims. This table in detail shows that our exports have increased 32 per cent since the enactment of the Fordney-McCumber tariff and that our imports have increased 63 per cent since the enactment of that tariff, which proves conclusively that our tariff does not handicap those nations of Europe which are engaged in the important work of reconstruction and rehabilitation. European countries are to-day selling us 53 per cent more goods than they did prior to the enactment of this tariff:

The growth of our foreign trade under the Fordney-McCumber Act runs true to the history and experience of all protective tariffs. The official records of our foreign commerce show that during the periods the United States has been under a protective tariff its foreign trade has always increased. The record also shows the equally striking and significant fact that during the periods the United States has been under a Democratic tariff its foreign trade has decreased. There is a reason. Trade follows prosperity. A prosperous neighbor buys more than an impoverished one. Under a protective tariff America has always been prosperous. A protective tariff has always stimulated business and increased industrial production. Increased industrial production calls for the increase of imports of raw materials and semimanufactured articles to be used in manufacturing industries. Increased industrial production means steady and profitable employment to millions of wage earners. It means a sure and stable market for the products of the farm. It means vastly increased business for the agencies of transportation and for the agencies of distribution of merchandise. It means that everybody has more money. All of this increases consumption of every conceivable commodity, foreign as well as domestic, which naturally stimulates the demand for imported goods.

Under free trade or a low tariff factories close and their employees walk the streets with empty pockets; farm produce rots in the fields for want of a market; railroads lay off employees and empty freight cars congest the sidetracks; wholesalers and jobbers discharge their traveling salesmen and retailers dismiss their clerks. Under such conditions we buy less at home and we buy less from abroad. When our industrial plants do not produce we have less for barter in international trade. Nothing is more logical or inevitable than the increase of foreign trade under the stimulus of a protective tariff. It has always been so. It always will be so, and the present period is no exception to the rule.

AGRICULTURE PROVIDED FOR IN EXISTING REPUBLICAN TARIFF

The two outstanding features of the Fordney-McCumber tariff from the standpoint of agriculture are (1) no previous American tariff ever approximated this one either in the number and variety of agricultural products given protection or in the degree of protection afforded them; and (2) no previous American tariff ever excelled this one in the number and variety of commodities peculiarly essential to the pursuit of agriculture which are on the free list.

I herewith append a list of the principal agricultural products which are afforded protection by the Fordney-McCumber tariff, the amount of protection afforded in each case, and, for purposes of comparison, the rate or lack of rate given the same products by the Underwood Democratic tariff of 1913, which was operative until the Republican Congress in its special session in the summer of 1921 enacted the farmers' emergency tariff. I also append the "farmers' free list"—those commodities in general use in agriculture the imports of which are admitted free under the provisions of the existing tariff law.

The matter referred to is as follows:

Comparative tariff rates on agricultural products under the present protective tariff act of 1922 and the Underwood Democratic tariff of 1913

Commodity	Rate of duty—present tariff	Rate of duty—Underwood tariff
GRAIN AND GRAIN PRODUCTS		
Wheat	42 cents per bushel of 60 pounds.	Free.
Barley	20 cents per bushel of 48 pounds.	15 cents per bushel of 48 pounds.
Oats	15 cents per bushel of 32 pounds.	6 cents per bushel of 32 pounds.
Rye	15 cents per bushel of 56 pounds.	Free.
Buckwheat	10 cents per 100 pounds.	Do.
Corn	15 cents per bushel of 56 pounds.	Do.
Rice, paddy or rough	1 cent per pound	⅗ cent per pound.
LIVESTOCK AND POULTRY		
Cattle:		
Less than 1,050 pounds each	1½ cents per pound	Free.
1,050 pounds each or more	2 cents per pound	Do.
Sheep	$2 per head	Do.
Goats	do	Do.
Swine	½ cent per pound	Do.
Horses and mules:		
Valued at $150 or under	$30 per head	10 per cent ad valorem.
Valued at $150 or more	20 per cent ad valorem.	Do.
Poultry, live	3 cents per pound	1 cent per pound.

Comparative tariff rates on agricultural products, etc.—Continued

Commodity	Rate of duty—present tariff	Rate of duty—Underwood tariff
MEATS AND MEAT PRODUCTS		
Beef, fresh	3 cents per pound	Free.
Veal, fresh	do	Do.
Mutton, fresh	2½ cents per pound	Do.
Lamb, fresh	4 cents per pound	Do.
Pork, fresh	¾ cent per pound	Do.
Bacon	2 cents per pound	Do.
Hams	do	Do.
Shoulders	do	Do.
Lard	1 cent per pound	Do.
Poultry, dressed or undressed	6 cents per pound	2 cents per pound.
DAIRY AND POULTRY PRODUCTS		
Milk, fresh	2½ cents per gallon	Free.
Cream	20 cents per gallon	Do.
Butter	12 cents per pound	2½ cents per pound.
Cheese	5 cents per pound, but not less than 25 per cent ad valorem.	20 per cent ad valorem.
Eggs in the shell	8 cents per dozen	Free.
Frozen eggs	6 cents per pound	2 cents per pound.
Dried eggs	18 cents per pound	10 cents per pound.
VEGETABLES		
Potatoes	50 cents per 100 pounds	Free.
Onions	1 cent per pound	20 cents per bushel of 57 pounds.
Tomatoes	½ cent per pound	15 per cent ad valorem.
Beans:		
Green or unripe	do	25 cents per bushel of 60 pounds.
Dried	1¼ cents per pound	Do.
Peas:		
Green or dried	1 cent per pound	10 cents per bushel of 60 pounds.
Split	1¼ cents per pound	20 cents per bushel of 60 pounds.
Turnips	12 cents per 100 pounds	15 per cent ad valorem.
Lentils	½ cent per pound	25 cents per bushel of 60 pounds.
FRUITS		
Apples:		
Green or ripe	25 cents per bushel of 50 pounds.	10 cents per bushel of 50 pounds.
Dried	2 cents per pound	1 cent per pound.
Apricots:		
Dried	½ cent per pound	Free.
Green, ripe, or in brine	do	Do.
Cherries:		
In their natural state, sulphured, or in brine.	2 cents per pound	10 cents per bushel of 50 pounds.
Maraschino cherries and cherries prepared or preserved in any manner.	40 per cent ad valorem	20 per cent ad valorem.
Figs:		
Fresh, dried, or in brine	2 cents per pound	1 cent per pound.
Prepared or preserved in any manner.	35 per cent ad valorem	20 per cent ad valorem.
Dates:		
Fresh or dried	1 cent per pound	1 cent per pound.
Prepared or preserved in any manner.	35 per cent ad valorem	20 per cent ad valorem.
Grapes	25 cents per cubic foot	25 cents per cubic foot.
Raisins	2 cents per pound	2 cents per pound.
Other dried grapes	2½ cents per pound	Do.
Currants, Zante or other	2 cents per pound	1½ cents per pound.
Lemons	do	½ cent per pound.
Limes	1 cent per pound	Do.
Oranges	do	Do.
Grapefruit	do	Do.
Olives:		
In brine, green	20 cents per gallon	15 cents per gallon.
Ripe	do	Do.
Pitted or stuffed	30 cents per gallon	Do.
Peaches:		
Green, ripe, or in brine	½ cent per pound	10 cents per bushel of 50 pounds.
Dried	2 cents per pound	1 cent per pound.
Pears:		
Green, ripe, or in brine	½ cent per pound	10 cents per bushel of 50 pounds.
Dried	2 cents per pound	1 cent per pound.
Pineapples: Crates of 1.96 cubic feet	22½ cents per crate	6 cents per cubic foot.
Plums	½ cent per pound	10 cents per bushel of 50 pounds.
Prunes	do	Do.
Citrons and citron peel:		
Crude, dried, or in brine	2 cents per pound	Free.
Candied or otherwise prepared or preserved.	4½ cents per pound	2 cents per pound.
NUTS		
Almonds:		
Not shelled	4¾ cents per pound	3 cents per pound.
Shelled	14 cents per pound	4 cents per pound.
Filberts:		
Not shelled	2½ cents per pound	2 cents per pound.
Shelled	5 cents per pound	4 cents per pound.
Pistache	1 cent per pound	1 cent per pound.
Peanuts:		
Not shelled	3 cents per pound	⅗ cent per pound.
Shelled	4 cents per pound	¾ cent per pound.

Comparative tariff rates on agricultural products, etc.—Continued

Commodity	Rate of duty—present tariff	Rate of duty—Under wood tariff
NUTS		
Walnuts of all kinds:		
Not shelled	do	2 cents per pound.
Shelled	12 cents per pound	4 cents per pound.
Pecans:		
Not shelled	3 cents per pound	1 cent per pound.
Shelled	6 cents per pound	Do.
SEEDS		
Grass seeds:		
Alfalfa	4 cents per pound	Free.
Alsike clover	do	Do.
Crimson clover	1 cent per pound	Do.
Red clover	4 cents per pound	Do.
White clover	3 cents per pound	Do.
Clover, n. s. p. f.	2 cents per pound	Do.
Millet	1 cent per pound	Do.
Timothy	2 cents per pound	Do.
Hairy vetch	2 cents per pound	Do.
Spring vetch	1 cent per pound	Do.
All other, n. s. p. f.	2 cents per pound	Do.
Other garden and field seeds:		
Beet (except sugar beet)	4 cents per pound	3 cents per pound.
Cabbage	10 cents per pound	6 cents per pound.
Carrot	4 cents per pound	3 cents per pound.
Cauliflower	25 cents per pound	Free.
Celery	2 cents per pound	Do.
Onion	15 cents per pound	5 cents per pound.
Parsnip	4 cents per pound	3 cents per pound.
Radish	do	Do.
Turnip	do	Do.
Rutabaga	do	Do.
BULBS AND NURSERY STOCK		
Tulip, lily, and lily of the valley pips	$2 per 1,000	$1 per 1,000.
Hyacinth bulbs	$4 per 1,000	$2.50 per 1,000.
Crocus bulbs	$1 per 1,000	50c per 1,000.
All other bulbs and roots, root stocks, clumps, corms, tubers, and herbaceous perennials imported for horticultural purposes.	30% ad valorem	Do.
Seedlings, and cuttings of manetti, multiflora, brier, rugosa, and other rose stock, all the foregoing not more than three years old.	$2 per 1,000	$1 per 1,000.
Cuttings, seedlings, and grafted or budded plants of other deciduous or evergreen ornamental trees, shrubs, or vines, and all nursery stock, n. s. p. f.	25% ad valorem	15% ad valorem.
Seedlings, layers, and cuttings of apple, cherry, pear, plum, quince, and other fruit stocks.	$2 per 1,000	$1 per 1,000.
Grafted or budded fruit trees, cuttings and seedlings of grapes, currants, gooseberries, or other fruit vines, plants, or bushes.	25 per cent ad valorem	15 per cent ad valorem.
OIL SEEDS		
Castor beans	½ cent per pound	15 cents per bushel of 50 pounds.
Flaxseed	40 cents per bushel of 56 pounds.	20 cents per bushel of 56 pounds.
Poppy seed	32 cents per 100 pounds	15 cents per bushel of 47 pounds.
Sunflower seed	2 cents per pound	Free.
Soy beans	½ cent per pound	Do.
Cottonseed	⅛ cent per pound	Do.
MISCELLANEOUS		
Honey	3 cents per pound	10 cents per gallon.
Hay	$4 per ton	$2 per ton.
Straw	$1 per ton	50 cents per ton.
Hops	24 cents per pound	16 cents per pound.
Sugar beets	80 cents per ton	5 per cent ad valorem.

ARTICLES USED BY THE FARMER WHICH ARE ON THE FREE LIST UNDER THE PRESENT PROTECTIVE TARIFF ACT OF 1922

Farm implements and machinery: Cream separators (valued at not more than $50 each); plows; cultivators; threshing machines; harrows, tooth and disk; farm drills; planters; hay rakes; headers; mowers (except lawn mowers); harvesters; binders; farm wagons and carts; cotton gins; sugar machinery; reapers.

Building materials: Building brick; lime (hydraulic); cement (hydraulic); plaster rock or gypsum (crude); lumber; logs (this does not extend to logs of fir, spruce, cedar, or western hemlock); timber (round, unmanufactured, hewn, sided, or squared otherwise than by sawing); boards (sawed); planks (sawed); deals (sawed); other lumber, but not further manufactured than sawed, planed, tongued and grooved (this does not extend to Spanish cedar, mahogany, Japanese white oak, Japanese maple and certain other wood in the log, or in the form of sawed boards, planks, deals); clapboards; laths, siding; shingles; telephone poles, of cedar or other woods; pickets and palings; hardwood lumber (maple, hickory and walnut).

Fuels and lubricating oil: Coal, anthracite and bituminous; coke; petroleum, crude; gasoline; kerosene oil; lubricating oil; composition fuels (in which coal is chief component material; firewood.

Chemicals and allied products: Sheep dip; sulphur; antitoxins, serums, vaccines, and viruses; turpentine; rosin; borax, crude; rock salt; tar and pitch; wax.

Fertilizers and fertilizer materials: Sodium nitrate (nitrate of soda); phosphate, crude and apatite; potassium chloride or muriate of potash, potassium sulphate, kainite, wood ashes and beet-root ashes, and all crude potash salts not specially provided for; potassium nitrate or saltpeter, crude; guano, basic slag, ground or unground, manures, and all other substances used chiefly for fertilizer, not specially provided for: *Provided*, That no article specified by name and Title I shall be free of duty under this paragraph; calcium cyanamide or lime nitrogen; tankage.

Oil and oil cake and meal: Soyabean cake and meal; cottonseed cake and meal; linseed cake and meal; peanut cake and meal; other oil cake and meal; cod liver oil.

Harness and saddlery: Harness (sets valued at less than $70 per set; single harness valued at $40 or less); saddles (valued at $40 or less); harness and saddlery parts, except metal, for foregoing; sole leather; pads for horses.

Seeds: Chickpeas or gabanzos; cowpeas; sugar-beet seed.

Miscellaneous: Animals for breeding purposes; barbed wire, whether plain or galvanized; binder twine; gunpowder; needles, hand-sewing and darning needles; rope made of rawhide; boots and shoes made chiefly of leather; gloves, leather, made chiefly from hides of cattle; bananas; coffee; tea; tapioca and tapioca flour; newspapers and periodicals; books and pamphlets in foreign languages; tar and oil-spreading machines used in road construction and maintenance; hones and whetstones; sea herring, smelts, and tuna fish, fresh, frozen, or packed in ice.

These outstanding factors of the present tariff enacted six years ago and in point of fact embodied in the farmers' emergency tariff which was enacted in the summer of 1921 and embodied even before that in the farmers' emergency tariff the Republican Congress passed in the winter of 1920 only to have it vetoed by a Democratic President were the result of careful and exhaustive study by the Republican Party of the needs of American agriculture. This fact should be emphasized because it has been only recently that the Democratic Party leaders in some cases have commenced to talk about the necessity of affording some protection to the American farmer. They are doing this only because they feel the necessity of attempting to win the farmers' vote and not because of any sincere conversion to the principles of protective tariff system.

DEMOCRATIC PARTY OPPOSED TO PROTECTION FOR FARMER

Whenever a Democrat gets in the company of Democrats, whenever a Democratic speaker addresses a Democratic gathering of political leaders or editors, whenever a Democratic keynoter addresses a Democratic convention, they invariably denounce protective tariff both as a theory and the present protective tariff law in particular. There is no sincerity in the public profession of the Democratic Party that it desires to give the American farmer high protective schedules. The Unlerwood law did not do so. The last Democratic President, whom all Democrats now pronounce to have been the greatest President the country has even seen, vetoed a farmers' emergency tariff bill passed by the Republican Congress no later than February, 1921. American agriculture can expect no continuation of existing protective rates in event the Democratic Party secures control of the American Congress and has in the White House a Democratic President to sign the tariff law which that Congress would pass.

On the other hand the Republican Party's policy of protection for agricultural interests is not a vote-getting scheme or a political makeshift, but a well-considered economic policy of permanence based on the knowledge of world-wide agricultural competitive conditions and based upon the traditional policy of the Republican Party that all American producers whether they be industrial or agricultural must have protection in the form of a high tariff if they are to keep their own home markets and survive.

It was for these reasons that high protective rates for all agricultural products were included in the tariff bill which is now a law. These rates reflected the deliberate judgment of the Republican Party and were in fulfillment of a specific pledge in the Republican platform of 1920, which read as follows:

The Republican Party reaffirms its belief in the protective principle and pledges itself to a revision of the tariff as soon as conditions shall make it necessary for the preservation of the home market, for American labor, agriculture, and industry.

This pledge was made because the Republican Party at that time realized that agriculture was entering upon a new era. It was no longer an industry dependent for success upon physical strength and climatic accidents. The introduction of labor-saving machinery, the growing complexities of the marketing

phase of agriculture, and the introduction of science in the preparation of soil, selection of seeds, and processes of cultivation, had all combined to make agriculture truly an industry—an industry dependent, quite as much as manufacturing, for success and profit upon the application of business methods and economic laws.

Moreover, our frontier had disappeared and with it the era of cheap land. Simultaneously "new country," with virgin soil, cheap land, and cheap labor was being opened in other parts of the world. American agriculture was meeting with severe competition from products of these newly developing countries. Indeed, at that particular time, the year 1920, under the Democratic Underwood tariff, a larger quantity of agricultural imports of all kinds passed through our customhouses than ever before in the history of this country. These imports included grain, livestock, and meat products from the Argentine and Canada; lamb and mutton from Australia, New Zealand, and England; potatoes, eggs, and dairy products from Denmark, Canada, and New Zealand, and other agricultural products from various quarters of the globe. All of these imports were admitted free of duty under the provisions of the Underwood tariff.

REPUBLICANS PASS FARMERS' TARIFF, BUT WILSON VETOED IT

The Republican Party did not wait until the inauguration of the Republican administration elected in 1920 to attempt to carry out its platform pledge. It controlled both branches of the Sixty-sixth Congress, elected in 1918. As soon as the third session of that Congress convened in December, 1920, an emergency farmers' tariff bill was introduced in the House of Representatives. This bill provided for substantial protection to agricultural products in striking contrast to the lack of any protection under the Underwood tariff, then in effect. That protective tariff measure, especially designed to assist the farmer, was opposed on the floor of the House by the Democratic leaders and by practically all of the Democratic minority. It passed the House December 22, 1920. In the Senate it met with the solid opposition of the Democratic minority, but the Republican majority passed it on February 16, 1921. It suffered the fate of all protective tariff measures at the hands of a Democratic administration—President Wilson vetoed it.

On April 11, 1921, the newly elected Republican Congress was convened in special session by President Harding. Almost immediately the farmers' emergency tariff was reintroduced, and it was speedily passed, becoming a law May 27, 1921. That tariff law applied solely to agricultural products. It remained in effect until the passage of the Fordney-McCumber tariff bill in September, 1922, and its agricultural schedules were embodied in the Fordney-McCumber law with comparatively few changes. The changes made were mostly increases in rates.

During the 16 months between the enactment of the farmers' emergency tariff and that of the Fordney-McCumber tariff the operations and effect of the farmers' emergency tariff were closely watched. During the consideration of the Fordney-McCumber bill the United States Senate called upon the United States Tariff Commission for a report as to the specific effect the farmers' emergency tariff had had upon farm prices, agricultural imports, and its general effect upon agricultural interests. The report of the tariff commission was voluminous, exhaustive, and conclusive, absolutely free from theory, presenting merely the facts. Briefly, it showed the farmers' emergency tariff had—

First. Appreciably diminished agricultural imports.

Second. Checked the precipitous decline of agricultural prices.

Third. Operated to maintain a higher level of prices in the United States for all kinds of agricultural products than prevailed in any other country.

It showed in detail that while prices of grain products, livestock, and meat products steadily declined throughout the world during the calendar year 1921, the decline in the prices of those products was far less in this country than in other countries; that where prior to the enactment of the tariff prices of farm products had been lower in this country than in other countries, following the enactment of that tariff they became the highest in the world for that year. The report further showed that the farmers' emergency tariff directly and positively operated to save the cattle, sheep, and wool industries from absolute ruin.

All the facts in connection with the operation of the emergency farmers' tariff argued in favor of its schedules being incorporated in the Fordney-McCumber tariff. Other facts contributed to the same conclusion. Agricultural and livestock interests were suffering from deflation of prices of farm products, precipitated in 1920 under the Democratic administration, and they needed all possible legitimate economic assistance. Competition from other agricultural producing countries gave every evidence of becoming more formidable. European peoples who had been largely dependent upon our agricultural products for their food supply during the World War and the years immediately following were not only resuming their pre-war agricultural activities, but in a desire to decrease their imports and balance their trade as far as possible, they were resorting to all possible stimulation of production of food at home. This meant an inevitable and very large decrease in our exports of agricultural products. All facts justified the schedules of the farmers' emergency tariff being incorporated in the Fordney-McCumber Act, and all agricultural interests joined in the active desire to have them included. It is well within the truth to state that the agricultural organizations of the country, representing bona-fide producers, dictated the agricultural schedules of the Fordney-McCumber Act. They were consulted in every instance, and their desires in every case were embodied in the bill.

EXISTING TARIFF RATES HAVE UNDOUBTEDLY SAVED AGRICULTURE FROM RUIN

There was every reason to believe that the protective schedules of the farmers' emergency tariff, which saved American agriculture from absolute ruin, would have a continued beneficial effect if embodied in a permanent tariff act. The operation of the Fordney-McCumber tariff has justified that belief. Under that tariff, and because of it, all our agricultural and livestock interests have been immeasurably benefited. No amount of deliberate or ignorant misrepresentation can change that fact. The proof is plain, easy of access, and indisputable.

There is no room for honest doubt that the existing tariff has profited American wheat growers in the sum of hundreds of millions of dollars; it has kept American wheat prices above the level of world prices and has saved the farmer his home market from a flood of foreign wheat that would have meant ruin and disaster to him.

According to the United States market reports compiled from official records the Winnipeg price of wheat for the three years of 1914, 1915, and 1916 averaged 8 cents higher per bushel than the price of like wheat on the Minneapolis market. During all of that period the Underwood Democratic tariff, which provided no protection whatever to American wheat, was in effect.

But beginning with the harvest of 1920 and continuing until the new crop of 1921 came in, the Underwood tariff still being in effect, the differential between prices of wheat in American markets and Canadian markets was only 4 cents a bushel. This statement is based upon the findings of the United States Tariff Commission. Points of comparison were: Sweetgrass, Mont., with Coutts, Alberta; Whitetail, Mont., with Bengough, Saskatchewan; Souris, N. Dak., with Waskada, Manitoba, and Pembina, N. Dak., with Emerson, Manitoba. However, with the imposition of a protective tariff of 30 cents a bushel upon wheat, the differential between these market points immediately jumped to from 25 to 31 cents a bushel in favor of the American markets.

BECAUSE OF TARIFF WHEAT HAS SOLD FAR ABOVE WORLD-MARKET PRICES

Furthermore, the records of the Department of Agriculture show during the period of 222 weeks from July 1, 1923, to October 1, 1927, during all of which time the protective tariff has been in effect, the average price of wheat at Minneapolis was 19 cents above like wheat at Winnipeg, and for 59 weeks of that period, or one-fourth of the entire time, the average price of wheat at Minneapolis was 30 cents or more above the price of like wheat in Winnipeg. During those four crops years the production of American wheat amounted to over 3,000,000,000 bushels, for which the American farmer received $602,000,000 more than he would have received had he sold at Winnipeg prices.

No other explanation can be offered for this differential except the protective tariff placed on wheat by the Republican Party. No other market conditions, no other economic factor entered the equation to cause this switch of a differential in the price of wheat from Winnipeg's favor to the favor of the American market except the enactment of a tariff law which took wheat off of the free list and gave it protection. In view of this, to make the charge, as is repeatedly made, that the American wheat grower does not benefit from the tariff and that he sells in an unprotected market is to utter an absurdity, to phrase it mildly.

This benefit is given further emphasis by the fact that since the American protective tariff on wheat went into effect Canada has become the second largest producer and largest exporter of wheat in the world. Canada exports more than 300,000,000 bushels of wheat every year. Moreover, according to the findings of the United States Tariff Commission the cost of producing wheat in Canada is 33 cents per bushel less than in the

United States. Taking Duluth as the market for American wheat and Fort William or Port Arthur as the market for Canadian wheat, the Tariff Commission finds that the cost of marketing wheat, including country elevator charges, rail transportation, terminal market charges, and so forth, in Canada is 8.84 cents per bushel less than in the United States. This makes a total of 42 cents a bushel in favor of the Canadian wheat grower. In other words, the Canadian wheat grower can lay wheat down at the head of the Lakes for 42 cents a bushel less than the American wheat grower. It certainly is no theoretical protection which has enabled the American wheat grower to obtain 19 cents a bushel more for his wheat than the Canadian wheat grower, in spite of Canada's annual export surplus of 300,000,000 bushels, which can be delivered at our very boundary line for 42 cents a bushel less than American wheat can be produced and delivered at the same point.

To phrase it another way, Canada is the greatest wheat-exporting country in the world. By reason of lower land values, lower labor costs, lower taxes, and lower transportation costs, Canadian wheat is raised and marketed at Great Lake ports 42 cents a bushel less than American wheat can be raised and marketed at Great Lake ports.

The United States is the greatest wheat-consuming country in the world. The only barrier between the world's greatest wheat-consuming people and the world's greatest wheat-exporting people is a tariff of 42 cents a bushel. No one who is sane will contend that that barrier affords the American grower no protection, or that its removal would not be followed by gigantic inundation of American markets by Canadian wheat. Were the tariff removed, Canadian wheat, enjoying a differential of 42 cents a bushel because of lower production and lower transportation costs, would undersell American wheat at every lake port from Duluth to Buffalo and still show a good profit.

At this point permit me to suggest to my Democratic friends that their eleventh-hour conversion to the support of the McNary-Haugen bill places them in a very embarrassing position. Either their very recent support of the McNary-Haugen bill is hyprocritical in the hopes of obtaining votes for their candidate from the sidewalks of New York, whose knowledge of agriculture is confined to raising spring vegetables in a window box, or it indicates upon their part an abandonment of their objection to a protective tariff and their admission that a protective tariff on agricultural products does bring the price of American farm products in America much above the world level of prices. The entire theory of the McNary-Haugen bill is based upon the fact that a protective tariff on farm products does work and does make the level of farm prices in the United States higher than the level of farm prices abroad. If this were not true, then there would be no need of an equalization fee to make up the difference between what farm products are sold for at the American price and what they are sold for abroad.

WHAT TARIFF HAS DONE FOR AMERICAN DAIRY INDUSTRY

Take another example of how the Fordney-McCumber tariff protects farm products! Due to this tariff the dairy industry of the United States has been able to obtain prices for butter that are above the world level of butter prices and are 15 per cent higher than the average in this country in 1921 under the Democratic tariff. This increase in butter prices and the stabilization of butter prices has taken place in face of a 100 per cent increase in butter production in this country and an increase of 400,000,000 pounds annually in the exports of butter from competing dairy producing countries, which are able to produce butter from 13 cents to 28 cents less per pound than it can be produced in this country.

The following are the salient facts in connection with the production of butter and its protection by the existing tariff. In 1917 creamery-butter production in this country was 759,000,000 pounds; in 1927 it was 1,467,000,000 pounds, or an increase of 100 per cent. In the same period exports of butter from Argentine, Australia, and New Zealand increased from an average of 124,000,000 pounds a year to 320,000,000 pounds. Exports from Scandanavian and northern European countries have increased in the same period 188,000,000 pounds. Quite obviously such a tremendous increase in the production of butter in the last 10 years had a depressing effect on butter prices in this country, which is the largest consumer of dairy products in the world. The Fordney-McCumber tariff placed a tariff of 8 cents a pound upon butter, which at that time seemed sufficient. However, as foreign competitive conditions became more severe and the production of butter increased in this country it became apparent that the rate was not high enough. The Tariff Commission made an investigation which disclosed the fact that butter is being produced in Denmark for 13 cents a pound less than it can be produced in this country and is being produced in New Zealand at from 24 cents to 28 cents per pound less than it can be produced in this country. As a result of this investigation, the Tariff Commission made recommendations to President Coolidge, and the tariff on butter was increased by his order March 6, 1926, from 8 cents to 12 cents per pound. In the meantime, despite the tremendous increase of butter production, prices of butter in the United States as paid on the farm are 15 per cent higher now than they were in 1921 prior to the enactment of the present protective tariff.

No one who has studied the dairy conditions in the last six years, as previously set forth above, and knows that in spite of them the price of butter in this country has gradually increased until it is above the world level, can doubt that this has been due solely to the protection afforded our dairy interests by the schedules of the existing tariff law.

I might go on in greater detail and show how the present law has benefitted practically every product of the farm; how it has prevented the importation of millions of pounds of Argentine beef, which, according to data collected by the United States Government, can be produced on the ranches of Argentine at 75 cents per hundred pounds, while the best showing that can be made in the United States on a ranch of 6,000 acres with production costs at a minimum is $3.65 per hundred pounds. The protective tariff prevents Argentine meat, which is being exported at the rate of 2,000,000,000 pounds a year, from coming into this country in any appreciable quantity, and is directly responsible for the fact that beef cattle on the Chicago market, ever since the enactment of the Fordney-McCumber tariff, have brought approximately twice as much as like cattle in the market at Buenos Aires.

It is claimed, and with a great deal of justice, that our agricultural imports are yet too great due to the fact that our protective rates on some products are still too low. In all probability the present schedules are not high enough in some instances to afford proper protection of certain agricultural products. That is because foreign competitive conditions have developed in intensity far beyond expectations at the time the present tariff law was enacted. The dairy industry affords an illustration of such unforseen competitive conditions. There are many others not only in agriculture but in manufacturing industries. Competition in and for the world markets has become increasingly severe in the last six years until at present it is keener and more intense than ever before in the history of civilization. Much of this competition is aimed directly at the American market, American industry, and American agriculture.

IF AMERICAN AGRICULTURE NEEDS MORE PROTECTION, REMEDY IS NOT FREE TRADE

But the history of the Republican Party for 60 years justifies the confidence that as fast as international competition menaces the American producer, whether he be on the farm or in the factory, just that fast will the Republican Party readjust tariff schedules in order to afford needed protection. For certainly the way to meet this increasing foreign drive to obtain control of American markets at the expense of American producers is not by lowering or abolishing tariff rates and inviting foreign producers to help themselves, which is the proposal offered by the Democratic Party which promises that in the event that it obtains control of the legislative and executive branches of our Government it will repeal the present tariff laws which it claims are robbing the consumer and not affording any benefit to the producer.

The Republican Party stands for the policy of writing tariff rates high enough to preserve the American market to American producers, and are revising these rates upward as often as necessary to maintain this protection. Evidence of this is afforded in the fact that since the present Fordney-McCumber law was enacted tariff schedules have been increased under the flexible provisions of that act on wheat and wheat products, butter, Swiss cheese, and cherries as follows:

Wheat and wheat products: The rate of duty on wheat was raised from 30 cents to 42 cents per bushel; on wheat flour, semolina, and so forth, from 78 cents to $1.04 per hundred pounds; and was reduced on by-product feeds, such as bran, from 15 per cent ad valorem to 7½ per cent advalorem. This change was effective March 7, 1924.

Butter: The rate of duty on butter was raised from 8 cents per pound to 12 cents per pound, effective March 6, 1926.

Swiss cheese: The rate of duty on Swiss cheese was raised from 5 cents per pound, but in no case not less than 25 per cent ad valorem, to 7½ cents per pound, but in no case less than 37½ per cent ad valorem, effective June 8, 1927.

Cherries: The rate of duty on cherries was increased from 2 cents per pound to 3 cents per pound, effective December 3, 1927.

All these increases were made by Executive order of President Coolidge, following investigation and report of the United States Tariff Commission. Investigations are now under way by the United States Tariff Commission looking to a revision of the rates on eggs and egg products, corn, peanuts, cottonseed, flaxseed, soy beans, onions, fresh tomatoes, canned tomatoes, and tomato paste. To carry on these investigations the United States Tariff Commission has sent its representatives into 40 States of the United States and into Canada, Mexico, China, and Italy.

The complaint is made that the Tariff Commission is slow. That is a natural complaint from those whose business is suffering from inadequate protection and who desire the utmost haste in applying the remedy of higher rates. All of the investigations of the Tariff Commission of rates on the above commodities are under section 315 of the Fordney-McCumber Act, which authorizes the President, after investigation and report by the Tariff Commission, to proclaim such changes in rates of duty, within a limit of 50 per cent either way, as may be necessary to equalize the ascertained differences in costs of production of like or similar articles in the United States and in the principal competing foreign country.

In attempting to carry out the provisions of this section, calling for ascertainment of production costs in foreign countries, the United States Tariff Commission has met with the most determined opposition upon the part of foreign producers and foreign governments. In no field of its endeavors has this opposition been more pronounced and unyielding than in those countries where it sought to investigate the costs of agricultural products. Some nations, notably Argentina, made the matter the subject of diplomatic protest, with the result that the United States Government instructed the United States Tariff Commission to recall its investigators from those countries.

Where the proposed investigations were of manufactured articles and might involve the disclosure of trade secrets or of exclusive processes and formulas, the objection might reasonably be raised to the United States Tariff Commission, making such investigation. This was the basis upon which several European countries registered their diplomatic protest against research work by the commission. But where the proposed investigation was one of costs of agricultural products, such as flaxseed, corn, butter, or cattle, involving the disclosure of no secret manufacturing processes, the conclusion is inescapable that the diplomatic objections were raised to prevent the collection of facts that would have undoubtedly justified an increase in our tariff rates on imports of those products.

PRICES OF FARM PRODUCTS HAVE INCREASED UNDER PRESENT TARIFF

Those who claim that the present tariff does not benefit the American farmer are referred to the monthly reports of the Department of Agriculture on farm prices, which show that since the tariff went into effect the price of wheat has increased 20 per cent, rye 20 per cent, corn 70 per cent, oats 50 per cent, barley 60 per cent, flaxseed 27 per cent, beef cattle 70 per cent, calves 48 per cent, butter 15 per cent, hogs 35 per cent, sheep 93 per cent, lambs 86 per cent, wool 100 per cent.

Yet in the face of these nonpartisan Government statistics there persists free-trade propaganda that the existing tariff has not enhanced the value of farm products and does not give the American farmer the benefit of a protected home market in which to sell his products. Such argument is childish, for nothing could be clearer than the fact that the American farmer does sell in a protected market, protected directly from the cheaply produced agricultural products of other countries. The tariff prevents 300,000,000 bushels of Canadian wheat, produced at 42 cents less on the bushel that he can produce it, from invading his market and taking it away from him. The tariff prevents the Argentine cattle interests, able to produce cattle at 70 cents per hundred pounds, from invading his market and utterly wiping out the livestock industry. The tariff prevents the dairy products from northern Europe, New Zealand, and Australia, produced at much less than they can be produced in this country, from invading his market and destroying the dairy industry.

One of the arguments advanced in an attempt to prove the protective tariff is of no benefit to the farmer, cites as alleged proof the decline of farm-land prices since the enactment of the Fordney-McCumber Act. This argument can not stand analysis. There is no tariff upon land as a commodity. Land is neither imported nor exported. The tariff, then, affects the value of land only in so far as it affects the value of farm products which, after all, must be the final basis of the valuation of land. The price of farm products just given indisputably prove farm land has a higher earning capacity now than it has had since the World War, and that this increased earning capacity is attributable to the existing tariff. Does anyone seriously believe our agricultural and livestock interests are no better off now with these price increases than they would be without them? Does anyone seriously advance the argument, no matter how much land values in some sections have declined since 1920, that those values would not be much lower to-day if farmers were getting 1921 prices for wheat, corn, hogs, cattle, and wool?

The plain, unvarnished truth which no amount of free-trade sophistry or political humbuggery can change is that the existing tariff has been of particular benefit to the American farmer. Under it farm prices have steadily increased and the price of nonagricultural commodities have steadily decreased.

Farm prices have increased under the existing tariff because (1) importation of cheaply produced agricultural products from other countries has been curtailed so that the American agricultural producer can sell in a protected home market at higher prices; and (2) because the operations of the tariff have increased the pay rolls of American industry and commerce by over $3,000,000,000 a year, which increased pay roll means increased market for food produced on American farms.

Prices of manufactured commodities have steadily declined since the tariff became operative. Under a protective tariff prices of manufactured articles always decline. This is because a protective tariff stimulates industry and increases industrial production, which, in turn, intensifies competition because of the necessity of manufacturers marketing their increased and increasing output.

Moreover, as already set forth, the severity of foreign competition has so increased during the last six years that rates of the present tariff, which were deemed adequate when the law was enacted, are proving inadequate in the face of incredibly low labor costs in European industries, plus the destructive competitive methods of foreign combines, or cartels, making especial efforts to establish themselves in the United States market.

TARIFF HAS NOT GIVEN AMERICAN MANUFACTURERS MONOPOLY OF MARKETS

The enemies of protective tariff as a policy, and the existing tariff in particular, have been busy spreading the impression that the present tariff law gives the American manufacturing interests a monopoly of the American markets, enabling them to exploit the American consumer. The most charitable thing that can be said about such propaganda is that it is peddled by those who are ignorant. The official figures of our imports show there has been an increase of 16.5 per cent in textile imports since the Fordney-McCumber law became operative; an increase of 50.2 per cent in imports of glass products; and of 68 per cent in pottery, china, and porcelain; of 63 per cent in nonmetallic minerals, such as fluorspar and magnesite; 67.9 per cent in metals and metal products, such as aluminum, steel, iron, etc.; 66.7 per cent in machinery and vehicles; and 35 per cent in chemicals.

The plain fact is the existing tariff has operated against the importation of agricultural products more effectively than it has against any other class of imports.

Democratic tariff critics orate and write about the descending level of farm prices, when farm prices, in point of fact, are ascending. They grow vehement over the alleged profiteering of protected industries when, in point of fact, factory prices have steadily declined for four years. There is no end, apparently, to the number or variety of such misrepresentations.

To cite an example: Speaking before a farm congress at Madison, Wis., last October, the Democratic Governor of South Dakota said:

> We no longer trade loaves of bread for a pair of shoes. The farmer trades his wheat for the dollar and then trades his dollar for shoes. This would be a fair and equitable way of arriving at an exchange if the same conditions existed and the same rules applied to both trades. The trouble is, when the farmer attempts to trade wheat for his dollar the value of his wheat is fixed by a world market. When he goes to trade with it for shoes the value of shoes is artificially fixed by tariff legislation. * * * If you want to put the wheat grower and the shoemaker upon an equal trade basis, tear down the tariff wall and give to both the equal benefit of a world market.

In the first place, the wheat grower of South Dakota does not sell his wheat at a price fixed by the world market. For the last four years he has been getting an average of 19 cents per bushel more for his wheat than the same grade of wheat sold by the Canadian farmer at Winnipeg or at points in Canada just across the boundary line from North Dakota. Sometimes this differential in favor of the South Dakota wheat grower was as great as 30 cents a bushel. On the other hand, the value of shoes is not artificially fixed by tariff legislation, for the very simple reason that all shoes, as well as all other products made of leather, are on the free list. So are hides, from which leather is made. The tariff has not the slightest thing to do with the price of shoes.

SOME FACTS ABOUT "GOOD OLD DAYS" OF FREE-TRADE FARM PROSPERITY

Another favorite argument of the Democratic low-tariff advocate is a comparison of farm-machinery prices to-day with those of the "good old pre-war days" under Democratic tariff, showing there has been a very great increase of farm-machinery prices during that period. But they neglect to show how much more the farmer is getting for his products to-day than he did then, and they also neglect to strike a balance to see whether the farmer's condition is better or worse now than it was then.

A Democratic Congressman resorted to this shopworn argument in Minnesota a few months ago and drew the following editorial reply from the Long Prairie (Minn.) Leader:

A couple of weeks ago Congressman KINCHELOE, of Kentucky, addressed a gathering of Minnesota Democrats and among other things he told them what the Democratic Party had done for the farmers.

The low price of farm machinery years ago and the high price now was referred to as his proof of how Republican policies, particularly the tariff, operate against the farmers. The farmer's dollar, he said, has a purchasing power under the present Republican conditions of only 65 cents, while way back under the Democratic times it had a purchasing power of $1.04.

* * * * * * *

We examined a file of the Leader, going through the papers for an entire year, to learn what the prices of farm products were in those days of wrong farm methods and low Democratic tariff. We found that averaging the prices throughout the year hogs brought 4 cents per pound; wheat, 60 cents per bushel; potatoes, 15 cents a bushel; butter, 12½ cents per pound.

Taking up prices paid for farm implements in those days, we found that the best 14-inch walking plow could be bought for $14, the best lumber wagon for $52.50, and the best grain binder for $125.

When we look back to the good old days it is true that we could buy farm implements pretty cheap, but what we had to buy them with was also pretty cheap. It is well not to forget that.

To-day the price of all kinds of farm implements are much higher. But while it took 3,120 pounds of hogs to buy a binder in the good old days, a better binder can be bought anywhere in Todd County to-day for 1,750 pounds of hogs.

If a farmer wanted to buy a wagon in the good old days that we like to turn back to when talking about the "purchasing power of the farmer's dollar," he would have to bring in 87 bushels of wheat. To-day, notwithstanding the wagon costs more than twice as much in dollars, any Long Prairie machine dealer will be glad to trade the best wagon on his floor for only 63 bushels of wheat.

If a farmer wanted to buy a walking plow back in the days that his "friends" yearn to have return, and he had nothing but potatoes with which to buy the plow, he would have had to haul in 93 bushels. To-day if he were trading potatoes for the same size but a much better plow he could easily bring in the spuds in one load, for it would require only 33 bushels.

If he traded butter for what he wanted in the good old days, he would have had to bring in 1,000 pounds of butter to get a binder. To-day 402 pounds of butter buys a binder that is so much better he would never give the other binder a second look.

A wagon costs more than twice as much as it did 25 or 30 years ago; but, speaking in terms of butter, it required 438 pounds of butter in the old days to buy a wagon. To-day the wagon can be bought for 160 pounds of butter.

In the good old days when everything was cheap and farmers wanted to trade butter for a walking plow, he would have had to hitch up the team to bring the load to town, for the butter would have weighed 110 pounds. To-day, although the same plow costs twice as much in dollars, he could walk into town with the butter, if he wanted the exercise, because the package would weigh only 43 pounds.

In the good old days if he wanted a suit of clothes and figured he could afford a $25 suit, the storekeeper would have demanded 625 pounds of hogs for the suit, or 402 bushels of wheat, or 166 bushels of potatoes, or 208 pounds of butter. To-day, however, the merchant would be tickled to death to trade the same value suit for 179 pounds of hogs, or 20 bushels of wheat, or 50 bushels of potatoes, or 43 pounds of butter.

We do not know how Congressman KINCHELOE gets his figures about the 65 cents purchasing power of the farmer's dollar, but if he will consider the purchasing power of the farmer's products, particularly those which are the results of diversification, he will reconstruct his figures.

The real road to farm prosperity is the road which the farmers of Todd County are traveling and which this newspaper has had a modest share in helping to advance. It is a road which the farmers themselves have built, and they have built it through the use of better methods of production and better business in marketing, aided during the process very materially by our Republican tariff laws, which directly and substantially protect the products raised on their farms. * * *

FARM ORGANIZATIONS REPRESENTING BONA FIDE PRODUCERS SUPPORT PRESENT TARIFF

Opponents of protective tariff on the floor of Congress, on the public platform, and in the editorial and news columns of the press, while making the general assertion that the farmers of the country are against a protective tariff, have failed to cite a single statement by any bona fide agricultural producing organization advocating either the repeal of the present tariff or a reduction of its schedules. Moreover, it is a matter of record that in the lengthy congressional hearings before the House Committee on Agriculture upon the subject of farm relief not a single agricultural producer, not a single representative of any bona fide agricultural organization, not a single representative of any farm bureau federation, not a single actual "dirt farmer" asked that the present tariff rates be reduced or that the present tariff act be repealed. Is it not strange that if, as free-trade critics allege, the farmer is in distress because of the present tariff, that none of the witnesses at those hearings so testified, or even intimated? The records of the United States Tariff Commission are filled with petitions from agricultural producers of all kinds asking for increase in tariff rates, and there is scarcely an agricultural organization but what has, at some time within the last two years, passed resolutions in support of the principle of a protective tariff and requesting an increase in present rates rather than a decrease.

An example of this was the action of the convention of the National Cooperative Milk Producers Federation held in Milwaukee, Wis., in November, 1927, an organization representing 290,000 dairy farmers. One of the resolutions it unanimously adopted was as follows:

It has long been the policy of the Federal Government to protect American industry by means of import tariff duties. We believe that the industry of agriculture should have an equivalent protection. We therefore urge the Congress to levy an excise tax on all vegetable oils and raw materials from which such oils are produced that are imported into this country from the Philippine Islands.

During the same month the American Farm Congress, at its annual convention in Kansas City, adopted resolutions which read as follows:

American agricultural and livestock industries have entered an era in which they must have protection in the home markets from unrestricted competition of products of countries where land is cheap, standards of living are low, or labor meanly paid if they are not to sink to the approximate level of such countries.

It is not in the interest of the farmers and stockmen alone that this protection should be maintained. For America to permit its own agriculture to fall into decadence, and to depend upon importations of foodstuffs from other countries, would be most unwise. Reliance can not safely be placed in any other land to feed our people.

Many similar resolutions adopted by various agricultural and livestock organizations could be quoted. Nor is this attitude confined to the agricultural interests of the North. Declaring that "the protective tariff principle is a recognized and extensively adopted program of our National Government," the Florida State Chamber of Commerce has memorialized Congress for higher duties upon such products as citrus fruits and vegetables. Similar requests were made by the Florida East Coast Growers' Association, which not only went on record in favor of a protective tariff on all such products, but sent a delegation to Washington and filed a formal petition with the United States Tariff Commission.

At the annual convention of the Sheep Raisers' Association of Texas, held in August of last year, a resolution was adopted reading:

We hereby agree that we will support in 1928 only those candidates for Congress and the United States Senate who will publicly declare in favor of a national policy of a just and equitable tariff protection.

Associations representing peanut growers of the States of North Carolina, Florida, Georgia, Louisiana, and Virginia have filed formal petitions with the United States Tariff Commission asking for increased tariff rates upon peanuts and peanut oil. Another petition filed with the United States Tariff Commission by Mr. L. B. Jackson, manager of the Georgia State Bureau of Markets, is signed by nine southern Democratic governors, protesting against reduction in the duty on vegetable oils.

The nine Democratic governors of the Southern States who so affixed their signatures to this petition were: Clifford Walker, Georgia; Henry L. Fuqua, Louisiana; John W. Martin, Florida; M. E. Trapp, Oklahoma; Thomas G. McLeod, South Carolina;

Austin M. Peay, Tennessee; Tom J. Terral, Arkansas; W. W. Brandon, Alabama; Henry L. Whitfield, Mississippi.

These are but a few of the indications of a revolutionary change in the economic and political thought of the Democratic South. For half a century that section of the country has been the stronghold of free trade, notwithstanding such Democrats as Andrew Jackson were protectionists.

PROTECTIVE TARIFF GIVES EMPLOYMENT TO FARMERS' BEST CUSTOMERS

Not only does the tariff now in effect protect agricultural interests by erecting a barrier against the cheap agricultural products of other countries, but it protects them in another way quite as vital to their welfare. Our domestic market during periods of good times consumes 95 per cent of the food products of our farms. This domestic consumption is the measure of our agricultural prosperity. When domestic consumption declines, prices of farm products decline. Domestic consumption declines whenever there is industrial depression. These facts are so fundamental there can be no disputing them.

The United States Department of Labor has made a survey of the expenditures of the American industrial wage earner, based on first-hand investigations of over 12,000 typical homes of industrial employees in 92 cities scattered through 47 States. This survey ascertained that 40 cents of every wage earner's dollar is expended for food. If the wage earner is idle, this expenditure is of necessity reduced to the minimum. If his wages are reduced this expenditure is naturally curtailed. Whatever increases employment and wages increases demand for farm products. A protective tariff always does this. The existing tariff has done it.

In 1921 it is a matter of record that over 5,000,000 wage earners ordinarily employed were in enforced idleness. The records further show that the per capita consumption of food in the United States during that year was the lowest of any year in the history of this generation. Less meat products per capita, less bread, less sugar, less grain goods of all kind were consumed, because the American workingman was out of a job and had no money wherewith to buy anything except the bare necessities.

Since 1921 the per capita consumption of beef and veal in the United States has increased 4½ pounds or 495,000,000 pounds in the aggregate. The per capita consumption of flour in this country year by year since 1921 (at which time it was lower than for any previous year of record) has steadily increased. So has the consumption of practically every food product which originates on the American farm.

Why the difference? Because the millions of idle industrial wage earners of 1921 have been put to work at steady employment and for a higher wage than ever before paid in the history of industry, either in this or any other country. The amount of wages paid by our industries has increased 32 per cent since 1921. Increased industrial activity naturally meant increased demand for raw material from mines, a tremendous increase in the amount of freight carried by railroads, which in turn meant an increase in the number of railroad employees. It meant an increase in the personnel of the commercial enterprises which handle the output of American industries—the wholesale and retail concerns with their vast army of clerks, traveling men, and office force. This meant a proportionate increase in the consumption of farm products.

The pay rolls of American industries to-day carry about 13,000,000 individuals; the mining industry employs an additional 1,000,000; the various transportation activities have a pay roll of over 3,000,000, and the business world, which includes the wholesale, retail, and banking interests and their related activities, employ over 7,000,000. Here is a total of 24,000,000 exclusive of those employed in agricultural pursuits and the professions whose income depends upon the degree of prosperity this country is enjoying, upon the amount of goods our mills and factories can produce and sell. Curtail home production by lowering our tariff and permitting a veritable flood of foreign-made goods to inundate our domestic market, and this vast army of employed would rapidly become a vast army of unemployed.

Estimates based upon the volume of factory and agricultural production, upon the volume of exports and imports, upon car loadings, wholesale sales, department store and chain store sales, and other data, made by conservative business representatives for the purpose of ascertaining the total value of retail business in this country, places the amount of money annually spent by the American people at retail stores at about $40,000,000,000. The analysis shows that of this amount $16,500,000,000 is expended for food products.

This market for the American farmer is created by the buying power of the American wage earner, which in turn has been created by the protective tariff. This market for the American farmer is to-day being maintained by reason of the protective tariff. It could not exist without a protective tariff. Every period of our country's history under a protective tariff has been marked by greatly increased production, accompanied by steady employment at good wages, resulting in increased consumption of farm products at higher prices.

AMERICAN FARMER DOES NOT SELL IN "OPEN" MARKET UNDER PROTECTIVE TARIFF

What, then, becomes of the argument that the farmer, in the words of the Democratic free-trade advocate, "buys in a protective market and sells in an open market"? It goes the way of the old Democratic argument of Bryan's first candidacy that "the price of wheat and the price of silver go hand in hand."

The American farmer under the present tariff does not sell in an open market. He sells in a protected market, in a market made possible by the protective tariff, in a market of consumers whose buying power, aggregating $16,500,000,000 of food products every year, is dependent almost wholly upon the maintenance of a protective tariff. Under the present tariff the farmer, instead of selling in an open market, sells in a market which for him is doubly protected. First, his consumers are protected in their wages—the highest ever paid in any country in the history of the world—40 per cent of which is spent for farm products. Second, the protective tariff sees to it that the food products bought by the industrial consumers are largely produced in the United States on American farms instead of being the imported products of other agricultural countries.

The American wage earner also buys in a protected market. By reason of this exchange of commodities between the protected farmer and the protected wage earner, the living standards in the city and on the farm are maintained at a level better than ever experienced in this country and infinitely better than anything dreamed of in Europe.

RECORD OF REPUBLICAN PARTY FOR CONSTRUCTION, PROGRESS, AND PROSPERITY

It is the policy of the Republican Party to maintain the present standards of living for the American people by continuing in force the economic policies which have made these standards possible. It is the policy and the promise of the Democratic Party to enact such legislation in event it secures control of the Government as will repeal or nullify the wise, salutary, and progressive laws which the Republican Party has placed upon the statute books. There is nothing new in this attitude of the Democratic Party. On the other hand, a destructive policy is characteristic of that party. Twice it has sought to destroy our financial system and our national credit. Three times it has destroyed our protective tariff system and brought ruin, poverty, and distress to all classes of people and all sections of the country as a result. Twice the Republican Party has carried the Nation through periods of reconstruction, with practically every constructive measure it proposed meeting with the opposition of the Democratic Party. The Democratic Party even went so far as to seek to destroy the sovereignty of the United States of America in order to join a European political league.

For 68 years the Republican Party has been a party of construction, upholding American traditions, defending American institutions. For 68 years it has been a party laboring to benefit all of the people, discriminating against no section of America or any class of Americans. In all that period it has never had to abandon any policy because it was unsound, uneconomic, or un-American. Within that period all of its constructive policies have been vindicated by the judgment of the American people and the verdict of time. The history of the development of this Nation in territory, in prosperity, in the promotion of the welfare of its people to a point where they now live better, have greater opportunities for themselves, and finer prospects for their children has been the history of the Republican Party.

SHALL THE SMALL BUSINESS UNIT SURVIVE?

Mr. KENT. Mr. Speaker, the small business man and the small business unit are gradually passing out of existence in the United States. Great consolidations of wealth and business are moving forward in violation of the Sherman antitrust law, and are gradually exterminating what was once the strength in this country, the small business man and the small business unit. The grocer, the farmer, and all men who do business upon a small scale were once separate and independent business units; but consolidated manufacturing plants, business houses, distribution systems, chain stores, and other great consolidations have come down into the large cities, the small towns, and the country cross roads, and are gradually driving these small but independent business men out of existence.

The Sherman antitrust law was designed to prevent such a condition, especially where a monopoly in a particular article or system of distribution was made effective.

In my own congressional district there is one of the finest articles of commerce in the world. I refer to slate. It makes the best roof, the best blackboard, and the best structural slate known to commerce. Yet there have been combinations of substitute roofing and blackboard manufacturers, who have millions at their disposal, who have consolidated their interests and their plants and their distribution systems. They have put on high-powered salesmanship and have gone down into the markets which once consumed hundreds of thousands of squares of slate and millions of feet of blackboards and have almost driven the slate business out of existence.

The Federal Trade Commission, raised up by the administration of Woodrow Wilson to prevent a condition of this kind, is a dead letter. It has been so ill treated by the present administration that it will not lay its hands upon the special interests who are gradually eliminating the small business man. Millions of dollars' worth of property has been rendered valueless in the slate fields of Northampton and Lehigh Counties in Pennsylvania, as well as in the slate fields of New York and Vermont. My own county of Northampton, in Pennsylvania, has particularly suffered.

The Attorney General's department is inactive. It has permitted the consolidation of the concerns which produce steel, coal, oil, furniture, newspapers, building materials, and has even permitted the consolidation of concerns dealing in bread, one of the greatest necessities of life.

The Government of the United States should not thus permit its people to be oppressed. My own people have been driven out of employment, have been compelled to leave their homes and go to far-distant places to work. Many of the slate industries have gone into bankruptcy or receiverships, and it is all because the Federal Trade Commission and the Attorney General's department have continued the policy of this administration of permitting great combinations of those who engage in mechanical production of articles of commerce to engage in activities in restraint of trade.

I protest against this iniquitous policy and demand a return to the days when the Attorney General's department will amount to something and when the Federal Trade Commission will function and protect the business men of the country against unfair trade practices.

The tax plan of this administration provided for an increase in the taxation on small corporations, and in the Sixty-ninth Congress that plan went into effect. I believe that those who are able to pay Federal taxes should pay them in proportion to their ability to pay. I am opposed to the present policy of this administration of imposing the great burden of taxation upon the small business man, the small business unit, and upon the professional man who earns a comparatively small income.

If we permit business to be diffused among the people generally; if the small business man and the small business unit may continue so that a man and his family may acquire moderate wealth in a lifetime of endeavor, we have accomplished real results; but the present policy of this administration will soon develop a condition where there will be only two classes of people in our country—the extremely wealthy class ruling our country through the purchase of elections, and the laboring class of people, who will be too poor to offer effective resistance against governmental oppression.

The safety of our country rests in the great middle class of our people. The small business man and woman, the professional man and woman, and the working man and woman who are interested in raising their families, building a home, and providing for some security in savings against old age, are the people upon whom we must rely in emergencies.

PANICS SINCE THE CIVIL WAR

Mr. HAMMER. Mr. Speaker, under leave to extend remarks in the RECORD, I include the following brief statement, giving the history of panics in the United States since the Civil War.

The Republican Party again comes with its ridiculously absurd position in attempting to win popular favor on the plea that it is a "prosperity party."

The claims made by Republican politicians and spellbinders are not in accord with the facts.

Heretofore I made a speech in the House on the achievements of the Democratic Party in which I dwelt at some length in disproving this allegation of the Republicans, who were claiming then as now that their party was the "prosperity party."

When a falsehood is repeated again and again in campaign after campaign, even the first inventor of the story sometimes accepts it as a fact. Briefly, I will give the facts as to panics. Those who are familiar with the history of legislation and have taken interest in public affairs will recognize the truth of these statements.

BLACK FRIDAY

The first financial crash after the Civil War was in 1869. It was caused by Jay Gould and Jim Fisk trying to corner the gold of the country. They succeeded in buying up a good share of it and put the price up to $1.60 in currency. On "Black Friday" the crash came and brought ruin to thousands of people, closed banks and industries of every kind, and for a year or more resulted in hard times and misery all over the country. Yet the Republican Party controlled every department of the Government. The very name of "Black Friday" still brings a shudder to every man who was old enough to feel its disastrous effects. This was the beginning of a series of panics which took place every few years while that party was in power.

PANIC OF 1873

In 1872 the campaign was conducted largely on the prosperity issue. An army of Republican speakers declared everywhere that if prosperity was to continue the Republican Party must be continued in power. The result was an overwhelming victory for the Republicans. Within a few months after the reinauguration of President Grant in 1873 a panic swept over the country that laid our industries prostrate and closed a large share of the banks throughout the United States. A panic is a sudden fright. Every branch of the Government—Congress, President, and the Supreme Court—were then entirely controlled by Republicans. Instead of the voters being rewarded with prosperity as they had been promised, they were given five long years of the hardest times ever known in this country. Business of every description was paralyzed, soup houses were established in all the large cities, and dire distress was on every hand. Older persons will remember with a feeling of horror the awful conditions which surrounded them. This continued until 1878.

The campaign of 1876 was fought on the hard-times issue, the Democrats claiming the Republicans were responsible for all the misery it had caused, while the Republicans claimed that the cause was beyond the control of any party to bring on that panic. The Democratic candidate had a plurality of 260,000 in that election. No change had been made in the tariff rates, which were as high as during the Civil War, yet the panic was one of the worst ever known.

PANIC OF 1883

In 1883 another panic came in full force, extending throughout the United States. There was terror in Wall Street and consternation in every city between the two great oceans. Thousands of banks and industrial institutions were closed, and in many sections of the country this panic was more disastrous than any of the others. It is generally referred to as a severe depression, but starvation among the working people was very great. Hard times was one of the issues on which Grover Cleveland was elected the following year—1884. Throughout this period the Republican Party was continuously in power in all departments of the Government at Washington.

PANIC OF 1893

In 1892 there was a panic all over the world. It was first felt in Australia and Argentine Republic. Some English banking houses were heavily interested in securities in those countries. This brought about many failures, among them being the banking house of Barring Bros., of London. This caused a collapse in all the countries of Europe, and as Europeans held some five billion dollars of American securities they at once unloaded a great quantity of them for whatever these securities would bring. A vast amount of gold left the United States for Europe. The stringency was felt in America severely in the fall of 1892 and many predictions of a panic were made before the election. During January and February, 1893, while Benjamin Harrison was still President and a Republican Congress was in session, banks and business houses of all kinds commenced to fail, and before the new President and his Congress had time to change a single word in any law the panic spread throughout the United States. If it is possible to prevent a panic by legislation it is necessary to have control of the law-making power before it commences. This the Democratic Party did not have. Is there any honest man anywhere who will say, in all candor and honesty, that the party which had just come into power, while every law on the statute books had been either enacted or approved by the Republican Party, could be responsible for the panic that was so widespread over the entire country? Beyond all question, if either party could be held responsible, the one under whose laws the country was governed would be the responsible party. Furthermore, it should be remembered that the Secretary of the Treasury had prepared plates for the large bond issue which was inevitable.

These plates, prepared in February, before Harrison's administration, expired March 4, are still in existence.

This panic was still on and in full force in May and June, 1893, while the tariff law was not changed in any way until September, 1894. The first effects of this panic were felt nearly two years before the tariff law was changed by the Democrats, while its worst stage was reached 16 months before the new tariff law was enacted. Long afterwards, when the people were supposed to have forgotten all about the dates of the beginning of the panic and the enactment of the new tariff law, the Republican newspapers and orators spread the report that a flood of imports caused by the low tariff that brought on this panic, which actually was in full force at the close of the Republican administration, but why there should have been a flood of imports a year and a half before the rates on imports were lowered has not been explained.

It is not true that there was a flood of imports after the passage of the Democratic tariff law. The Government reports show that during the entire time the Wilson tariff law, enacted during the Cleveland administration, was in force the average imports were $40,000,000 a year less than during the duration of the McKinley law, which it succeeded. In other words, there was a great decrease in imports instead of an increase, although the Republican press has often proclaimed that there was a great increase of imports. This fraud has been exposed many times in the last 20 years, yet there are editors and speakers so ignorant or so untruthful they continue to make the same false and inaccurate statements, perhaps with the hope that a falsehood well stuck to is as good as the truth.

"Telling a falsehood is just like hiding in a fog" some one has aptly said. As soon as the sun or wind scatters the fog there is no longer anything to hide behind; and in this case, whenever anyone who knows the facts tells them, there is no longer any way to hide, and usually the men who have made these false statements deny they have ever made them. They rely solely on the supposed ignorance of their hearers, which is worse than hiding in a fog. When this false position is shown up they say, "Well, while the tariff law did not go into effect until long after the panic started, it was fear of tariff that caused it."

If that were the case, the question comes up, Who spread the alarm? Who made the scare? It was members of the Republican Party. Its newspapers came out day after day with great scare-head lines announcing the coming of a panic and telling the people not to buy any more than the bare necessities of life. The people became alarmed and stopped buying everything except something to eat, and this closed the mills and factories all over the land.

Which party was responsible for that, the calamity howlers or the administration, which has not had time to make a single move? Your own judgment will answer that. If the law which was enacted a year and a half after the panic started was the best law ever put upon the statute books, it could not have affected in the least degree the things that had happened. You see how unfair that was. That can be illustrated by the story of a peaceful, harmless dog that quietly trots down the street and a half dozen men run ahead of him screaming, "Mad dog! Mad dog!" And there is a panic in the crowd, resulting in injuries or death. Who is to blame, the harmless dog or the loud-mouthed calamity howlers? Of course, it was the howlers, both orators and newspapers, and they were members of the Republican Party.

PANIC OF 1907

Now let us pass to the next severe panic, where there likewise can be no doubt who was responsible. In 1907, with the Republican Party in power for the 10 preceding years and controlling every branch of the Government, with crops the largest ever known and no panic abroad, a severe financial crash came to the country, which the Republican Comptroller of the Currency, Mr. Ridgely, said was the most severe panic in a century. Millions of persons were thrown out of work and a large share of them were out for two or three years.

This was only 20 years ago and most of us can remember it. Soup houses were established in all our large cities, and the working people suffered untold misery. If the Democratic Party had been in power, what a great howl would have gone up. Instead the large newspapers refused to publish even the facts in the case and boasted afterwards that they had prevented a far worse panic by suppressing the facts. If they had pursued this course in 1893, business would have run along almost in its natural course. This shows how they placed partisanship above patriotism. Some of these newspapers have made little improvement. Some are worse; but it is to be hoped that upon the whole they are better, certainly not so bitterly partisan.

RETIREMENT OF EMERGENCY OFFICERS

Mr. CARTWRIGHT. Mr. Speaker, it was argued that the Tyson-Fitzgerald bill was discriminatory of the commissioned officer as against the enlisted man. There was much discussion pro and con.

I investigated the matter and found the disabled emergency Army officer was the only one out of nine officer classes to have been left out. The members of the other eight classes had all been cared for by the Government. The Tyson-Fitzgerald bill aimed to right an injustice. The enlisted men could not be helped by the defeat of the bill; it could mean only injury to the emergency officers. There is no discrimination against the enlisted man by giving the officer what is due his rank. I therefore supported the bill, and am just as willing to do everything reasonably possible for the enlisted man.

I have actively supported all legislation in the interests of all our veterans and their dependents. Hardly a day has passed since I have been a Member of Congress that I have not had opportunity to render some aid to ex-service men or their dependents in connection with pensions or increase of pensions, insurance settlements, compensation, hospitalization, and so forth. I believe the people who have actually made sacrifices for their country are entitled to every consideration.

ADDRESS DELIVERED BEFORE UNITED STATES TARIFF COMMISSION

Mr. FISH. Mr. Speaker, under leave to extend my remarks in the RECORD I insert the following address which I delivered before the United States Tariff Commission on February 24, 1928:

Mr. Chairman and members of the United States Tariff Commission, I represent the twenty-sixth congressional district of New York, one of the largest fluid-milk districts in the United States, the output of which goes mostly to New York City.

The dairy industry, which stands second to none in the United States in size and importance, comes here to-day to request increased duties or adequate duties to afford protection against the quantities of cream and milk shipped into the United States, and particularly into New York State, from Canada, a part of which is used to make butter within the United States and thereby escape payment of the existing duty of 12 cents a pound on imported butter. Certainly if any amount of fluid milk is being shipped from Canada to be made into butter in the United States it is only fair and just that the duty on milk and cream should be raised to a level comparable to the present duty on butter. I am strongly of the opinion that the dairymen of New York State and elsewhere are entitled to increased protection as against the fluid milk and cream supply from Canada, regardless of its being used in part for butter.

The dairy industry in the United States produces more wealth than the steel industry, and should secure reasonable protection and encouragement from the Federal Government, as it reaches into every household. The dairymen of New York have to undergo large expenditures to comply with the drastic State and city supervision and health regulations. The Lenroot-Taber bill has partially extended these regulations to the Canadian supply, but they are difficult to enforce in a foreign country.

The typhoid epidemic in Montreal last summer, I understand, resulted from impure milk, although it was hushed up by the authorities. Such a condition could not exist in the New York milk shed, and I for one would like to see increased duties for our dairymen who comply with the expensive health regulations and added protection for the health and lives of our children.

If the protective principle is right, it should be extended to give adequate protection to agricultural and dairy products just as much as to manufactured articles and other protected industries.

The prosperity of our country has been built up on the protective principle, which has made possible the American standard of wages and of living. Our wage earners are the best paid, best housed, best clothed, and most contented in the world. Revise the tariff downward and permit competition from the underpaid labor of Europe or the Far East and the economic supremacy of the United States will crumble and the disastrous days of 1914 will be revived, with its soup kitchens and millions of unemployed.

Instead of revising the tariff downward I believe that the time has come when agricultural products should be given the same amount of protection as other industries. The farmers of both the East and West have to buy in a protected market and sell in competition with the rest of the world. The remedy is not in a downward revision of the tariff but in affording adequate protection on what farmers produce; they are entitled to the same consideration as other protected industries, no more or no less. Believing that the principle of equality or parity is sound and that industries should be treated alike, without favoritism, I have introduced a bill to increase the duties on various farm products which are suffering from foreign competition, such as dairy products, eggs, vegetables, hay, and poultry. It seems to me to be fair and just that the rates on agricultural products should be on a level comparable to the rates that are effective in other industries. I believe it would

be practical to pass a special emergency tariff bill limited to providing adequate protection on agricultural products. If the Government affords proper and reasonable protection to the farmer, it will not only increase his buying power but also help other American industries.

EXPENDITURES OF ST. ELIZABETHS HOSPITAL

Mr. HAMMER. Mr. Speaker, under leave to extend remarks in the RECORD I include statements submitted to the Subcommittee of the District of Columbia in its investigation of St. Elizabeths Hospital and comments thereon.

COAL CONSUMPTION

In Document No. 1538 (Report of the District of Columbia Investigation Before the House District Committee, 1926), on pages 1273–1274, appears a report of expenditures for coal at St. Elizabeths Hospital covering a 10-year period.

This report shows the amount expended to have been more than $200,000 in some years. The expenditures for the year 1920 were $222,489.35; for 1923, $200,327.40. And a total average for 10 years shows an expenditure sufficient to purchase more than—

SEVEN TONS OF COAL PER ANNUM PER CAPITA POPULATION

These expenditures have decreased during the last two or three years to about $150,000 per annum, due to the lower price of coal. It is safe to say that not less than $100,000 per annum of this amount is sheer waste.

WHO IS RESPONSIBLE?

The hospital claims it has nothing to do with the purchase of this coal; that it is purchased through requisitions made on the Bureau of Mines. This bureau is under the Department of Commerce, of which Herbert Hoover is the head.

St. Elizabeths Hospital, where this unexplained waste occurs, is controlled by Doctor Work, Secretary of the Interior, who therefore makes the requisition for the coal, the contracts of which are placed by Herbert Hoover, Secretary of Commerce.

Doctor Work issues the requisitions and contends that this large amount of coal is necessary and is used by the hospital.

MR. HERBERT HOOVER PLACES THE CONTRACTS—WHO GETS THEM?

On June 27 I mailed three letters, copies of which I give below. At this date—afternoon, July 2—I have received replies from none of them.

JUNE 27, 1928.

Mr. J. R. MCCARL,
Comptroller General, Washington, D. C.

MY DEAR MR. MCCARL: I would be glad if you would send me a copy of your report of the unnecessary waste of coal and boilers purchased at St. Elizabeths Hospital, Washington, D. C.

The Gibson Committee requested that a supplementary report be made, but this supplementary report has not been received. I would be glad if you would advise me why this supplementary report has not been made. Mr. Homer A. A. Smith looked after this matter.

I shall appreciate a prompt reply.

Very truly yours, WM. C. HAMMER.

JUNE 27, 1928.

Dr. W. A. WHITE,
Superintendent St. Elizabeths Hospital, Washington, D. C.

MY DEAR MR. WHITE: Please advise me of persons with whom contracts for fuel and boilers have been made for the last few years and the amount of each contract.

Very truly yours, WM. C. HAMMER.

JUNE 27, 1928.

Mr. E. C. FINNEY,
Acting Secretary, Interior Department, Washington, D. C.

MY DEAR MR. FINNEY: I would be glad to have the names and addresses and the amount of each contract awarded for fuel and boilers of St. Elizabeths Hospital for the last six years, if this is not troubling you too much.

I shall appreciate a prompt reply.

Very truly yours, WM. C. HAMMER.

The Government has been paying from $150,000 to $200,000 annually for coal for this asylum, which is many times more than should be used in this institution.

These conditions have continued under Dr. William A. White, superintendent, who has been retained in office by Doctor Work, and the same waste appears in the purchase of

BOILERS IN THE POWER PLANT

The boiler capacity:

In 1916 was 3,300 horsepower to a population of 3,193.

In 1919 was 3,600 horsepower to a population of 3,586.

In 1926 the population was slightly over 4,000, and at that time Superintendent White called on Congress for an appropriation of $750,000, a part of which was needed for additional boilers. (See 1926 report of hospital, page 11, second paragraph.)

It is evident that the hospital considers it necessary to have a boiler capacity equal to one horsepower per capita population.

In 1925 the boiler capacity at St. Elizabeths was 3,600, which Superintendent White said was not enough. He wanted more boilers. In the same year the entire District of Columbia and suburbs, with over 500,000 population, were served from Benning Road station of the Potomac Power Company with a capacity of 26,000 horsepower, a ratio of 1 horsepower for 19 population,

WHILE ST. ELIZABETHS REQUIRES 1 HORSEPOWER FOR 1 POPULATION

St. Elizabeths, supplying only 3,600 people, has a boiler plant one-seventh as large as is required for the whole District of Columbia and suburbs with over 500,000 people, and they clamored for still more boilers in the official reports.

Mr. John A. Savage, director of the American Equity Association, who compiled facts for the hearings and presented them to the District Subcommittee, states that he has the proof that no longer ago than last month two good boilers were condemned, wrecked, and removed by the St. Elizabeths authorities "on orders from higher up" to make room for the installation of unneeded new boilers.

These extravagances in the coal consumption and boiler installation in the power plant of this institution coming under the administration of Doctor Work, Secretary of the Interior Department, falls to the lot of Doctor Work, a man well versed in asylum management since he started his career running his asylum at Pueblo, Colo., and is therefore well equipped to understand the correct management of asylum affairs. It is difficult to understand why there should be such waste and lack of economy in the fuel supply and boiler equipment at St. Elizabeths.

It is a notable fact that in denying the claims of the Miami Indians, of Indiana, on H. R. 12101, of Mr. EDGAR HOWARD, of Nebraska, the Interior Department pleaded that the Bureau of the Budget recommended following out the President's "program of economy."

REPEATED INVESTIGATIONS HAVE BEEN MADE BY CONGRESS

Exposures of conditions at St. Elizabeths Hospital made to the Gibson committee resulted in the House of Representatives instructing Comptroller General McCarl to investigate this institution.

Mr. McCarl investigated, spending thousands of dollars for experts, and reported to Congress, but never mentioned the coal, which had been particularly pointed out, and was one of the main reasons for having the investigation. The report returned on the boiler plant was inaccurate and misleading, as shown by official records. This was pointed out to the chairman, Mr. GIBSON, who confronted Homer A. A. Smith, McCarl's chief investigator, with the yearly reports of the hospital, which contradicted his statements.

Mr. Smith, on being called before the subcommittee and questioned on the neglect of the coal bills and the incorrect report on the boiler plant, promised to submit a supplemental report. This supplemental report has never been submitted, and Smith resigned from the comptroller's office shortly after the request was made for the supplemental report.

Mr. Savage further states to members of the committee that the subject of these expenses was taken up with the Assistant Secretary of the Interior, Mr. E. C. Finney, and an offer made to remedy the waste in coal consumption in the power plant. Mr. Finney refused to avail the department of this offer to be shown how these expenses can be cut down.

It is a notable fact that while Congress was laboring with its investigations of St. Elizabeths Hospital the Secretary of the Interior imported into the District of Columbia a group of alienists who were associates of his and of Superintendent White—they are members of the psychiatric organizations—to make their own investigation instead of a congressional investigation. When their report was finished Doctor Work sent it in to Congress, but Congress refused to accept it as correct, and it was not permitted to be printed as a public record.

Mr. Savage says that he had a definite appointment with Doctor Work's committee, at which he presented the information about the extravagant coal consumption and the boiler plant, but that Doctor Work's committee refused to accept or consider these facts.

Doctor Work mailed out under Government frank a number of these reports to Members of Congress, but later, after this franking privilege was challenged, the amount of postage due for this was returned to the United States Treasury. The expenses of Doctor Work's committee were refused to be allowed to be paid out of Government funds.

Mrs. Myrtle de Montis, secretary of the American Equity Association, calls attention to the fact that the two "mental hygiene" bills introduced to amend the laws of the District of Columbia, which were prepared in the office of Doctor Work and sent to Mr. ZIHLMAN for presentation to the House, would empower a Cabinet member to confine a citizen from a Government department, or anyone arrested by the police authorities in the District of Columbia, in St. Elizabeths Hospital on "certification," without any court trial whatever unless a trial was requested.

These matters seem to be of serious moment, and should be brought to the attention of the public and this extravagance discontinued.

ADDRESS AT THE ANNUAL BANQUET OF THE WOMAN'S INTERNATIONAL LEAGUE

Mr. FISH. Mr. Speaker, under leave to extend my remarks in the RECORD, I insert the following address, which I delivered at the annual banquet of the Woman's International League at the New Willard Hotel on Friday evening, May 4, 1928:

NICARAGUA

The partisan attacks and the sneers of the foreign press have combined to try to make the United States out as a great imperialistic nation seeking to exploit Central American countries. Nothing is further from the truth. Free and independent Cuba is the proof of the sincerity of our policy toward Latin America. We responded to the Macedonian cry of crushed and bleeding Cuba and sent our Army to drive out the cruel and autocratic power of Spain from the Western Hemisphere. We defeated the Spaniards; we restored order; we stamped out yellow fever; and we helped to establish a stable government. That is the true American policy. When we promised to free Cuba, the old, imperialistic governments of Europe laughed, as none believed such a thing possible, and sneered just as they now sneer when we state that our marines will be taken out of Nicaragua after the election in November.

We have no selfish aims of aggression; we do not want a square foot of Nicaragua; we do not seek to exploit their natural resources. There is nothing to exploit, and more particularly there is no sign of it.

Our marines first went to Nicaragua under President Taft, stayed there for eight years under President Wilson, and were withdrawn by Secretary of State Hughes of 1925. They were sent back in 1927 as the disorders became widespread owing to the war between the Conservatives and Liberals, which menaced the lives and property of foreigners. Great Britain even sent a cruiser to Nicaragua to look after the interests of her nationals. However, our State Department assumed the responsibility under the Monroe doctrine and assured the British Government we would extend our protection to their citizens.

Instead of exploiting the Nicaraguans our armed forces have saved the lives of both the Conservatives and Liberals who were fighting each other to the death. We saved the lives of hundreds of wounded; we fed and cared for them, whereas left in the jungles without medical help they were doomed to be devoured by the vultures.

Instead of exploiting a small weak nation we have brought about an armistice between two warring parties and saved that war-stricken country from death and desolation. Both factions together turned over to us about 14,000 rifles. We have consented at the request of both the Conservatives and the Liberals to supervise the elections in November and thereby help establish a sound and stable government based on the approval of the people. We have entered into a compact at the request of both sides to supervise the elections and to withdraw the marines before then would be a gross breach of good faith.

When the election law was proclaimed last week giving the American officials the legal right to supervise the elections, the Liberals, who are the opposition party, held celebrations throughout the country and in Managua, the capital of Nicaragua.

The guerrilla warfare being conducted by Sandino is the one discordant note. He may be a bandit or a patriot, but whatever he is practically all the leaders of both factions and people of the country want us to remain there until after the election is held.

I am in accord with the policy of the administration to protect American property and lives, to uphold the Monroe doctrine, and to help establish a sound and stable government in Nicaragua. I do believe, however, that our State Department makes a mistake in not requesting the cooperation of the Central American nations or of Argentina and Brazil in supervising the election. They may refuse, but it would show the world that we had no ulterior, selfish, or imperialistic aims.

The European nations, which for a century have been grabbing up all available land in Africa and Asia, and have recently seized Syria and Mesopotamia, continue to condemn us as a great imperialistic nation, whereas if Cuba, Mexico, or Nicaragua had been within their spheres of influence they would have been gobbled up long ago.

REPUBLICAN PARTY AND FARM RELIEF

Mr. FORT. Mr. Speaker, under leave granted by the House, I hereby extend my remarks by inserting therein a speech on the subject of farm relief delivered by me on June 14, 1928, before the Republican National Convention at Kansas City. The speech followed addresses by five or six supporters of the McNary-Haugen bill, who urged the adoption of a plank favoring farm legislation of that type, all of whom had, however, discussed the politics and not the economics of their proposal. This speech was in direct support of the majority plank in the platform which was overwhelmingly adopted upon roll call by the convention, and is a statement of the position both of the administration of President Coolidge and of the present attitude of the party upon this great question. The speech is as follows:

Mr. Chairman, ladies, and gentlemen, for four years, as has been said by Mr. Murphy, the American farmers, through their organized representatives, have appeared before the doors of Congress asking for legislation. For four years, twice by the act of the Congress, twice by the veto of the President, they have been denied the specific proposal for which they have continuously contended. That makes, as Mr. Murphy has said, a situation where this convention of the Republican Party should accord to the question the consideration that any great group of American citizens is entitled to at the hands of their fellow citizens.

The sincerity of these men who have appeared before you on this platform to-day in their advocacy of their proposal I do not question. I believe that many of them have reached the point of almost fanatical belief in their nostrum.

I resent, however, as the Representative of a purely industrial eastern district, the implication that there is any conflict between the opinion of the industrial East and the West on the fundamental question that every American citizen is entitled to equality before the law. [Applause.] Repeatedly in my own district, which contains not a farmer, have I urged the adoption of some constructive farm-relief program, even though its effect might be some increase in the cost of living, and to this day not one protest has reached my ears. The people of the East have no objection—indeed, will gladly favor any program of farm relief which, in their judgment, the situation demands and which they believe will be effective for its purposes.

Nor, friends in the East, can we afford nor should we deny the existence of an agricultural problem. It is not exactly such a problem, in my opinion, as it has been here defined upon the floor. But that certain of the staple crops of agriculture and those men producing them are to-day suffering from a large combination of economic causes can not be denied. Thus far we agree in full with the minority here to-day. We believe in their sincerity, we are sympathetic with their purpose, we concede the existence of a genuine problem.

But, my friends, you have just heard six speakers who have addressed you in behalf of the minority plank, and has one of those speakers fixed his argument upon the plan they propose? Or have they all confined themselves to discussing the politics and not the economics of the proposal?

I have yet to hear on the floor of Congress any man who was willing to appear and argue in detail and attempt to prove and demonstrate the economic soundness of the McNary-Haugen bill. [Applause.] Year after year they have changed its form. But still, to this great midwestern country, the title McNary-Haugen is the charter of agricultural equality. And yet there is not one man, in my opinion, on the farms of America who can explain what "McNary-Haugen" really is. [Applause.] And when I say that I say it because there has not been a man in Congress that could. [Laughter and applause.] And you have to-day heard the ablest exponents of McNary-Haugenism—the men who lead the farm movement in the United States—on this platform for an hour and a half, and not one of them has mentioned it except by name.

Now, friends, the Republican convention is not going to be stampeded on an economic question by political considerations. [Applause.] If we were considering only politics in the disposition of this question in Congress or in the convention, of course the Republican Party would accept that thing which a great organized minority demands. But the Republican Party has never in its political history made politics the chief criterion of its position. [Applause.]

What is the McNary-Haugen bill and its proposal? It starts upon the premise that the protective tariff guarantees to every American producer the amount of the world price plus the tariff. Well, I take it that if the General Motors Corporation chooses to make three times the number of automobiles that the American people choose to buy the General Motors Corporation will sell those cars for less than the European price plus the tariff. The same thing is true as to any commodity manufactured or grown. The tariff is fully effective on butter. The tariff is fully effective on wool. The tariff is fully effective on cream and milk from Canada. It is effective as to every commodity of agriculture that the American farmer grows if he does not grow a surplus beyond the domestic requirements of the American consumer. When he grows a surplus the tariff is not effective, nor is it effective for the manufacturer who likewise makes a surplus.

Starting from that premise they propose to make the tariff effective as to the crops of which we produce a surplus. That includes

cotton, where we have no tariff and where two-thirds of the crop is always exported. That includes wheat and corn—wheat, of which we always grow a surplus; corn, for which we have no export demand.

Now, to do this trick they want to set up a Government-controlled corporation or a Government-controlled agency, and they want the Government to contract with that agency. Under the terms of the contract they ask that the Government shall direct and finance that agency to purchase all of the commodity grown in the United States which the American consumer will not buy and force up the domestic price to the tariff level. Then they want to turn around and sell that over in Europe for whatever they can get for it, and they want to charge that loss, as they say, against the producer over here by means of an equalization fee or a charge against the commodity itself. In other words, they are trying to do the impossible thing of making profits out of taking losses in the world's markets. [Applause.]

The amount of the loss they have got to take has got to be paid by the fee, and the amount of that loss will be the difference between what they pay for it here and what they sell it for abroad.

They have persuaded the American farmer that the proposal means that he will pay the bill for his own operations. Waiving the question as to whether he pays it or the consumer, the fact remains that the plan of the equalization fee is either a tax upon consumption or a tax upon production, and, whichever it is, I have yet to be persuaded that either of those types of tax is economically wise or socially desirable. And no matter how the bill is to be paid, I have yet to be persuaded that the Government in peace times should enter directly into the purchase and sale or the fixing of the price of the products of the farm.

The real meat of the proposal, gentlemen, is, however, something different. I do not believe that initially the proponents of this matter realized the path upon which their logical reasoning must carry them eventually. But, to-day, they have reached it, and two of their speakers here have proclaimed it.

There is a form of organization of American agriculture, voluntary in its nature, which to-day has been highly successful in many groups and in many sections, known as cooperative marketing associations, organizations of farmers to meet what is perhaps the real crux of their situation, namely, that to-day they are 6,000,000 individuals competing in an organized world with highly organized buyers. Those cooperatives have been successful, except that they say, "We can not wholly solve this matter because we can not make all the farmers come in; and, if we can not make them all come in, then the ones in are doing a service for the ones who stay out, and the ones who are in are paying the bill." And, therefore, they want this plan to induce and enforce cooperation.

Now, my friends, enforced cooperation, whether it be of capital, of labor, or of agriculture, is not in consonance with the genius of American institutions. [Applause.] When we reach the stage in this country where we are going to say to any man what he must do with the profits of his industry or of his labor we have departed from those traditions of the Republic under which it has grown to its present grandeur.

Against it, what does the majority plank offer to the American farmer; what has the administration for four years offered to the American farmer, only to have from his lips, through his representatives, as you have heard here to-day, not economic argument, but the political demand for the McNary-Haugen bill or nothing? [Applause.] We have offered proposal after proposal of constructive relief. We renew that offer in the platform here to-day. We offer the assistance—not the power—of the Government to produce organization. We offer every aid in the whole structure of our Nation to induce the farmers to join together, to induce them to unify their efforts in the disposition of their commodity, to induce them to join the cooperative associations voluntarily—not to have the dues of the association checked off at the door of the Treasury.

We offer them a Federal farm board devoted to the interests of agriculture. We offer them any reasonable financial assistance out of the Treasury of the United States in the early days of their organization—before they have tried and tested it—before they have reached that point of capital ability on their own account which will enable them to finance it themselves—we have offered them any reasonable assistance from the Treasury for the purpose of furnishing the finances—to do what? To stabilize the prices of their commodities. To limit the speculation in commodities. To furnish the mediums of distribution and marketing of their commodities. To enable them, on their own hook and under their own management, to operate and control their own business.

My friends, the proposals differ in detail, it is true, but more—they differ in that one great fundamental principle. The proposal of the minority report eventually can mean only that the Government of the United States shall place its hand upon agriculture and hereafter run agriculture. The consumers to-day constitute 70 per cent of the people and the producers are but 30 per cent. And yet the McNary-Haugen bill to meet an emergency would hand over the absolute control of agriculture to a government which in the long run must be dominated by the 70 per cent who are consumers.

The majority report says, "We will help the farmer of the United States to build up his own control, his own management, his own organization in order that he may from now henceforth be as he has been from time immemorial, the great independent backbone of America, the American farmer whom no man controls." [Applause.]

MEMORIAL DAY ADDRESS

Mr. YATES. Mr. Speaker, the first session of the Seventieth Congress has ended, and under the leave granted to Members of Congress to print in the RECORD their statements on any subject I request insertion of certain remarks which I made at the Memorial Day exercises at the Battle Ground National Cemetery, Brightwood, D. C. In other words, the cemetery in which was buried the remains of American soldiers who fell in the fighting around Fort Stevens, in the District of Columbia, during the Civil War.

The matter referred to is as follows:

Ladies and gentlemen, I feel deeply the honor which has been tendered to me on appearing here to-day on the same platform with John M. Kline, Department of the Potomac, Grand Army of the Republic, chairman, and John Clagett Proctor, vice chairman, and Maj. John Eavy, and Rev. Daniel L. Snyder, who furnished the invocation, and Mr. Arthur Bradley White, who recited the Star-Spangled Banner, and Mr. Theodore Hardy, who recited Lincoln's Gettysburg Address, and Mr. L. F. Randolph, who presented the tenor solo, Battle Hymn of the Republic, and Rev. William L. Mayo, who pronounced the benediction, and also Mrs. Mullenberg, who sang the Recessional, and the Thirteenth Engineer Band, George A. Horton, band leader, and the Battle Ground Quartette, and the guests of honor: Maj. Gen. Lansing H. Beach, Col. William B. Ladue, Hon. Eugene Black, Hon. John C. Box, Maj. Gen. John L. Clem, Hon. Ben. G. Davis, Maj. Gen. Robert C. Davis, Hon. Proctor L. Dougherty, Hon. Lynn J. Frazier, Col. U. S. Grant, 3d, Prof. R. L. Haycock, Hon. Ira G. Hersey, Maj. Gen. I. W. Ireland, Hon. Blair Lee, Maj. E. Brooke Lee, Col. E. M. Markham, Mr. Theodore W. Noyes, Mr. Harley V. Speelman, Hon. Sidney F. Taliaferro, Hon. Frederick N. Zihlman.

I have come here to-day to say a few words upon this sweetly solemn occasion and in this imposing presence. It is my duty to endeavor, to the best of my feeble ability, to give suitable expression to the sentiments which have brought you here and to the teachings of the hour. I feel sure that you have come here to-day prepared to sneer at no words of eulogy and ready to decry no utterance of commendation bestowed upon heroic deed and heroic dead.

NOT ONE WAR ONLY

There are millions with us standing in salute to-day to the armies of the dead, while they, with their deeds and scenes of sacrifice, are passing in review. The graves over which the Nation so tenderly bends to-day are not the work of one war only. I am persuaded, fellow citizens, the chief glory of the world and its civilization to-day is the freedom enjoyed by Americans. Many of us believe that this citizenship was divinely ordained. It has always been and is destined always to be full of all civil and religious liberty. It is a citizenship cherishing justice, embellishing freedom, and adorning manhood. All along our wending way it has been deemed worth fighting for and worth dying for. Every war fought by America, every degree of progress it ever attained, every onward step it ever took to establish that citizenship is to be honored and remembered by the citizens of to-day. And I am sure that on this occasion we would accord full measure of praise and attention to every sacrifice, whether of time or treasure, of limb or life, made in this stupendous campaign for pure and potent manhood.

THE CIVIL WAR

But, fellow citizens, the Revolution brought no Decoration Day, the War of 1812 established no permanent memorial custom, and the struggle with Mexico and Spain seems to have rendered no such occasion a necessity. It was reserved for another controversy to develop so much havoc of life, to tear such gaps in the ranks of manhood, to harrow so many homes with heartbreak, and to create so much of courage and of patriotism and of zeal as to contribute the main interest to this day and occasion. For this hour the thoughtful elders of this Nation live again in the tumultuous times of 1861.

RUSHING EVENTS

Visions of fast-rushing events rise to-day in the mind of the middle-aged man. He remembers the preliminary excitement. The country convulsed from day to day by ominous occurrences. Each State trembling beneath the mighty blows struck by renowned champions of public opinion. Every community stirred to its foundations in the mighty crisis.

At last the crash comes, and the fire is opened upon and against that devoted place, Fort Sumter. The patience of the Union's friends can endure no more. The forbearance of even the Chief Magistrate is exhausted. Sorrowfully he turns from the despairing presence of the angel of peace and reluctantly beckons to the majestic spirit of war. The peaceful people respond as though called to participate in a summer

spectacle. Every county tenders its company; every city its regiment; every State its batteries. "With malice toward none and charity for all" call after call comes from the Capital for troops. The call is not in vain. Massachusetts sends her noblest; New York puts forth her product; Ohio furnishes her bravest; California dispatches her boldest; Illinois forwards her best—hundreds whose names we know; thousands more whose names are to us unknown; the whole grand heroic host.

LIKE A BENEDICTION

The fragrance of their memory hovers over us to-day like a benediction from the past.

"Rest on, embalmed and sainted dead,
Dear as the blood ye gave,
No impious footstep here shall tread,
The herbage of your grave.
Nor shall your glory be forgot,
While Fame her record keeps,
Or Honor points the hallowed spot,
Where Valor proudly sleeps.

On Fame's eternal camping ground
Their silent tents are spread,
And Glory guards with solemn round,
The bivouac of the dead."

After the passing of 63 years probably twenty hundred thousand of the soldiers of the Union are to-day in their graves. We would remember and honor them all; garlands for the humblest as well as for the proudest; blossoms for the nameless as well as for the famous; the latter will not fail of praise, the former we must not forget.

ABRAHAM LINCOLN

The new President, leaving his Illinois home for the National Capital, is so surrounded by menacing difficulties that he owns his strong mind, courageous heart, and mighty soul to be unequal to the unprecedented task. To his neighbors assembled to bid him farewell he says: "There has fallen upon me a task such as did not rest even upon the Father of his Country, and so feeling I can not but turn and look for that support, without which it will be impossible to perform that great task. I turn, then, and look to the great American people and to that God who has never forsaken them."

Grand and sublime figure, how he towers aloft in his pure nobility; how he guided this struggling and suffering country with patient, merciful hand; how he stood like a shield and a bulwark strong and firm between the Union and all the perils that assailed it. Fling open the baskets! Pour forth the flowers! Cause his tomb to blush and to quiver and to glow with all the beauty and the loveliness and grace that nature can bestow, and still the spirit of the grand, majectic Lincoln will break from beneath the fragrance, and, rising Godlike over us, reflect the light of a matchless integrity and prudence over all that is or will be fair and good in Americanism.

THE GRANDEST VICTORY

Ladies and gentlemen, you and I know that Abraham Lincoln received the help that he prayed for—received it from 20,000,000 loyal hearts and from the Infinite Power on high. Abraham Lincoln put one hand into the outstretched palm of the American people. With the other he laid a strong hold on the almighty arm of the Almighty God. And standing there, supported by humanity and supported by Divinity, he fought the grandest fight and won the grandest victory the human race has ever seen.

MAN'S HAND CAN HELP

In the mighty days of 1861 to 1865 referred to by your chairman in introducing me, it is true that my father was Governor of Illinois—war governor. I, myself, have some precious memories of that time, although I was very small, and indeed little more than a baby boy. But a boy 4 years old, who hears nothing but one thing, and that the flag, the flag, the flag, morning, noon, and night, "the flag and the Union," at breakfast, dinner, and supper for four long years will remember; and every mother of a child here knows it is possible.

The most precious recollection that I have of my father is of how he used to get up and walk the floor at night, forward and back, forward and back, hour after hour, hour after hour, all night long; with wringing hands and streaming eyes and breaking heart, agonizing for some one far away; before he died, and he died when I was 12 years old, I asked him if that midnight march really occurred; in other words, whether it was a creation of my own brain. His reply was that it was by no means imagination, that those were "the telegram nights" when telegrams would come in, reading "Great battle to-day, 10,000 killed, wounded, and missing, over half the regiments from Illinois engaged"; that he could not sleep because those suffering ones were his boys, appealed to by him to enlist.

WHY HE WALKED

He said, "All over Illinois I begged them to go into the Army, appealing to them for the honor and glory of Illinois and the Stars and Stripes; and they went; and I can see their white faces yet as I appealed to them and they listened, standing about the platforms in the light cast by the glare of flaring torches; their white faces I can see them yet; and so when the telegram nights came I could not sleep; that is why I walked the floor many and many a night.

He told me of how he went to his first battle field; he gave his note for a hundred thousand dollars, and with the money thus borrowed from patriotic bankers (patriotic then as patriotic now) he took a steamboat all filled with nurses and surgeons, with cots and with bandages, with surgical supplies and delicacies for the sick to that battle field; upon his arrival, my father, desiring to be the first man to land, started down the gangplank the moment it struck the river bank, but two soldiers started up and they said, "Here, take this boy," and they threw into my father's outstretched arms a wounded soldier boy, chest all lacerated by a fragment of a shell, right arm hanging only by the shreds of the skin, and my father received the precious burden and turned and staggered up the gangplank with it, and just as he reached the deck of the steamboat proper the boy opened his eyes.

And my father said that there was in that boy's look both agony and ecstacy; the agony of the approaching dissolution, the ecstacy of knowing he was giving his young life that liberty might live; and he struggled and said, "Oh, who are you?" "Oh, my boy, I am the Governor of Illinois," and that boy said two things—one was, "My governor," and the other, "Tell mother"; and then he died right there in those arms, in which many others died later.

O sacrifice, sacrifice, the memory of which is like a blessed benediction as long as liberty lives! Who shall say how much that governor's soul was strengthened by that contact? Who shall say how much comfort came to that boy's soul from it?

What was it all for? It was to establish—yea, to establish and to maintain. Some things just don't merely happen. Washington crossed the Delaware just in time. Lafayette came over just in time. France aided us just in time. Just so the *Oregon* came around the end of the world to Santiago just in time, and our boys arrived in France just in time. God does move in the affairs of men.

OUR DUTY

The bare fact remains—and we must face it—that you and I are not to have this experience. We must devote ourselves to other things, to things not dramatic, not sensational, not connected with the glamor and the pageantry of battle. It is for us to make sacred the service of the country by showing deference to all its symbols and to those who go forth to make the bodily sacrifice constantly faced by the soldier boy. We must send him away in all wars with a smile. We must convince him in all wars that all the way from his station on the firing line, all the way back to his home, there is a direct and unsevered chain of sympathy and support.

We must give, of course, out of our resources, even as we have given to the first Liberty loan, the second and the third and fourth and fifth, even as we have given to the American Red Cross its first war fund and its other war funds, even as we have given to the Y. M. C. A. or the Knights of Columbus, even as we have given to the war recreation fund and every other holy cause.

But there are other ways than mere giving of money. The 10,000,000 American women who were 10 years ago doing war service at this hour are giving a gracious gift, more precious than silver or gold.

The mothers, wives, and sweethearts who in such days crush their loved ones in their embraces and say nothing—who can measure the help coming from their hearts? Fathers and brothers and comrades of the 5,000,000 who did go, how their cool and quiet backing will bridge the ocean and the land. We must not forget, either, the effect upon our allies and the world as we prove to all mankind day by day that we are really a Nation, one and indivisible, melted and welded together, and fighting as one man.

THINGS NOT TO DO

There are some things which we should not do, of course. Of course, we must not teach hate.

NO APOLOGY FOR TRAITORS

It is possible that for saying these few words I may be criticized by some insane men. No sane man will criticize me. I am making no apology for any spy or traitor. I am making no apology for any man who is only partly loyal. We are all together if at war and not partly. We must be altogether loyal and not partly. There is no such thing as a 50-50 patriot, or a 75 per cent patriot, or a 95 per cent patriot; there is no room in this country for any man who is anything less than a 100 per cent patriot. No word I have uttered can justify any man of foreign birth or descent in fighting, resisting, betraying, or belittling Uncle Sam.

If any man in this country wishes anybody in this world or any country in this world to win over and against our Uncle Sam, then I am in favor, just as soon as we get ships enough (and we will ultimately get ships enough) I am in favor of gently but firmly taking that gentleman and giving him a leave of absence from America forever and shipping him and all his treason over to the country he prefers to America, there to remain forever under his beloved tyranny, with frightfulness sufficient to satisfy the all-highest expert in frightfulness.

CLOSING WORDS

I close with regret. This is not the first occasion upon which I have had the honor and the pleasure of addressing the great, powerful, progressive, patriotic people of this part of our great, powerful, progressive, and patriotic Commonwealth. From every former occasion I have carried away with me recollections so pleasant of the courtesy, the cordiality, the hospitality which you of this community and vicinity extend to men coming among you, like myself, from afar, that I assure you it will require the intervening of a great many years to make all this hospitality a mere memory; and to-day, here again, I am the recipient with my dear wife of that same hospitality. It makes me glad I came and sorry to go.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, bills and joint resolutions of the following titles:

H. J. Res. 238. Joint resolution providing for the granting of veterans' preference in civil-service examinations;

H. J. Res. 243. Joint resolution to provide for the striking of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century;

H. J. Res. 307. Joint resolution to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River;

H. R. 325. An act repealing existing law requiring the Postmaster General to report action taken on claims of postmasters;

H. R. 802. An act to correct the military record of Curtis P. Wise;

H. R. 3221. An act for the relief of Ross F. Collins;

H. R. 3241. An act for the relief of Seymour Buckley;

H. R. 3539. An act for the relief of Frank Murray;

H. R. 4380. An act for the relief of Martha Andrew Virginia Johnson;

H. R. 6669. An act fixing the salary of the Public Printer and the Deputy Public Printer;

H. R. 6685. An act to regulate the employment of minors within the District of Columbia;

H. R. 7354. An act to allow the Postmaster General to promote mechanics' helpers to the first grade of special mechanics;

H. R. 7492. An act for the relief of Capt. Louis C. Brinton;

H. R. 8628. An act for the relief of Amos Dahuff;

H. R. 9051. An act to amend section 1 of the act of February 22, 1875, entitled "An act regulating fees and costs, and for other purposes";

H. R. 10073. An act to change the name of Railroad Avenue between Nichols Avenue and Massachusetts Avenue;

H. R. 10166. An act to amend the Foreign Service buildings act, 1926;

H. R. 10244. An act to credit the accounts of Richings J. Shand, United States property and disbursing officer, Illinois National Guard;

H. R. 10435. An act providing for the extension of the time limitations under which patents were issued in the case of persons who served in the military or naval forces of the United States during the World War;

H. R. 11463. An act to fix the salaries of certain judges of the Territories and insular possessions of the United States;

H. R. 11758. An act authorizing the Secretary of War to grant a right of way for a levee through the Chalmette National Cemetery;

H. R. 11951. An act to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by the acts of March 6, 1920, and February 27, 1926;

H. R. 11981. An act to authorize officers of the Medical Corps to account certain service in computing their rights for retirement, and for other purposes;

H. R. 12064. An act to discontinue certain reports now required by law to be made annually by Congress;

H. R. 12280. An act for the relief of Lula Lewis;

H. R. 12311. An act to provide for the payment of compensation to William J. Tilson;

H. R. 12352. An act to require certain contracts entered into by the Secretary of War, or by officers authorized by him to make them, to be in writing, and for other purposes;

H. R. 12605. An act to enable the Postmaster General to purchase and erect community mail boxes on rural routes and to rent compartments of such boxes to patrons of rural delivery;

H. R. 12938. An act for the relief of the State of Ohio;

H. R. 12952. An act to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by act of March 6, 1920;

H. R. 13039. An act to amend the World War veterans' act, 1924;

H. R. 13048. An act for the relief of James Aloysius Manley;

H. R. 13108. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a toll bridge across the White River at or near Newport;

H. R. 13182. An act authorizing the Secretary of the Navy, in his discretion, to deliver to the custody of the State of Alabama the silver service presented to the United States for the battleship *Alabama;*

H. R. 13248. An act to authorize an increase in the limit of cost of one fleet submarine;

H. R. 13318. An act authorizing the Val Verde County Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near Langtry, Tex.;

H. R. 13399. An act authorizing the Baltimore Gas Engineering Corporation, a Maryland corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near Dunbar, W. Va.;

H. R. 13447. An act authorizing and directing the Secretary of Agriculture to establish and maintain a dairy and livestock experiment and demonstration station for the South at or near Lewisburg, Tenn.;

H. R. 13512. An act to amend the act entitled "An act to create the Inland Waterways Corporation, for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act, and for other purposes," approved June 3, 1924;

H. R. 13621. An act to authorize preparation and publication of supplements to the Code of Laws of the United States with perfecting amendments, printing of bills to codify the laws relating to the District of Columbia and of such code and of supplements thereto, and for distribution;

H. R. 13622. An act to amend and supplement the Code of Laws of the United States of America;

H. R. 13644. An act authorizing the Secretary of Commerce to sell at private sale a portion of the Pointe Aux Herbes Lighthouse Reservation, La.;

H. R. 13651. An act granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Choctawhatchee River in Dale County on the highway now under construction from Dothan to Enterprise;

H. R. 13777. An act authorizing the State of Louisiana and the State of Texas to construct, maintain, and operate a free highway bridge across the Sabine River at or near Burr Ferry, La.;

H. R. 13930. An act to authorize an appropriation for the American group of the Interparliamentary Union; and

H. R. 13996. An act granting the consent of Congress to the board of supervisors of Leake County, Miss., to construct, maintain, and operate a free highway bridge across the Pearl River at or near Edinburg, Leake County, Miss.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that to-day, May 29, 1928, the President approved and signed the following acts and joint resolutions:

H. R. 13143. An act to adjust the compensation of certain employees in the Customs Service.

APPROVED BY THE PRESIDENT AT THE CAPITOL

H. J. Res. 243. Joint resolution to provide for the striking of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century;

H. J. Res. 307. Joint resolution to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River;

H. R. 325. An act repealing existing law requiring the Postmaster General to report action taken on claims of postmasters;

H. R. 802. An act to correct the military record of Curtis P. Wise;

H. R. 3221. An act for the relief of Ross F. Collins;

H. R. 3241. An act for the relief of Seymour Buckley;

H. R. 3539. An act for the relief of Frank Murray;

H. R. 13996. An act granting the consent of Congress to the board of supervisors of Leake County, Miss., to construct, maintain, and operate a free highway bridge across the Pearl River at or near Edinburg, Leake County, Miss.

REPORT OF COMMITTEE TO WAIT UPON THE PRESIDENT

Mr. TILSON. Mr. Speaker, your committee, appointed to join with a like committee on the part of the Senate to wait upon the President of the United States and inform him that Congress is about to adjourn and inquire if he has any further communication to make to the Congress, has performed that duty and reports that the President has no further communication to make at this time, except to congratulate Congress upon the work accomplished at this session. [Applause.]

I ask unanimous consent to proceed for four minutes.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut to proceed for four minutes?

There was no objection.

The SPEAKER. The gentleman from Connecticut is recognized for four minutes.

WORK OF THE FIRST SESSION

Mr. TILSON. Mr. Speaker, we have about reached the end of our work for the present session. We are soon to go out from this Chamber and return to the several constituencies we here represent. We have tried each to do his duty as he saw it day by day. It is well if we have so acted as to receive the approval of at least a majority of the people who sent us. All fair-minded people will agree, however, that it is of far greater importance that we shall have acted in accordance with our own best judgment and deal honestly with ourselves. We may easily make a mistake as to what our constituents would have us do in a particular case, but there can be no unworthy mistake if in each instance we followed the best light afforded us and acted accordingly. [Applause.]

The first session of the Seventieth Congress will long be remembered as a memorable one for what has been accomplished, but it can never be forgotten, the circumstances and conditions under which this session of Congress has done its work. I have sometimes thought that our worthy forefathers might have worked out some way by which the session of Congress immediately preceding the presidential election might be omitted. Such a provision might have saved the country from some unfortunate legislation in the past. When the wisdom of some of the acts of the present session shall be tested by time and experience it may turn out to be true that even we have not been infallible. Perhaps never in our history has there been a fiercer preconvention struggle in both the major political parties than that which the country has been witnessing during the months of this session of Congress, and we have not been able to escape entirely the effects of it. In spite of all this, however, Congress has considered, and with notable success in most instances, an unusual number of questions of very great importance. Problems of far-reaching consequences have been grappled with and either solved or put on their way toward solution. Had it not been for the disturbing effects of the political struggle to which I have referred, I feel quite confident that other helpful legislation might have been enacted.

Another—and one of the most important duties of Congress—should also be mentioned in this connection, and that is the refusal to pass legislation that unnecessarily depletes the Treasury, for which there is always a demand, but in the year of a presidential election even greater pressure for its enactment. After the political struggle is over and people have had time to settle down again to a normal state will be a better time to consider calmly and with more judicial mind some of the propositions we now leave pending in Congress.

At another place in the RECORD I refer somewhat more at length to the work of the present session. I now wish to take advantage of the present opportunity, ere we part for the summer, to thank the Members of the House individually and collectively for the uniform courtesy and generous kindness

extended to me in my work as floor leader. It is not an easy task, as you all know. It would be well nigh impossible if I did not have a friendly spirit of cooperation from both sides of this Chamber. My Republican colleagues have shown a most gratifying willingness to bear each his share of the burden, which is far too heavy for any one person to carry alone, while my Democratic friends, except where party loyalty or expediency seemed to indicate otherwise, have most helpfully cooperated in carrying on the work of the House. You have all been very good to me and I shall never be able to thank you enough for it. I wish you all health, happiness, and the best of everything until we meet again. [Applause.]

ADDRESS OF THE SPEAKER

The SPEAKER. Before exercising the duty imposed upon me by the adjournment resolution, I desire to thank all of you and each one of you for the cordial and cheerful support you have invariably given me at this session of Congress in the exercise of my important and sometimes arduous duties.

We are about to separate for several months, and I wish for you all every sort of health, happiness, and prosperity until we meet again. Aloha! [Applause.]

And now I declare the first session of the Seventieth Congress adjourned without day.

ADJOURNMENT SINE DIE

Accordingly, at 5.30 o'clock p. m. the House adjourned sine die.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. BURDICK: Committee on Naval Affairs. H. R. 13542. A bill to authorize the payment of the sum of $2,500 to the dependents of the officers and men who lost their lives on the submarine *S-4;* without amendment (Rept. No. 1920). Referred to the Committee of the Whole House.

Mr. HILL of Washington: Committee on the Public Lands. H. R. 12339. A bill authorizing the Secretary of the Interior to grant a patent to certain lands to Joseph M. Hancock; without amendment (Rept. No. 1921). Referred to the Committee of the Whole House.

Mr. MACGREGOR: Committee on Accounts. H. Res. 142. A resolution to pay Fred R. Miller for extra and expert services to the Committee on Pensions (Rept. No. 1924). Ordered printed.

Mr. MACGREGOR: Committee on Accounts. H. Res. 151. A resolution to pay to Walter C. Neilson $1,000 for extra and expert services to the Committee on Pensions by detail from the Bureau of Pensions (Rept. No. 1925). Ordered printed.

Mr. MACGREGOR: Committee on Accounts. H. Res. 129. A resolution that the sum of $200 be paid to Margaret Elma Naylor for extra and expert services to the Committee on Invalid Pensions (Rept. No. 1926). Ordered printed.

Mr. GLYNN: Committee on Military Affairs. H. R. 11844. A bill for the relief of Joseph Marko; with amendment (Rept. No. 1927). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. COCHRAN of Missouri: A bill (H. R. 14117) to provide that certain officers and employees of the United States shall file bonds for the purpose of satisfying judgments obtained by persons injured by the unlawful or careless use of firearms by such officers or employees, and for other purposes; to the Committee on the Judiciary.

By Mr. CRAIL: A bill (H. R. 14118) giving additional clerk hire to Members representing districts having a population of 500,000 or more persons; to the Committee on Accounts.

Also, a bill (H. R. 14119) giving additional copies of the CONGRESSIONAL RECORD to Members representing districts having a population of 500,000 or more persons; to the Committee on Printing.

By Mr. FISH: A bill (H. R. 14120) to authorize the construction of a memorial statue in the District of Columbia, and for other purposes; to the Committee on the Library.

By Mr. JOHNSON of Washington: A bill (H. R. 14121) to provide for establishment of a Coast Guard station at or near the mouth of the Quillayute River, in the State of Washington; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 14122) to provide for the establishment of a Government hospital for the insane on McNeil Island, in the State of Washington; to the Committee on Public Buildings and Grounds.

By Mr. McMILLAN: A bill (H. R. 14123) to provide a preferential rate with respect to certain mail matter for delivery to members of the military and naval forces; to the Committee on the Post Office and Post Roads.

By Mr. CRAIL: A bill (H. R. 14124) to establish an aviation flag of the United States of America; to the Committee on the Judiciary.

By Mr. COLLINS: A bill (H. R. 14125) authorizing and directing the Secretary of Agriculture to establish and maintain a dairy and livestock experiment and demonstration station for the Gulf States at or near Forest, Miss.; to the Committee on Agriculture.

By Mr. SIMMONS: A bill (H. R. 14126) to prohibit the burial of persons guilty of felony and other heinous crimes in national cemeteries and to prohibit the use of public funds in connection therewith; to the Committee on Military Affairs.

By Mr. TEMPLE: A bill (H. R. 14127) to provide for the purchase of the Harriman Geographic Code system; to the Committee on Appropriations.

By Mr. WHITE of Maine: A bill (H. R. 14128) to amend section 4581 of the Revised Statutes of the United States to provide more adequately for the discharge, maintenance, and repatriation of seamen in foreign ports; to the Committee on the Merchant Marine and Fisheries.

Also, a bill (H. R. 14129) to amend section 4580 of the Revised Statutes of the United States respecting the liability of vessels for the care of seamen guilty of certain offenses; to the Committee on the Merchant Marine and Fisheries.

Also, a bill (H. R. 14130) to define more clearly the authority of consular officers of the United States in certain respects; to the Committee on the Merchant Marine and Fisheries.

By Mr. TIMBERLAKE: A bill (H. R. 14131) to amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, as amended; to the Committee on Mines and Mining.

By Mr. SUMMERS of Washington: A bill (H. R. 14132) authorizing the construction of a memorial, and for other purposes; to the Committee on the Library.

By Mr. SMITH: A bill (H. R. 14133) concerning leave of absence and sick leave of civil employees of the United States Government and the government of the District of Columbia; to the Committee on the Civil Service.

By Mr. WARE: A bill (H. R. 14134) to amend the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906 (U. S. C., title 33, ch. 11); to the Committee on Interstate and Foreign Commerce.

By Mr. HADLEY: Joint resolution (H. J. Res. 322) to permit the Cascade Tunnel Association to enter upon lands belonging to the United States for the purpose of surveying and locating a site for the construction of a tunnel under the Cascade Range in the State of Washington, and to provide for the withdrawal of such lands as may be necessary for the construction and operation of such tunnel; to the Committee on the Public Lands.

By Mr. RATHBONE: Joint resolution (H. J. Res. 323) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. BELL: Joint resolution (H. J. Res. 324) authorizing an appropriation to be administered by the United States Forest Service for experimental purposes; to the Committee on Appropriations.

By Mr. BROWNE: Joint resolution (H. J. Res. 325) proposing an amendment to the Constitution of the United States, abolishing the Electoral College; to the Committee on the Judiciary.

By Mr. MEAD: A joint resolution (H. J. Res. 326) for the appointment of a joint committee of the Senate and the House of Representatives to inquire into the general subject of unemployment in the United States, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BUCHANAN: A bill (H. R. 14135) for the relief of the Farmers State Bank, Georgetown, Tex.; to the Committee on Claims.

By Mr. EVANS of California: A bill (H. R. 14136) granting a pension to Martin J. Weber; to the Committee on Pensions.

By Mr. FULMER: A bill (H. R. 14137) for the relief of Patrick P. Riley; to the Committee on Military Affairs.

By Mr. HAWLEY: A bill (H. R. 14138) granting an increase of pension to Jane Hooker; to the Committee on Invalid Pensions.

By Mr. LEHLBACH: A bill (H. R. 14139) for the relief of William H. Chambliss; to the Committee on Claims.

By Mr. McFADDEN: A bill (H. R. 14140) granting an increase of pension to Alice Wilson; to the Committee on Invalid Pensions.

By Mr. RATHBONE: A bill (H. R. 14141) granting a pension to August W. Nohe; to the Committee on Invalid Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 14142) granting a pension to Fred Koeckritz; to the Committee on Pensions.

By Mr. TINKHAM: A bill (H. R. 14143) granting a pension to Charles Henry Heller; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7816. By Mr. BACON: Petition of sundry citizens of the United States, urging support of House Joint Resolution 27, providing for the celebration of the one hundred and fiftieth anniversary of the death of Gen. Casimir Pulaski and for the establishment of a Pulaski sesquicentennial commission; to the Committee on the Library.

7817. By Mr. CRAIL: Petition of Grand Army of the Republic, Department of California and Nevada, protesting against the desecration of the Lee Mansion grounds and flag in Arlington, Va.; to the Committee on the Library.

7818. By Mr. GRIEST: Petition of Mrs. J. H. Buch and other residents of Elizabethtown, Lancaster County, Pa., urging enactment of the so-called Jones-Stalker bill (H. R. 9588) providing maximum penalties for violations of the prohibition enforcement act; to the Committee on the Judiciary.

7819. Also, petition of residents of East Petersburg, Quarryville, Terre Hill, and other localities in Lancaster County, Pa., urging enactment of the so-called Jones-Stalker bill (H. R. 9588) providing maximum penalties for violations of the national prohibition law; to the Committee on the Judiciary.

7820. By Mr. KVALE: Petition of F. Scott McBride, general superintendent, and Edward B. Dunford, attorney, for the Anti-Saloon League of America; Edwin C. Dinwiddie, legislative representative of the International Order of Good Templars, Flying Squadron Foundation, Committee on Promotion of Temperance Legislation in Congress, and Association in Support of National Prohibition; Ella A. Boole, president for National Woman's Christian Temperance Union; James Cannon, jr., chairman of Board of Temperance and Social Service of the Methodist Episcopal Church, South; and William Sheafe Chase, general superintendent for International Reform Legislation, urging a vote and favorable action at this session of Congress upon the House bill 9588, the Stalker bill, so called; to the Committee on the Judiciary.

7821. Also, petition of Woman's Christian Temperance Union of the seventh congressional district, Montevideo, Minn., urging passage of the Stalker bill; to the Committee on the Judiciary.

7822. Also, petition of Alexandria Post, No. 87, American Legion, Alexandria, Minn., urging passage of the universal draft bill; to the Committee on Military Affairs.

7823. By Mr. MOORE of Virginia: Petition of B. F. A. Myers, H. F. Myers, and others, requesting the passage of the Sproul bill (H. R. 11410) to amend the national prohibition act; to the Committee on the Judiciary.

7824. By Mr. PARKER: Petition of citizens of the State of New York, favoring the Sproul bill (H. R. 11410) to amend the national prohibition act; to the Committee on the Judiciary.
